

SRI VENKATESWARA UNIVERSITY

Accredited By 'NAAC' With 'A+' Grade

Metric No: 1.1.3. Average percentage of courses having focus on employability/ entrepreneurship/ skill development offered by the institution during the last five years

DVV Comment:

Provide Syllabus Copy of the courses highlighting the focus on employability/ entrepreneurship/ skill development 2017-18, 2018-19, 2019-20, 2020-21 and 2021-22. Provide Reflection of mapping the courses to employability / entrepreneurship / skill development 2017-18, 2018-19, 2019-20, 2020-21 and 2021-22.

HEI Response:

1. Provided Syllabus Copy web link

Name of the Programme	Course Code	Title of the Course	Years of Introduction	Employability	Entrepreneurship	Skill
Adult & Continuing Education	MA AE 1.1	Alternative learning systems	2018			√
	MA AE 1.2	Policy Studies In Adult/Continuing Education	2018			
	MA AE 1.3	Adult Psychology And Learning	2018			√
	MA AE 1.4	Socio-Philosophical Foundation Of Adult Education	2018			
	MA AE 1.5	Communication Methods in Adult Education	2018	√		
	MA AE 1.6	Human Values And Professional Ethics-I	2018			
	MAAE-2.1	Recent Trends In Adult And Continuing Education	2018			
	MAAE-2.2	Curriculum And Methods Of Literacy Teaching	2018	√		√
	MAAE-2.3	Research Methods In Adult Education	2018	√		√
	MAAE-2.4	Field Work & Practical Assignments	2018	√		√
	MAAE-2.5	Management Of Adult/Continuing Education	2018			
	MAAE-2.6	Human Values And Professional Ethics-II	2018			
	MAAE-3.1	Training In Adult And Continuing Education	2018	√		√
	MAAE-3.2	Comparative Studies In Adult Education	2018			
	MAAE-3.3	Material Development For Adult& Continuing Education	2018			√
	MAAE-3.4A	Peoples' Participation And Development	2018	√		
	MAAE-3.4B	Vocational Education & Training	2018	√		
	MAAE-3.4C	Guidance And Counselling In Adult/Continuing Education	2018			
	MAAE-3.4D	Inclusive Education	2018			
	MAAE-3.5A	Information Technology For Continuing Education	2018			
	MAAE-3.5B	Entrepreneurship Development	2018	√	√	
	MAAE-3.5C	Women's Education & Development	2018			
	MAAE-4.1	Monitoring & Evaluation	2018	√		
	MAAE-4.2	Human Resources Management& Development	2018			√
	MAAE-4.3	Dissertation / Project Work	2018			
	MAAE-4.4 A	Environmental Education	2018			
	MAAE-4.4 B	Statistical Methods For Social Research	2018			√
	MAAE-4.4 C	Development Strategies & Voluntarism	2018	√		
	MAAE-4.4 D	Population Education	2018			
	MAAE-4.5 A	Adult Education And Extension	2018			
	MAAE-4.5 B	Skill Development Initiatives	2018			
	MAAE-4.5 C	Career Guidance And Counselling	2018			
Rural Development & Management						
	MARDM-1.3	Indian Economic Scene	2018	√		
	MARDM-2.1	Rural Industrialisation	2018	√		√
	MARDM-2.3	Agriculture & Rural Bio Technology	2018			√
	MARDM2.4	Field Work& Practicals	2018			√
	MARDM-2.5	Rural Marketing & Management	2018		√	
	MARDM-3.1	Natural Resources Management -Land	2018	√		√
	MARDM3.2	Natural Resources Management -Water	2018	√		√
	MARDM-3.3	Natural Resources Management-Vegetation	2018	√	√	√
	MARDM-3.4a	Communications For Rural Development	2018			√
	MARDM3.4b	Micro Finance &Women Empowerment	2018	√		√
	MARDM-1.4c	Economics Of Agriculture	2018		√	
	MARDM3.5b	Skill Development Initiatives	2018			√
	MARDM-4.1	Agriculture And Rural Development	2018	√	√	
	MARDM-4.2	Rural Credit & Marketing	2018	√	√	
	MARDM4.3	Dissertation/Project Work	2018	√		√

	MARDM-4.1c	Rural Entrepreneurs	2018		√	
	MARDM- 4.1d	Vocational Education & Training	2018	√	√	√
	MARDM-5.1a	Human Resources Development In Rural Sectors	2018	√		√
AIHC & Archaeology	AIHC&A-101	History of Ancient India upto 550 A.D.	2018			
	AIHC&A-102	History of India from 1206 A.D. to 1526 A.D.	2018

34	B.TECH	ME701	Industrial Engineering and Management	2020	
35	B.TECH	ME707S	Robot Programming	2020	

S. No	Course Code	Title of the Course	Year of Introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/Skill development
I Semester				
	MA101	Mathematics – I	2020	apply differential equations to engineering problems.
	CY 102	Engineering Chemistry	2020	analyze microscopic chemistry in terms of atomic and molecular orbitals and intermolecular forces.
	EN103	English	2020	develop the language skills like listening, speaking, reading and writing
	EE104	Basic Electrical and Electronics Engineering	2020	understand the concept of power factor improvement for industrial installations and concepts of most economical power factor
	ME105	Engineering Graphics and Design	2020	make a distinction between first angle projection and third angle projection of drawing.
	EN 106	English Communication Lab	2020	The student will acquire basic proficiency in English including reading and listening comprehension, writing and speaking skills.
II Semester				

	MA201	Mathematics – II	2020	Acquire knowledge about the physical interpretation of the gradient, divergence and curl
	PY 202	Engineering Physics	2020	Able to demonstrate competency and understanding of the concepts found in Mechanics, Harmonic Oscillations, Waves in one dimension, wave Optics, Lasers, and a broad base of knowledge in physics
	CS 203	Programming for Problem Solving	2020	Able to discuss basic algorithmic analysis for simple algorithms; determine appropriate algorithmic approaches to a real world problems.
	CE 204	Engineering Mechanics	2020	apply the basic knowledge of force system.
	ME 205	Workshop / Manufacturing Practices	2020	Design and develop different types of wood joints based on the requirement
	CS206	Programming for Problem Solving Lab	2020	Able to develop programs for real world applications using Java
	CEMCT207	Environmental Science	2020	Able to understand the importance of the environment
	III Semester			

	MA301B	Mathematics – III	2020	After the completion of course, students will be able to Understand the analyticity of complex functions and conformal mappings.
	ME302C	Strength of Materials	2020	Determine the stresses and strains in the members subjected to axial, bending and torsional loads
	HS303C	Managerial Economics and Accountancy	2020	Understand Macro Economic environment of the business and its impact on enterprise.
	ME304C	Manufacturing Processes	2020	Able to understand the basic concepts of manufacturing.
	ME305C	Basic Thermodynamics	2020	Students can evaluate changes in thermodynamic properties of substances
	ME306L	Strength of Materials Lab	2020	Apply knowledge of materials and structural elements to the analysis of simple structures.
	ME307L	Manufacturing Process Lab	2020	To impart knowledge of different types of machine tools and their constructional details like lathe, milling and shaping machines.
	ME308L	Fuels Lab		Analyze important fuel and lubricant properties for the application in specific exploitation conditions
	ME309S	CAD Laboratory		Draw complex geometries of machine components in sketcher mode.
		IV Semester		
	ME401C	Fluid Mechanics and Hydraulic Machinery	2020	Understand and analyze simple flow situations and solve fluid flow problems.

	ME402C	Kinematics of Machinery	2020	Understand the principles of kinematic pairs, chains and their classification, DOF, inversions, equivalent chains and planar mechanisms.
	ME403C	Applied Thermodynamics	2020	Understand the 1st law analysis of combustion reactions
	ME404C	Advanced Engineering Graphics	2020	Able to draw Projections of solids and Auxiliary projections of solids parallel to one plane perpendicular to both the planes
	ME405C	Machine Tools and Metal Cutting	2020	Able to understand the basic concepts of metal cutting and basic machine tools of workshop practice.
	ME406L	Fluid Mechanics and Hydraulic Machinery Lab	2020	Able to calculate loss coefficients for use in the pipe flow analysis.
	ME407L	IC Engines Lab	2020	Estimate energy distribution by conducting heat balance test on IC engines
	ME408L	Electronics and Electrical Engineering Lab	2020	Understand the construction, operating principle and characteristics of DC machine, single phase transformer and three phase induction motor.

	ME409S	MATLAB	2020	Use MATLAB effectively to analyze and visualize data
--	--------	--------	------	--

M.TECH (INDUSTRIAL ENGINEERING)

S. No	Course Code	Title of the Course	Year of Introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/Skill development
I Semester				
	MAME T01	Applied Probability and Statistics	2016	Basic concepts of sampling applied in population enumeration.
	MEIE T01	Operations Research	2016	Concepts of queuing systems in real life situations and model for analysis.
	MEIE T02	Work System Design	2016	Work study principle and design effective work layout for minimal hand and body motions
	MEIE T03	Operations Planning and Control	2016	Forecasting principles and techniques for short range and long range planning
	MEIE P01	Industrial Engineering Lab	2016	Understanding of reliable and flexible method to accomplish hectic task in minimum possible time.
II Semester				

	MEIE T04	Supply Chain Management	2016	Managerial decision plans for effective implementation with competitive supplies
	MEIE T05	Quality Control and Reliability Engineering	2016	Able to maintain quality in products using quality circle principles
	MEIE T06	Human Resources Management	2016	Identify and evaluate key organisational approaches to improving HR outcomes for both the organisation and its employees
	MEIE T07	Advanced Operations Research	2016	Able to solve Un-constrained and constrained minimization problems using programming methods.
	MEIE P02	Simulation Lab	2016	Able to understand the basic programming knowledge with respect to domain

M.TECH (PRODUCTION ENGINEERING)

S. No	Course Code	Title of the Course	Year of Introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/Skill development
	I Semester			
	MAME T01	Applied Probability and Statistics	2016	Basic concepts of sampling applied in population enumeration.

	MEPE T01	Advanced Materials Technology	2016	They will be able to compare the types of newer materials along with their properties and applications.
	MEPE T02	Advanced Manufacturing Processes	2016	Able to test the influence of different process parameters on the performance and their applications
	MEIE T03	Operations Planning and Control	2016	Forecasting principles and techniques for short range and long range planning
II Semester				
	MEPE T03	Computer Integrated Manufacturing	2016	Understand the effect of manufacturing automation strategies and derive production metrics
	MEPE T04	Automation in Manufacturing	2016	Understand the different automated material handling, storage and retrieval systems and automated inspection systems
	MEPE T05	Additive Manufacturing	2016	Identify the need for time compression in product development and manufacturing.

	MEPE T06	Metal Cutting and Cutting Tool Design	2016	Ability to extend, through modeling techniques, the single point, multiple point and abrasive machining processes
	MEPE P02	CAD / CAM Laboratory	2016	Knowing the programme for transformation of mathematical matrices for translation, rotation, scaling and mirror reflection

S. No	Course Code	Title of the Course	Year of Introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/Skill development
I Semester				

	IEPC 01	Operations Planning and Control	2018	Forecasting principles and techniques for short range and long range planning
	IEPC 02	Work System Design	2018	Work study principle and design effective work layout for minimal hand and body motions.
	IEPE 11	Applied Probability and Statistics	2018	Basic concepts of sampling applied in population enumeration
	IEPE 12	Financial Management & Control	2018	Clearly understand the cost management discipline and process
	IEPE 13	Human Resource Management	2018	Critically analyse and apply the emerging strategic role that HRM plays in a changing business environment and workplace to maintain current policies and procedures
	IEPE 21	Design for Manufacturing	2018	Design components for machining
	IECP 01	Industrial Engineering Lab-I	2018	Understanding of reliable and flexible method to accomplish hectic task in minimum possible time.
	IECP 02	Simulation Lab - I	2018	Able to understand the basic programming knowledge with respect to domain.
	II Semester			

	IEPC 03	Advanced Operation Research	2018	Able to solve Un-constrained and constrained minimization problems using programming methods.
	IEPC 04	Quality Control and Reliability Engineering	2018	Able to apply statistical methods to accept the lot of samples
	IEPE 31	Supply Chain Management	2018	Managerial decision plans for effective implementation with competitive supplies
	IEPE 41	Productivity Engineering & Management	2018	Identification and formulation productivity measurement at national level with diversity concepts
	IEPE 42	Logistics Engineering & Management	2018	An ability to apply the knowledge, techniques, skills, and modern tools of the discipline to Engineering Logistics technology;
	IEPE 43	Service Engineering & Management	2018	Able to acquire knowledge on focusing on customer and service management
	IECP 03	Industrial Engineering Lab-II	2018	Understand the forecasting techniques
	IECP 04	Simulation Lab - II	2018	Understand the solving of sequencing and assignment problem
	III semester			
	IEPE 51	Design and Analysis of Experiments	2018	Develop appropriate experimental design to conduct experiments for a given problem.

	IEPE 52	System Dynamics	2018	Ability to develop students' skills in analyzing, simulating, and identifying dynamic systems based upon their input-output responses.
--	---------	-----------------	------	--

M.TECH (PRODUCTION ENGINEERING)

S. No	Course Code	Title of the Course	Year of Introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/Skill development
I Semester				
	PEPC 01	Advanced Manufacturing Processes	2018	Able to test the influence of different process parameters on the performance and their applications
	PEPC 02	Advanced material technology	2018	They will be able to compare the types of newer materials along with their properties and applications.
	PEPE 13	Advanced Casting Technology	2018	Knowing and identification of materials for moulding the additives, coating and the methods of sand controls
	PEPE 22	Design for Manufacturing	2018	Design components for sheet metal work by understanding in depth the sheet metal processes and their formation mechanisms

	PECP 01	Production Engineering Lab – I	2018	Apply knowledge of metal cutting to perform various machining operations.
	PECP 02	CAD Lab	2018	Create complex engineering assemblies using appropriate assembly constraints
	II Semester			
	MEPE T03	Computer Integrated Manufacturing	2018	Understand the effect of manufacturing automation strategies and derive production metrics.
	MEPE T06	Metal Cutting and Cutting Tool Design	2018	Ability to extend, through modeling techniques, the single point, multiple point and abrasive machining processes
	MEPE T04	Automation in Manufacturing	2018	Understand the different automated material handling, storage and retrieval systems and automated inspection systems.
	PEPE 43	Oil Hydraulics and Pneumatics	2018	Identify and analyze the functional requirements of a power transmission system for a given application.
	PECP 03	Production Engineering Lab-II	2018	Apply knowledge of metal cutting to perform various machining operations.
	PECP 04	CAM Lab - II	2018	Create complex engineering assemblies using appropriate assembly constraints

1.1.3. Employability / Entrepreneurship / Skill Development - Mapping

M.TECH (INDUSTRIAL ENGINEERING)

S. No	Course Code	Title of the Course	Year of Introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/Skill development
I Semester				
	IEPC 01	Operations Planning and Control	2018	Forecasting principles and techniques for short range and long range planning
	IEPC 02	Work System Design	2018	Work study principle and design effective work layout for minimal hand and body motions.
	IEPE 11	Applied Probability and Statistics	2018	Basic concepts of sampling applied in population enumeration
	IEPE 12	Financial Management & Control	2018	Clearly understand the cost management discipline and process
	IEPE 13	Human Resource Management	2018	Critically analyse and apply the emerging strategic role that HRM plays in a changing business environment and workplace to maintain current policies and procedures
	IEPE 21	Design for Manufacturing	2018	Design components for machining
	IECP 01	Industrial Engineering Lab-I	2018	Understanding of reliable and flexible method to accomplish hectic task in minimum possible time.

