To
The Registrar
S.V. University
Tirupati - 2.

Dear Madam, **[THROUGH PROPER CHANNEL-attention to Academic section]**
Sub: SVUCS- BOS-Chairperson, -Inclusion of Core Practical title-VR-404: Applied Virology/ Tumor Biology and Viruses - M. Sc-Virology-Semester-IV-Requesting-Reg.
Ref: 1. University Proceedings No: C-II (A,B&F)/Revised Syllabus of PG Courses/2016-17 dated 12-07-2016.

2. Approved syllabus relevant pages copy for the year 2016-17
With respect to the cited first reference, BOS Virology internal members resolved to recommend the inclusion of course code as VR-404 A or VR-404 B and title of the core practical for the M. Sc- IV Semester Virology Course as VR-404 A: Applied Virology/Tumor Biology and Viruses, such that **depending on the student's option/interest and feasibility**, we can either conduct core practical or take up project work during the upcoming years for the present 3 rd semester students (2017-19 batch) and also for the following batches.

We submit that the Applied Virology/ Tumor Biology and Viruses are important core practicals that deals with all modern technologies related to translational Virology research/tumor biology and the practical training in these areas is highly useful for the IV semester students to fetch jobs in industries, diagnostic laboratories and national research organizations.

Due to all the above explained reasons, I request you to consider the request from the BOS internal members of Virology Department (refer the attached BOS resolution) and to amend the changes for course code and include the title of the core practical VR-404 A in the IV Semester Syllabus of M.Sc. Virology course as indicated below.

M. Sc. VIROLOGY- SEMESTER-IV							
	Course Code	Components of the Study	Title of the Course	No. of Credits	IA Marks	End Sem Exam Marks	Total Marks
4	VR-404-A (OR) VR-404-B	Core-Practical (OR) Project work	Applied Virology/Tumor Biology and Viruses (OR) Project work related to Virology	4	-	-	100

Since there is no change in the number of credits and marks, we request you to approve this amendment for the above said purpose and take necessary action at your end. Your positive action will enable us to implement the recommendations for the upcoming M. Sc. IV Semester Virology students-2017-19 batch onwards.

Thanking you,

Sincerely Yours

[M. HEMA]

Enclosures: As above; Copy to the Head, Virology; The Principal, SVUCS; to the file

BOS RESOLUTION

Minutes of the Virology, BOS meeting held in the Chambers of BOS, Virology on 17-09-2018 at 11 AM and the BOS internal members recommended the following resolutions.

1. BOS Virology internal members resolved to recommend the inclusion of course code as VR-404 A or VR-404 B and title of the core practical for the M. Sc- IV Semester Virology Course as VR-404 A: Applied Virology/Tumor Biology and Viruses, such that **depending on the student's option/interest and feasibility**, we can either conduct core practical or take up project work during the upcoming years for the present 3rd semester students (2017-19 batch) and also for the following batches.
2. Applied Virology/ Tumor Biology and Viruses are important core practicals that deals with all modern technologies related to translational Virology research/tumor biology and the practical training in these areas is highly useful for the IV semester students to fetch jobs in industries, diagnostic laboratories and national research organizations. Since there is no change in the number of credits and marks, Virology DDC members resolved to request the University authorities to amend the changes for course code and include the title of the core practical VR-404 A in the IV Semester Syllabus of M.Sc. Virology course as indicated below, such that it can be implemented for the upcoming M. Sc. Virology IV Semester students - 2017-19 batch onwards.

M. Sc. VIROLOGY- SEMESTER-IV

	Course Code	Components of the Study	Title of the Course	No. of Credits	IA Marks	End Sem Exam Marks	Total Marks
4	VR-404-A (OR) VR-404-B	Core-Practical (OR) Project work	Applied Virology/Tumor Biology and Viruses (OR) Project work related to Virology	4	-	-	100
