

M.Sc. AQUACULTURE

Department of Fishery Science and Aquaculture BRANCH - VIII

2025-2026

SRI VENKATESWARA UNIVERSITY: TIRUPATI
SVU COLLEGE OF SCIENCES
MASTER OF SCIENCES
DEPARTMENT OF FISHERY SCIENCE & AQUACULTURE
Re – Structured P.G Programme (CHOICE BASED CREDIT SYSTEM (C.B.C.S), as per NEP – 2020, National
Higher Education Qualification Frame Work (NHEQF) And Guidelines Of APSCHE
(WITH EFFECT FROM THE BATCH ADMITTED IN THE ACADEMIC YEAR 2025-2026)
M.Sc., AQUACULTURE
OBJECTIVES

1. **Provide knowledge for sustainable Aquaculture**
2. **Provide the students on field exposure to help them in understanding Aquaculture practices.**
3. **Provide the learners an experience in research for Aquaculture production**
4. **Effective utilization of aquatic and land resources, enhancing skills of rural youth, commercial fish farming and increasing their entrepreneurship opportunities**
5. **Providing means of livelihood through commercial and industrial aquaculture.**

Program Outcomes

S.No	Program Outcomes
PO1	Apply knowledge in Aquatic Ecology and ecosystem to understand the physical and chemical characteristics of water constituents their physico chemical and functional properties. To assess organic matter and recognize various biogeochemical cycles. Determine the dynamics of aquatic ecosystem and productivity.
PO2	Identify and understand different types of fishes and fin fish anatomy related to classification of commercially important crustaceans and mollusks up to sub class level and their salient features and distribution. Apply knowledge on shell fish anatomy and examine identification and morphology of cultivable organisms.
PO3	Design supplementary feeds applying the principles of food and feeding habits and nutrition to meet the challenges of nutritional problems. Describe fertilization and liming in aquaculture ponds, dynamics of dissolved oxygen, aeration and miscellaneous treatments to increase the production. Determination and estimation of total proteins, carbohydrates and lipids in aquatic feeds.
PO4	Know nature of ethics, values, ahimsa, crime and theories of punishment and explain Bhagavad-Gita as student, researcher and aqua technician. Know Professional and social ethics as researcher, marketing, farming, community mentor, aqua business operator and hatcheries.
PO5	Apply appropriate methods of Aquaculture systems, selection, survey and location of suitable site, Aquaculture engineering, hydrology of ponds, selection of species, restocking management and stocking. Techniques of post stocking management and growth. Apply soil and water characteristics and physiology of finfish and shell fish.
PO6	Discuss digestion, respiration, excretion and osmoregulation, circulatory system, neuroendocrine system and reproduction. Describe bioluminescence, mating and parental care. Describe the culture of Indian major carps, exotic carps, air breathing fishes. Locate Hatchery management, Fresh water prawn and pearl culture. Predict Aquarium fishes and management.
PO7	Communicate effectively viral and bacterial diseases in finfish and shellfish. Nutrition and environmental stress diseases information in person and with community. Microbiology and fish pathology. Acquire skills in writing research report, documentation, case studies, seminar presentations, group discussions and marketing strategies.
PO8	Describe fish immunology and immunotechnology. Social and environmental dimensions within nutrition and the life sciences. Able to demonstrate the cell biology , genetics and immunology.
PO9	Know basic structure of cell and its organelles, chromosomes, principles of physico chemical basis of heredity, genetic rationale in fish breeding, natural hybridization and cytogenetics of fishes.
PO10	Apply knowledge on chemical composition of fish and shellfish, common bacteria present in fish, handling of fish. Prepare pharmacology chromosomal engineering and hormonal manipulation of genetics, recombinant DNA and Polymerase chain reaction and gene amplification.
PO11	Develop and design fish feeds, supplementary feeds, biomolecules enzymes metabolism and bioenergetics. Identify computer application and scope of biostatistics and statistical analysis in an aquaculture.
PO12	Learn new concepts of fish breeding and hatchery management, limnology, Bioinformatics in aquaculture, General Principles and practices of Aquaculture, Ornamental fish Culture, fish processing technology, marine pollution.

Program Specific Outcomes

S.No	Program Specific Outcomes
PSO1	Identify and select sources of credible information in fish Nutrition and management.
PSO2	Apply and incorporate the principles of Aquaculture farming, nutrition, diseases, marketing, hatcheries and aquaculture by products and real world situations and problems.

Name of the Department: DEPARTMENT OF FISHERY SCIENCE AND AQUACULTURE

Name of the Programme: M.Sc., AQUACULTURE

• VISION

- Provide 100% Job security to our students
- To make the department a well-established and reputed center for Aquaculture related studies
- To promote knowledge base and make students self-reliant and useful to the society.
- Faculty involved in decision making – collective leadership. “Wisdom lies in the right perspective”.

MISSION

“To train students in Principles and Practices of Aquaculture relevant to regional and National food production programs and Provide Employment to all the outgoing students”.

	TOTAL SEMESTERS			144	84	1320	880	2200

*Open Online Skill development Course (OOSDC)/ SDC – Students can choose any **Two** relevant courses of his / her choice from the online courses offered by governmental agencies like SWAYAM, NPTEL, etc., **to get 8 credits (with 4 credits from each course).**

Note: AQC 402 : PROJECT WORK

Each Student will be under the guidance of a faculty member and the students will put in field oriented research work which mainly consists of visiting to the field for sample collection, farming in fish and prawn culture, hatcheries, processing units, marketing and aquatic diseases analysing in the laboratory. Data collected is compiled and submitted as a dissertation to the department. During viva – voce the students has to present his/ her work to the panel of examiners. The attendance of the student during project work period is considered were they do in Aqua companies / Industries.

SRI VENKATESWARA UNIVERSITY: TIRUPATI
DEPARTMENT OF FISHERY SCIENCE AND AQUACULTURE
M. Sc. AQUACULTURE

**Re – Structured P.G Programme (CHOICE BASED CREDIT SYSTEM (C.B.C.S), as per NEP – 2020, National
Higher Education Qualification Frame Work (NHEQF) And Guidelines Of APSCHE
(WITH EFFECT FROM THE BATCH ADMITTED IN THE ACADEMIC YEAR 2025-2026)**

SEMESTER – I

CORE COURSE - I – THEORY- AQC 101: CONCEPTS OF AQUATIC ECOLOGY

COURSE OBJECTIVES

To enable the students to

1. Understand the concepts of Aquatic Ecology
2. Acquire knowledge on the Characteristics of water and dynamics of Aquatic ecosystem
3. Understand the Aquatic vegetation
4. Acquire knowledge on Energy transfer in the ecosystem

CORE – THEORY

AQC 101 : CONCEPTS OF AQUATIC ECOLOGY

UNIT – I

1. INTRODUCTION: Definition of ecology, organism and environment; features of organism - environment relations; living and non - living environments; the ecosystem or habitat.
2. AQUATIC ECOSYSTEMS: Freshwater ecosystems - Lotic and Lentic ecosystems; Marine ecosystems - oceans and seas, zonation of the seas - rocky, sandy and muddy shores; classification of marine habitat - pelagic, benthic, neritic, oceanic, littoral and abyssal.

UNIT – II

3. PHYSICAL CHARACTERISTICS OF WATER: Light - penetration of sunlight into aquatic media, effect of light on productivity, photoperiodicity in animals; Temperature - annual temperature cycles, thermal stratification of water bodies, thermal optimum, maximum and minimum, water movements, periodic and a periodic current system; Turbidity - causes, variations and effects.
4. CHEMICAL CHARACTERISTICS OF WATER: Atmosphere and atmospheric gases dissolved in water; Oxygen - oxygen and life, hypoxia, anoxia and hyperoxia, adaptations of animals to varying oxygen tensions; Carbon dioxide - sources of CO₂, its ecological effects; pH or hydrogen ion concentration - its significance. total hardness and total alkalinity

UNIT – III

5. BIOGEOCHEMICAL CYCLES: Nitrogen cycle; phosphorus cycle; sulfur cycle; carbon cycle; trace elements - manganese and copper.
6. ORGANIC MATTER : Aquatic vegetation – zones of aquatic vegetation; Plankton - classification of plankton, factors affecting plankton distribution, plankton counting and sampling; phytoplankton - zooplankton relationship, plankton productivity; Benthos - phytobenthos and zoo benthos.

UNIT – IV

7. PRODUCTIVITY: Concept of productivity – standing crop, rate of production and rate of removal; primary and secondary productivity; classification of water bodies on the basis of productivity.
8. DYNAMICS OF AQUATIC ECOSYSTEM : Principal steps and components – niches, trophic levels and relations; producers, consumers, decomposers and transformers; food chain and food web; pyramid of biomasses; pyramid of numbers; energy transfer in the ecosystem.

SUGGESTED READING :

1. Santhanam, R. 1993. A Manual of Fresh Water Ecology: An Aspect of Fishery Environment. Daya Publishing House, New Delhi.
2. Pillai, N. K. 1993. Marine Biology and Ecology. Daya Publishing House, New Delhi.
3. Reid, G. K. and R. D. Wood. 1976. Ecology of Inland Waters and Estuaries D. Van Nostrand Company.
4. Kormondy, E. J. 1996. Concepts of Ecology. Prentice Hall of India Pvt. Ltd. New Delhi.
5. Cole, G. L. 1954. Text Book of Limnology. The C. V. Mosloy Co.,
6. Odum, E. P. 1996. Fundamentals of Ecology. 3rd Edn. Natraj Publishers, Dehradun.
7. Santhanam, R. and A. Srinivasan. 1994. A Manual of Marine Zooplankton. Oxford and IBH Publishing Co. Pvt. Ltd., New Delhi.
8. Pillai, N. K. 1986. Introduction to Planktonology. Himalaya Publishing House, Mumbai.
9. Balakrishnan Nair, N and D. M. Thampy. 1980. A Text Book of Marine Ecology. Mc Millan Co. of India Ltd.
10. Battish, S. K. 1992. Freshwater Zooplankton of India. Oxford & IBH Publishing Co. Pvt. Ltd. New Delhi.

COURSE OUT COMES

Upon completion of the course, students will be able to

CO1.Understand the Aquatic environment and Aquatic ecosystem.

CO2.Understand the Physical and Chemical Characteristics of water.

CO3.Acquire knowledge on Importance of Biogeochemical cycles

CO4. Describe the Nature of Dynamics of Aquatic Ecosystem

CO-PO MAPPING

AQC 102: SYSTEMATICS AND EXTERNAL ANATOMY OF CULTIVABLE ORGANISMS

COURSE OBJECTIVE

To enable the students to

1. Understand the Systematic and External Anatomy of Cultivable Organisms
2. Discuss the basic structure of fishes
3. Understand the classification of commercially important crustaceans and molluscs
4. Acquire knowledge on morphology shell fish

UNIT – I

1. FIN FISH SYSTEMATICS: Classification of fishes up to subclass level; major groups of fresh water fish and their salient features and distribution.

UNIT – II

2. FIN FISH ANATOMY : Basic structure of the skin in fishes; epidermal derivatives – microridges and integumentary glands; dermal derivatives – cosmoid scales, ganoid scales, placoid scales, elasmoid, cycloid and ctenoid scales; fish age and scales; integumentary pigments; mouth and jaws; gill slits; fins – median fins and paired fins, origin of paired fins; coloration – morphology of chromatophores, pigments, physical and chemical colours, mixed colours, colour change, adaptive significance.

UNIT – III

- 3.SHELL FISH SYSTEMATICS: Classification of commercially important crustaceans and molluscs up to sub class level and their salient features and distribution.

UNIT – IV

- 4.SHELL FISH ANATOMY: External morphology of shell fish: prawn, shrimp, crab and molluscs – exoskeleton and appendages.

