About the International Conference

Research is a part of life and a lifelong process. The main purpose of the research is to improve the standards of life for a happy, healthy, and wealthy life. Many authors and researchers have defined the concept 'Research' differently. According to Creswell "Research is a process of steps used to collect and analyze information to increase our understanding of a topic or issue". The Doctoral Research Scholars' first duty is to select an area of the research topic and a research problem. A research problem is a statement about an area of concern, a condition to be improved, a difficulty to be eliminated, or a troubling question that exists in scholarly literature, in theory, or in practice that points to the need for meaningful understanding and deliberate investigation. The research problem properly defined is half-solved. The characteristics of good topics are viz., Interesting, Researchable, Significant, Manageable, and Ethical.

The Doctoral Research Scholars should be focused on the Research Process (Identification of Problem to Report Writing) nicely to reach their goals. Research is about using established methods to investigate a problem or question in detail with the aim of generating new knowledge about it. There are various types of research that are classified according to their objective, depth of study, analyzed data, the time required to study the phenomenon, and other factors. It's important to note that a research project will not be limited to one type of research, but will likely use several (Discover PhDs, Community Blog). There are various types/classifications of research: Theoretical Research, Applied Research (Technological Applied Research, Scientific Applied Research), Exploratory Research, Descriptive Research, Exploratory Research, Correlational Research, Historical Research, Qualitative Research, Quantitative Research, Mixed-Method Research, Experimental Research, Non-Experimental Research, Quasi-Experimental Research, Deductive Investigation, Inductive Research, Hypothetical-Deductive Investigation, Diachronic Research (Longitudinal Study), Synchronous Research (Cross-Sectional Study), Primary Research, Secondary Research, Documentary Research, Field Research, Laboratory Research, and so on. The main objective of the conference is to provide a platform for the Doctoral Scholars to present their research work to fill the research gap and to grow confidently.
