# SRI VENKATESWARA UNIVERSITY BA DEGREE COURSE IN POPULATION STUDIES SEMESTER SYSTEM WITH CREDITS

(Effective from the Academic year 2015-2016)

#### **SYLLABUS**

#### Semester V - Core V - Population Policy -I

#### Unit-I -Theories of Population Growth

- A. Outlines of the different theories with special emphasis on Malthusian
- B. Optimum theories
- C. Demographic transition.

#### Unit - II - Population policy

- A. Meaning and Significance U.N. Approach to population policy
- B. An outline of World Population plan of Action 1974 and Mexico Conference

#### Unit III: Population policy

- A. Population policy in developed countries-USA, USSR, Japan and Sweden
- B. Population Policy in developing countries China, Korea, Srilanka and Singapore.

## Unit - IV -India's Population Policy and Family Welfare programmes and Implementation

- A. India's Population Policy-Genesis. 1976 and 1977 policies
- B. Progress of population control programme in India
- C. Strategies adopted for implementing F.W. programme-incentives/ disincentives, age at marriage; Medical termination of pregnancy.

#### Unit -V -Biology of human reproduction

- A. An elementary knowledge of anatomy and physiology of male and female reproductive organs
- B. Different stages of human development, C. Sexually transmitted diseases.

#### **SYLLABUS**

### Semester V Elective V Population Research Methodology and Population Education -I

#### Unit -I - Research Method

- A. Aim and scope of research
- B. Difference between common sense and scientific research. Need for population research
- C. Steps involved in designing Population research.

#### Unit - II -Collection of data

- A. Meaning of Primary and secondary data and sources of data.
- B. Tools of Primary data: i. Observation ii. Interview iii. Questionnaire iv. Schedule v. Attitudinal scale.

#### Unit -III- Sampling Techniques

- A. Sampling, need of sampling
- B. probability and non probability sampling
- C. Simple random sample, purposive sample.

#### Unit-IV- Variables and Hypothesis

- A. Dependent variable, independent variable, control variable
- B. Definition of Hypothesis, formulation of Hypothesis, null Hypothesis and alternative Hypothesis.

#### **Unit-V - Report Writing**

- A. Synopsis preparation, classification of tables
- B. Chapterization of data
- C. Style of presentation, do's and don'ts of technical report writing

#### **SYLLABUS**

SemesterV - CoreV - Population policy- Practicum-I

Marks:50

### Detailed of Field Study:

A Village Study on Socio-Economic Factors and Family Planning Behaviour

- 1. Identify Eligible Couples.
- 2. Demographically effective couples.
- 3. Target Couples for spacing and terminals methods
- 4. Classify the couples into 1. Adopters, 2. Dropouts and 3. Non-adopters.
- 5. Interview 25 non-adaptors and records the reasons for their non-adoption.
- 6. Interview another 25 adopters and record the factors which motivated them to adopt Family Planning methods.
- 7. Prepare an education and Motivation Plan including A.V. Aids

  Collect from both the adopters and non-adaptors the following information:
  - a. Present age of the respondent and husband.
  - b. Age at marriage of the respondent and husband.
  - c. Record reasons for early marriage of females.
  - d. Education of the respondent and husband.
  - e. Religion and class.
  - f. Occupation of the respondent and husband.
  - g. Annual family income.
  - h. Number of children
  - i. Family Planning Methods

The report should cover all the above points.

The Report should not exceed 25 pages. It should be valued by the external examiner who visits for conducting practicals.