SUGGESTED READING :

AQC- 102: CORE COURSE –2 (B) – THEORY – ORNAMENTAL FISH CULTURE

COURSE OBJECTIVE

To enable the students to

1. Understand classification of ornamental fishes
2. Acquire knowledge on construction and setting up fresh water aquarium and it maintenance
3. Know diseases of aquarium fishes
4. Understand economic s of ornamental fish culture

UNIT – I

1. Classification and characteristic features of common species of freshwater ornamental fishes.
2. Classification and characteristic features of common species of brackish water and marine ornamental fishes.

UNIT – II

3. Construction and setting up freshwater aquarium and its maintenance; aquarium plants.
4. Mass production of ornamental fishes – food and feeding habits, water quality maintenance, breeding and rearing.

UNIT – III

5. Bacterial and viral diseases of aquarium fishes – causes, symptoms and control.
6. Fungal, parasitic and nutritional deficiency diseases – causes, symptoms and control.

UNIT – IV

7. Setting up of an export oriented ornamental fish unit.
8. Economics of ornamental fish culture.

SUGGESTED READINGS :

1. V. K. Dey, 1986. **Ornamental Fishes**. MPEDA.
2. R. Santhanam. 1987. **A Manual of Freshwater Aquaculture**, Oxford X IBH.
3. V. Satyanarayana. 1996. **Fish culture**, Narendra Publishing House.
4. P. K. Talwar and A. G. Jhingran 1991. **Indian Fishes**, Oxford & IBH
5. Q. J. Shammi and S. Bhatnagar. 2002. **Applied Fisheries**, Agrobios (India)

COURSE OUT COMES

After completion of this course, students

CO1.Understand the Common species of fresh water ornamental fishes
 CO2. Acquire knowledge on Mass production of ornamental fishes
 CO3.Creating awareness on Diseases of aquarium fishes
 CO4.Knowledge on Economics of ornamental fish culture
 CO-PO MAPPING

POS COS	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO 10	PO11	PO12
CO1	1	2	2	1	2	3	3	1	3	2	2	3
CO2	2	1	2	3	2	3	3	2	1	2	2	3
CO3	1	1	2	1	2	3	3	2	3	2	2	3
CO4	2	1	2	2	2	1	1	1	1	1	3	3

H-High-3, M- Medium-2, L- Low-1

COURSE OBJECTIVE:

To enable the students to:

1. Comprehensive knowledge on nutritional requirements in aquaculture
2. Know the principles and working application of supplementary feed
3. Understand the properties of fertilizers and liming
4. Acquire knowledge on aeration in fish pond

UNIT – I

1.NUTRITION: Importance of nutrition; nutritional requirements; nutritive needs of finfish with special reference to carps and cat fishes and shrimp and prawn; major nutrients – carbohydrates, proteins and lipids and their importance. Natural food and live feed culture: methods of collection of live feed organisms; identification, isolation and maintenance of phytoplankton and zooplankton; mass culture of spirulina and azolla, culture of rotifers (*Brachionus* and *Moina*) and artemia.

2.FOOD AND FEEDING HABITS : Types of food – basic food, secondary food, incidental food, obligatory food; feeding habits – detritivores, scavengers, herbivores, omnivores, carnivores, surface feeders, column feeders, bottom feeders; monophagic, stenophagic and euryphagic fishes; seasonal changes in food availability and food preferences; food and feeding in relation to age; food selectivity and feeding intensity; feeding strategies; food and feeding habits of prawns, shrimps, crabs and bivalves; morphological adaptations for feeding in fishes.

UNIT – II

1.SUPPLEMENTARY FEEDS : Supplementary feed and feed formulations; different types of feeds (dry feed, wet feed, floating feed, sinking feed and flakes); feed composition; nutrient source; feed ingredients (conventional and non-conventional, their nutritive value); water stability of feeds; use of attractants in feeds; binders; processing of feeds (importance of anabolic agents, antioxidants and mould inhibitors; anti nutritional factors); storage and quality control; determination of energy content in feeds.

2.FEEDING : Introduction; feeding and fish production; fate of nutrients in feed; water quality and feeding rates – temporal changes; relationship to maximum feeding rate; effects of weather on maximum feeding rate; effluents from fish ponds; off-flavor.

UNIT – III

5.FERTILIZATION: Properties of chemical fertilizers: Primary nutrients; secondary nutrients; sources of fertilizers; mixed fertilizers; solubility of fertilizers. Effects of fertilization on plants and invertebrates: Phytoplankton; zooplankton; benthos; macrophytes; water transparency as an index to fertilization; fish yield in fertilized ponds. Organic fertilizers: Sources; influence on pond ecology and fish production.

6.LIMING : Properties of liming materials – compounds, neutralizing value, fineness; effects of liming on pond ecosystem – chemistry, production of plankton and invertebrates; fish production; liming rates for ponds; application of liming materials for ponds – selection of liming material and time of application; methods of application; residual effects of liming.

UNIT – IV

7.DYNAMICS OF DISSOLVED OXYGEN : Introduction; diffusion; photosynthesis; respiration; diet changes in dissolved oxygen concentrations; predicting decline in dissolved oxygen concentrations; oxygen budgets of fish ponds; algal die-offs; overturns; identification of oxygen problems.

8.AERATION : Introduction; principles of aeration; emergency aeration; supplemental or continuous aeration; destratification; practical considerations.

9.MISCELLANEOUS TREATMENTS : Introduction; potassium permanganate; hydrogen peroxide; calcium hydroxide; reduction of pH; control of turbidity; salinity; hardness and chloride; water exchange; chlorine removal; rotenone; formalin and malachite green; methods of applying chemicals.

SUGGESTED READING :

11. Pillay, T. V. R. and W. A. Dill. 1979. Advances in Aquaculture. Fishing News Books Ltd.

COURSE OUT COMES

After the completion of the course, the students will be able to:
CO1.Acquire knowledge on the Importance of Nutrition
CO2.Understand the Food and Feeding Habits.
CO3.Importance of Supplementary feeds and Fertilization
CO4.Knowledge on Dynamics of Dissolved oxygen
CO-PO MAPPING

H-High-3, M- Medium-2, L- Low-1

AQC103 Core Course- 3(B): -THEORY- ENVIRONMENTAL MONITORING AND BIODETERIORATION

COURSE OBJECTIVE:

- To enable the students to
1. Understand limitations for monitoring critical pollutants
 2. Know the role of biotechnology in environmental pollution
 3. Acquire knowledge on Control of bio deterioration of wood and synthetic substances in the sea
 4. Understand prospects of sustainable development and current environment al problems in india and their management.

UNIT-I

- 1.Global environmental monitoring methods: Status and objectives, limitations for monitoring critical pollutants.
2.Role of biotechnology in environmental pollution control: Indicator organisms, Test organisms, Monitoring organisms, Enzymes.

UNIT-II

- 3.Coastal developmental activities-environmental issues.
4.Micro and Macro fouling, corrosion of metals and alloys in the sea, effects of bio-fouling and bio deterioration on marine structures.

UNIT-III

- 5.Protection methods against corrosion and fouling; Application of biotechnology in controlling the bio deterioration of wood and synthetic substances in the sea.
5.Red tides: Cause character and effects on the organisms of Marine environment.

UNIT-IV

- 6.Current Environmental Issues: Current environmental problems in India and their management. Urban waste and health: recycle of water and use; role of garden, park and reservoirs in environmental protection.
7.Sustainable development: an international perspective; Retrospect and prospects of sustainable environmental development

10. Gupta, P.K.: Introduction to Biotechnology.

COURSE OUT COMES

After completion of this course, students

- CO1Understand the Global Environmental monitoring methods
CO2 Acquire knowledge on Coastal development activities
CO3 Creating awareness on Protection methods against corrosion and fouling
CO4 Knowledge on Current Environmental issues
CO-PO MAPPING

PRACTICAL -I

AQC104: IDENTIFICATION AND MORPHOLOGY OF CULTIVABLE ORGANISMS MARKS : 50

1. Identification of commercially important finfish – marine fishes, freshwater fishes, exotic carps, ornamental fishes, predatory fishes and weed fishes.
2. Identification of commercially important shellfish – crabs, prawns and shrimps.
3. Identification of eggs and larval forms of cultivable finfish and shellfish.
4. Identification of fins and scales of fish; mounting of scales.
5. Collection and identification of fish food organisms.
6. Biometric analysis.
7. Length-weight relationship.
8. Dissections: (1) Digestive system (2) Reproductive system in finfish and shellfish.
9. Identification of different crafts and gear.
10. Identification of aquatic insects.
Identification of aquatic weeds.

AQC- 105: Skill Oriented Course 1 (A) – THEORY- COASTAL AQUACULTURE

Course Objectives

To enable the students to:

COURSE OBJECTIVE

1. Understand seed collections from natural resources
2. Acquire knowledge on Crab culture and Lobster culture
3. Understand the methods of Double cropping
4. Comprehension knowledge on Oysters, pearl oysters and mussels

UNIT – I

1.SHRIMP HATCHERY MANAGEMENT: Seed collection from natural resources, identification of post larval stages, brood stock management, breeding by eyestalk ablation, hatchery management, larval rearing of *Penaeus monodon*. Shrimp Culture Management: Culture of *P.vannamei* and *P.mondon*

2.CRAB CULTURE: Culture of *Scylla serrata*, *Scylla oceanica*, *Scylla tranquibarica*.

3.LOBSTER FISHERY: Distribution – biology of spiny lobster – abundance of spiny lobster - culture of spiny lobster – processing and preservation of lobsters.

UNIT – II

4.CRAY FISH CULTURE: Culture of *Procambarus clarkii* – pond culture methods – double cropping.

5.MOLLUSCAN CULTURE: Oysters, pearl oysters and mussels.

UNIT – III

6.SEAWEED CULTURE: Seaweed morphology, biology, reproduction, importance of seaweeds; culture of seaweeds.

7.MARINE AND BRACKISHWATER FISH CULTURE: Culture of *Lates calcarifer*, *Etroplus suratensis* and *Mugil cephalus*.

UNIT – IV

8. POST HARVEST TECHNOLOGY: Harvesting methods - drainable ponds, undrainable ponds, cage and raceway farms, handling and transport; principles and importance of fish preservation; preservation methods - traditional and advanced methods of fish preservation – sun drying, salt curing, pickling, smoking, chilling, freezing and canning.

9. PRESERVATION AND PROCESSING : Processing and preservation of fish products and byproducts – minced meat, FPC, fish meal, fish oils, fish hydrolsate, fish sauce, fish glue; sanitation in processing plants and quality control of fresh and processed fish and fishery products; IQF shrimp Freezing.

SUGGESTED READING :

1. MPEDA, **Hand Book on Aquafarming**, Shrimps, lobsters, mudcrabs (1996).
2. Nandi, N. C. and S. K. Pramanik. 1994. **Crabs and crab Fisheries of Sundarban**. Hindustan Publishing Corporation.
3. Pillay, T. V. R. 1988. **Aquaculture, Principles and Practices**. Fishing News Books.
4. Piska, R. S. 1999. **Fisheries and Aquaculture**. Lahari Publications, Hyderabad.
5. Pandian, T. J. 2001. **Sustainable Indian Fisheries**. National Academy of Agricultural Sciences.
6. Sahoo, D. and S. Z. Qasim. 2002. **Sustainable Aquaculture**. APH Publishing Corporation, New Delhi – 110 002.
7. MPEDA – Hand Book on Aqua farming – **Fish Processing, Quality Control & Marketing**. 1995. Kochi, India.
Pillay, T. V. R. 1993. **Aquaculture: Principles and Practices**. Fishing News Books.