	IECP 02	Simulation Lab - I	2018	Able to understand the basic programming knowledge with respect to domain.
	II Semester			
	IEPC 03	Advanced Operation Research	2018	Able to solve Un-constrained and constrained minimization problems using programming methods.
	IEPC 04	Quality Control and Reliability Engineering	2018	Able to apply statistical methods to accept the lot of samples
	IEPE 31	Supply Chain Management	2018	Managerial decision plans for effective implementation with competitive supplies
	IEPE 41	Productivity Engineering & Management	2018	Identification and formulation productivity measurement at national level with diversity concepts
	IEPE 42	Logistics Engineering & Management	2018	An ability to apply the knowledge, techniques, skills, and modern tools of the discipline to Engineering Logistics technology;
	IEPE 43	Service Engineering & Management	2018	Able to acquire knowledge on focusing on customer and service management
	IECP 03	Industrial Engineering Lab-II	2018	Understand the forecasting techniques
	IECP 04	Simulation Lab - II	2018	Understand the solving of sequencing and assignment problem
	III semester			
	IEPE 51	Design and Analysis of Experiments	2018	Develop appropriate experimental design to conduct experiments for a given problem.

	IEPE 52	System Dynamics	2018	Ability to develop students' skills in analyzing, simulating, and identifying dynamic systems based upon their input-output responses.
--	---------	-----------------	------	--

M.TECH (PRODUCTION ENGINEERING)

S. No	Course Code	Title of the Course	Year of Introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/Skill development
I Semester				
	PEPC 01	Advanced Manufacturing Processes	2018	Able to test the influence of different process parameters on the performance and their applications
	PEPC 02	Advanced material technology	2018	They will be able to compare the types of newer materials along with their properties and applications.
	PEPE 13	Advanced Casting Technology	2018	Knowing and identification of materials for moulding the additives, coating and the methods of sand controls
	PEPE 22	Design for Manufacturing	2018	Design components for sheet metal work by understanding in depth the sheet metal processes and their formation mechanisms

	PECP 01	Production Engineering Lab – I	2018	Apply knowledge of metal cutting to perform various machining operations.
	PECP 02	CAD Lab	2018	Create complex engineering assemblies using appropriate assembly constraints
	II Semester			
	MEPE T03	Computer Integrated Manufacturing	2018	Understand the effect of manufacturing automation strategies and derive production metrics.
	MEPE T06	Metal Cutting and Cutting Tool Design	2018	Ability to extend, through modeling techniques, the single point, multiple point and abrasive machining processes
	MEPE T04	Automation in Manufacturing	2018	Understand the different automated material handling, storage and retrieval systems and automated inspection systems.
	PEPE 43	Oil Hydraulics and Pneumatics	2018	Identify and analyze the functional requirements of a power transmission system for a given application.
	PECP 03	Production Engineering Lab-II	2018	Apply knowledge of metal cutting to perform various machining operations.
	PECP 04	CAM Lab - II	2018	Create complex engineering assemblies using appropriate assembly constraints

1.1.3. Employability / Entrepreneurship / Skill Development - Mapping

1.1.3 Activities/Content with direct bearing on Employability/Entrepreneurship/ Skill development 2017-2018

SVU COLLEGE OF ARTS

1. Adult & Continuing Education

S.No	Course Code	Name of the Course	Year of introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/ Skill development
1	MAAE -1.1	Alternative Learning Systems	2017	<ul style="list-style-type: none"> ➤ Remembrance of different forms of learning. ➤ Application of different technology support services for effective learning. ➤ Organization and administration of nonformal education programmes. ➤ Evaluation of nonformal education programmes.
2	MAAE-1.2	Policy Studies In Adult/Continuing Education	2017	<ul style="list-style-type: none"> ➤ Identify the socio-political movements during pre-independence period for the promotion of literacy. ➤ 2.Analyze the trends of adult education programmes during post-independence period from social education to saakshar Bharat Mission. ➤ 3.Describe the National and International organizations efforts for the promotion of

				<p>literacy at various levels.</p> <ul style="list-style-type: none"> ➤ 4.Ex plain the State & Central Govt policies on adult education and special reference to literacy, post-literacy and continuing education.
3	MAAE-1.3	Adult Psychology And Learning	2017	<ul style="list-style-type: none"> ➤ 1: Acquire knowledge on psychological foundations and its relevance to Adult Education and Learners. ➤ 2: Learn classification of motives and motivation techniques to motivate the Adult Learner. ➤ 3: Compare the Adult Personality & Child personality based on three Domain principles. ➤ 4: Examine the Adult Learning characteristics and theories of learning, eventually he/she will apply all aspects in adult class room activity.
4	MAAE-1.4	Socio-Philosophical Foundatons Of Adult Education	2017	<ul style="list-style-type: none"> ➤ Create thinking capacity to survival in the present society with philosophical approach. ➤ Know great eminent leaders biography, sacrifices their lives for society. ➤ Aware Dalit movement, women movement, co-operative movement in society especially rural areas. ➤ Examine the problems of society with reference

				to bonded labor, child labour, untouchability, transgender and provide awareness on human rights.
5	MAAE-1.5	Communication Methods in Adult Education	2017	<ul style="list-style-type: none"> ➤ Remembering the concept and methods of communication and their application to adult Education ➤ Identifying different models of communication. ➤ Describing the media of communication and their utility in continuing education. ➤ Realising the use of different Audio-visual aids in teaching learning process.
6	MAAE-1.6	Human Values And Professional Ethics-I	2017	<ul style="list-style-type: none"> ➤ know the importance of professional ethics and to implement the ethical values in various professions. ➤ understand about the Good and bad values and to analyze the basic moral concepts. ➤ inculcate the students in the aspects of pursharthas . ➤ 4. Know different crimes and its impact on personal and social life and theories of punishment

7	MAAE-2.1	Recent Trends In Adult And Continuing Education	2017	<ul style="list-style-type: none"> ➤ .Identify the variations of literacy growth among States and Nation with reference to gender, rural and urban. ➤ 2.Recognize the functions, activities of JSS and Saakshar Bharat Mission, to promote Life Long learning. ➤ 3. Understand the five-year plan period programmes in terms of literacy, non-formal and functional literacy. ➤ 4. Examine the significance of the extension activities as third dimension of literacy programmes at field level.
8	MAAE-2.2	Curriculum And Methods Of Literacy Teaching	2017	<ul style="list-style-type: none"> ➤ Remembering the meaning, foundations and theories of curriculum development with reference to adult learners. ➤ Distinguishing different principles and approaches of curriculum development. ➤ Interpreting the needs and interests of lifelong learners. ➤ Executing to evaluate Adult Education programmes
9	MAAE-2.3	Research Methods In Adult	2017	<ul style="list-style-type: none"> ➤ Understanding the concepts and methods of

		Education		<p>research.</p> <ul style="list-style-type: none"> ➤ Adopting the suitable sampling methods for research studies. ➤ Developing tools for research studies. ➤ Ability of research report writing.
10	MAAE-2.4	Field Work & Practical Assignments	2017	<ul style="list-style-type: none"> ➤ Application of knowledge and skills in project designing ➤ Ability to do research work. ➤ Finding solutions to the problems identified in his research work. ➤ Preparing the research report.
11	MAAE-2.5	Management Of Adult/Continuing Education	2017	<ul style="list-style-type: none"> ➤ Know the principles of Management, Planning and Organizing capacity to conduct Adult Education Programmes. ➤ Develop Social and Communication Skills to organize village, Mandal, District, State and Central level programmes. ➤ Acquire project techniques for sustainable programmes. ➤ Learn and enhance research skills to write project report, monitoring and evaluation of data

				of Adult Education Programme.
12	MAAE-2.6	Human Values And Professional Ethics-Ii	2017	<ul style="list-style-type: none"> ➤ Understand and recognize the importance of Value Education & Human Values and also try to follow the traditional values of family, women and elders in the society. ➤ Examine code of ethics for medical and health care professionals. They Can sensitize the rural people on Health Issues & Problems. ➤ Explain the Environmental Protection and relationship between Man and Nature, causes of pollution and impact on environmental health. ➤ Recognize the need of Social ethics and fight against the anti-social activities, Organ trade, Human trafficking etc.
13	MAAE-3.1	Training In Adult And Continuing Education	2017	<ul style="list-style-type: none"> ➤ Identify the importance of training in Adult and Continuing Education programmes and differences between training and education. ➤ Know the training methods, training materials to organize the Adult and Continuing Education programmes. ➤ Follow the teaching methods like Lecture, discussion, demonstration and Role Play

				<p>methods.</p> <ul style="list-style-type: none"> ➤ Recognize training facilities at different levels like National, State, District and Local.
14	MAAE-3.2	Comparative Studies In Adult Education	2017	<ul style="list-style-type: none"> ➤ Compare the Adult Education Programmes of different countries based on its aims and significance. ➤ Compare and contrast of Adult Education movement and progress in different countries like UK, USA, Denmark etc with reference to India. ➤ Find out the similarities and dissimilarities of Adult Education Programs in selected countries. ➤ Identify the problems of Adult Education in terms of Planning, Organization and Budget activities in developing countries and India.
15	MAAE-3.3	Material Development For Adult And Continuing Education	2017	<ul style="list-style-type: none"> ➤ Identify the significance of learning materials in Adult Education classes. ➤ Design the teaching learning activity objectives for better performance of Teacher educator in Adult Education Programmes. ➤ Enhance language forms and competence and tune with the needs of the learner.

				➤ Develop teaching learning materials for self-learning
16	MAAE-3.4a	Peoples' participation And Development	2017	<ul style="list-style-type: none"> ➤ Analysing the role and functions of people committees, ➤ Understanding the functions of Panchayat Raj institutions. ➤ Knowledge on the role of co-operatives in rural development. ➤ Ability to catalyse the performance of PRIs and co-operatives.
17	MAAE-3.4b	Vocational Education And Skill Development	2017	<ul style="list-style-type: none"> ➤ Identify the relationships of Vocational Education and Adults development. ➤ Understand the institution training importance and its practices in vocational training. ➤ Identify the issues of Rural Vocational training in India and Asian Countries. ➤ Provide Vocational Guidance and Counselling for Adult trainees.
18	MAAE-3.4c	Guidance And Counselling In Adult And Continuing Education	2017	➤ Remembering the concept and theories and perspectives of guidance and counselling in educational process.

				<ul style="list-style-type: none"> ➤ Recollecting understanding and analysis of educational problems of a clientele group. ➤ Knowing the roles and functions of guidance counsellor. ➤ Analysing the use of computers and internet in guidance and counselling.
19	MAAE-4.1	Monitoring And Evaluation	2017	<ul style="list-style-type: none"> ➤ Identify the concept of monitoring and monitoring systems in adult education ➤ 2.Describe the different evaluation models. ➤ 3.Demonstrate the tools and techniques of evaluation. ➤ 4.Understand the importance of learner evaluation.
20	MAAE-4.2	Human Resource Development And Management In Lifelong Learning	2017	<ul style="list-style-type: none"> ➤ Understand the importance of human resource development and its historical background. ➤ Analyze the human capital and its functions in Adult Education. ➤ Explain the cost benefit process and problems of measurements. ➤ Identify the need of planning in human resource development and relation to Adult Education.

21	MAAE-4.3a	Environment And Education	2017	<ul style="list-style-type: none"> ➤ 1. Understand the fundamental aspects of environment and need of environmental protection. ➤ 2: Interpret the environmental crisis with reference to pollutions and its impact of human life need of Environmental Conservation. ➤ 3: Know the environmental laws and role of individual and community to Control environmental pollution. ➤ 4: Explain Ecology and eco factors for Ecological Balance.
22	MAAE-4.3d	Population Education	2017	<ul style="list-style-type: none"> ➤ Recollecting the concepts, needs and importance of population related terminologies. ➤ Analysing the causes and consequences of population growth. ➤ Distinguishing the roles of different agencies in promotion of population education and control. ➤ Identifying the different National population policies and influences fertility, mortality and migration.
23	MAAE-4.4	Dissertation / Project Work	2017	<ul style="list-style-type: none"> ➤ Application of knowledge and skills in project

				designing <ul style="list-style-type: none"> ➤ Ability to do research work. ➤ Finding solutions to the problems identified in his research work. ➤ Preparing the research report.

2. Ancient Indian History, Cultural Archeology

S.No	Course Code	Name of the Course	Year of introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/ Skill development	Link to the relevant

1	AIHC&A-304(B)	b) Social and Political Institutions in Ancient India	2017	<ul style="list-style-type: none"> ➤ The student will be able to understand the basic features of various theories and thoughts used in archaeological interpretations. ➤ They can formulate a research proposal and decide on appropriate materials and methods of analysis. ➤ They can present the findings and the process of conducting research in written and verbal formats. ➤ Students get acquainted with various developmental phases of the Indian social institutions and their significance in human life and values 	
2	AIHC&A-305(A)	a) Outlines of Indian History	2017	<ul style="list-style-type: none"> ➤ The non-history students as an external elective course become familiar in understanding the broad phases of Indian history and culture 	
3	AIHC&A-404(B)	b) India's Early Cultural Contacts with other Countries	2017	<ul style="list-style-type: none"> ➤ Cross regional cultural diffusion has been an important aspect of historical evolution. ➤ A strong and vibrating civilization having its impact felt upon other contemporary cultures has been a common phenomenon of history ➤ The students were able to understand the influence of Indian culture on Central Asia, south east asia, Japan, 	

3. Area Studies Programme

S.No	Course Code	Name of the Course	Year of introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/ Skill development	Link to the relevant
1. 1	SEAP-104	Ancient Indian History Upto 1206 A.D.	2017	<ul style="list-style-type: none"> ➤ Students understand the causes for the spread of Indian culture in Southeast Asia. ➤ Know the different Indian dynasties of the past in Southeast Asia. ➤ Students will be able to learn the impact of Indian cultural on Southeast Asian societies 	
2.	SEAPS-203	Regional Geography Of South Pacific And East Asia	2017	<ul style="list-style-type: none"> ➤ Students identify physical setting, landforms, climate and soils of South Pacific. ➤ Comprehend on Australia, New Zealand, Japan and China ➤ Recognize the economic trends in South Pacific and East 	
3.	SEAPS-303	India And The World	2017	<ul style="list-style-type: none"> ➤ Students acquaint knowledge on Opening of Japan and its early western contacts. ➤ Knows Japan's militarization, Russo Japanese war and the First World War ➤ Gain knowledge on US Occupation of Japan and Post World War-II developments and Japanese foreign relations. 	

