

## **USE OF LED BULBS/ POWER EFFICIENT EQUIPMENT**

Power crisis is one of the most common problems in India. LED is a highly energy efficient lighting technology, and has the potential to fundamentally change the future of lighting in India. With the help of LED, we can eliminate this shortage by minimizing the wastage of electrical power or saving our generated power. Light-emitting diode (LED) is one of today's most energy-efficient and rapidly developing lighting technologies. Quality LED light bulbs last longer, are more durable, and offer comparable or better light quality than other types of lighting. LEDs, use at least 75% less energy, and last 25 times longer, than incandescent lighting. Widespread use of LED lighting has the greatest potential impact on energy savings in the campus.