8. MPEDA, **Hand Book on Aquafarming**, Shrimps, lobsters, mudcrabs (1996).
9. Nandi, N. C. and S. K. Pramanik. 1994. **Crabs and crab Fisheries of Sundarban**. Hindustan Publishing Corporation.
10. Pillay, T. V. R. 1988. **Aquaculture, Principles and Practices**. Fishing News Books.
11. Piska, R. S. 1999. **Fisheries and Aquaculture**. Lahari Publications, Hyderabad.
12. Pandian, T. J. 2001. **Sustainable Indian Fisheries**. National Academy of Agricultural Sciences.
13. Sahoo, D. and S. Z. Qasim. 2002. **Sustainable Aquaculture**. APH Publishing Corporation, New Delhi – 110 002.
14. MPEDA – Hand Book on Aqua farming – **Fish Processing, Quality Control & Marketing**. 1995. Kochi, India.
Pillay, T. V. R. 1993. **Aquaculture: Principles and Practices**. Fishing News Books.

COURSE OUT COMES

1. Understand the Shrimp hatchery management
2. Acquire knowledge on Crab culture, cray fish culture and Molluscan culture
3. Creating awareness on Seaweed culture
4. Knowledge on Post harvest technology

H-High-3, M- Medium-2, L- Low-1

AQC 105: Skill Oriented Course 1 – (B) - CAPTURE FISHERIES

COURSE OBJECTIVE

1. Understand crafts, gears, nets from natural resources
2. Acquire knowledge on commercial reservoirs
3. Understand the methods of fisheries in India.
4. Comprehension knowledge on clupepods, prawns and mullets.

UNIT – I

1.CRAFTS - Introduction to fishing crafts; types of fishing crafts: indigenous crafts – coracle, sangadam, shoe dhonl, catamaran, tuticorin boats, dugout canoe, outrigger canoes, masula boats; / built up boats – Kakinada nava, Machilipatnam nava, dinghy and nauka. Materials used for construction of fishing crafts- timber,metals for sheathing,metallic fitting, protection of the boat.

2.GEAR – types of fishing gear – disabling type, traps and barriers, filtering type, entangling type, self-fishing type, wounding gear. **NETS** – types of nets; common fishing gears for inland waters – traps, angling, cast net, stake net, hand seines, gill net. Gears for spawn collection – Midnapore type of net, murshidabad type of net, lalgola type, jaunpur type. Gamcha, - midnapore type, murshidabad type – materials used for fishing gear; preservation of fishing gears.

UNIT – II

3.RIVERINE FISHERIES OF INDIA : Ecology of riverine environment; different river systems and their fisheries; regulations of populations and exploitation; improvement of fish stocks; status of spawn prospecting; fisheries of major and minor carps and cat fishes.

4.LACUSTRINE FISHERIES: Lakes and reservoirs; development of reservoir fisheries; commercial exploitation of reservoirs; recent advances in reservoir management.

UNIT – III

5.MARINE FISHERIES: Marine fishery resources of India; historical background and recent trends; problems of inshore fisheries; fishery resources of the continental shelf; exploitation and management of under exploited and unexploited resources of EEZ.

6.PELAGIC FISHERIES: Pelagic fishery resources of India; fisheries of oil sardine, lesser sardines, anchovies, mackerel, ribbon fishes and cephalopods.

7.DEMERSAL FISHERIES: Fisheries of elasmobranchs; Bombay duck, silver bellies, threadfins and other perches; flat fishes, shrimps, crabs, oysters and clams.

UNIT – IV

8. ESTUARINE FISHERIES: Definition; origin and classification; types of estuaries in India and their fishery resources fisheries of brackish water lakes and backwaters; problems confronting brackish water capture fishers. fisheries of clupeoids, prawns and mullets; fisheries of brackish water lakes and backwaters; problems confronting brackish water capture fisheries.

SUGGESTED READING:

1. Jhingran, V. G. 1985. **Fish and Fisheries of India**. Hindustan Publishing Corporation, New Delhi.
2. Kurian, C. V. and O. V. Sebastian, 1982. **Prawns and Prawn Fisheries of India**. Hindustan Publishing Corporation, New Delhi.
3. Srivastava, U. K. and Dharma Reddy. 1983. **Cold Water Fisheries of India**. Concept Publishing Co., New Delhi.
4. Bal, D. V. and K. V. Rao. 1990. **Marine Fisheries**. Narendra Publishing House, New Delhi.
5. **Proceedings of the Symposium of Living Resources of the Seas around India**. CMFRI. 1973. Spl. Publ. CMFRI. Cochin.
6. FAO, **Year Book of Fishery Statistics** (Yearly).
7. Talwar, P. K. and R. K. Kacker. 1984. **Commercial Sea Fishes of India**. ZSI, Kolkata.
8. Khanna, S. S. 1997. **An Introduction to Fishes**. Central Book Depot, Allahabad.
9. Sinha, V. R. P. 1993. **A Compendium of Aquaculture Technologies**. Oxford and IBH Publishing Co. Pvt. Ltd. New Delhi.
10. Piska, R. S. 1999. **Fisheries and Aquaculture**. Lahari Publications, Hyderabad.
11. Pandian, T. J. 2001. **Sustainable Indian Fisheries**. National Academy of Agricultural Sciences.

COURSE OUT COMES

After completion of this course, students will be able to:

CO1 Understand the types of fishing crafts, gears and nets.

CO2 Acquire knowledge on Aquaculture fisheries

CO3 Creating awareness on marine, pelagic and demersal fisheries.

CO4 Knowledge on estuarine fisheries and Management

CO-PO MAPPING

H-High-3, M- Medium-2, L- Low-1

AQC 106 SKILL ORIENTED COURSE 2 (A) : AQUACULTURE MANAGEMENT

UNIT - I:

1. **Aquaculture Engineering:** Types of culture systems: Open culture system (cages, pens, rafts and racks); semi-closed culture system (Ponds and Raceways) and closed culture system (Tanks, Water recirculation systems).
2. Design and construction of a freshwater fish farm and hatchery.
3. Design and construction of a shrimp farm and hatchery.

UNIT - II:

1. **Management of fish ponds:** Management of fish production; Natural productivity of ponds; Biological means of increasing fish production.
2. Identification of oxygen depletion problems and control mechanisms in fish and shrimp's ponds.
3. Liming, organic manures, chemical fertilizers and their implications in fish ponds.
4. Techniques and management practices adopted for the Reservoir Fisheries in India.

UNIT - III:

1. **Feed Management:** Natural food, culture of live food – Spirulina, Chaetoceros, Brachionus, Artemia for hatcheries.
2. Supplementary feeds: Types of feeds– wet, moist and dry feeds, mash, pelleted feeds– floating and sinking pellets; Feed additives– binders, antioxidants, enzymes, pigments, growth promoters, feed stimulants. Use of preservatives.
3. Feed formulation and manufacturing. Feed storage methods.
4. Feeding strategies: Feeding devices, feeding schedules and ration size. Feed evaluation - feed conversion efficiencies and ratios.

UNIT - IV:

- 1. **Economics and Fish processing:** Principles of aquaculture economics – Capital costs, Variable costs, Cost-benefit analysis.
- 2. Fish harvesting in ponds; Fish handling and packaging; methods of transport; fish marketing methods in India.
- 3. Methods of fish and shrimp preservation and processing; Fishery by-products.
- 4. Organic Aquaculture – Concept, Principles and Practices.
- 5. Methods of fish/shrimp preservation and processing
- 6. Principles and practices of organic aquaculture.
- 7. Impact of aquaculture on environment

COURSE OUT COMES:

- After completion of this course, students
- CO1 Methods of planning for aquaculture development
- CO2 Criteria to be followed for selection of aquaculture sites and
- CO3 Important aspects of farm / hatchery standards and bio – security measures.
- CO4 Knowledge on Design and construction

CO-PO MAPPING:

H-High-3, M- Medium-2, L- Low-1

AQC 106 Skill Oriented Course 2 (B) : AQUATIC FOOD SAFETY &QUALITY MANAGEMENT

- CO1: To introduce the basic concepts about Uniqueness of Seafood quality control and its management.
- CO2: To discuss about fish spoilage and quality assessment; enzymic and non enzymatic deteriorations.
- CO3: To study about Recognized Specific spoilage organisms and Mechanism of Microbial Spoilage.
- CO4: To understand the Methods of Quality Assessment of Fish and Fishery Products and changes during spoilage.
- CO5: To study about Traditional Quality Control and Food Safety with Special Reference to HACCP System.

UNIT-I:

- 1) **Quality Control;** Uniqueness of Seafood quality control; Quality management/assurance.
- 2) Intrinsic quality, Species, Size, Sex, Condition and composition; Parasities and other organisms; Naturally toxic fish; Contamination with pollutants; Occasional Peculiarities
- 3) Extrinsic quality; Quality Deterioration and Extrinsic Quality defects in fish (Raw material).

UNIT-II:

- 1) **Microbial spoilage :** Fish spoilage and Quality Assessment
- 2) Enzymic Action, Non- enzymatic Deteriorations
- 3) Microbial Spoilage

UNIT-III:

- 1) **Quality Problems in seafood Industry:** Poor Quality Raw Materials;
- 2) Recognised Specific spoilage organisms (SSOs);
- 3) Mechanism of Microbial Spoilage; Spoilages and Quality Indices in Frozen Fish; Freezing Process; Frozen Strorage.

UNIT-IV:

- 1) **Quality Assessment of Fish and Fishery Products:** Methods of Quality Assessment; Organoleptic/Sensory-Subjective and Objective; a. appearance; b. Flavour; c. Taste; d. Odour; e. Texture; Interaction of Taste, Odour, Texture and Flavour; Sensory Testing Methods.
- 2) Selection of Test Subjects; i) Discrimination Tests ii) Preference Tests; iii) Training of Panel Members; iv) Presentation of samples.
- 3) Changes during Spoilage; i) Condition of the Skin (Sight and Touch); ii) Appearance of the Eye (Sight); iii) Condition of the Gills (Sight and Smell); iv) Condition of the Flesh (Touch and Sight).

UNIT-V:

- i) **Concept of Quality Management** : Traditional Quality Control; Modern Safety and Quality Assurance Methods and Systems; Methods to Manage Quality and Safety; i) Good Hygienic Practices/ Good Manufacturing Practices; ii) Hazard Analysis Critical Control Point; iii) Quality Control (QC); iv) Quality Management; v) Quality Systems; vi) Total Quality Management (TQM); vii) Good Manufacturing Practices in Fish Handling
- 2) Food Safety with Special Reference to HACCP System; i) The HACCP Concept; ii) Advantages of HACCP; iii) Applications of HACCP
- 3)Determine Critical Control Points.

Course Outcome: On completion of the above unit they are able to understand the traditional quality control and food safety with special reference to Hazard Analysis Critical Control Point and its applications.

- 1.Upon completion of the above unit they are able to understand the concept of Uniqueness of Seafood quality control and its management.
- 2.Students will get awareness about fish spoilage and quality assessment and enzymic and non enzymatic deteriorations.
- 3.Upon completion of the above unit they are able to understand the recognized specific spoilage organisms and mechanism of microbial spoilage.
- 4. Students will get awareness about Methods of quality assessment and changes during spoilage.

PRACTICAL -II - AQC 107: FISH NUTRITION Marks: 50

- 1. Estimation of total proteins, carbohydrates and lipids in fish feeds.
- 2. Estimation of ash content.
- 3. Estimation of inorganic ions through flame photometer.
- 4. Estimation of fiber content in fish feeds.
- 5. Determination of amino acid profiles through paper chromatography.
- 6. Effect of different feeds on digestibility, FCR and FCE.
- 7. Determination of energy contents using bomb calorimeter.
- 8. Proximate composition of fish digestive tract.

II SEMESTER

CORE COURSE -4 – THEORY AQC 201: PRINCIPLES OF AQUACULTURE

COURSE OBJECTIVE

To enable the students to

- 1. Describe the Principles of Aquaculture
- 2. Identify the Design Construction of pond
- 3. Indicate the Biological characteristics of aquaculture species
- 4. Acquire knowledge on measurement of growth and water and soil quality parameter.