4.	SEAPS-402	Developing Blue Economy	2017	<ul style="list-style-type: none"> ➤ Develop an understanding of the rise of industrial economies like Singapore, Malaysia, Thailand and Indonesia. ➤ Comprehend of the economies of Australia and New Zealand. ➤ Ability to know the Regional Economic Groups like ASEAN, ESCAP, APEC and EAS. 	
----	-----------	-------------------------	------	--	--

TOURISM:

S.No	Course Code	Name of the Course	Year of introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/Skill	Link to the relevant
1.	T-102	Planning And Development Of Tourism	2017	<ul style="list-style-type: none"> ➤ Students understand geographical profile of different countries of Southeast Asia. ➤ Know the trends in population movement within Southeast Asia. ➤ Students will be able to assess location significance and various infrastructural 	

2	T. 201	Historical Application Of Tourism In India	2017	<ul style="list-style-type: none"> ➤ Students list the Christian Missionary activities in Southeast Asian countries. ➤ Knows the factors of Indian Emigration, and Chinese economic contribution in Southeast Asia. ➤ Comprehensive grasp over different cultures and religions in Southeast Asia 	
3	T 301	Travel Agency And Tour Operations Management	2017	<ul style="list-style-type: none"> ➤ Students learn about the different political regimes in Southeast Asian nations. ➤ Comprehend on the contemporary political and economic conditions in Southeast Asian countries ➤ <u>Analyse the reasons to address some of the</u> 	
4	T 303	Airline Ticketing And Information Management	2017	<ul style="list-style-type: none"> ➤ Students acquaint knowledge on Opening of Japan and its early western contacts. ➤ Knows Japan's militarization, Russo Japanese war and the First World War ➤ Gain knowledge on US Occupation of Japan and Post World War-II developments and Japanese foreign relations. 	

4. Centre for Extension Studies

5. Centre for Gandhian Studies

6. Centre for Women's Studies

	Course Code	Name of the Course	Year of introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/ Skill development	Link to the relevant
1	SVUWS-105a	Gender, Environment, Climate Change & Livelihood	2017	<ul style="list-style-type: none"> ➤ This course builds theoretical base required for classification Gender Roles and livelihood of rural and tribal women. ➤ Impart skills and knowledge for developing Sustainable Environment and Livelihood Management systems with gender mainstreaming. 	
2	SVUWS-105b	Gender Society and Power Relations	2017	<ul style="list-style-type: none"> ➤ This course Insights on Gender Disparities within the Family, Economy, Education, Political and Legal Systems, understanding of social dynamics and power relations to perform the society and acquired gender sensitized skills. 	
3	SVUWS-106a	Human Values And Ethics –I	2017	<ul style="list-style-type: none"> ➤ The course is to enable students to develop amoral values and ethics for holistic approach of human development. 	
4	SVUWS-106b	Leadership values	2017	<ul style="list-style-type: none"> ➤ This course instill skill and domaine knowledge required for hands-on leadership learning experience focusing on leadership as an outgrowth of universal values that will help as effective and ethical leaders. 	
5	SVUWS-205a	Capacity building and leadership Training	2017	<ul style="list-style-type: none"> ➤ Enhance Knowledge and skills among students in designing and organization of suitable capacity 	

6	SVUWS-205b	Gender & Media	2017	➤ Students learn to Critical analysis of Gender representation and socio-cultural mechanism on media	
7	SVUWS-206a	Human values & Professional Ethics –II	2017	➤ To develop values and professional ethics in an organization and society.	
8	SVUWS-206b	Familial values and Ethics	2017	➤ To apply the skills of theory in practice with families and children to understand the family values and ethics	
9	SVUWS 301	Gender, Science & Technology	2017	➤ Students acquire skills on Approaches to applying Gender in Science and Technology to create Gender Management System.	
10	SVUWS 304d	Women's participation in Agriculture & Allied sectors	2017	➤ To understand the Role of Women in Agriculture and allied fields and Policies and Programmes for Women in Agriculture importance's in our country and to know the possible oppournities to create agri-business.	
11	SVUWS 305a	Gender Sensitization & Training	2017	➤ To equip the students on the capacities to raise gender sensitivity to reduce felinity and masculinity and ➤ To important knowledge on the appropriate actions to be taken for sustenance of gender equal society	
12	SVUWS 305b	Gender Identity and Leadership	2017	➤ Provides knowledge about social process and cultural understanding. It also develops a clear and precise conceptual clarity on gender and leadership.	

14	SVUWS 305c	Women and Governance	2017	<ul style="list-style-type: none"> ➤ To enable the students to understand the Women and Governance in the Indian context 	
15	SVUWS 404c	Multimedia systems	2017	<ul style="list-style-type: none"> ➤ Hands on experience on Multimedia: media and Data Streams. ➤ To understand Multimedia operating and Communication Systems. 	
16	SVUWS 404d	Reproductive Health and Family Life Education	2017	<ul style="list-style-type: none"> ➤ Create knowledge about Reproductive Health and Communicable Diseases ➤ Awareness on Reproductive Health Care Services, Policies & Programmes 	
17	SVUWS 405a	Women & Globalization	2017	<ul style="list-style-type: none"> ➤ To create awareness among the students on the ongoing process of globalization; ➤ To analyze the impact of globalization on feminization of labour force, low wages and Income gender inequalities 	
18	SVUWS 405b	Technical communication and computer ethics	2017	<ul style="list-style-type: none"> ➤ Establish skills on Technical Writing, Computer Ethics, Hacking and Hacker Ethics computer crimes in gender perspective. 	
19	SVUWS 405c	Gender & Mass Communication	2017	<ul style="list-style-type: none"> ➤ To provides a clear and precise clarity about gender status in contemporary society by referring the participation of women in mass communication 	

7. Econometrics

S.No	Course Code	Name of the Course	Year of introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/ Skill development	Link to the relevant
------	-------------	--------------------	----------------------	---	----------------------

1	EMT 101	Microeconomic Theory I	2017	<ul style="list-style-type: none"> • The microeconomic theory is to analyze how individual decision-makers, both consumers and producers, behave in a variety of economic environments. • The common goal in all of these issues is to identify the incentives of the various participating agents and the trade-offs that they face. • Microeconomics is a branch of economics that studies the behavior of individuals and firms in making decisions regarding the allocation of scarce resources and the interactions among these individuals and firms. • Microeconomics shows conditions under which free markets lead to desirable allocations. 	
---	---------	------------------------	------	---	--

2	EMT 102	Macroeconomic Theory I	2017	<ul style="list-style-type: none"> • Define and explain the process of calculating national income, identify its components, demonstrate circular flow of income, analyse the various income identities with government and international trade, define the concept of green accounting. • Understand Say's law of market, classical theory of employment and Keynes objection to the classical theory, demonstrate the principle of effective demand and income determination. • Explain the meaning of consumption function, relationship between APC and MPC, consumption and income, concept of multiplier and analyse the theories of absolute and relative income hypotheses. • Understand the relationship between investment and savings, demonstrate investment multiplier, and understand the meaning of MEC and MEI. CO5. Illustrate 	
---	---------	------------------------	------	---	--

3	EMT 103	Mathematical Methods	2017	<ul style="list-style-type: none"> • Formulate mathematical models describing the dynamics of economic systems. Demonstrate the role of quantitative techniques in the field of business/industry, illustrate different types of equations, solve equations and system of equations, understand the concept of sets, illustrate and apply basic set operations. • Explain the rules for calculating derivatives, uses and application in calculating inter-relationship among total, marginal and average cost and revenue, calculate maxima, minima, elasticity, decide the optimal level of production for a firm. • Demonstrate the rules for calculating integration, describe the importance and application of integration in consumers' and producers' surpluses, total revenue and cost. 	
---	---------	----------------------	------	---	--

4	EMT 104	Practical I	2017	CO1 Able to find Mean, Median, Mode, Range, Quartile Deviation and Standard Deviation and Coefficient of Variation. CO2 Able to apply Binomial, Poisson, Normal and Log-Normal Distribution Correlation and Regression Analysis CO3 Able to test small sample tests based on t, F and Chi-square distributions CO4 Able to find Inverse of a Matrix, System of Simultaneous Linear Equations and Cramer's Rule method.	
5	EMT 105	StatisticalMethods	2017	CO1 Able to find Mean, Median, Mode, Range, Quartile Deviation and Standard Deviation and Coefficient of Variation. CO2 Able to apply Binomial, Poisson, Normal and Log-Normal Distribution Correlation and Regression Analysis. CO3 Able to test small sample tests based on t, F and Chi-square distributions CO4 formulate Statistical Methods describing the dynamics of economic systems such as production function analysis and solve econometric analysis of underlying data use with knowledge	
6	EMT 106	HumanValuesandProfessiona lEthics–I	2017		
7	EMT 201	MicroeconomicTheoryII	2017	Course Objectives: The microeconomic theory is to analyze how individual decision-makers, both consumers and producers,	

8	EMT 202	Macroeconomic Theory II	2017	<p>CO1 The overarching goals of macroeconomics are to maximize the standard of living and achieve stable economic growth</p> <p>CO2 The goals are supported by objectives such as minimizing unemployment, increasing productivity, controlling inflation, and more.</p> <p>CO3 The macro economy of a country is affected by many forces, and as such, economic indicators are invaluable to assessing different aspects of performance.</p> <p>CO4 Meaning and Types of Inflation – Demand-Pull inflation – Cost-Push Inflation – The Phillips curve – The Inflation –</p>	
9	EMT 203	Basic Econometrics	2017	<p>CO1 Adequate competency in the frontier areas of economic theory and methods.</p> <p>CO2 Formulation and estimation of a multiple regression model.</p> <p>CO3 Decision about the statistical significance of individual explanatory variable and also over all models</p> <p>CO4 Impacts for the violation of one of the important assumptions for application of OLS regression.</p> <p>CO5 Estimation of system of equations estimation of panel</p>	

10	EMT 204	Practical II	2017	<p>CO1 Students can Identify Inter industrial relationships using Input-output analysis,</p> <p>CO2 analyse maximization of profits and minimization of costs can evaluate using Linear Programming,</p> <p>CO3 Analyse relationship of economic variables using simple and multiple regression models which are covered in basic Econometrics</p> <p>CO4 Able to estimate and interpret linear regression models and be able to distinguish between economic and statistical</p>	
----	---------	--------------	------	---	--

11	EMT 205	MathematicalEconomics	2017	<p>CO1 Students can deal Mathematical calculation of static optimization, Application of Lagrange's method and also student can evaluate Differential Equations and with Economic Applications.</p> <p>CO2 Able to estimate and interpret Inter industrial relationships using Input-output analysis, also analyse maximization of profits and minimization of costs of the firms using Linear Programming method</p> <p>CO3 Economic Applications of Differential Equations – Dynamic Multiplier – Harrod-Domar Model.</p> <p>CO4 Homogeneous Linear Difference Equations with Constant Coefficients – Particular Solution of Non-homogeneous Linear Equations – Linear First Order and Second Order Difference Equations with constant coefficients – Cobweb Model –Market</p>	
12	EMT 206	HumanValuesandProfessi onalEthicsII	2017		

13	EMT 301	<i>Indian Economy</i>	2017	<p>Course Outcomes: At the end of the course, the student will be able to</p> <p>CO1 Students will develop ideas of the basic characteristics of Indian economy, its potential on natural resources. Understand the importance, causes and impact of population growth and its distribution, translate and relate them with economic development.</p> <p>CO2 Understand agriculture as the foundation of economic growth and development, analyse the progress and changing nature of agricultural sector and its contribution to the economy as a whole. Students will obtain information regarding various agricultural issues in India and remedies for it</p> <p>CO3 Students will aware about recent economic affairs such as demonetization, universal basic income, cashless economy, skill and training development schemes, make in India etc</p>	
----	---------	-----------------------	------	--	--

14	EMT 302	<i>Economics of Insurance</i>	2017	<p>Course Outcomes: At the end of the course, the student will be able to</p> <p>CO1 Demonstrate knowledge of insurance contracts and provisions, and the features of property-liability insurance, life and health insurance, and employee benefit plans.</p> <p>CO2 Demonstrate knowledge of the operation and management of insurance entities, and the economic implications of organizational design and structure.</p> <p>CO3 Develop skills to facilitate insurance product cost and pricing, marketing, and distribution.</p> <p>CO4 Develop practical skills through professional development</p>	
----	---------	-------------------------------	------	--	--

15	EMT 303	<i>Advanced Econometrics</i>	2017	<p>Course Outcomes: At the end of the course, the student will be able to</p> <p>CO1 Concepts of Heteroscedasticity & Multicollinearity. Possible reasons behind the presence of Heteroscedasticity & Multicollinearity. Skill to judge the reliability of estimation in case of violation of basic assumptions for the application of ordinary linear regression method.</p> <p>CO2 Concepts of Autocorrelation reasons behind the presence of Heteroscedasticity & Multicollinearity. Describe the variance/covariance matrix for the regression errors under the assumption that the errors are correlated</p> <p>CO3 Apply modern econometric methods covering time series analysis, financial econometrics, microeconomics,</p>	
----	---------	------------------------------	------	--	--

16	EMT 304	<i>Computer Applications and Data Analysis</i>	2017	<p>Course Outcomes: At the end of the course, the student will be able to</p> <p>CO1 Students will get basic knowledge of computers i.e., block diagram, evolution of computer, input/output devices, storing information in computer etc.</p> <p>CO2 At the end of this course student will gain Examine spreadsheet concepts and explore the Microsoft Office Excel environment. Import and export data.</p> <p>CO3 Work with pivot tables and charts. Create and edit charts. Learn to use functions and formulas. Perform analysis tasks using Data analysis pack</p> <p>CO4 Student gained and evaluate Econometric Methods such</p>	
----	---------	--	------	---	--

17	EMT 305	<i>Public Finance</i>	2017	<p>.</p> <p>Course Outcomes: At the end of the course, the student will be able to</p> <p>CO1 Understand the sources of finance both public and private, demonstrate the role of government to correct market failures and possible advantage of public financing</p> <p>CO2 Attain the advantages and knowledge of public investments and other government expenditures. Understand the causes of growing public expenditures for various programmes and policies within and outside the country.</p> <p>CO3 Understand the possible burden, benefits and distribution of various types of taxes among various classes of people, know the general trend and impact on general welfare and arouse them to suggest good and bad tax system.</p> <p>CO4 Understand the needs of public borrowing from all possible sources to meet necessary public</p>	
----	---------	-----------------------	------	--	--

18	EMT 306	<i>Financial Institutions and Markets</i>	2017	<p>Course Outcomes: At the end of the course, the student will be able to</p> <p>CO1 Explain the broad features of Indian financial institutions with its apex banks' objectives and purview. Also understand the instruments to control credit in the country.</p> <p>CO2 Effectively narrate the kinds and components of money with its regulatory system, be aware of the functions, objectives and limitations of commercial banks.</p> <p>CO3 Identify the existence and development of non-banking financial institutions, know the important role of Mutual funds, LIC, investment companies etc., utilize and effectively participate in the development process.</p> <p>CO4 Understand the conditions of financial markets and its</p>	
19	EMT 307	<i>Practical III</i>	2017	<p>Course Outcomes: At the end of the course, the student will be able to</p> <p>CO1 Student will gain Examine spreadsheet. Work with pivot tables and charts. Create and edit charts. Learn to use functions and formulas.</p> <p>CO2 Perform analysis tasks using Data analysis pack using MS-Excel.</p> <p>CO3 Student gained and evaluate Econometric Methods such as OLS, LPM, Logistic regression analyse and conclude using SPSS Package</p> <p>CO4 Student will able to test of Multicollinearity.</p>	

20	EMT 308	IntroductiontoEconometrics	2017	<p>CO1 students will have adequate competency in the frontier areas of economic theory and methods</p> <p>CO2 Use basic econometric estimation techniques such as Ordinary Least Squares to estimate bivariate and multivariate regression models.</p> <p>CO3 Decision about the statistical significance of individual explanatory variable and also over all model.</p> <p>CO4 Impacts for the violation of one of the important assumptions for application of OLS regression.</p> <p>CO5 Students will acquire additional specialization topics are</p>	
----	---------	----------------------------	------	---	--

