# B.A./B.Sc. SECOND YEAR MATHEMATICS SYLLABUS PAPER - III **SEMESTER – III - W.E.F.2016-17** ABSTRACT ALGEBRA

#### UNIT - 1: (10 Hrs) GROUPS: -

Binary Operation - Algebraic structure - semi group-monoid - Group definition and elementary properties Finite and Infinite groups - examples - order of a group. Composition tables with examples.

### UNIT - 2: (14 Hrs) SUBGROUPS: -

Complex Definition – Multiplication of two complexes Inverse of a complex-Subgroup definition - examples-criterion for a complex to be a subgroups.

Criterion for the product of two subgroups to be a subgroup-union and Intersection of subgroups.

### Co-sets and Lagrange's Theorem :-

Cosets Definition - properties of Cosets-Index of a subgroups of a finite groups-Lagrange's Theorem.

### UNIT -3: (12 Hrs) NORMAL SUBGROUPS: -

Definition of normal subgroup - proper and improper normal subgroup-Hamilton group criterion for a subgroup to be a normal subgroup - intersection of two normal subgroups - Sub group of index 2 is a normal sub group - simple group - quotient group - criteria for the existence of a quotient group.

### UNIT - 4: (10 Hrs) HOMOMORPHISM: -

Definition of homomorphism - Image of homomorphism elementary properties of homomorphism - Isomorphism - aultomorphism definitions and elementary properties-kernel of a homomorphism - fundamental theorem on Homomorphism and applications.

### UNIT - 5: (14 Hrs) PERMUTATIONS AND CYCLIC GROUPS: -

Definition of permutation - permutation multiplication - Inverse of a permutation - cyclic permutations – transposition – even and odd permutations – Cayley's theorem.

### Cyclic Groups :-

Definition of cyclic group – elementary properties – classification of cyclic groups.

#### Prescribed Text Book:

A. First course in Abstract Algebra, by J.B. Fraleigh Published by Narosa Publishing house. *Chapters*: 1 to 7 and 11 to 13.

### Reference Books:

- 1. A text book of Mathematics for B.A. / B.S. by B.V.S.S. SARMA and others Published by S.Chand & Company New Delhi.
- 2. Modern Algebra by M.L. Khanna.

Chr. Subbaiah Naidu Bos Chairman Mathematics B.T College Madanapalle.

## S.V.UNIVERSITY, MODEL PAPER.

#### THREE YEAR B.A/B.Sc DEGREE EXAMINATIONS.

#### CHOICE BASED CREDIT SYSTEM

#### III SEMESTER

#### **PART II: MATHEMATICS**

#### Paper III : ABSTRACT ALGEBRA

(New Syllabus w.e.f 2015-16)

Time: 3 hours

Max Marks:75

#### SECTION - A

Answer any FIVE of the following questions. Each question carries 5 marks (5X5 = 25).

- 1. Show that the fourth roots of unity is an abelian group w.r.t multiplication.
- 2. Prove that identity element in a group is unique.
- 3. If Z is the additive group of integers, then prove that the set of all multiples of integers by a fixed number "m" is subgroup of Z.
- 4. Prove that intersection of two sub groups H<sub>1</sub>and H<sub>2</sub> of group G<sub>2</sub> is a subgroup of G.
- Show that H = { 1,-1} is a normal subgroup of the group of non-zero real numbers under multiplication.
- 6. If G is a group of non-zero real numbers under multiplication the prove that  $f(x) = x^2 : G \rightarrow G$  is a homomorphism. Determine Ker f.
- 7. Examine whether the following permutation is even or odd.

$$\begin{pmatrix} 1 & 2 & 34 & 5 & 67 & 8 & 9 \\ 6 & 1 & 43 & 2 & 57 & 9 & 8 \end{pmatrix}$$

8. Define cyclic group and give an example.

#### **SECTION - B**

Answer ALL of the five questions. Each question carries 10 marks (5X10 = 50).

9 a.Prove that the set-Z of all integers form an abelian group w.r.t the operations defined by

OR

b. Show that the set  $G = \{1,2,3,4,5,6\}$  is a finite abelian group of order 6 w.r.t  $X_7$ .

10a. Prove that the necessary and sufficient condition for a complex H of a finite group G to be a subgroup is  $\forall a, b \in H = > a b \in H$ .

OR

b. State and prove Lagrange's theorem.

 $a * b = a + b + 2, \forall a, b \in Z$ .

11a. A subgroup H of a group G is a normal subgroup of G iff the product of two right cosets of H in G is again a right coset of H in G.

OR

b. Prove that a sub group H of a group G is normal subgroup of G iff each right coset of H in G is left coset of H in G.

12a. State and prove Fundamental theorem on homomorphism of groups.

OR

b. If  $\emptyset:Z_{10}{\to}~Z_{10} be$  a homomorphism defined by  $\emptyset$  (1) = 8 ,then  $~find~Ker~\emptyset$  .

13a. State and prove Cayley's theorem.

OR

b. The order of a cyclic group is equal to the order of its generator.