UNIT – I

1. **AQUACULTURE SYSTEMS AND METHODS:** Scope and definition; origins and growth of aquaculture; biological and technological basis; Traditional, extensive, semi - intensive and intensive culture; monoculture, polyculture, composite culture, mixed culture, monosex culture; cage culture, pen culture, raft culture, race way culture, culture in circulatory systems; warm water and cold water aquaculture; sewage – fed fish culture, integrated fish farming.
2. **SELECTION OF SITES:** Survey and location of suitable site – topography; soil characteristics; acid sulphate soils; water source; hydrometeorological data.

UNIT – II

3. **AQUACULTURE ENGINEERING :** Design and construction of pond, layout and design of aquaculture farm, construction, water intake system, drainage system; aeration and aerators; recent advances in aquaculture engineering; tips for better aquaculture practices; design and construction of hatcheries.
4. **HYDROLOGY OF PONDS :** Types of ponds; sources of water – precipitation, direct run off, stream inflow, ground water inflow, regulated inflow; losses of water– evaporation, seepage, outflow, consumptive use, water budgets of embankment ponds; water budget of an excavated pond; water exchange.

UNIT – III

5. **SELECTION OF SPECIES:** Biological characteristics of aquaculture species; economic and market considerations; seed resources, collection and transportation.
6. **PRE STOCKING MANAGEMENT:** Sun drying, ploughing / tilling, desilting, liming and fertilization, eradication of weed fishes.
7. **STOCKING:** Acclimatization of seed and release; species combinations; stocking density; ratio.

UNIT – IV

8. **POST STOCKING MANAGEMENT :** Water and soil quality parameters required for optimum production, control of aquatic weeds and aquatic insects, algal blooms; specific food consumption, food conversion ratio (FCR), protein efficiency ratio, true net protein utilization, apparent net protein utilization, biological value of protein.

9. **GROWTH :** Measurement of growth; length - weight relationship; methods of determination of age in fishes and shellfish based on length data and growth checks; ponderal index; growth hormones.

SUGGESTED READING :

1. Mathew Landau. 1995. **Introduction to Aquaculture**. Daya Publishing House, New Delhi.
2. Pillay, T. V. R. 1993. **Aquaculture: Principles and Practices**. Fishing News Books. Black Well Scientific Publications.
3. MPEDA, 1991. **Hand Book on Shrimp Farming**, Kochi, India.
4. Jhingran, V. G. 1982. **Fish and Fisheries of India**. Hindustan Publishing Corporation, New Delhi.
5. Chakrabarti, N. M. 1998. **Biology, Culture and Production of Indian Major Carps**. Narendra Publishing House, New Delhi.
6. Coche, A. G. and J. F. Muir. 1996. **Pond Construction and Fresh Water Fish Culture – Pond Farm Structures and Layouts – Simple Methods for Aquaculture**. FAO. Daya Publishing House, New Delhi.
7. Upadhyay, A. S. 1995. **A Hand Book on Design, Construction and Equipments in Coastal Aquaculture (Shrimp Farming)**. Daya Publishing House, New Delhi.
8. Wheaton, F. W. 1985. **Aquaculture Engineering**. MPEDA, Cochin.
9. MPEDA 1990. **Aquaculture Engineering and Water Quality Management**. Cochin, India.

COURSE OUT COMES

After completion of this course, students will be able to:

CO1.Understand the Aquaculture systems and methods

CO2.Acquire knowledge on Aquaculture Engineering

CO3.Creating awareness on selection of species and Hydrology of ponds

CO4.Knowledge on Pre stocking Management and Post stocking management and growth.

CO-PO MAPPING

COURE COURSE – 5(A) – THEORY AQC 202: PHYSIOLOGY OF CULTIVABLE ORGANISMS

COURSE OBJECTIVE

To enable the students to

1. Recognize the Physiology of cultivable Organisms.
2. Understand the digestion and respiration.
3. Creating awareness on neuroendocrine system and reproduction.
4. Knowledge on Bioluminescence, mating and parental care.

UNIT – I

1. **DIGESTION:** Digestive systems, digestive enzymes, absorption and assimilation.
2. **RESPIRATION :** Respiratory organs, mechanisms of ventilation, respiratory pigments, gaseous exchange mechanism, response of the respiratory system to external changes; accessory respiratory organs.

UNIT – II

3. **EXCRETION AND OSMOREGULATION:** Mechanism of excretion – kidney structure and functions of freshwater and marine teleosts. Osmoregulation in freshwater fishes and marine fishes and salt balance.
4. **CIRCULATORY SYSTEM:** Arteries and veins; mechanical properties and regulation of cardiac activity; general properties of the cardiovascular system; effects of drugs.

UNIT – III

5. **NEUROENDOCRINE SYSTEM:** Neuroendocrine system in finfish; neuroendocrine regulation of moulting and reproduction in crustaceans.
6. **REPRODUCTION:** Reproductive cycles, sexual maturity, spawning and fecundity, gonado somatic index, fertilization, hormones and reproductive behaviour in fishes.

UNIT – IV

7. **BIOLUMINISCENCE:** Light organs – biochemistry, regulation of light emission, significance and employment of luminescence.
8. **MATING AND PARENTAL CARE :** The abyssal and pelagic eggs; attachment devices; spawning sites; nest building and other means of parental care; ovoviviparity and viviparity; types of larvae; metamorphosis; larval life and feeding habits of larvae in finfish and shellfish.

SUGGESTED READING :

1. Hoar W.S. and D. J. Randal. 1976. **Fish Physiology**. Vol. I to IX Academic Press, New York.
2. Khanna, S. S. 1996. **An Introduction to fishes**. Central book depot, Allahabad.
3. Lynwood S. Smith. 1999. **Introduction to Fish Physiology**. Narendra Publishing House, Delhi.
4. Harper, A. L. 1989. **Physiological Chemistry**.
5. Lagler, K. F., J. E. Bardach and R. R. Miller. 1972. **Ichthyology**. John Wiley.

COURSE OUT COMES

After completion of this course, students will be able to:

- CO1 To Understand the metabolism of fishes and prawns
- CO2 Acquire knowledge on Neuroendocrine system
- CO3 Creating awareness on bioluminescence
- CO4 Knowledge on fertilization and parental care

H-High-3, M- Medium-2, L- Low-1

(B)- CORE COURSE -5(B) – THEORY AQC 202 - AQUACULTURE ENGINEERING

COURSE OBJECTIVE

To enable the students to

1. To learn the basic aspects of successful farm designing for effective management and optimum yield
2. Students will learn about design and construction of Freshwater fish farm and brackish water shrimp farm
3. Students will get an understanding of design and construction of Fish hatchery and Shrimp hatchery
4. Students will get an understanding of design and construction of culture systems like Cages and Rafts, Pens and Enclosures, and Raceway Farms

UNIT – I

1.Planning and Aquaculture Development: Priorities, resources, technology, human resources, legal and environmental factors and organization of aquaculture.

2.Selection of Sites for Aquaculture: Criteria for site selection of fresh water and brackish water farms - land based and open water farms; quantity and quality of water, sources of pollution and conflicts.

3.Farm/hatchery standards and bio-security measures: Sanitary and Phyto-Sanitary (SPS) measures; Better Management Practices (BMP's)

UNIT – II

4. Freshwater Fish Farm - Design and construction: Layout of farm, size of the farm, division of the farm area; size, shape and depth of ponds; dike design, pond bottom and harvesting sump; water supply and drainage system of pond – pipes, sluice, monk, turn-down pipe; aerators and method of construction.

5.Brackish water Shrimp Farm - Design and construction: Layout designs, design of water management systems, design of water control structures, design of peripheral and internal dikes, water supply and drainage, method of construction.

UNIT – III

6.Fish Hatchery - Design, construction: Criteria for site selection of hatchery and nursery; Design and construction of Jar hatchery and Chinese hatchery system.

7.Shrimp Hatchery - Design and construction: Site selection and facilities required – maturation tanks, spawning tanks, larval rearing tanks, live food culture tanks, water storage and filtration tank, aeration, seawater supply and piping system; Lay-out and construction.

UNIT – IV

8.Cages and Rafts: Design and construction.

9.Pens and Enclosures: Design and construction

10.Raceway Farms: Design and construction.

COURSE OUT COMES

After completion of this course, students

CO1 Methods of planning for aquaculture development

CO2 Criteria to be followed for selection of aquaculture sites and

CO3 Important aspects of farm/hatchery standards and bio-security measures.

CO4 Knowledge on Design and construction

CO-PO MAPPING

COURE COURSE 6 (A)– AQC: 203 - FRESHWATER AQUACULTURE

COURSE OBJECTIVE

To enable the students to

1. Understand the culture of Indian Major carps
2. Acquire knowledge on hatchery management
3. Creating awareness on Fresh water pearl culture
4. Knowledge on important Aquarium fishes and management

UNIT – I

1. **CULTURE OF INDIAN MAJOR CARPS** – Catla, Rohu, Mrigal
2. **CULTURE OF EXOTIC CARPS** – Grass carp, common carp, silver carp, tilapia
3. **CULTURE OF AIR BREATHING FISHES** – Murrels and cat fishes

UNIT – II

HATCHERY MANAGEMENT:

4. **FISH:** Induced breeding; hypophysation of Indian Major carps; types of hatcheries - Hapa, Jar hatchery, circular hatchery (Chinese hatchery), Modern Indian hatchery system.
5. **FRESHWATER PRAWN:** Identification of post larval stages; brood stock management, breeding and Hatchery management, larval rearing.

UNIT – III

6. **FRESHWATER PRAWN CULTURE:** Seed collection from natural sources; culture of *M.rosenbergii* / *M.malcolmsonii*

7. **FRESHWATER PEARL CULTURE:** Definition and scope, origin of pearls, pearl producing molluscs; freshwater pearl culture in the World and in India; types of pearls; mantle cavity insertion, mantle tissue insertion, gonadal insertion; water quality management.

UNIT – IV

8.AQUARIUM FISHES AND MANAGEMENT : Identification of commercially important ornamental fishes, setting and design of freshwater aquarium; taxonomy of species; live bearing fishes; egg laying fishes; biology of ornamental fishes; physiochemical properties of water used in aquaria; aquatic plants and other structures for beauty and utility; common aquarium fish diseases and their control; preparation of supplementary feeds and mass production of ornamental fishes.

SUGGESTED READING:

1. Pillay, T. V. R. 1998. **Aquaculture Principles and Practices**. The Fishing News Books.
2. Rath, R. K. 2000. **Freshwater Aquaculture**. Scientific Publishers (India) Jodhpur.
3. Piska, R. S. 1999. **Fisheries and Aquaculture**. Lahari Publications. Hyderabad.
4. Pandian, T. J. 2001. **Sustainable Indian Fisheries**. National Academy of Agricultural Sciences.

COURSE OUT COMES

After completion of this course, students will be able to:

CO1 Understand the Culture of Indian Major carps

CO2 Acquire knowledge on Aquaculture Hatchery Management

CO3 Creating awareness on Fresh water prawn culture

CO4 Knowledge on Aquarium fishes and Management

CO-PO MAPPING

H-High-3, M- Medium-2, L- Low-1

CORE COURSE -6(B) – THEORY AQC 203: CAPTURE FISHERIES

COURSE OBJECTIVE

9. Understand crafts, gears, nets from natural resources
10. Acquire knowledge on commercial reservoirs
11. Understand the methods of fisheries in India.
12. Comprehension knowledge on clupepods, prawns and mullets.