21	EMT 309	IndianEconomy	2017	<p>CourseOutcomes:Attheendofthecourse, thestudentwillbeableto</p> <p>CO1 Students will develop ideas of the basic characteristics of Indian economy, its potential on natural resources. Understand the importance, causes and impact of population growth and its distribution, translate and relate them with economic development.</p> <p>CO2 Understand agriculture as the foundation of economic growth and development, analyse the progress and changing nature of agricultural sector and its contribution to the economy as a whole. Students will obtain information regarding various agricultural issues in India and remedies for it</p> <p>CO3 Students will aware about recent economic affairs such as demonetization, universal basic income, cashless economy, skill and training development schemes, make in India etc.</p>	
----	---------	---------------	------	---	--

22	EMT 310	Economics of Insurance	2017	<p>Course Outcomes: At the end of the course, the student will be able to</p> <p>CO1 Demonstrate knowledge of insurance contracts and provisions, and the features of property-liability insurance, life and health insurance, and employee benefit plans.</p> <p>CO2 Demonstrate knowledge of the operation and management of insurance entities, and the economic implications of organizational design and structure.</p> <p>CO3 Develop skills to facilitate insurance product cost and pricing, marketing, and distribution.</p> <p>CO4 Develop practical skills through professional development</p>

16. Library and Information Science

S. No.	Course Code	Title of the Course	Years of Introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/Skill development
1	LIS-101	Foundation of Library and Information Science	2017	1. Know the various types of libraries and their role in the society 2. Learn the Professional ethics and library Legislation in India 3. Understand LIS education in India and various library associations in India
2	LIS102	Knowledge Organization: Classification Theory	2017	1.. Understand the definition, need and purpose of classification 2. Learn the Fundamental Categories, Facet Analysis, types of Isolates in all schemes of classification

				3. Understand the Notation, trends and developments in Classification
3	LIS-103P	Knowledge Organization:Classification Practice	2017	1.Learn the Dewey Decimal Classification Scheme 2. Get the skill regarding assigning the class numbers 3.Have knowledge on Tables and Schedules of DDC
4	LIS-104	Knowledge Management	2017	1.Get an idea on the concepts of knowledge management, types of knowledge 2.Understand the knowledge creation models, knowledge transfer in E-World 3.know the tools for knowledge management and neural network and datamining
5	LIS-105	Introduction to Information Technology	2017	1.Gain knowledge on the concepts of computer basics and Network technologies

				<p>2.Understand the concepts of Operating Systems, Programming Languages and types of softwares</p> <p>3.Learn the Database Management systems, steps in development of databases and get an idea on different library software packages</p>
6.	LIS-106	Human Values and Professional Ethics-I	2017	<p>i. The student will be enriched with several aspects pertaining to Human values and performing of Professional Ethics in day today life.</p> <p>ii. Introduction of several Nature of values to be performed by Humans to lead a good and Peaceful life by extending and imparting good behavior, character and conduct towards people of the society.</p> <p>iii. Introducing different concepts of Bhagavad Gita and its applications in uplifting of Religious values in the present society.</p>
7.	LIS-201	Information Sources and Services	2017	1.Learn documentary and non-documentary sources and

				<p>different types of information sources</p> <p>2. Know about the Indian and British National Bibliographies, and Electronic Books</p> <p>3. Understand the virtual reference service and translation Services</p>
8.	LIS-202	Knowledge Organization: cataloguing Theory	2017	<p>1. Understand the basic ideas on catalogue, forms of the catalogue, Main Entry and added entries</p> <p>2. Know the Canons, Principles and Laws of Cataloguing</p> <p>3. Gain the knowledge on different types of subject headings, Cooperative and Centralized cataloguing</p> <p>.</p>
9.	LIS-203P	Knowledge Organization: cataloguing Practice	2017	<p>1. Gain knowledge on Anglo American Cataloguing Rules</p> <p>2. Learn the preparation of Main entry and added entries for monographs and serial publications</p>

				3. Gain the skills on preparation of entries on cartographic materials, manuscripts and sound recordings
10.	LIS-204P	Meta data Standards- Practice	2017	1.Know the Metadata and its types, standards 2. Learn the skills on KOHA Software 3.Learn the skills on MARC 21 and Dublincore
11	LIS-205	Library Management	2017	1.Gain knowledge on meaning and purposeofmanagement, Organizational Structures 2.Able to identify the factors behind selection, procurement and accessioning of documents 3.Gain knowledge on a circulation system suitable for a library, different budgetary methods and its standards, norms and principles
12	LIS-206	Human Values and Professional Ethics-II	2017	i. Student will know the values of ethics in various fields including medical, social and business ethics. ii. The student will be enriched with several aspects pertaining to Human values and performing of Professional Ethics in day today life.

				iii. Introduction of several Natural values to be performed by Humans to lead a good and Peaceful life.
13	LIS-301	Information Processing and Retrieval Theory	2017	<p>1.Understand the basic concepts on Information procession and Retrieval and various schemes on classification</p> <p>2.Learn the Indexing Systems and Techniques and their Evaluation Criteria and Studies</p> <p>3.Gain knowledge on Web based Information Retrieval Systems</p>
14	LIS-302	Library Automation and Digital Library	2017	<p>1.Learn the basics of Library Automation, various modules of library automation software packages and their features</p> <p>2.Gain knowledge on basic concepts and characteristics of digital libraries</p> <p>3.Know about network and communication devices, digitization and metadata</p>
15	LIS-303	Search and Search strategies	2017	<p>1.Gain knowledge on search strategies, various types of databases, internet searching tools</p> <p>2.Understand Z39.50 protocol and Wide area information servers</p> <p>3. 3.Learn the search engines and meta search</p>

				engines.
16	LIS-304B	Internship	2017	<p>1. Attain skills on all types of sections and its maintenance in libraries in which they underwent training</p> <p>2. Get skills on maintenance of Digital Library</p> <p>3. Learn the skills on preservation and conservation of manuscripts and digitization.</p>
17	LIS-304C	Academic Library System	2017	<p>1. Know the basic objectives, growth and development of Academic Libraries in India, UK and USA</p> <p>2. Learn about an overview of higher education in India, UGC, its powers and functions and its role in the development of academic libraries</p> <p>3. Understand the total design of the building, techniques of financial management, and know the organization of library and information services needed by distance learners and special users</p>
18	LIS-305A	Information Literacy (OE)	2017	<p>1. Learn the concepts of Information Literacy and sources of Print and Electronic Information</p> <p>2. Get the skills on information access through INFLIBNET Network</p>

				3.Able to understand the Internet and its search techniques and Intellectual Property Right
19	LIS-401	Research Methodology	2017	<p>1.Understand the definition, need and purpose of various research methods</p> <p>2.Get the knowledge on Research design, techniques and tools</p> <p>3.Gain the skills on Data analysis and Interpretation of Data in SPSS.</p>
20	LIS-402P	Software for Libraries-Practice	2017	<p>1.Attain knowledge on D Space, GreenstoneDigital Library Softwares</p> <p>2.Learn about Koha : Library Management Software, E-Resources, Directory of Open Access Journals,</p> <p>3.Get an idea on designing of Web Page and Data Mining</p>
21	LIS-403	Dissertation/Project Work	2017	<p>1.Gain Knowledge on how to select the theme for their work</p> <p>2.Learn the writing styles, preparation of questionnaire, data analysis and interpretation and Citation styles</p> <p>3.Get the skills on findings and conclusion in dissertation</p>

22	LIS-403A	Management of Information System	2017	<p>1. Know the basic concepts in Management, and various methods of decision-making and its application to Library and Information Centers</p> <p>2. Understand the budgeting techniques and methods and policies and procedures</p> <p>3. Gain knowledge on system analysis, PERT/CPM</p>
23	LIS -404C	Information Processing and Retrieval: UDC and Indexing Practice	2017	<p>1. 1. Gain knowledge on Universal Decimal Classification</p> <p>2. Learn different Indexing systems</p> <p>3. Understand the design and development of thesaurus</p>
24	LIS-405-B	Technical Writing	2017	<p>1. Know the definition and types of technical writing</p> <p>2. Attain the idea on technical writing process and styles</p> <p>3. Get the skills on technical writing techniques, use of MS-Office for preparation and presentation of technical writing</p>

22. Population Studies

S.No.	Course Code	Title of the Course	Years of Introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/Skill development
1.	PS- 101	Population Characteristics and Theories	2017	<ul style="list-style-type: none"> i. Identify basic demographic concepts and definitions in Population studies ii. Impart knowledge on Population trends in size and growth of population at regional, national and global level. iii. Discover the implications of different theories on past and present population components with special reference to Malthusian theory
2.	PS - 102	Fertility	2017	<ul style="list-style-type: none"> i. Examine the basic concepts and measurements of fertility ii. Assess, compare and contrast trends in fertility and its determinants iii. Familiarize the concepts of nuptiality and factors affecting nuptiality
3.	PS – 103	Mortality	2017	<ul style="list-style-type: none"> i. identify the various concepts and measures of mortality ii. Examine the global levels and trends in mortality

				<p>and its determinants</p> <p>iii. Acquire knowledge on techniques of life tables, constructions of multiple-decrement life table and computational aspects for demographical analysis</p>
4.	PS 104	Sources, Evaluation and Adjustment of Data	2017	<p>i. Examine and compare merits and demerits of various sources of population data</p> <p>ii. Understand the evaluation of data, factors affecting completeness of data</p> <p>iii. Reproduce knowledge on population projections, calculations and applications</p>
5.	PS – 105	Population Education and Extension	2017	<p>i. Examine the components of population education and create awareness on population education among the students and youth</p> <p>ii. Acquire skills to organize Extension Programmes in population education at school, college and Non formal educational levels</p> <p>iii. demonstrate training on population education methods and techniques in order to create awareness on population education</p>
6.	PS - 106	Human Values and Professional Ethics-I	2017	<p>i. Identify the concepts of ethics and its relation to religion, politics and environment</p> <p>ii. Memorize the different aspect of values and</p>

				<p>interpret the best skills in understanding the merits of value related aspects</p> <p>iii. Demonstrate to interpret crime and theories of punishment with special reference to acquire knowledge on Manu and Yajnavalkya</p>
7.	PS – 201	Migration and Multi Regional Demography	2017	<p>i. Explore the different types and trends in migration</p> <p>ii. Apply skills in measurement, causes and consequences of different migrations in different regions</p> <p>iii. Explore the theories and recommend suitable policies of migration</p>
8.	PS – 202	N.G.O Management & Field Work Orientation	2017	<p>i. Understand the role, importance and establishing of NGO</p> <p>ii. Explore the sources of funding of NGO's at national and international level</p> <p>iii. Explore demographic data by working with individuals, groups and communities</p>
9.	PS - 203	Statistical Methods	2017	<p>i. Familiarize the basic statistical methods and its applications to demographic data</p> <p>ii. Demonstrate knowledge on methods and techniques of sampling</p>

				iii. Acquire skills in processing of data with computer
10.	PS - 204	Population Sociology	2017	i. Examine the basic sociological concepts, and evaluate the relationship of sociology to other social sciences ii. Identify the social institutions, social change and socialization iii. Explore the sociological theories of fertility and its application in contemporary society
11.	PS - 205	Fundamentals of Social Work	2017	i. Memorize the basic concepts of social work and its nature and scope. ii. Recognize the different methods of social work iii. Explore the social work practice in different fields iv. Acquire knowledge on the evolution of social work in India v. Explore the professional associations and importance of networking in social work profession
12.	PS – 206	Human Values and Professional Ethics - II	2017	i. Acquire and gain knowledge on different concepts of human values and behavioural changes. ii. Recognizing the medical ethics and views of

				<p>Charaka, Sushruta and Hippocrates on moral ethics of medical and health care professionals.</p> <p>iii. Acquire skills on environmental ethics and its relation to Health</p>
13.	PS - 301	Population Geography	2017	<p>i. Enumerate the geographical factors affecting the distribution of population</p> <p>ii. Awareness and understanding of trends in urbanization and its impact on ecological imbalance, global warming, greenhouse effects.</p> <p>iii. Able to assess changing pattern of land use, conservation of resources and critical thinking of policies, programmes for better management of environment</p>
14.	PS - 302	Research Methodology	2017	<p>i. Demonstrate in conducting population research and surveys</p> <p>ii. Prepare research design and apply sampling techniques</p> <p>iii. Discover skills in methods and tools of data collection, data analysis, interpretation, and report writing.</p>
15.	PS - 303	Community Health	2017	<p>i. Discover comprehensive knowledge on concepts of community health, illness, disease prevention</p>

				<ul style="list-style-type: none"> ii. Critical thinking on epidemiology, communicable diseases and its prevention iii. Understand and appreciate the concepts of health, nutrition, balance diet, nutrition deficiency diseases and National Health Programmes
16.	PS – 304 a	Population Psychology	2017	<ul style="list-style-type: none"> i. Appreciate the scope of psychology and the relationship between value of children and fertility ii. Familiarize and comprehend the significant psychological theories relevant to fertility and contraceptive behavior iii. Demonstrate leadership and effective communication skills in promoting health and family planning
17.	PS – 304 b	Population Policies and Programmes	2017	<ul style="list-style-type: none"> i. Explore population policies related to fertility, mortality and migration ii. Acquire the knowledge on methods of family planning and acts relating to medical termination of pregnancy, age at marriage and also registration of vital events iii. Apply best practices and strategies for promoting family welfare programme.

18.	PS – 304 c	Gerontology	2017	<ul style="list-style-type: none"> i. Understand the scope of gerontology and demographic dimensions of the elderly ii. Critically explore and analyze changes in status of elderly health, problems and needs of elderly iii. Acquire skills in dealing elderly issues like neglect, abuse, violence and abandonment caregivers stress and elderly neglect
19.	PS – 304 d	Population and Sustainable Development	2017	<ul style="list-style-type: none"> i. Examine the concepts and theoretical issues relating to sustainable development and sustainable goals ii. Assess and measure the quality of life, resource creation, and management and distribution iii. Critically think of the relationship between population, environment, poverty and population sustainable growth
20.	PS-305 a	Principles of Population Studies	2017	<ul style="list-style-type: none"> i. Explore the components of population change, trends in size and growth of population ii. Discover the concepts of fertility, mortality and migration iii. Acquire skills in exploring the sources and quality of data on fertility, mortality and migration
21.	PS – 305 b	Population, Society and	2017	<ul style="list-style-type: none"> i. Understand the components of population change

		Environment		<p>and sociological consequences</p> <p>ii. Demonstrate sociological perspective to analyze the relationship between man, ecology and environment</p> <p>iii. Critical thinking of Sustainable development and its concepts</p>

To prepare the students for further research in broad areas of environment and natural resource governance from sociological perspective</p>
12	MASO -206	Human Values and Professional Ethics-II	2017	<p>1. To provide knowledge about Value oriented education, Medical ethics, Family values , Ethics and Moral code</p> <p>2. To provide the Business, Environmental and social ethics followed and practiced</p> <p>3. To enhance values of self-esteem and self-respect among students</p>
13	MASO -301	Medical Sociology	2017	<p>1. This course will help the students to</p>

				<p>understand the concepts of health and illness</p> <ol style="list-style-type: none"> 2. To understand the social facts of health and the root causes of illness 3. To apply sociological theories, concepts, and research to experiences of health, illness, health education, public health and the intense public issues related to health
14	MASO -302	Urban Sociology and Development	2017	<ol style="list-style-type: none"> 1. This paper attempts to analyse the urban social world and its dynamics, various theoretical constructs concerning the patterning and growth of towns and cities 2. To understand the various theoretical approaches to urban development and apply them to different aspects of cities 3. To study historical, economic, and political trends that have affected the growth and development of cities
15	MASO -303	Field Work and Extension (Village placement)	2017	<ol style="list-style-type: none"> 1. This paper aims at direct exposure of students to the real world and problems confronting society 2. Students will carry out field work in village for 10 days for practical experience

				3. To learn about sociological study techniques like Participatory Rural Appraisal, Sampling, Interview and Extension
16	MASO 304	Generic electives (a) Human Rights	2017	<ol style="list-style-type: none"> 1. To study Human rights and Constitutional framework 2. To recognize the role of human rights in development, theories of development, development and tradeoff on human rights 3. To Understand the social, political, cultural, and comparative construction of human rights history , institutions, discourses, and futures
		(b) Sociology of Gender	2017	<ol style="list-style-type: none"> 1. To examine how society influences understandings and perception of differences between masculinity (what society deems appropriate behaviour for a “man”) and femininity (what society deems appropriate behaviour for a “woman”). 2. To understand influences of gender on identity and social practices. 3. To pay special focus on the power relationships that follow from the established genderorder in a given society

				and changes over time.
		c) Gerontology	2017	<ol style="list-style-type: none"> 1. This paper aims at understanding physical, psychosocial, and cultural aspects of the aged 2. To understand aging transitions and intergenerational issues at various contexts and its nexus 3. To examine health and illness adjusting to loss and care of persons with chronic illnesses and rehabilitative needs
		(d) Sociology of Andhra Pradesh	2017	<ol style="list-style-type: none"> 1. This paper aims to study the historical outline and emergence of Andhra society 2. To understand the culture and various social movements in Andhra Pradesh 3. To analyze the welfare and developmental programmes of the rural and urban Andhra Pradesh
17	MASO -305	Open elective (a) Social Psychology and Personality Development	2017	<ol style="list-style-type: none"> 1. This paper aims at the understanding the relationship of cognition and attitudes of individual and society 2. To focus on psychological aspects of the individual in the context of social behaviour 3. To examine group dynamics such as group

				thinking and decision making, leadership, persuasion, conflict and cooperation)
		(b) Business And Society	2017	<ol style="list-style-type: none"> 1. This paper aims at understanding the concepts of Social economy and knowledge management 2. To examine the business community and social responsibility 3. To understand the inter-relation among business firms, organizations , public policy, business law and governance
23	MASO -401	Criminology	2017	<ol style="list-style-type: none"> 1. This paper seeks to describe the students about the different types of crime and scope of criminology 2. To illustrate the causes of crime and crime rates 3. To study the crime scientifically through data on crime, trends and various theoretical approaches
24	MASO-402	Industrial Dynamics	2017	<ol style="list-style-type: none"> 1. This paper aims to provide the students about the structure and process of industrial organizations from sociological perspective 2. To deal with the effects of industrialization on

				<p>Indian social systems and institutions</p> <p>3. To study the internal relations which are connected directly or indirectly with industry</p>
25	MASO-403	Field Work	2017	<p>1. This paper aims at exposing students in analysing the data</p> <p>2. To understand the different variations in viva-voce</p> <p>3. To understand the recent patterns in Practice</p>
26	MASO-404	<p>Generic electives</p> <p>(a) Social Welfare and Welfare Administration</p>	2017	<p>1. This paper aims at understanding the efficiency of resources and services to meet the needs of the individuals, families, groups and communities</p> <p>2. To understand the problems of Schedule castes, Schedule tribes, Backward classes and Minorities</p> <p>3. To facilitate social relationship and adjustments necessary for the disadvantaged sections, children, women, youth and elderly</p>
		(b) Social Entrepreneurship Development	2017	<p>1. The aim of this paper is to understand the theoretical positions of the Social entrepreneurship development</p> <p>2. To be aware of the contemporary approaches</p>

				<p>to social entrepreneurship</p> <p>3. To have comprehensive understanding of the context, process and effects of entrepreneurial activities</p>
		(c) Sociological Perspectives	2017	<p>1. This paper aims at the students to compare and contrast basic theoretical perspectives of sociology through rigorous scientific enterprise</p> <p>2. To sensitize the need for empirically grounded theories</p> <p>3. To acquaint students with the recent trends in Sociological thought</p>
		(d) Globalization and society	2017	<p>1. This paper aims at the students to understand the nature and dynamics of globalization and social context though various agencies</p> <p>2. To analyze the interconnected changes in the economic, cultural, social, and political spheres of society</p> <p>3. To understand ever-increasing integration of nations, regions, communities</p>
27	MASO-405	Open elective (a) Globalization and Educational Pursuits	2017	<p>1. This paper aims to understand multifaceted nature of globalization and</p>

				<p>internationalization in the context of higher education</p> <ol style="list-style-type: none"> 2. To examine key concepts and theories of globalization, international and comparative education 3. To make the students understand the Global citizenship from professional and academic perspective
		(b) Visual Sociology	2017	<ol style="list-style-type: none"> 1. This paper aims at providing the students a new perspective in study of deliberate versus spontaneous behavior 2. To be aware of recording social signals, expressions as spontaneous as possible 3. To organize the recording of reactions and variations that occur as a response to the context

28. Anthropology

S. No.	Name of the Programme	Course Code	Title of the Course	Years	Activities/Content with direct bearing on Employability/Entrepreneurship/ Skill development
1	M.Sc. Anthropology	ANO : 101	Introduction to Social Cultural Anthropology	2017	<ul style="list-style-type: none"> a. Exposed to the basic introductory background about Socio-cultural Anthropology, its historical background and relation to other branches b. Provides knowledge about the entire subject matter of the socio-cultural anthropology as well as its different sub-branches. c. Exposed to social institutions d. Know the religion beliefs, rituals and myth
2	M.Sc. Anthropology	ANO : 102	Introduction to Biological Anthropology	2017	<ul style="list-style-type: none"> a. Exposed to the basic concept, meaning and scope of Biological Anthropology

					<ul style="list-style-type: none"> b. Explain how human being acts as the central figure of Anthropology c. Elucidate the major divisions of Biological/ physical Anthropology d. Know the inter-relationship between Biological Anthropology and other sciences e. To know how Man evolved in animal kingdom f. To understand how evolution has occurred and what are the evidences of evolution and addresses human variation and the causes of variations
3	M.Sc. Anthropology	ANO-103	Introduction to Archaeological Anthropology	2017	<ul style="list-style-type: none"> a. Able to define archaeological anthropology and its branches b. Understand the geological timescale, tool typology and technology c. The Course will explain the basic concepts and terminology used in

					<p>prehistoric archaeology</p> <p>d. Understand chronological and cultural determinants of Indian and European prehistory</p>
4	M.Sc. Anthropology	ANO-104P	Somatometry & Somatoscopy	2017	<p>a. Able to define archaeological anthropology and its branches</p> <p>b. Understand the geological timescale, tool typology and technology</p> <p>c. The Course will explain the basic concepts and terminology used in prehistoric archaeology</p>
5	M.Sc. Anthropology	ANO 105p	Archaeological Anthropology	2017	
6.	M.Sc. Anthropology	ANO 106	Economic and Political Anthropology	2017	<p>a. Able to learn meaning and scope of economic anthropology</p> <p>b. To understand the division of labor by gender and age, exchange of goods and gifts, and to understand the market economy.</p> <p>c. Able to know the historical background of Political Organization</p>

					<p>besides types and trends of Political Organization including types like i.e. Band, Tribe, Chiefdoms and State</p> <p>d. To know the local institutions: panchayats (traditional and statutory)</p>
7.	M.Sc. Anthropology	ANO 107	Human Values and Professional Ethics -1	2017	
8.	M.Sc. Anthropology	ANO 201	Comparative Ethnography and Indian Anthropology	2017	<p>a. To understand the major ethnological regions of the world</p> <p>b. To know the ethnic and linguistic classifications</p> <p>c. Able to understand the traditional Indian culture</p> <p>d. To know the contributions of Indian anthropologists</p>
9.	M.Sc. Anthropology	ANO 202	Principals of Genetics	2017	<p>a. understand about the scope of genetics and its historical development</p> <p>b. to learn the biology of cell and cell division</p>

					<ul style="list-style-type: none"> c. Exposed to the patterns of the inheritance d. Know about blood groups and their anthropological perspective
10	M.Sc. Anthropology	ANO 203	Research Methods in Anthropology	2017	<ul style="list-style-type: none"> a. To understand the fieldwork traditions in Anthropology b. To understand the concept of research and its purpose c. highlight the conceptual structure of a research design d. understand the various statistical tools in the analysis and interpretation of the data
11	M.Sc. Anthropology	ANO 204P	Craniology and Craniometry	2017	
12	M.Sc. Anthropology	ANO205P	Doing Ethnography	2017	
13	M.Sc. Anthropology	ANO206	Prehistoric India	2017	<ul style="list-style-type: none"> a. learn the regional distribution of lower, middle, and upper Paleolithic cultures b. To learn the Mesolithic culture and typo- technology

					<ul style="list-style-type: none"> c. Learn the regional distributions of Neolithic cultures d. understand the copper and iron age e. exposed to the distribution of megaliths
14	M.Sc. Anthropology	ANO 207	Human Values and Professional Ethics -II	2017	
15	M.Sc. Anthropology	ANB 301	Human Evolution and Fossil Evidence	2017	<ul style="list-style-type: none"> a. Understand the evolutionary trends of primates, prosimians to homosapiens b. To know the hominid evolution c. To know the Neanderthals distributions and extension d. Exposed to the homo sapiens distribution and feature of human species
16	M.Sc. Anthropology	ANB 302	Human Genetics	2017	<ul style="list-style-type: none"> a. understand the meaning and scope of human genetics b. know methods of studying human chromosomes and chromosomal

					<p>abnormalities</p> <p>c. depict Inborn errors of metabolism with typical examples and human ABO blood group system and its fundamentals</p> <p>d. know the concept of “one-gene-one-enzyme hypothesis” which explains development of genetic diseases/disorders caused by defective genes controlling the functions of enzymes in metabolic pathways</p>
17	M.Sc. Anthropology	ANB 303P	Human Osteology and Osteometry	2017	
18	M.Sc. Anthropology	ANB 304P	Dermatoglyphics	2017	
19	M.Sc. Anthropology	ANB 305	Anthropological Demography	2017	<p>a. Know about the different population growth theories</p> <p>b. Learn the basic demographic variables</p> <p>c. Understand how the different factors regulates the population growth</p> <p>d. Understand the different demographic models</p>

					e. Learn the genetic consequences of family planning
20	M.Sc. Anthropology	ANB 306	Biostatistics and Computer Applications	2017	a. To understand the concept of research and its purpose b. To enlighten the process of research and conceptual structure of a research design c. Understand the disease outcomes through measurement of descriptive, analysis of variance and regression models through computer applications d. Know the use of computers in the analysis data and power point presentation
21	M.Sc. Anthropology	ANB 307	Forensic Anthropology	2017	a. able to know about forensic anthropology, a specialized, applied branch of physical/biological anthropology which deals with the crime investigation b. understand how dermatoglyphic,

					<p>somatoscopic characteristics and body fluids helpful in crime investigation</p> <p>c. know the use of skeletal remains in forensic investigations</p> <p>d. know the importance of modern methods in crime investigation</p>
22	M.Sc. Anthropology	ANB 308	Palaeoanthropology	2017	<p>a. understand the geological time scale and Pleistocene epoch</p> <p>b. know about tool making techniques and tool types</p> <p>c. gain knowledge about dating methods</p> <p>d. learn about Paleolithic, Mesolithic and Neolithic cultures in India</p>
23	M.Sc. Anthropology	ANB 401	Biological Anthropology	2017	<p>a. Understand the basic concept, meaning and scope of Biological Anthropology</p> <p>b. Know the biological variation in modern human populations</p> <p>c. Understand the human adaptability</p>

					<p>and impact of urbanization on humans</p> <p>d. Bio-cultural aspects of health and disease</p>
24	M.Sc. Anthropology	ANB-402	Human Population Genetics	2017	<p>Students will</p> <p>a. Explain the basic terms/concepts of human population genetics</p> <p>b. Appreciate the mechanisms of evolutionary forces in shaping biological diversity</p> <p>c. Understand the importance of Hardy – Weinberg Equilibrium especially the gene frequency changes with respect to Mutation, Genetic drift, Selection, Gene flow and to investigate them in empirical situations in human populations</p> <p>d. Know about breeding isolation and its implications in human population genetics.</p>

					e. Understand various mating patterns (inbreeding and types of consanguineous marriages) and measure the inbreeding in families
25	M.Sc. Anthropology	ANB-403P	Advanced Biological Anthropology	2017	
26	M.Sc. Anthropology	ANB 404 P	Fieldwork, Dissertation & Viva-Voce	2017	
27	M.Sc. Anthropology	ANB -405	Human Growth, Physique and Nutrition	2017	<p>a. Know about the Differentiate the term growth, maturation and development</p> <p>b. To learn the methods of studying growth and the factors affecting the growth</p> <p>c. To understand the Human Physique and its Relation of Function, Disease and Behavior.</p> <p>d. Know the socio-cultural aspects of nutrition and nutrients in health and diseases</p>
28	M.Sc. Anthropology	ANB 406	Applied Biological	2017	a. Know about various applications of

			Anthropology		<p>anthropometry and kinanthropometry in various fields</p> <p>b. Understand about the importance of forensic anthropology in crime investigations</p> <p>c. Know the importance genetic counseling, genetic screening, Genetic engineering, treatment of genetic diseases and Gene therapy</p> <p>d. Learn about the human geno project</p>
29	M.Sc. Anthropology	ANB 407	Medical Genetics	2017	<p>a. Understand the overplanting areas of anthropology and genetics, anthropology and medicine (Disease)</p> <p>b. Understand the different methods of identification genetic diseases</p> <p>c. Know about epidemiology, socio cultural and ecological dimensions of genetic diseases control and treatment</p> <p>d. Learn the knowledge, attitude and currying practices of genetic diseases</p>

30	M.Sc. Anthropology	ANB-408	Epidemiology	2017	<ul style="list-style-type: none"> a. Exposed to the basic concepts in epidemiology with examples of epidemiology in different areas of public health. b. Understand the global burden of health outcomes and diseases by assessing measures and interpret the prevalence, risk, rate, and odds within the context of epidemiology c. Know about Complications of obesity on health its prevention and control d. Understand the complex web of biological, behavioral, cultural and environmental factors towards the prevalence of communicable infections and chronic infections
31	M.Sc. Anthropology	ANB -409	Fundamentals of Anthropology	2017	<ul style="list-style-type: none"> a. Understand the meaning, scope and relation with other branches of Biological Anthropology.