UNIT – I

1. **CRAFTS** - Introduction to fishing crafts; types of fishing crafts: indigenous crafts – coracle, sangadam, shoe dhonl, catamaran, tuticorin boats, dugout canoe, outrigger canoes, masula boats; / built up boats – Kakinada nava, Machilipatnam nava, dinghy and nauka. Materials used for construction of fishing crafts- timber,metals forsheating,metallicfitting, protection of the boat.
2. **GEAR** – types of fishing gear – disabling type, traps and barriers, filtering type, entangling type, self-fishing type, wounding gear.
NETS – types of nets; common fishing gears for inland waters – traps, angling, cast net, stake net, hand seings, gill net. Gears for spawn collection – Midnapore type of net, murshidabad type of net, lalgola type, jaunpur type. Gamcha, - midnapore type, murshidabad type – materials used for fishing gear; preservation of fishing gears.

UNIT – II

3. **RIVERINE FISHERIES OF INDIA** : Ecology of riverine environment; different river systems and their fisheries; regulations of populations and exploitation; improvement of fish stocks; status of spawn prospecting; fisheries of major and minor carps and cat fishes.
4. **LACUSTRINE FISHERIES**: Lakes and reservoirs; development of reservoir fisheries; commercial exploitation of reservoirs; recent advances in reservoir management.

UNIT – III

5. **MARINE FISHERIES**: Marine fishery resources of India; historical background and recent trends; problems of inshore fisheries; fishery resources of the continental shelf; exploitation and management of under exploited and unexploited resources of EEZ.
6. **PELAGIC FISHERIES**: Pelagic fishery resources of India; fisheries of oil sardine, lesser sardines, anchovies, mackerel, ribbon fishes and cephalopods.
7. **DEMERSAL FISHERIES**: Fisheries of elasmobranchs; Bombay duck, silver bellies, threadfins and other perches; flat fishes, shrimps, crabs, oysters and clams.

UNIT – IV

- 8.**ESTUARINE FISHERIES**: Definition; origin and classification;
types of estuaries in India and their fishery resources fisheries o brackish water lakes and backwaters; problems confronting brackish water capture fishers. fisheries of clupepoids,prawns and mullets;fisheries of brackish water lakes and backwaters;problems confronting brackishwater capture fisheries.

SUGGESTED READING:

22. Pandian, T. J. 2001. **Sustainable Indian Fisheries**. National Academy of Agricultural Sciences.

COURSE OUT COMES

After completion of this course, students will be able to:

CO1 Understand the types of fishing crafts, gears and nets.

CO2 Acquire knowledge on Aquaculture fisheries

CO3 Creating awareness on marine, pelagic and demersal fisheries.

CO4 Knowledge on estuarine fisheries and Management

CO-PO MAPPING

POS COS	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12

H-High-3, M- Medium-2, L- Low-1

PRACTICALS - I

AQC 204 PRACTICAL III : SOIL AND WATER CHARACTERISTICS

1. Determination of temperature, pH and transparency.
2. Estimation of dissolved oxygen and primary productivity.
3. Estimation of carbon dioxide.
4. Estimation of total ammonia – nitrogen and nitrate – nitrogen.
5. Estimation of phosphates.
6. Estimation of iron.
7. Estimation of chlorine
8. Determination of hardness.
9. Estimation of organic matter and biological oxygen demand (BOD)
10. Determination of salinity.
11. Plankton analysis.

SKILL ORIENTED COURSE - 3 (A) – AQC 205: FISHERY ECONOMICS, EXTENSION AND ENVIRONMENTAL MANAGEMENT

COURSE OBJECTIVE

To enable the students to

1. Understand the concepts of Fishery Economics
2. Describe the role and responsibilities of marketing
3. Knowledge on Finance of Aquaculture
4. Knowledge on utility on remote sensing techniques for the identification of suitable grounds for aquaculture

UNIT – I

1. **AQUACULTURE ECONOMICS** : Production economics – definition of economics and application of economic principles to aquaculture; the input-output relationship; maximum level of input; least-cost combination of inputs; maximum level of output; combination of products; economics of size; partial budget analysis.
2. **MARKET ECONOMICS**: Basic concepts in demand and price analysis; supply and demand for fish; elasticity of demand (price elasticity of demand, income elasticity of demand, cross elasticity of demand).

UNIT – II

3. **ECONOMICS AND FINANCING OF AQUACULTURE** : Economic viability; assets and liabilities; cost-return analysis; production costs-variable and fixed costs; operating income; evaluation of farm performance; sensitivity analysis; minimum farm size; gross revenue.
4. Economic feasibility of investment analysis; methods of feasibility analysis – the payback method, net present value method, average rate of return, discounting method; benefit – cost ratio; internal rate of return; cash flow analysis; socio-economic analysis; risk and insurance.
5. Economics of carp, prawn and shrimp breeding farms and production farms.
6. Role of banks, central organizations and other funding agencies in the growth and development of aquaculture.

UNIT – III

7. **FARM MANAGEMENT**: Concepts of economic principles of farm management; application of farm management principles in aquaculture.
8. **MARKETING** : Economics of fish markets; marketing and resource management; co-operatives and their importance in fish production and marketing; export oriented growth policies; fisheries projects and fish resources; institutional and management issues; planning and financing schemes for fisheries; legal and environmental issues.
9. **FISHERIES EXTENSION**: Extension education-objectives and principles; role of extension in community development; rural development strategies – programmes for weaker sections of the community; fisheries as a tool in rural development; extension strategies and methodologies; employment generation.

UNIT – IV

- 10. **REMOTE SENSING:** Utility of remote sensing techniques for the identification of suitable grounds for aquaculture and for obtaining data on geographical information system (GIS); role of remote sensing in the assessment of aquatic pollution.
- 11. **ASSESSMENT OF ENVIRONMENTAL HAZARDS AND IMPACTS OF AQUACULTURE :** Concept of clean environment; impact of fish farming on the aquatic ecosystem; impact of fish farming on socio-economic and socio cultural environment; effects of aquatic pollution on fish farming; environmental impact assessment studies (EIA); ecofriendly technologies in aquaculture.

SUGGESTED READING :

H-High-3, M- Medium-2, L- Low-1

SKILL ORIENTED COURSE - 3 (B) - AQC 205 : LIMNOLOGY

COURSE OBJECTIVE

To enable the students to

- 1. Acquire knowledge on dynamics of lentic and lotic environments
- 2. Understand classification of planktons
- 3. Know aquatic plants
- 4. Understand artificial enrichment

UNIT-I

1. **Introduction to limnology:** inland water types, their identities and distribution; ponds and lakes; streams and rivers; dynamics of lentic and lotic environments.

2. **Lakes** - their origin and diversity. Famous lakes of the world and India; nature of lake environment; morphometry, physical and chemical conditions and related phenomena;

UNIT-II

3.**Biological relations:** influence of physical and chemical conditions on living organisms in inland waters. Plankton: planktonic organisms; classification of plankton;Distribution of plankton: geographic, vertical, horizontal and seasonal distribution of phytoplankton and zooplankton: seasonal changes of body form in planktonic organisms; food of planktonic organisms. Primary productivity;

UNIT-III

4.**Aquatic plants:** character, classification, zonation, seasonal relations, quantity produced chemical composition distribution in different waters, limnological role. Nekton: composition, distribution, movements.

5.**Benthos:** classification; periphyton; zonation; distribution; movements and migration; seasonal changes in benthos, profundal bottom fauna.

UNIT-IV

6.Biological productivity: circulation of food material; classification of lakes based on productivity; laws of minimum; biotic potential and environmental resistance; quantitative relationships in a standing crop; trophic dynamics; successional phenomena; indices of productivity of lakes; artificial enrichment.

7.Lotic environments: running waters in general; physical conditions; classification of lotic environments, biological conditions; productivity of lotic environments. influence of currents; plant growth; plankton; nekton; benthos; temporary and head waters streams; ecological succession.

SUGGESTED READING :

SKILL ORIENTED COURSE - 4 (A)- AQC 206 : FISH PROCESSING TECHNOLOGY

COURSE OBJECTIVE

- To enable the students to
1. Understand the Chemical composition of fish and shell fish
2. Know the principles and working application of fish preservations and package
3. Ac quire knowledge on different types of aquaculture freezers
4. Knowledge on processing of low cost fish and by products.

UNIT-I

1.Chemical composition of fish and shellfish: moisture, protein, fat, carbohydrates, ash etc.
Microbiology of fresh and processed fish: Morphology of bacteria: growth and reproduction of bacteria: effect of environmental factors like temperature, pH, oxygen, moisture, etc.

UNIT-II

2.Common bacteria present in fish; identification and isolation. Bacteria of sanitary significance.

3.Handling of fish: spoilage of fish and shellfish; effect of temperature on fish spoilage, use of ice;

UNIT - III

4.Solid carbon dioxide and liquid nitrogen in fish preservations; containers for packaging and transportation of fish, handling on board fishing vessels and on shore; use of chemical preservatives and irradiation in extending shelf life of fish and shell fish.

5.Canning: Principles of canning; canning materials; handling and preparation of fish and shellfish for canning; spoilage of canned fish; chemical and microbiological spoilage and their prevention.

6.Curing: Salting of fish-principles and practices; pickling; smoked fish; spoilage of cured fish.

UNIT-IV

7.Freezing of fish: Techniques of freezing; different types of freezers; changes during freezing and storage of fish; effects of freezing on proteins, lipids and bacteria, spoilage of frozen fish and shellfish; denaturation of proteins, lipid hydrolysis; fat oxidation, protection of frozen fish; glazing and wrapping; use of anti-oxidants; thawing of frozen fish, double freezing of fish; storage, transportation and distribution of frozen fish, industrial methods of freezing fish and shellfish; production and freezing of fish fillets, minced meat and fish fingers.

8.Byproducts: processing of low cost fish, minced meat, fish oil, fish meal, fish sausages, isinglass, glue, fish silage, chitosan, chitin pearl essence, alginates, agar and corals.

Text Books:

H-High-3, M- Medium-2, L- Low-1

SKILL ORIENTED COURSE - 4 (B) - AQC 206:POLLUTION AND TOXICOLOGY

COURSE OBJECTIVE

- To enable the students to
- 1. Ac quire knowledge on methods of toxicity testing factors
 - 2. Understand marine environment sewage pollution
 - 3. Understand Heavy metal pollution
 - 4. Verify Oil pollution ,biological impacts

UNIT-I

1.Marine Pollution:definition- role of GESAMP- major pollutant- sources, transport path, dynamics. Toxicology- lethal and sub lethal effects of pollutants to marine organismsbioconcentration, bioaccumulation and biomagnifications- methods of toxicity testingfactors influencing toxicity- synergistic and antagonistic effects- role of microcosms and mesocosms.

UNIT II

2.Sewage pollution industrial: agricultural and domestic impact on marine environment, treatment methods. Detergents- composition- eutrophication and ecological significance- Plastics and Litter source and impact in the marine environment.

UNIT III

3.Heavy Metal pollution: sources, distribution, fate- analytical approaches; Pesticide pollution classification, sources, distribution, fate and ecological impacts with special reference to marine fishes, birds and mammals.

UNIT- IV

4.Oil Pollution: composition, sources, biological impacts on fishes, birds, mammals, treatment techniques. Thermal pollution- sources - uses of waste heat role of biocides, chlorine ecological impacts. Radioactive pollution- sources (natural and artificial) biological effects of radiation.
5.Environmental monitoring methods for critical pollutants-objectives status limitations biological indicators - natural bioaccumulations (mussel watch water quality assessment. Use of analytical instruments AAS, ICP, GLC, Spectrofluorometer for analyzing Petroleum hydrocarbon, Pesticides, Heavy metals etc.

Text Books

1. Clark R.B 1992. *Marine pollution* 3rd edition Clavendron, Press Oxford.
2. Williams 1996. *Introduction to Marine Pollution Control*. John Wiley.
3. Michael J. Kennish 1994. *Practical Handbook on Estuarine and Marine Pollution*.