					<ul style="list-style-type: none"> b. Understand the meaning, scope and relation with other branches of Socio-Cultural Anthropology. c. Understand the meaning, scope and relation with other branches of Archeological Anthropology d. Exposed to race, ethnicity and racial classification
32	M.Sc. Anthropology	ANS 301	Theories of Culture	2017	<ul style="list-style-type: none"> a. Understand the Conceptual Contributions of E. B. Tylor, B. Malinowski, A. L. Kroeber, L. White, Unilineal Evolution (L. H. Morgan and E. B. Tylor); Multilineal Evolution (J. Steward); Universal Evolution (L. White) b. To know the British School; German-Austrian School; American – Distribution School of culture c. Know the Patterns of Culture (R. Bendict); Basic Personality, Model Personality (Kardiner, Linton, Cora

					<p>Dubois); Selfhood (Murphy); Symbolic (G. Obeyesekere)</p> <p>d. understand the historical approaches of culture</p>
33	M.Sc. Anthropology	ANS 302	Social Anthropology of Complex Societies	2017	<p>a. Learn the meaning and approach of great and little traditions</p> <p>b. learn about the peasant societies and contemporary peasant societies</p> <p>c. know the culture of poverty, institution and complex societies</p> <p>d. understand problems of urbanization and social changes</p>
34	M.Sc. Anthropology	ANS 303P	Participatory of Research methods in Development Process	2017	
35	M.Sc. Anthropology	ANS 304P	Non-Governmental Organizations and Extension studies	2017	
36	M.Sc. Anthropology	ANS 305	Ecological Anthropology	2017	<p>a. Understand the environment and ecosystem in understanding the cultural modifications</p>

					<p>b. Know about the cultural ecology, cognitive ecology, single unified ecology, and ethno ecology.</p> <p>c. Learn issues and prospects on development projects and displacement</p> <p>d. Understand Biodiversity for sustainable development Knowabout Ecological protest movements (Chipko and Narmada Bachao Andolan (NBA));</p>
37	M.Sc. Anthropology	ANS 306	Applied Anthropology- Indigenous Communities	2017	<p>a. Know the Similarities and Differences between Applied and Action Anthropology, Indigenous communities and applied anthropology. Indigenous rights.</p> <p>b. Know the process of acculturation and assimilation, socialization</p> <p>c. Know about applications of Anthropology in the management of health, agriculture, education and biodiversity and poverty eradication</p> <p>d. Gain the knowledge on tribal welfare,</p>

					tribal problems, forest and property rights, shifting cultivation and tribal movements
38	M.Sc. Anthropology	ANS 307	Anthropology of Religion Sacred complexes in India	2017	<ul style="list-style-type: none"> a. Know about meaning and relation with power and political leverages, ethnic identity and other aspects of culture in tradition and modern societies b. Know the different anthropological theories of religion c. Know the issues of right of food among by Hindus, five symbols of sikh identity, Aspects of sarora ritual and Shamansism, and Christianity in India d. To understand Contemporary issues of religious violence, secularism and fundamentalism
39	M.Sc. Anthropology	ANS 308	Anthropology and Career Promotion	2017	<ul style="list-style-type: none"> a. Understand the anthropology in competitive examinations

					<ul style="list-style-type: none"> b. Know about participatory research appraisal c. Exposed to the issues in tribes, tribal problems and cast populations d. Learn the books to be consulted, review of questions and scheme of valuation
40	M.Sc. Anthropology	ANS 401	Structural Anthropology	2017	<ul style="list-style-type: none"> a. Know the social structure and function of culture b. Understand about the ideal and real social structure and social organization c. Know the general notion of structuralism d. Learn the symbols and structure
41	M.Sc. Anthropology	ANS-402	Medical Anthropology	2017	<ul style="list-style-type: none"> a. Exposed to the basic concepts in epidemiology with examples of epidemiology in different areas of public health.

					<ul style="list-style-type: none"> b. Understand the etiology, control of infections and non-infections diseases c. Understand the ethno-medicine in the management of health and illness behavior d. Understand the modern medical systems and health care delivery services
42	M.Sc. Anthropology	ANS-403P	Computer Applications	2017	
43	M.Sc. Anthropology	ANS 404 P	Fieldwork, Dissertation & Viva-Voce	2017	
44	M.Sc. Anthropology	ANS -405	Developmental Anthropology	2017	<ul style="list-style-type: none"> a. Know about the Concept of Development and Sustainable Development b. Understand the steps in project preparation, goals, process of implementation and monitoring. c. Role of government, NGOs and peoples participation in development d. Know the watershed management

					and irrigation, resettlement,(Narmada) poverty Alleviation (Velugu); Primary Education (VECs
45	M.Sc. Anthropology	ANS 406	Culture and Management	2017	<ul style="list-style-type: none"> a. Know the concept of organizational culture. Its links with cultural anthropology Organizational ethnography. Anthropology of work b. Understand the Theories of organizational culture. Different anthropological traditions c. Know the How culture affect management Changes in management styles Future outlook. d. To understand the Ethno methodological approaches, Organizational symbolism. Integration, differentiation and fragmentation as three perspective approaches to organizational culture
46	M.Sc. Anthropology	ANS 407	Anthropology of Displaced Populations	2017	<ul style="list-style-type: none"> a. Know the peoples perception towards development and displacement b. Understand the role of government

					<p>and non-government agencies in the process of displacement, resettlement and rehabilitation.</p> <p>c. Understand policy issues relating development and displacement in legal implications of displacement and rehabilitation</p> <p>d. Learn the Socio-Cultural effects of displacement, Socio disorganization, process of disintegration and reintegration</p>
47	M.Sc. Anthropology	ANS-408	Visual Anthropology	2017	<p>a. Know about the concept, scope and Historical Development of visual anthropology</p> <p>b. Know about the appraisal of ethnographic films in cultural context</p> <p>c. Knowledge about descriptive studying of Visual data produced by Cultures</p> <p>d. To understand the ethnographical films, still photos film shootings and commentary</p>

48	M.Sc. Anthropology	ANS -409	Tribal Studies	2017	<ul style="list-style-type: none"> a. Understand the classification and distribution of tribes b. Know the tribal problems like Land Alienation, Indebtedness, Migration, and Cultural Degradation. c. To know the shifting cultivation, tribal education and tribal health d. To know the Fifth and Sixth Schedules Constitutional safeguards

29. Biochemistry

S.No.	Course Code	Name of the Course	Year of introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/ Skill development
1	BCH101	Biochemical and Biophysical methods	2018	<ul style="list-style-type: none"> 1. Understand the principle, Instrumentation of different types of Light microscopy, electron microscopy, and techniques of Centrifugation and its applications in various fields of research. 2. Learn about basic Radioactivity principles, measurement method and its biological applications. 3.Acquire knowledge about the basics and latest developments in the instrumentation techniques of Electrophoresis (IEF, 2D PAGE) and Chromatography and their applications in various research fields. 4.Demonstrate skill to explain about principle, Bioinstrumentation and

				applications of spectroscopy techniques
2	BCH 102	Molecular Physiology and community nutrition	2018	<ol style="list-style-type: none"> 1. Gain the knowledge about circulatory and excretory systems. 2. Know the importance of muscular and nervous system. 3. Health benefits and malnutrition of proteins and fats. 4. Know the importance of nutrition in maintenance of health and diseases.
3	BCH 103P	Practical related to Biochemical Preparations and Analysis	2018	<ol style="list-style-type: none"> 1. Learn safety and precautionary measures for working in a laboratory. 2. Develop skill and proficiency in preparation of laboratory reagents and Use of handling of glass wares, minor equipment for conducting experiments 3. Acquire practical training for qualitative and quantitative analysis of biological materials/molecules and their estimation using multiple methods. 4. Gain the knowledge about isolation studies of biological samples.
4	BCH 104P	Practical related to Analytical methods	2018	<ol style="list-style-type: none"> 1. Learn how to standardize various biomolecules. 2. Separate biomolecules by paper chromatography and thin layer chromatography 3. Demonstrate separation of protein by electrophoresis. 4. Isolation and spectrophotometric characterization of plant pigments.
5	BCH 105P	Human values and Professional ethics-I	2018	<ol style="list-style-type: none"> 1. Easily understand the Need and Importance of Professional Ethics- Goals- Ethical Values in various Professions. 2. Analyse the basic moral concepts- right , ought, duty, obligation, justice, responsibility and freedom. 3. Know about Purusharthas, Dharma, Artha, Kama, Moksha. 4. Understand the Four Noble Truths- Arya astanga marga, Jainism- mahavratas and anuvratas 5. Gain the knowledge about views on Manu and Yajnavalkya
6	BCH 106	Cell and	2018	<ol style="list-style-type: none"> 1. Easily understand the difference between prokaryotic and

		Biomolecules		<p>eukaryotic cells, and the concept of cell division.</p> <ol style="list-style-type: none"> 2. Understand the classification, structure and biochemical reactions of aminoacids and proteins. 3. Describe the classification, structure and biochemical reactions of carbohydrates and lipids. 4. Understand the concept of structural organization of nucleic acids
7	BCH 201	Energy metabolism	2018	<ol style="list-style-type: none"> 1. Explain the broad outlines of intermediary metabolism and importance of carbohydrate metabolism in life. 2. Describe the importance of Electron transport and ATP production mechanism. 3. Gain in knowledge in Carbohydrate metabolism and their associated disorders. 4. Describe the details of lipid metabolism.
8	BCH 202	Metabolism of Nitrogen based molecules	2018	<ol style="list-style-type: none"> 1. Understand the anabolic and catabolic reactions of proteins and aminoacids. 2. Gain knowledge in the importance of aminoacids as biosynthetic precursors. 3. Know the biosynthesis and degradation of purine and pyrimidines and their associated disorders. 4. How toxic chemicals are metabolised by the body through detoxification and the mechanism of carcinogenicity.
9	BCH 203P	Practical related to Enzymology	2018	<ol style="list-style-type: none"> 1. Learn about estimation of various enzymes in biological sample. 2. Learn to perform assay of clinically important enzyme: serum acid and alkaline phosphatase, serum LDH. 3. Learn about the factors affecting enzyme activity and determination of K_m. 4. Demonstrate the Immobilization of enzymes.
10	BCH 204P	Practical related to Molecular	2018	<ol style="list-style-type: none"> 1. Isolate nucleic acids from various sources. 2. Estimate the nucleic acids quantitatively.

		Biology		3. Determine the melting temperature. 4. Determine the purity of DNA by UV method.
11	BCH 205	Human values and Professional ethics-II	2018	1. Easily understand the Components, Structure and responsibilities of family and status of women in family and society. 2. To get an idea on Ethical issues in relation to health care professionals and patients and genetic engineering, Social justice in health care, Human cloning. 3. To know about Characteristics of ethical problems in management, ethical theories, causes of unethical behavior, ethical abuses and work ethics. 4. Understand the Ethical theory, Ecological crisis, Pest control, Pollution and waste, Climate change, Energy and population. 5. Gain the knowledge about Organ trade, Human trafficking, Human rights violation and social disparities, Feminist ethics, Surrogacy/ pregnancy.
12	BCH 206	Enzymology	2018	1. Distinguish the fundamentals of enzyme properties, nomenclatures, characteristics and mechanisms. 2. Describe the concepts of enzyme inhibition and mechanism of enzyme catalysis. 3. Students will acquaint with mechanism of enzyme action and various coenzymes involved in the biochemical reactions taking place in living systems. 4. Describe the concepts of co-operative behavior and allosteric regulation.
13	BCH 301	Microbial Biochemistry and Genetics	2018	1. Understand the basics of microbiology like nomenclature and classification of microorganisms, understand the various biological and non-biological method to control microorganisms 2. The student will learn about different mode of nutrition in microorganisms and about viruses - Isolation, purification and

				<p>characterization.</p> <ol style="list-style-type: none"> 3. Understand the basics of genetics and the gene arrangement in prokaryotes and eukaryotes. 4. Gain knowledge in bacterial genetics includes the different types plasmids, recombination in bacteria, bacteriophages and bacterial defense mechanism(CRISPR) and Describe the various types of mutations and its effect.
14	BCH 302	Molecular Biology	2018	<ol style="list-style-type: none"> 1. The students will learn about the Possible modes of replication, and roles of helicase, primase, gyrase, topoisomerase, DNA Polymerase, DNA ligase, and Regulation of replication. 2. Learn about the mechanism and regulation of transcription in prokaryotes and eukaryotes. 3. Learn about genetic code and their evolution. 4. Gain knowledge in Different stages and components of protein synthesis.
15	BCH 303P	Practical related to Microbiology	2018	<ol style="list-style-type: none"> 1. Handle the microscope. 2. Learn Methods of sterilization and preparation of various culture media, Purification techniques. 3. Identification of isolated bacteria, and Growth curve of microorganism. 4. Learn Staining techniques for bacteria and yeast. 5. Gain knowledge in the Preparation of wine from Grapes. 6. Production and estimation of alcohols, citric acid, lactic acid etc.
16	BCH 304P	Practical related to Clinical Biochemical Analysis	2018	<ol style="list-style-type: none"> 1. Collect and maintain the biological samples for clinical assay. 2. Estimate the blood and serum enzymes for diagnosis of diseases. 3. Qualitatively analyse the abnormal constituents in urine. 4. Work with diagnostic kits
17	BCH 305 Generic Elective (Two	<ol style="list-style-type: none"> a) Molecular Endocrinology b) Clinical 	2018	<ol style="list-style-type: none"> 1. Know about the mechanism of action of different hormones secreted by hypothalamus, pituitary and pineal glands. 2. Familiar with Iodine, Calcium metabolisms and disorders related to thyroid and parathyroid glands.

	papers out of three)	Biochemistry and Cell and Developmental Biology		<ol style="list-style-type: none"> 3. Know about the mechanism of action of insulin, glucagon and many gastro intestinal hormones. 4. Acquire knowledge on Hormonal regulation of menstrual cycle and disorders associated with Gonadal hormones.
18	BCH 305 B	Clinical Biochemistry	2018	<ol style="list-style-type: none"> 1. Maintain clinical biochemistry laboratory, biological specimen collection for clinical assay and investigation of disorders associated with carbohydrates. 2. Learn and understand the Inborn errors of amino acid metabolism, Lipid metabolism and Renal function system. 3. Gain knowledge in clinical enzymology and Disorders of Gastrointestinal Tract. 4. Investigate the serum enzymes in liver
19	BCH-305c	Cell and Developmental Biology	2018	<ol style="list-style-type: none"> 1. Acquire knowledge on basic concepts of Developmental Biology. 2. Gain the proficient knowledge about zygote formation, blastula formation, gastrulation and many events in early development. 3. Understand Organogenesis, limb development and regeneration in vertebrates, and post embryonic development in animals and Plant tissue culture, Protoplast fusion and Production of transgenic plants. 4. Acquire knowledge about biomembrane concept and various membrane transport systems
20	BCH 306 Open Elective to others	a) General Biochemistry	2018	<ol style="list-style-type: none"> 1. Understand the classification, structure and biochemical reactions of amino acids and proteins. 2. Describe the classification, structure and biochemical reactions of carbohydrates and lipids. 3. Understand the concept of structural organization of nucleic acids. <ol style="list-style-type: none"> 1. Describe the Structure of porphyrins, Chemistry and functions of water and fat soluble vitamins. 2. Students will be able to know how to conserve natural resources for future. 3. Students will be able to describe differing types

		b)Environmental Biochemistry		<p>of <i>ecosystems</i> and their characteristic features.</p> <ol style="list-style-type: none"> 4. Gain the knowledge about different types of pollution in the environment. 5. Know the Relation between human population and environment. <ol style="list-style-type: none"> 1. Understand the principle, Instrumentation of different types of Light microscopy, electron microscopy, and techniques of Centrifugation and its applications in various fields of research. 2. Learn about basic Radioactivity principles, measurement method and its biological applications. 3. Acquire knowledge about the basics and latest developments in the instrumentation techniques of Electrophoresis (IEF, 2D PAGE) and Chromatography and their applications in various research fields. 4. Demonstrate skill to explain about principle, Bioinstrumentation and applications of spectroscopy techniques
21	BCH 401	Genetic Engineering	2018	<ol style="list-style-type: none"> 1. Familiar with the tools and techniques for isolation and purification of genes, vector construction. 2. Understand the mechanisms of regulation of gene expression in different operons. 3. Know the techniques for transfer and expression of cloned gene and 4. Apply the knowledge of genetic engineering in biological research. 5. principle, Bioinstrumentation and applications of spectroscopy techniques.
22	BCH 402	Technical Writing, Biostatistics and Bioinformatics	2018	<ol style="list-style-type: none"> 1. Discuss the various steps involved in conducting research. 2. Learn to apply hypothesis testing via some of the statistical distributions.

		c)Plant Biochemistry		
26	BCH 406 Open Elective to others (For other departmen t students)	a) Research Methodology b) Biochemistry of diseases	2018	<ol style="list-style-type: none"> 1. Discuss the various steps involved in conducting research. 2. Learn to apply hypothesis testing via some of the statistical distributions. 3. Develop understanding about Biological data and database search tools. 4. Acquire hands on training on various computational tools and techniques employed in Biological sequence analysis <ol style="list-style-type: none"> 1Maintain clinical biochemistry laboratory, biological specimen collection for clinical assay and investigation of disorders associated with carbohydrates. 2Learn and understand the Inborn errors of amino acid metabolism, Lipid metabolism and Renal function system. 3Gain knowledge in clinical enzymology and Disorders of Gastrointestinal Tract. 4.Investigate the serum enzymes in liver diseases
27		C)Nutritional Biochemistry	2018	<ol style="list-style-type: none"> 1. Determine the body composition and body weight by using various methods. 2. To describe the importance of protein and fats. 3. Gain knowledge on vitamins and minerals to maintain health. 4. Aquire knowledge on nutritional importance in different ages in the life

Immuno technology

S.No.	Course Code	Name of the Course	Year of introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/ Skill development
1	Core 1	Biochemical and Biophysical methods	2017	1. Understand the principle, Instrumentation of different types of Light microscopy, electron microscopy, and techniques of Centrifugation and its applications in various fields of research. 2. Learn about basic Radioactivity principles, measurement method and its biological applications. 3. Acquire knowledge about the basics and latest developments in the instrumentation techniques of Electrophoresis (IEF, 2D PAGE) and Chromatography and their applications in various research fields. 4. Demonstrate skill to explain about principle, Bioinstrumentation and applications of spectroscopy techniques
2	Core 2	Molecular Physiology and community nutrition	2017	5. Gain the knowledge about circulatory and excretory systems. 6. Know the importance of muscular and nervous system. 7. Health benefits and malnutrition of proteins and fats. 8. Know the importance of nutrition in maintenance of health and diseases
3	Core 3P	Practical related to Biochemical Preparations and Analysis	2017	1. Learn safety and precautionary measures for working in a laboratory. 2. Develop skill and proficiency in preparation of laboratory reagents and Use of handling of glass wares, minor equipment for conducting experiments 3. Acquire practical training for qualitative and quantitative analysis of biological materials/molecules and their estimation using multiple methods. 4. Gain the knowledge about isolation studies of biological samples.

4	Core 4P	Practical related to Analytical methods	2017	<ol style="list-style-type: none"> 1. Learn how to standardize various biomolecules. 2. Separate biomolecules by paper chromatography and thin layer chromatography 3. Demonstrate separation of protein by electrophoresis. 4. Isolation and spectrophotometric characterization of plant pigments
5	Compulsory Foundation	Cell and Biomolecules	2017	<ol style="list-style-type: none"> 6. Easily understand the difference between prokaryotic and eukaryotic cells, and the concept of cell division. 7. Understand the classification, structure and biochemical reactions of aminoacids and proteins. 8. Describe the classification, structure and biochemical reactions of carbohydrates and lipids. 9. Understand the concept of structural organization of nucleic acids.
6	Elective foundation	Human values and Professional ethics-I	2017	<ol style="list-style-type: none"> 10. Easily understand the Need and Importance of Professional Ethics- Goals- Ethical Values in various Professions. 11. Analyse the basic moral concepts- right , ought, duty, obligation, justice, responsibility and freedom. 12. Know about Purusharthas, Dharma, Artha, Kama, Moksha. 13. Understand the Four Noble Truths- Arya astanga marga, Jainism- mahavratas and anuvratas. 14. Gain the knowledge about views on Manu and Yajnavalkya.
7	Core 1	Energy metabolism	2017	<ol style="list-style-type: none"> 1. Explain the broad outlines of intermediary metabolism and importance of carbohydrate metabolism in life. 2. Describe the importance of Electron transport and ATP production mechanism. 3. Gain in knowledge in Carbohydrate metabolism and their associated disorders. 4. Describe the details of lipid metabolism.

8	Core 2	Metabolism of Nitrogen based molecules	2017	<ol style="list-style-type: none"> 1. Understand the anabolic and catabolic reactions of proteins and aminoacids. 2. Gain knowledge in the importance of aminoacids as biosynthetic precursors. 3. Know the biosynthesis and degradation of purine and pyrimidines and their associated disorders. 4. How toxic chemicals metabolised by the body through detoxification and the mechanism of carcinogenicity.
9	Core 3	Practical related to Enzymology	2017	<ol style="list-style-type: none"> 5. Learn about estimation of various enzymes in biological sample. 6. Learn to perform assay of clinically important enzyme: serum acid and alkaline phosphatase, serum LDH. 7. Learn about the factors affecting enzyme activity and determination of Km. 8. Demonstrate the Immobilization of enzymes
10	Core 4	Practical related to Molecular Biology	2017	<ol style="list-style-type: none"> 1. Isolate DNA from bacterial, plant and animal cells and RNA from yeast cells. 2. Estimate concentrations of DNA and RNA by conventional methods and UV absorption methods. 3. Determine the melting temperature(T_m) of DNA. 4. Learn procedures for isolation of phage M_{13} and single and double standard M_{13} DNA.
11	Compulsory Foundation	Enzymology	2017	<ol style="list-style-type: none"> 1. Distinguish the fundamentals of enzyme properties, nomenclatures, characteristics and mechanisms. 2. Describe the concepts of enzyme inhibition and mechanism of enzyme catalysis. 3. Students will acquaint with mechanism of enzyme action and various coenzymes involved in the biochemical reactions taking place in living systems. 4. Describe the concepts of co-operative behaviour and allosteric regulation

12	Elective foundation	Human values and Professional ethics-II	2017	6. Easily understand the Components, Structure and responsibilities of family and status of women in family and society. 7. To get an idea on Ethical issues in relation to health care professionals and patients and genetic engineering, Social justice in health care, Human cloning. 8. To know about Characteristics of ethical problems in management, ethical theories, causes of unethical behavior, ethical abuses and work ethics. 9. Understand the Ethical theory, Ecological crisis, Pest control, Pollution and waste, Climate change, Energy and population. 10. Gain the knowledge about Organ trade, Human trafficking, Human rights violation and social disparities, Feminist ethics, Surrogacy/ pregnancy
13	Core 1	Microbial Biochemistry and Genetics	2017	1. Understand the basics of microbiology like nomenclature and classification of microorganisms and different modes of nutrition in microorganisms. 2. Learn and understand the various biological and non-biological methods to control microorganisms and Biology of subviral agents – Viroids, Prions, Satellite viruses. 3. Understand the basics of genetics and the gene arrangement in prokaryotes and eukaryotes. 4. Gain knowledge in bacterial genetics like different types plasmids, recombination in bacteria, bacteriophages and bacterial defense mechanism (CRISPR) and various types of mutations and their effects
14	Core 2	Immunology	2017	1. Gain knowledge on different types of antigens, antibodies and how different types of antibodies are produced. 2. Out line, compare and contrast the key mechanism of innate and adaptive immunity 3. Gain knowledge on undesirable immunological reactions and their complications in health management 4. Apply knowledge in disease diagnosis through serological tests

15	Core 3	Practical related to Microbiology	2017	<ol style="list-style-type: none"> 1. Handle the microscope. 2. Learn Methods of sterilization and preparation of various culture media, Purification techniques. 3. Identification of isolated bacteria, and Growth curve of microorganism. 4. Learn staining techniques for bacteria and yeast. 5. Gain knowledge in the Preparation of wine from Grapes. 6. Production and estimation of alcohols, citric acid, lactic acid etc
16	Core 4	Practical related to Immunology	2017	<ol style="list-style-type: none"> 1. Perform RBC, WBC count and differential count. 2. Do all haematological tests that will be done in clinical labs. 3. Have an idea on Rocket immunoelectrophoresis, Cross over Immunoelectrophoresis etc. 4. Do Heme agglutination tests for identification of different antigens
17	Generic Elective (Two papers out of three)	a) Molecular Biology	2017	<ol style="list-style-type: none"> 1. The students will learn about the Possible modes of replication, and roles of helicase, primase, gyrase, topoisomerase, DNA Polymerase, DNA ligase, and Regulation of replication. 2. Learn about the mechanism and regulation of transcription in prokaryotes and eukaryotes. 3. Learn about genetic code and their evolution. 4. Gain knowledge in Different stages and components of protein synthesis
		b)Molecular Endocrinology		<ol style="list-style-type: none"> 1. Know about the mechanism of action of different hormones secreted by hypothalamus, pituitary and pineal glands. 2. Familiar with Iodine, Calcium metabolisms and disorders related to thyroid and parathyroid glands. 3. Know about the mechanism of action of insulin, glucagon and many gastro intestinal hormones. 4. Acquire knowledge on Hormonal regulation of menstrual cycle and disorders associated with Gonadal hormones.
		c)Cell and Developmental Biology		<ol style="list-style-type: none"> 1. Acquire knowledge on all cell organelles in prokaryotes and eukaryotes, cell signaling, cell communication, cell adhesion,

				<p>Apoptosis, Senescence, integrins .</p> <p>2. Gain the proficient knowledge about basic concepts of Developmental Biology, zygote formation, blastula formation, gastrulation and many events in early development.</p> <p>3. Understand Organogenesis, limb development and regeneration in vertebrates, and post embryonic development in animals and Plant tissue culture, Protoplast fusion and Production of transgenic plants.</p> <p>4. Gain knowledge about Miscelle, and liposomes, Membrane fluidity, Active transport, Ionophores Gap junctions, Endocytosis and Exocytosis.</p>
18	Open Elective to others (For other department students)	a) Basics of Immunology	2017	<p>1. Gain knowledge on essential features of different types of antigens, antibodies.</p> <p>2. Out line, compare and contrast the key mechanism of innate and adaptive immunity.</p> <p>3. Gain knowledge on undesirable immunological reactions and their complications in health management and transplantation.</p> <p>4. Apply knowledge in disease diagnosis through serological tests.</p>
		b) Immunotechniques		<p>1. To purify and analyse the antigens and antibodies.</p> <p>2. To apply different Hybridization techniques and ELISA, RIA.</p> <p>3. To detect various diseases by application of antiisera.</p> <p>4. To engineer antibodies and catalytic antibodies and produce drugs to allergies</p>
19	Core 1	Microbial Biochemistry and Genetics	2017	<p>1. Familiar with the tools and techniques for isolation and purification of genes, vector construction.</p> <p>2. Understand the mechanisms of regulation of gene expression in different operons.</p> <p>3. Know the techniques for transfer and expression of cloned gene and</p>

				4. Apply the knowledge of genetic engineering in biological research
20	Core 2	Immunology	2017	<ol style="list-style-type: none"> 1. Discuss the various steps involved in conducting research. 2. Learn to apply hypothesis testing via some of the statistical distributions. 3. Develop understanding about Biological data and database search tools. 4. Acquire hands on training on various computational tools and techniques employed in Biological sequence analysis
21	Core 3	Practical related to Microbiology	2017	<ol style="list-style-type: none"> 1. Use diagnostic kits to test different types of auto immune diseases. 2. Prepare Rabbit for performance of immunological studies. 3. Perform Single Radial Immunodiffusion. 4. Have an idea on Rocket immunoelectrophoresis, Cross over Immunoelectrophoresis etc. 5. Do Heme agglutination tests for identification of different antigens
22	Core 4	Practical related to Immunology	2017	<ol style="list-style-type: none"> 1. Understand the microbial techniques for isolation, cultivation and maintenance of pure cultures 2. Learn structure, function of gene and its transfer methods 3. Develop understanding on cause, spread and control of diseases caused by different microorganisms 4. Get knowledge on collection of data, thesis writing.
23	Generic Elective (Two papers)	a) Molecular Biology	2017	<ol style="list-style-type: none"> 1. The students will learn about the Possible modes of replication, and roles of helicase, primase, gyrase, topoisomerase, DNA Polymerase, DNA ligase, and Regulation of replication.

	out of three)			<p>2. Learn about the mechanism and regulation of transcription in prokaryotes and eukaryotes.</p> <p>3. Learn about genetic code and their evolution.</p> <p>4. Gain knowledge in Different stages and components of protein synthesis</p>
		b) Molecular Biology	2017	<p>1. Know about the mechanism of action of different hormones secreted by hypothalamus, pituitary and pineal glands.</p> <p>2. Familiar with Iodine, Calcium metabolisms and disorders related to thyroid and parathyroid glands.</p> <p>3. Know about the mechanism of action of insulin, glucagon and many gastro intestinal hormones.</p> <p>4. Acquire knowledge on Hormonal regulation of menstrual cycle and disorders associated with Gonadal hormones</p>
		c) Cell and Developmental Biology	2017	<p>1. Acquire knowledge on all cell organelles in prokaryotes and eukaryotes, cell signaling, cell communication, cell adhesion, Apoptosis, Senescence, integrins .</p> <p>2. Gain the proficient knowledge about basic concepts of Developmental Biology, zygote formation, blastula formation, gastrulation and many events in early development.</p> <p>3. Understand Organogenesis, limb development and regeneration in vertebrates, and post embryonic development in animals and Plant tissue culture, Protoplast fusion and Production of transgenic plants.</p> <p>4. Gain knowledge about Mitochondria, and liposomes, Membrane fluidity, Active transport, Ionophores Gap junctions, Endocytosis and Exocytosis</p>
24	Open Elective to others (For other department)	c) Basics of Immunology Immunotechniques	2017	<p>1. Gain knowledge on essential features of different types of antigens, antibodies.</p> <p>2. Outline, compare and contrast the key mechanism of innate and adaptive immunity.</p> <p>3. Gain knowledge on undesirable immunological reactions and their complications in health management and transplantation.</p>

	students)			4. Apply knowledge in disease diagnosis through serological tests.
25	Open Elective (b)	<i>Immunotechniques and their Applications</i>	2017	1. To purify and analyse the antigens and antibodies. 2. To apply different Hybridization techniques and ELISA, RIA. 3. To detect various diseases by application of antiisera. 4. To engineer antibodies and catalytic antibodies and produce drugs to allergies.
26	Core 1	<i>Genetic Engineering</i>	2017	1. Familiar with the tools and techniques for isolation and purification of genes, vector construction. 2. Understand the mechanisms of regulation of gene expression in different operons. 3. Know the techniques for transfer and expression of cloned gene and 4. Apply the knowledge of genetic engineering in biological research
27	Core 2	<i>Technical Writing, Biostatistics and Bioinformatics</i>	2017	1. Discuss the various steps involved in conducting research. 2. Learn to apply hypothesis testing via some of the statistical distributions. 3. Develop understanding about Biological data and database search tools. 4. Acquire hands on training on various computational tools and techniques employed in Biological sequence analysis.
28	Core 3 P	<i>Practical related to Clinical Immunology, Biostatistics and Bioinformatics</i>	2017	1. Use diagnostic kits to test different types of auto immune diseases. 2. Prepare Rabbit for performance of immunological studies. 3. Perform Single Radial Immunodiffusion. 4. Have an idea on Rocket immunoelectrophoresis, Cross over Immunoelectrophoresis etc. 5. Do Heme agglutination tests for identification of different

				antigens
29	Core 4	<i>Project Work</i>	2017	<ol style="list-style-type: none"> 1. Understand the microbial techniques for isolation, cultivation and maintenance of pure cultures 2. Learn structure, function of gene and its transfer methods 3. Develop understanding on cause, spread and control of diseases caused by different microorganisms 4. Get knowledge on collection of data, thesis writing
30	Generic Elective (a)	<i>Clinical Immunology</i>	2017	<ol style="list-style-type: none"> 1. Understand different types of immunity and components of the Immune System. 2. Gain knowledge on auto immune diseases, Animal models used to study them and the treatment for them. 3. Familiar with Clinical manifestation of graft rejection, general immunosuppressive therapy and immune tolerance to allografts. 4. Acquire the knowledge on oncogenes, Psychoimmunology and neuroimmunomodulation
31	Generic Elective (b)	<i>Applied And Molecular Immunology</i>	2017	<ol style="list-style-type: none"> 1. Develop skill in production of monoclonal antibodies. 2. How better enzyme immobilization enhances its activity and their industrial and clinical applications. 3. Familiar with different types of vaccines and how they help in prevention of diseases. 4. Acquire the knowledge on IPR and procedures for patent filing
32	General Elective (C)	<i>Immunopharmacology</i>	2017	<ol style="list-style-type: none"> 1. Understand about drug receptors, pharmacodynamics, pharmacokinetics, drug biotransformation. 2. Acquire knowledge on Immunomodulation therapy, malignancy therapy. 3. Gain knowledge on Prostaglandins, thromboxanes, leukotrienes and inhibitors of these molecules formation. 4. Familiar with Nitric oxide and its immunological effects.
33	Open Elective a	<i>Research Methodology</i>	2017	<ol style="list-style-type: none"> 1. Discuss the various steps involved in conducting research. 2. Acquire hands on training on various computational tools and techniques. 3. Learn to apply hypothesis testing via some of the statistical distributions.