Reference Books

1. Johnston, R. (ed), 1976. Marine Pollution, Academic Press, London.

H-High-3, M- Medium-2, L- Low-1

PRACTICAL – II

PRACTICAL – IV - AQC 207: PHYSIOLOGY OF FINFISH AND SHELLFISH

1. Effect of size, sex and salinity on oxygen consumption.
2. Effect of eyestalk ablation on oxygen consumption in crab.
3. Estimation of excretory ammonia.
4. Collection and preservation of pituitary gland in fish
5. Induced breeding in fish through hypophysation.
6. Estimation of haemolymph chlorides with reference to salinity in crab.
7. Effect of thyroxine on fish growth.
8. Determination of fish age.
9. Estimation of gonado somatic index and fecundity in fish

OOTC – AQC : 208: OPEN ONLINE – TRANSDICIPLINARY COURSE – 1

III SEMESTER

CORE COUSE- 7 – AQC 301: MICROBIOLOGY AND FISH PATHOLOGY

COURSE OBJECTIVE

To enable the students to

- 1. Understand the Principles and scope of Microbiology
- 2. Classify Microbiology and Fish Pathology
- 3. Summarize Food Microbiology, Organize Fish farming and public health techniques
- 4. Examine Diseases and Nutritional Deficiency diseases in Aquaculture

UNIT – I

1.INTRODUCTION TO MICROBIOLOGY: Scope and definition; major groups of microorganisms and their characteristics; classification and identification of microorganisms; fine structure, morphology and culture characteristics of bacteria and viruses.

UNIT – II

2.SOIL AND AQUATIC MICROBIOLOGY: Study of role of microorganisms in soil and water; soil and water probiotics and their importance.

3. FOOD MICROBIOLOGY: Role of microorganism’s in preservation and spoilage of fishery products and food stuffs.

UNIT – III

4.VIRAL AND BACTERIAL DISEASES IN FINFISH AND SHELLFISH: Causes, symptoms, diagnosis, prophylactic and therapeutic measures.

5. PROTOZOAN AND FUNGAL DISEASES: Causes, Symptoms, diagnosis and preventive measures.

UNIT – IV

6.CRUSTACEAN AND HELMINTH PARASITES IN FISH: Diseases caused by isopods and leannea; diseases caused by dactylogyrus and monocoelium; trematode larvae, nematodes and fish leeches – clinical picture, symptoms and prophylaxis.

7.Tumours in fish – Epitheliomas and fibroepitheliomas, epithelioma papulosum; papillomas; adenomas; carcinomas; hepatoma and melanosarcomas.

8.NUTRITIONAL DEFICIENCY DISEASES: Metaboli disturbances; vitamin deficiency; gastritis and enteritis; aflatoxins in feed.

9.ENVIRONMENTAL STRESS DISEASES: Lack of oxygen; gas bubble disease; pH; acidosis and alkalosis; intoxications; hydrocyanic acid, free chlorine, metals, phenol and temperature, disturbances.

10.Fish farming and public health; techniques of curative baths and mass injections.

SUGGESTED READING :

CORE COURSE -8 (A) - AQC 302: FISH IMMUNOLOGY

COURSE OBJECTIVE

To enable the students to

1. Acquire knowledge on fish immunity
2. Understand the structure and functional aspects, Immunoglobulin
3. Know the principles and working application of Immuno diffusions
4. Comprehensive knowledge on Immunising fish

UNIT – I

1. **IMMUNE SYSTEM IN FISH:** Innate & acquired immunity- Advanced, primitive and unique features; specific and non-specific defence mechanisms.
2. **LYMPHOID SYSTEM IN FISH :** Stem cells, thymus, spleen, head, kidney and other lymph glands; lymphocyte subpopulation in fish

UNIT – II

3. Antigen - Types - Heptanes, Ag - Ab interactions
4. **IMMUNOGLOBULIN:** IgM structure and functional aspects; other Igs; Ig mediated immunity; antibody diversity.
5. **COMPLEMENT SYSTEM :** Classical & alternative

UNIT – III

6. **NON IG MEDIATED HUMORAL IMMUNITY:** Antigrowth factors, antienzymes, lysins, complement (properdin path way); agglutinins and opsonins.
7. **CRUSTACEAN IMMUNE SYSTEM**
8. **CELL MEDIATED IMMUNITY:** MHS class I & II, allograft rejection; anaphylactic hypersensitivity; delayed type hypersensitivity, lymphokines. Antibody probes in diagnosis of fish diseases & immunodiagnostic kits.

UNIT – IV

9. **IMMUNOTECHNOLOGY:** Immunodiffusions, immuno electrophoresis, radio immunoassay, ELISA, MLR, Hybridoma technique, immunoblotting.
10. **CONCEPT OF IMMUNISING FISH:** Vaccines and immunostimulants in fish adjuvants; features of vaccine development; vaccine delivery systems; identification of disease problems and potential vaccines; case study describing vaccination for furunculosis; commercial considerations. Management of aquacultural practices through immunological approach.

SUGGESTED READINGS :

1. Nandini Shetty. 2000. **Immunology: Introductory Text Book** - New Age International (p) Ltd., Chennai.
2. Karunasagar, I. 1999. **Aquaculture and Biotechnology**. Oxford IBH Publishers
3. Goldsby. R.A., J. K. Thomas and B. A. Barbara, 2000. **Kuby Immunology**, IVth Edn., W. H. Freeman and Co., New York.
4. **Fish & Shell Fish Immunology**. 1992. Vol. 2, No.1, Academic press.
5. Kimbell, E. 1988. **Fundamentals of Immunology**.

COURSE OUT COMES

To enable the students to

CO1 Understand the Immunity system in fish

CO2 Acquire knowledge on Immunoglobulin structure and functions

CO3 Creating awareness on Humoral immunity, Crustacean immune system and cell mediated immunity

CO4 Knowledge on Immuno technology and concept of immunizing fish

CO-PO MAPPING

CORE COURSE -8 (B) - AQC 302 : FISH BREEDING AND HATCHERY MANAGEMENT

COURSE OBJECTIVE

To enable the students to

- 1. Understand the life cycle of important shell fishes
- 2. Know Induced maturation in penaeus monodon by eye stalk ablation
- 3. Knowledge on reproductive hormones in crustaceans
- 4. Understand health management hatcheries

UNIT-I

1.Natural seed resources, site selection and collection methods. Life cycle of important shellfish (*Penaeus monodon*, *P. vannamei*, *Macrobrachium rosenbergii*, *Scylla serrata*, lobster, edible, oyster, pearl oyster, fresh water mussel, holothurians, sea horse, horse-shoe carb, Sepia, Loligo, cray fish etc.).

UNIT-II

2.Sexual maturity and breeding seasons of different species. Maturation stages of *Macrobrachium rosenbergii* and *Penaeus monodon*.

3.Induced maturation in *Penaeus monodon* by eye stalk ablation;

UNIT-III

4.Reproductive physiology. Reproductive harmones in crustaceans; Brood stock management of *Penaeus monodon*, *P. vannamei* and *Macrobrachium rosenbergii*.

UNIT-IV

5.Breeding and hatchery management of *Penaeus monodon* and *Macrobrachium rosenbergii*. Breeding and hatchery management of crabs and bivalves. Food and feeding of larval stages of important shellfishes. Health management in hatcheries.

COURSE OUT COMES

After completion of this course, students

CO1. Understand the Natural seed resources

CO2.Acquire knowledge on Sexual maturity and breeding seasons of different species

CO3. Creating awareness on Reproductive physiology, Reproductive harmones in crustaceans

CO4. Knowledge on Breeding and hatchery management of penaeus monodon and Macrobrachium rosenbergii

CORE COURSE -9 (A) - AQC 303 : CELL BIOLOGY AND GENETICS

COURSE OBJECTIVE

To enable the students to

1. Acquire knowledge on physicochemical basis of heredity
2. Understand the principles of genetic rationale in fish breeding
3. Acquire knowledge on Natural hybridization in fishes and Genetic diversity in fishes
4. Knowledge on sex chromosomes in fishes

UNIT – I

1. STRUCTURE OF PROKARYOTIC AND EUKARYOTIC CELLS: ultra-structure of animal cell; cell differentiation in animal cells. Structural organization of plasma membrane; membrane protein, cytoskeletal proteins; types of cell functions – transport of nutrients, osmosis and active transport.

2. CELL ORGANELLES: Organization and functions of endoplasmic reticulum, golgi complex, lysosomes, mitochondria, ribosomes, nucleus, and vacuoles.

UNIT – II

3. CHROMOSOMES: Structural organization, nucleosomes, chromonema, euchromatin, heterochromatin, centromere, kinetochore, telomeric organization.

4. Cell cycle, mitosis and meiosis; cell senescence and death.

UNIT – III

5. PRINCIPLES AND PHYSICO CHEMICAL BASIS OF HEREDITY: Phenotype and genotype, chromosomal basis of heredity; Mendel's laws of inheritance, **mutations** – types of mutations, molecular basis of mutation and its importance, chemical and physical mutagens, site directed mutagenesis.

6. GENETIC RATIONALE IN FISH BREEDING: Random genetic drift, inbreeding, measures to prevent random genetic drift and inbreeding; selective breeding programmes - selection of species and traits, choice of breeding strategy, methods of selection and evaluation of selection response, impacts of selective breeding programmes on aquaculture productivity.

UNIT – IV

7. Natural hybridization in fishes, consequences and evolutionary impacts of hybridization; artificial hybridization – hybridization in Indian carps and Chinese carps. Genetic diversity in fishes – natural genetic variation in fishes, stock concept, measuring genetic variation, importance of genetic diversity; threats to fish genetic diversity – fishing pressure, physical modification of habitat and pollution load, introduction of exotic fishes; genetic management of natural fish populations – goals and tasks and conservation approaches.

8. CYTOGENETICS OF FISHES : Chromosome preparation, staining of chromosomes, chromosome banding techniques (NOR banding, C-banding, G and R banding, Fluorescence *insitu* hybridization), trends in karyotype evolution, sex chromosomes in fishes.

SUGGESTED READING :

6. H. Lodish, A. Berk, S. L. Zipursky, P. Matsudaria, D. Baltimore and J. Damell. **Molecular Cell Biology**. W. H. Freeman & company, New York.

COURSE OUT COMES

After completion of this course, students

CO1 Understand the structure of prokaryotic and eukaryotic cells and cell organelles

CO2 Acquire knowledge on Chromosomes and Cell cycle

CO3 Creating awareness on Genetic rationale in fish breeding and physico chemical basis of heredity

CO4 Knowledge on Natural hybridization and cytogenetics of fishes

H-High-3, M- Medium-2, L- Low-1

CORE COURSE -9 (B) - AQC 303: BIOINFORMATICS IN AQUACULTURE

COURSE OBJECTIVE

To enable the students to

1. Understand bioinformatics applications in aquaculture
2. Acquire knowledge on application of genetic maps
3. Comprehensive knowledge on automated tools for phylogenetics analysis
4. Understand applications of microarray technology

UNIT - I

- 1. BIOINFORMATICS AN OVERVIEW:** Definition and objectives of bioinformatics, major bioinformatics databases, data integration and data analysis, molecular biology and bioinformatics, central dogma of molecular biology, important definitions related to central dogma and overview of bioinformatics applications.
- 2. INFORMATION SEARCH AND DATA RETRIEVAL:** Introduction, tools for web search, data retrieval tools, data mining of biological data bases.

UNIT – II

- 3. GENOME ANALYSIS AND GENE MAPPING:** Genome analysis, gene mapping, sequence assembly problem, genetic mapping and linkage analysis, physical maps, cloning the entire genome, genome sequencing, applications of genetic maps.
- 4. TOOLS FOR SIMILARITY SEARCH AND SEQUENCE ALIGNMENT:** Fasta, Blast, Filtering and gapped BLAST, PSI – BLAST, Comparison of running time for various programmes.

UNIT – III

- 5. ALIGNMENT OF PAIRS OF SEQUENCES:** Introduction, biological motivation of alignment problems, methods of sequence alignments, using scoring matrices, measuring sequence detection efficiency.
- 6. ALIGNMENT OF MULTIPLE SEQUENCES :** Introduction, methods of multiple sequence alignment, evaluating multiple alignments; phylogenetic analysis – methods of phylogenetic analysis, tree evaluation, problems in phylogenetic analysis, automated tools for phylogenetic analysis.

UNIT – IV

- 7. GENE IDENTIFICATION AND PREDICTION:** Introduction, basis of gene prediction, pattern recognition, gene prediction methods, other gene prediction tools.
- 8. GENE EXPRESSION AND MICROARRAYS:** Introduction, working with DNA microarrays, clustering gene expression profiles, data sources and tools for microarray analysis, applications of microarray technology.
- 9. GENERAL APPLICATIONS OF BIOINFORMATICS IN AQUACULTURE.**

SUGGESTED READINGS :

PRACTICAL – V – AQC 304: MICROBIOLOGY AND FISH DISEASES

1. Preparation and sterilization of microbial media.
2. Quantitative determination of microorganisms by dilution plate technique.
3. Staining methods of microorganisms.
4. Antibiotic sensitivity.
5. Collection and Preservation of Diseased Fish.
6. External & Internal examination of diseased finfish and shellfish.
7. Maceration and squash preparation of organs and microscopic observation.
8. Identification of disease causing microbes.
- 11 Identification of various diseases in finfish and shellfish
- 12 Preparation of chromosomes from scale and fin epithelium.
- 13 Isolation of DNA from yeast.
- 14 Isolation of RNA from yeast.
- 15 Immunoelectrophoresis.
- 16 Double immunodiffusion.

SKILL ORIENTED COURSE – 5 (A) -AQC: 305 - FISH NUTRITION TECHNOLOGY

COURSE OBJECTIVE

To enable the students to

1. Provide knowledge for sustainable aquaculture
2. Provide the students on field exposure to help them in understanding the Aquaculture practices. Effective utilization of aquatic and land resources.
3. Provide the learners an experience in research for Aquaculture production.
4. Enhancing skills of rural youth commercial fish farming and increasing their entrepreneurship opportunities, Providing means of livelihood through commercial and industrial aquaculture.

UNIT-I: FISH NUTRITION AND FEED TECHNOLOGY

1: Nutritional requirements of cultivable fish and shellfish. Forms of feeds: wet feeds, moist feeds, dry feeds, mash, pelleted feeds, floating and sinking pellets. Feed additives: binders, antioxidants, enzymes, pigments, growth promoters, feed stimulants. Feed storage, use of preservatives and antioxidants.

2: Feed evaluation - feed conversion ratio, feed efficiency ratio, protein efficiency ratio, net protein utilization and biological value.

UNIT – II

3.: Feeding devices and methods. Non-conventional feed ingredients and anti-nutritional factors. Digestive enzymes, feed digestibility. Factors affecting digestibility. Nutritional deficiency diseases.

UNIT- III: FEED MANAGEMENT&ECONOMICS

4.: Feed Manufacture: Feed formulation and processing, On-farm feed manufacture, Commercial feed manufacture, Feed storage

5.: Feeding Practices: Supplementary feed-theory and practice, Complete diet - theory and practice, Feeding methods and scheduling, ration size, feed performance and economics. culture and use of different live feed in shellfish hatcheries, Aquarium fish feeds

UNIT- IV:

6. Introduction to fisheries economics, Farm production economics – production functions in capture and culture fisheries; Costs and returns – breakeven analysis of fish production system; factors of production, marginal cost and return, law of diminishing marginal return, returns to scale, economies of scale and scope, Revenue, profit maximization, measurement of technological change, farm planning and budgeting.

Course Outcome:

On successful completion of the course, students will be able to:
CO1 Employment in specific area, Expand research ability
CO2 Get the knowledge of different types of Aquaculture practices
CO3 Build up capability in self-employment and income generation
CO4 Apply for various Governments, Non-Government Schemes for establishing an independent aquaculture farm.

AQC 305 - Skill Oriented Course – 5(B) - SEED PRODUCTION AND HATCHERY MANAGEMENT

Course Objective:

To enable the students to

- 1.To provide knowledge on seed production and hatchery management of fin fish and shell fish.
- 2.To understand the basic concepts of brood stock management and seed production of fin fish and shell fish.
- 3.To learn about the wild seed collection methods and nutritional requirements of larval forms.
- 4.Attain knowledge on hatchery management.

UNIT I

1.Brood stock management of finfish and shellfish: Brood stock availability, transport, captive rearing and maturation, nutritional requirements, improvement, SPF and SPR brood stock certification.

UNIT II

2.Wild seed collection methods - mullets, milkfish, seabass, shrimps,crabs,lobsters,oysters,pearl-oysters,musselsandseaweeds.Induced breeding: Methods of natural and artificial fertilization, synthetic hormones and its analogues, and its applications.

UNIT III

3.Hatchery management of mullets, milkfish, seabass, shrimps, crabs ,lobsters, oysters, pearl-oysters, mussels and seaweeds.

UNIT IV

4.Nutritional requirements of finfish and shellfish larvae: live feeds - *Spirulina*, micro algae, Artemia and artificial feeds - micro encapsulated feeds, pellets& flakes. Harvesting, packaging and transport of fish and shrimp seed. Seed quality management: Testing and certification. Marketing and economics of seed production.

SKILL ORIENTED COURSE – 6(A) -AQC: 306: COMPUTER APPLICATIONS, INFORMATION TECHNOLOGYAND BIostatISTICS IN AQUACULTURE
COURSE OBJECTIVE

To enable the students to

1. Understand the classification of computers
2. Knowledge on computer application
3. Understand the scope of Biostatistics in aquaculture
4. Understand the statistical analysis in research

UNIT- I

1.INTRODUCTION TO COMPUTER

History of computers, classification of computers, computer generations; Input, output processing and storage devices – Floppy disk, hard disk, CD-ROM, DVD. Operating system – types of operating systems – MS DOS, WINDOWS; MS – ACCESS, FOXPRO.

UNIT- II

2.COMPUTER APPLICATIONS

Computer Graphics – graphic generation methods, uses of computer graphics, graphic forms; Internet access tools, Web searching, e-mail, File Transfer Protocol 9 FTP); Word processing and presentation software MS-WORD and MS- POWERPOINT, MS – EXCEL; Use of commonly available statistical packages, such as SPSS ANOVA etc.

UNIT – III

3. INTRODUCTION AND SCOPE OF BIOSTATISTICS

Definition and scope, collection, tabulation and presentation of data; measures of central tendency – mean, median and mode; measures of dispersion, mean deviation, standard deviation, co- efficient of variation; curve fitting; correlation and regression.

UNIT – IV

4. STATISTICAL ANALYSIS:

Normal probability distribution and its applications; students t- test; correlation coefficient; regression co-efficient; F-distribution; X² distribution; analysis of variance (ANOVA);Probit analysis.

SUGGESTED READINGS :

SKILL ORIENTED COURSE – 6 (B)-AQC: 306: FISHING TECHNOLOGY AND FISHERY MANAGEMENT

Course objectives :

- To enable the students to
- 1.To understand the fishing crafts and gear.
2. To understand the methods of stock assessment
3. To understand the potential fishing zones
- 4.To understand the principles of fishery management.
- 5.To understand the effects of over exploitation.
6. To get knowledge on modern navigation equipment.

Unit – I

- 1.Evolution of Fishing craft: boat types and their classification. Boats used in India.
- 2.Evolution of Fishing gear: Classification of fishing gear; Descriptions of hand-line, troll line and pole line. Description, design and fabrication of trawl nets, purse-seine and gill nets.

Unit – II

3.Pelagic, demersal and deep sea fishing, By catch reduction in trawl fishing, Turtle Excluder 4.Devices. Stock assessment: Collection of basic data; stock size, yield models (Methods).

Unit – III

5.Fishing regulations: Potential fishing zones, code of conduct for responsible fishing, duration of fishing output control measures,

Unit – IV

6.Total available catch, catch quotas, licensing, technical control measures such as size limitations, closed fishing areas, closed seasons, size of nets and mesh size regulations, limited entry. The effects of exploitation: The over-fishing problem, Management techniques. Modern navigation equipment life saving devices (Buoy, jacket, raft, SART, EPIRB, SCUBA).

Commercial fishing methods

Course outcomes (CO):
On successful completion of the course, students will be able to:

- CO1.Acquire knowledge on fishing crafts and gears used in India and their fabrication.
- CO2.Obtain knowledge on fish stock assessment.
- CO3.Acquire knowledge on identification of potential fishing zones.
- CO4.Acquire knowledge on fishery management practices in India.
- Gain knowledge on modern navigation equipment and their uses in marine environment.
- Student could able to conduct fishery survey and identified potential fishing zones.
- Able to monitor fishing regulations and fishery management. Able to get employment in fishery sector.

PRACTICAL – VI – AQC : 307

AQUACULTURE BIOTECHNOLOGY AND BIOSTATISTICS

1. DNA Electrophoresis.
2. Estimation of DNA by Diphenylamine reaction.
3. Determination RNA by orcinol method.
4. Separation of protein through Electrophoresis (PAGE).
5. Separation of eyestalk peptides through HPLC.
6. Absorption spectrum of DNA.
7. Calculation of mean, median mode.
8. Calculation of standard deviation and coefficient of variation.
9. Calculation of Correlation co-efficient.
10. Fitting of regression lines.
11. Application of F-test.
- 12.Diagrammatic representation of statistical data.
13. Estimation of digestive enzymes in fish tissues (Amylase, Protease and Lipase)

AQC: 308 OPEN ELECTIVE - GENERAL PRINCIPLES AND PRACTICES OF AQUACULTURE

COURSE OBJECTIVE

To enable the students to

- 1. Understand types of culture systems in aquaculture
- 2. Acquire knowledge on aquatic weeds
- 3. Understand induced breeding and seed fish production
- 4. Determined culture of Indian major carps

UNIT – I

- 1. Definition of Aquaculture: Types of culture, pond preparation and selection of species for culture.
- 2. Control of aquatic weeds and predators; management of fish ponds.

UNIT – II

- 3. Induced breeding and seed fish production in carps; transport of seed fish and breeders.
- 4. Food and feeding in fish - live feed and artificial feeds.
- 5. Measurement of growth : Length - weight relationship; determination of age in fishes; growth hormones

UNIT – III

- 6. Culture of Indian major carps and air breathing fishes.
- 7. Culture of shrimp and prawn.
- 8. Integrated fish farming; aquarium fish and their maintenance.

UNIT – IV

- 9. Bacterial and viral diseases of fish - causes, symptoms diagnosis and control measures.
- 10. Protozoan and fungal diseases and their control.

SUGGESTED READINGS :

COURSE OUT COMES

- CO1. Understand the Definition of Aquaculture
- CO2. Acquire knowledge on Induced breeding and seed fish production in carps
- CO3. Creating awareness on Culture of Indian major carps
- CO.4 Knowledge on Bacterial , viral , Protozoan and Fungal diseases

CO-PO MAPPING

IV - SEMESTER

SKILL DEVELOPMENT COURSE – 1 (A)-AQC: 401: AQUACULTURE BIOTECHNOLOGY

COURSE OBJECTIVE

To enable the students to

1. Understand structure and replication of DNA
2. Acquire knowledge on Hormonal manipulation of genetic sex
3. Comprehensive knowledge on techniques of analysing the PCR in biotechnology and genetic engineering.
4. Acquire knowledge on Bioactive compounds from marine organisms and cryopreservation of gametes.

UNIT – I

1. **Structure and replication of DNA:** Principles of DNA isolation; DNA blotting
2. **DNA :** Transcription and translation

UNIT – II

3. **CHROMOSOMAL ENGINEERING:** Genome manipulation, polyploidy, gynogenesis, androgenesis, method of chromosomal manipulation, Induction of ploidy and evaluation.
4. **Hormonal manipulation of genetic sex,** strategy of sex reversal, management of hormone treatment, biological effects of sex reversal, integrated approach. Transgenic fish, candidate genes for transfer, making gene constructs, mechanism of gene transfer, characterization of transgenic fish, potential hazards and benefits.

UNIT – III

5. **Recombinant DNA and gene cloning** – cloning vectors for recombinant DNA, restriction enzymes for cloning, cloning in bacteria and eukaryotes, construction and screening of genomic and cDNA libraries.
6. **Polymerase chain reaction and gene amplification** - basic PCR and its modifications; applications of PCR in biotechnology and genetic engineering- DNA polymorphism, DNA fingerprinting, Nucleotide probes, mapping and gene sequencing: RAPD, RFLP. DNA bar-coding.

UNIT – IV

7. **PHARMACOLOGY:** Prospects – Bioactive compounds from marine organisms: Biomedical potential of marine natural products isolation and mode of action. Eicosonoids and related compounds from marine algae. Antitumour and cytotoxic compounds from marine organisms.
8. **Cryopreservation of gametes:** Implications of cryopreservation in Aquaculture. Bioremediation: Types of bioremediation and their importance; Role of Probiotics in Aquaculture.

SUGGESTED READINGS :

1. K. Padhi & R. K. Mandal, **Applied Fish Genetics**. Fishing Chimes, Vishakapatnam.
2. P. S. Verma & V. K. Agarwal, 1999. **Concepts of Molecular Biology**, S. Chand Company Ltd, New Delhi.
3. Cherfas, N. B. 1981. Gynogenesis in fishes. **In : Genetic bases of fish selection**. (Ed. Kirpichnikov, V. S.), Springer-Verlag, Berlin, pp. 255 – 273.
4. Hackett, P. B. 1993. **The molecular biology of transgenic fish**. **In : Biochemistry and Molecular Biology of Fish**, (Eds. Hochachka, P., Mommsen, T.) Vol. 2, Elsevier Science Publishers, Amsterdam, pp. 207 – 240.
5. Leung, L. K. P. and Jamieson, B. G. M. 1991. **Live preservation of fish gametes**. **In : Fish Evolution and Systematics : Evidence from spermatozoa** (Ed. Jamieson, B. G. M.) pp. 245 – 295, Cambridge University Press.
6. Old, R. W. and Primrose, S. B. 1994. **Principles of gene manipulation : An introduction to genetic engineering**, Blackwell Scientific Publications, Oxford.
7. Balasubramanyam, D. et al. 1998. **Concepts in Biotechnology**, University Press.
8. Gupta, P. K. 1999. **Elements of Biotechnology**, Rastogi Publications, Meerut.
9. David H. Attaway and R. Oskar, 1993. **Marine Biotechnology**. Vol. I **Pharmaceutical and Bioactive Natural Products**. Plenum Press, New York & London, 500pp.
10. Milton Fingerman. R. Nagabushanam and Man' – Frances Thompson, 1999. Recent Advances in **Marine Biotechnology**, Vol. I – 514pp. Vol. 2 – 313 pp. Vol. 3 – 312pp.
11. Ranga, M. M. 1999. **Animal Biotechnology**, Agrobios, Jodhpur, New Delhi.
12. Karunasagar, **Aquaculture and Biotechnology** (for chapters 11 & 14). Ranga and Shammi . 1999. **Fish Biotechnology**

COURSE OUT COMES

After completion of this course, students

CO1 Understand the Structure and replication of DNA
 CO2 Acquire knowledge on Chromosomal Engineering
 CO3 Creating awareness on Recombinant DNA and gene cloning
 CO4 Knowledge on Pharmacology

CO-PO MAPPING

POS COS	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12

H-High-3, M- Medium-2, L- Low-1

SKILL DEVELOPMENT COURSE AQC- 401 - Paper –1 (B) FINFISH AND SHELL FISH PATHOLOGY

UNIT - I

- 1. Fish Diseases:** History, species affected, Clinical symptoms, pathology and control measures of Viral Hemorrhagic Septicemia (VHS) and Infectious Hematopoietic Necrosis (IHN).
- 2. Shrimp Diseases:** History, species affected, Pathology, clinical symptoms, prevention and treatment of Monodon Baculoviral disease (MBV), Infectious Hypodermal and Hematopoietic Necrosis (IHHN), Hepato Pancreatic Parvovirus disease (HPPV), Yellow-head virus disease, Taura syndrome and White spot syndrome.

UNIT – II:

- 3. Fish Diseases:** History, species affected, Clinical symptoms, pathology, prevention and control measures of Bacterial Hemorrhagic Septicemia (BHS), Bacterial gill disease and Tail and fin rot.
- 4.** Pathology, clinical symptoms, prevention and control measures of Saprolegniasis and Branchiomycosis.
- 5. Shrimp Diseases:** History, species affected, Clinical symptoms, pathology, prevention and control measures of Black gill disease, Filamentous bacterial gill disease.
- 6.** History, species affected, Clinical symptoms, pathology, prevention and control measures of *Lagenidium* disease (Larval Mycosis) and Brown gill disease.

UNIT – III:

- 7. Fish Diseases:** History, species affected Clinical symptoms, pathology and control measures of Ichthyophthiriasis, Enterococcidiasis, Whirling disease and Nodular disease.
- 8.** History, species affected Clinical symptoms, pathology and control measures of Gyrodactylosis and Dactylogyrosis.
- 9.** History, species affected Clinical symptoms, pathology and control measures of Argulosis and Lernaesis.
- 10. Shrimp Diseases:** History, species affected, History, Etiology, morphology and control measures of Zoothamnium and Acineta.

UNIT – IV:

- 11. Fish Diseases:** History, species affected clinical symptoms, pathology and control measures of gas bubble disease and lack of oxygen.
- 12.** History, species affected, clinical symptoms, pathology, prevention and control measures of Epizootic Ulcerative syndrome.
- 13. Shrimp Diseases:** History, species affected Clinical symptoms, pathology and control measures of cramped tails, and Blue shell syndrome.
- 14.** History, species affected, Clinical symptoms, pathology and control measures of Muscle Necrosis, Gas bubble disease, Black death disease and Chronic soft shell syndrome.

SKILL ORIENTED COURSE-AQC: 401 -2 (A) ESSENTIALS OF BIOCHEMISTRY

COURSE OBJECTIVE

To enable the students to

- 1.Acquire knowledge on structure and function of biomolecules
- 2.Understand enzyme classification and their factors
- 3.Attain knowledge on vitamins and minerls
- 4.Understand bioenergetics models and energy budget

UNIT – I

1. BIOMOLECULES

A brief account of structure and function of protein, lipid and carbohydrate.

UNIT – II

2. ENZYMES

Nomenclature and classification; chemical nature of enzymes; coenzymes, properties of enzymes, factors affecting enzyme activity.

UNIT – III

3. METABOLISM

Interconversions of protein, lipid and carbohydrates; A general account of vitamins and minerals and their importance.

UNIT – IV

4. BIOENERGETICS

Definition and scope; bioenergetics model; structure of an energy budget; components of the energy budget – measurement of components; faecal losses – the absorption efficiency; excretory loses– the assimilation efficiency; metabolic loses; effects of environmental factors on metabolism – temperature, salinity, oxygen and other abiotic factors; examples of energy budgets.

SUGGESTED READINGS :

1. Furton, H. S. and S. Simonds. 1958. **General Biochemistry**. John Wiley and Sons, New York.
2. Murray et. al. 2002. **Harper's Biochemistry** 25th Edn, Mc Grew Hill.
3. Nelson, D. L. and Cox, M. M. 2000. **Lehninger Principles of Biochemistry**. MacMillan Worth Publishers.
4. Robert J. Wootton. 1991. **Ecology of Teleostean Fishes**. Chapman & Hall.
5. Sibly, R.M. and Calow, P.1986. **Physiological Ecology of Animals**. Blackwell, Oxford.

COURSE OUT COMES

After completion of this course, students

CO1 Understand the Biomolecules
 CO2 Acquire knowledge on Enzymes
 CO3 Creating awareness on Metabolism
 CO4 Knowledge on Bioenergetics
 CO-PO MAPPING

Skill Development Course - 2 (B) RESEARCH METHODOLOGY, BIOINFORMATICS AND BIOSTATISTICS

COURSE OBJECTIVE

To enable the students to

- 1.To know meaning and objectives of research, research design and their significance.
- 2.To Understand and analysis of biological databases
- 3.To understand the application of statistics in biosciences.

UNIT – I

1.RESEARCH METHODOLOGY: RESEARCH METHODOLOGY – Meaning, Aim And Objective Of Research, Significance Of Research, Types Of Research, Research, problem, selecting the problem. Thrust areas in research in Marine sciences and Technology. Research Design. Collection of primary data through different methods.

UNIT – II

2.BIO INFORMATICS: Introduction – Origin of bioinformatics biological data (genome projects), computer and information technology contributions. Disciplines of bioinformatics – Genomics, transcriptomics, proteomics, functional genomics, structural genomics, metabolomics, pharmacogenomics, structural prediction and drug design. Biological database – Introduction of database (DB), need, organization, search of DB. An over view of biological databases – NCBI, EMBI, DDBJ, SWISS – PROT, PDB, AND KEGG – Sequence analysis – concepts of sequence analysis and their importance, BLAST – blastn, blastp, blastx tblastx, output analysis matrix BLOSSUM, PAM e – value.

UNIT – III

3.DATA ANALYSIS: Collection and analysis of biological data – Mean, Median, Mode, Standard Deviation Standard error, coefficient of variation, Simple random sampling, Use of random number tables.

UNIT – IV

4.BIOSTATISTICAL METHODS: Student's t test, Skewness, Kurtosis, Chi – Square test, Z- test, Correlation and Regression, ANOVA, Duncan's Multiple Range Test (DMRT).

REFERENCE BOOKS:

- 1.S.C.Gupta: Fundamentals of Statistics, Himalaya Publishing House Delhi.
- 2.Gupta & Kapoor: Fundamentals of Mathematical Statistics. S. Chand & Co., New Delhi.
- 3.Yule & Kendall: Elementary Statistics, Charles Griffin & Co. London.

COURSE OUT COMES:

On the successful completion of course, students will be able to

CO1: Understand the Research problem selection, design of the research work and the significance .
 CO2: Know the collection and analysis of biological data through statistical tools.
 CO3: Understand about the different bioinformatics tools for analysis of data.
 CO4: Understand the fundamental concepts of biostatistics.

H-High-3, M- Medium-2, L- Low-1

AQC: 402: PROJECT WORK

COURSE OBJECTIVE

To enable the students to

- 1. Effective utilization of aquatic and land resource
- 2. Providing means of livelihood through commercial and industrial aquaculture.
- 3. Provide knowledge for sustainable aquaculture.
- 4. Provide the students on an field exposure to help them in understanding the Aquaculture practices.

AQC 402: PROJECT WORK

Each Student will be under the guidance of a faculty member and the students will put in field oriented research work which mainly consists of visiting to the field for sample collection, farming in fish and prawn culture, hatcheries, processing units, marketing and aquatic diseases analysing in the laboratory. Data collected is compiled and submitted as a dissertation to the department. During viva – voce the students has to present his/ her work to the panel of examiners. The attendance of the student during project work period is considered were they do in Aqua companies / Industries.

COURSE OUT COMES

After completion of this course, students

- CO1 Reproduce knowledge on aquaculture farming
 - CO2 Acquire knowledge on culture and diseases identification
 - CO3 Creating awareness on self – employment
 - CO4 Knowledge on aquaculture by products
- CO-PO MAPPING