				4. To acquire knowledge on research proposals and motivate students towards research
34	Open Elective (b)	<i>Immunological Diseases and Therapeutics</i>	2017	1. Maintain the Clinical Immunology lab with all required standards. 2. Out line, compare and contrast the key mechanism of innate and adaptive immunity. 3. Gain knowledge on different types of immunodeficiencies, their treatment and about autoimmune disorders. 4. Familiar with Clinical manifestation in graft acceptance or rejection and how immunosuppressive therapy is useful. And about cancer immunotherapy.

30. Botany

S. No.	Course Code	Title of the Course	Years of Introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/Skill development
	BOT-101	Algae, Bryophytes, Pteridophytes and Gymnosperms	2017	1. The student able to distinguish different species of lower plant groups. 2. Cultivation methods of Algae for industrial production of Single Cell Proteins, Agar Agar ,carragin and Neutraceuticals.Discuss the importance of morphological structure, classification, reproduction and economic importance of Algae.
	BOT-102	Taxonomy of Angiosperms	2017	1. Plant identification skills 2. Herbaria preparation and documentation.
	BOT-103	Microbiology	2017	1. Isolation and identification of Pathogenic and Non-Pathogenic

				<p>micro-organisms.</p> <p>2. Methods of cultivation of economically/industrially important microorganisms.</p> <p>3. Plant disease identification and control methods.</p>
	BOT-104	Human Values and Professional Ethics - I	2017	<p>1. The student will be enriched with several aspects pertaining to Human values and performing of Professional Ethics in day today life.</p> <p>2. Introduction of several Nature of values to be performed by Humans to lead a good and Peaceful life by extending and imparting good behavior, character and conduct towards people of the society.</p> <p>3. Introducing different concepts of Bhagavad Gita and its applications in uplifting of Religious values in the present society.</p>
	BOT-105P	Practical-I Algae, Bryophytes, Pteridophytes and Gymnosperms & Taxonomy of Angiosperms	2017	<p>1. Identification of different Algal forms</p> <p>2. Morphological description and use of Floral Keys for plant identification.</p>
	BOT-106P	Practical-II Microbiology & Plant	2017	<p>1. Isolation, culture and staining methods for identification of micro-organisms.</p>

		Development and Reproduction		<ol style="list-style-type: none"> 3. Diagnosis of Plant diseases based on symptoms and control methods. 4. Histology of vegetative and reproductive structures and isolation
	BOT-201	Plant Ecology	2017	<ol style="list-style-type: none"> 1. Concepts of Ecology Students, relation between biotic and abiotic factors in an ecosystem. 2. Interaction between biotic communities and ecological energetics 3. Environmental pollution, Global warming and Environmental protection strategies and green energy production
	BOT-202	Plant Biochemistry and Metabolism	2017	<ol style="list-style-type: none"> 1. Biosynthesis of plant primary metabolites and chemistry. 2. Plant physiological processes water relation, plant nutrition and energy metabolism, 3. Metabolic changes in response to biotic and abiotic stress
	BOT-203	Plant Development and Reproduction	2017	<ol style="list-style-type: none"> 1. Wood formation and types 2. Reproductive structures. Mode of Reproduction
	BOT-204	Human Values and Professional Ethics - II	2017	<ol style="list-style-type: none"> 1. The student will be enriched with several aspects pertaining to Human values and performing of Professional Ethics in day today life. 2. Introduction of several Nature of values to be performed by Humans to lead a good and Peaceful life by extending and imparting good behavior, character and conduct towards people

				<p>of the society.</p> <p>3. Introducing different concepts of Bhagavad Gita and its applications in uplifting of Religious values in the present society.</p>
	BOT-205P	Practical-I Plant Biochemistry and Metabolism & Phytobiodiversity and Conservation	2017	<p>1. Plant metabolite analysis and metabolic enzyme activity</p> <p>2. Methods for Phytodiversity analysis.</p>
	BOT-206P	Practical-II Plant Ecology & Cell Biology, Genetics and Evolution	2017	<p>1. Plant communities</p> <p>2. Methods for analysis of environmental pollutants</p> <p>3. Designs of waste water treatment plants.</p> <p>4. Assessment of effect of Global warming on Plant systems</p> <p>5. Study of chromosomal morphology and behavior in Mitosis and Meiosis</p> <p>6. Practical Problem solving on genetic concepts</p>
	BOT-301	Molecular Biology And Techniques	2017	<p>1. Nucleic acids properties and mechanism of DNA replication and damage repair, and Chromatin organization and Cell Cycle regulation</p> <p>2. Gene expression, processing of Transcripts and Proteins, and mechanisms of regulation of gene expression in Prokaryotes and Eukaryotes.</p>

				3. Principles of Microscopy, Nucleic acid and protein separation and identification techniques and methods
	BOT-302	Biodiversity and Conservation	2017	<ol style="list-style-type: none"> 1. Knowledge on Phytodiversity, biodiversity centres and types of Biodiversity. 2. Phytodiversity analysis using Remote sensing 3. Causes for the loss of phytodiversity and conservation strategies
	BOT-303 IE	Biosystematics	2017	<ol style="list-style-type: none"> 1. Biosystematic Categories, 2. Omega Taxonomy 3. Taximetrics and Concept of Species
	BOT-304IE	Molecular Plant Pathology	2017	<ol style="list-style-type: none"> 1. Symptoms based Diagnosis of Plant Diseases 2. Methods of Plant Disease Management and pest control
	BOT-306 IE	Computer Applications and Bioinformatics	2017	<ol style="list-style-type: none"> 1. Computer Operating systems and MS Office 2. The biological databases and Databases 3. Bioinformatics, tools and its applications.
	BOT-307 IE	Plants and Human Welfare	2017	<ol style="list-style-type: none"> 1. Food Yielding Plants as a source of food, fiber and timber. 2. Plants used in curing human diseases and other ailments in traditional medical systems and Veterinary diseases 3. Spices and condiments, Non timber forest products. 4. Preparation and application of Bio fertilizers, Bio pesticides, Bio insecticides, mushroom cultivation and plant based preservatives

	BOT-308 IE	Organic Farming and Mushroom Cultivation	2017	<ol style="list-style-type: none"> 1. Different types of compost preparation and their Nutritive value. 2. Biofertilizers and organic preparations, their marketing and farm management. 3. Vermicompost Technology 4. Identification of types of edible and poisonous mushrooms. 5. Method of cultivation of mushrooms and diseases management
	BOT-309 IE	Gardening and Nursery Techniques	2017	<ol style="list-style-type: none"> 1. Nurseries development and Management and Garden designing for different plant groups 2. <i>In vivo</i> and <i>in vitro</i> plant propagation methods 3. Plant nutrition and protection 4. Types of gardens and nurseries
	Practical-I	Molecular Biology And Techniques ; Biodiversity and Conservation	2017	<ol style="list-style-type: none"> 1.. Study of Chromosomal Behavior during Mitosis. 2. Isolation of DNA, RNA and proteins, Quantitative estimation 3. Assignments on DNA structure, Replication and Gene expression 4. Methods for Phytodiversity analysis. 5. Plant diversity conservation methods

	Practical-II	Biosystematics / Molecular Plant Pathology / Computer Applications and Bioinformatics	2017	<p>Biosystematics</p> <ol style="list-style-type: none"> 1. Isolation of Pathogenic Fungi and Bacteria. 2. Estimation of Rhizosphere, Phyllosphere, Spermosphere microorganisms by Serial dilution methods. 3. Screening of Botanical Pesticides (plant extracts) against Fungal Pathogens 4. Preparation of Plant Pathology Herbarium <p>Molecular Plant Pathology</p> <ol style="list-style-type: none"> 1. Isolation of Pathogenic Fungi and Bacteria. 2. Estimation of Rhizosphere, Phyllosphere, Spermosphere microorganisms by Serial dilution methods. 3. Screening of Botanical Pesticides (plant extracts) against Fungal Pathogens 4. Preparation of Plant Pathology Herbarium <p>Computer Applications and Bioinformatics</p> <ol style="list-style-type: none"> 1. Internet – E-mail and mail attachment Downloading 2. Webpage; Search engines; 3. Visit to DNA and Protein database; NCBI; EMBL, Swiss- Prot ;PDB 4. Use of similarity search tools: NBLAST; PBLAST
--	--------------	---	------	---

				5. Use of literature database Virtual library; Agricola; PubMed
	BOT-401	Molecular Genetics & Genomics and Proteomics	2017	<ol style="list-style-type: none"> 1. Genetic basis of inheritance of genes and their mapping in eukaryotes and microbes 2. Molecular marker techniques and construction of genetic and physical maps. 3. Whole genome sequencing strategies, and structural and functional annotation. 4. Principles and methods of Transcriptome and Proteome

				<p>analysis.</p> <ol style="list-style-type: none"> 5. Mechanisms of evolution of genomes, New genes and proteins and construction of Phylogenetic trees. 6. Structural organization of plant genomes, Arabidopsis and rice genomes and applications of genome projects.
	BOT-402	Plant Biotechnology	2017	<ol style="list-style-type: none"> 1. Techniques of Plant Tissue Culture and Applications. 2. Process of r-DNA technology 3. Production of genetically modified crops and Achievements
	BOT-403 IE	Molecular Plant Physiology	2017	<ol style="list-style-type: none"> 1. 1.Signal transduction pathways and Senescence 2. 2.Molecular mechanism of Photosynthesis 3. Synthesis and application of Nanomaterials. 4. Molecular Physiology of Stress and Flowering
	BOT-404 IE	Horticulture and Agricultural Biology	2017	<ol style="list-style-type: none"> 1. Propagation methods for horticultural crops 2. Soil science and fertility management for horticultural crops. 3. Seed production technology of horticultural crops.
	BOT-405 IE	Ethnobotany and Phytomedicine	2017	<ol style="list-style-type: none"> 1. Ethnobotanical knowledge 2. Medicinal plant Cultivation, Multiplication, Collection, Processing and Marketing 3. Sources of Plant Medicines, Formulations, Diagnostic features and their Biological activity.
	BOT-406	Herbal Drugs and	2017	<ol style="list-style-type: none"> 1. Plants used by the Tribes for health care and applications of

	EE	Cosmetics		<p>Ethno botany.</p> <p>2. Identification of locally available Medicinal plants.</p> <p>3. Methods of Collection, Processing and Storage of Plant Medicines and trade</p> <p>4. Phytochemicals used in Herbal Cosmetic Preparations</p> <p>5. Formulation & standardization of various herbal cosmetic products</p>
	BOT-407 EE	Hydroponics	2017	<p>1. Scope, Future developments and applications of Hydroponics.</p> <p>2. Chemical and physical factors required for plant growth</p> <p>3. Nutrient Solutions and Media Plant sanitation and disease management</p> <p>4. Techniques in Hydroponics and Cultivation of crop plants</p>
	BOT-408 EE	Nano Biotechnology	2017	<p>1. Production of nano scale devices by different methods.</p> <p>2. Applications of nano devices in medicine and agriculture</p>
	BOT-409 EE	Plant Disease Management	2017	<p>1. Plant disease causing agents</p> <p>2. Specific diseases of Cereals, Pulses, Vegetables, Fruit Crops, Oil Yielding and Fibre yielding Plants.</p> <p>3. Plant Disease Management using Physical and Chemical and Bio-Control methods</p>
	Practical – I	Molecular Genetics &	2017	<p>1) Isolation of genomic DNA and RNA and Quantification by</p>

		Genomics and Proteomics; Plant Biotechnology		<p>Spectrophotometry.</p> <ol style="list-style-type: none"> 2) Preparation of DNA denaturation curve 3) Restriction digestion of DNA, Agarose Gel Electrophoresis 4) PCR amplification of DNA. and RAPD analysis. 5) Precipitation of proteins ,Estimation of protein. 6) Determination of Isoelectric Point of proteins 7) Separation of proteins by SDS-PAGE and size determination 8) Problems related to genomics, proteomics and molecular evolution 9) Establishment of callus, organ and cell cultures
	Practical - II	<p>403 IE – Molecular Plant Physiology /</p> <p>404 IE – Horticulture and Agriculture Biology /</p> <p>405 IE – Ethanobotany and Phytomedicine</p>	2017	<p>BOT-403 IE : Molecular Plant Physiology</p> <ol style="list-style-type: none"> 1. Extraction and Estimation of Chlorophyll pigments. 2. Assay of enzyme activity 3. Estimation of Carbohydrate, proteins and separation 4. Seed viability and germination 5. Metabolite accumulation under stress <p>BOT-404 IE: Horticulture and Agriculture Biology</p> <ol style="list-style-type: none"> 1. Isolation, Characterization and Identification of Rhizobium 2. Outdoor cultivation of Blue green Algae 3. Vermicompost production 4. Multiplication of VAM and Preparation Biofertilizers;

				<p>5. Establishment of nursery, different containers, soil transplantation techniques.</p> <p>6. Plant propagation – layering, cutting, grafting.</p> <p>7.. Layout and Designing of gardens and Lawns.</p> <p>BOT-405 IE: Ethnobotany and Phytomedicine</p> <p>1. Recording medicinal practices and herbal formulations of tribal medicine by interviews and field study and preparation of report.</p> <p>2. Development of medicinal plant nurseries in botanical garden.</p> <p>3. Practical Methods of Cultivation, Propagation, Conservation and Protection of important Medicinal plants to develop familiarity.</p> <p>4. Micro-propagation of Medicinal plants and Production of Callus from different Explants for Specific Biologically active Ingredients.</p> <p>5. Practical demonstration of collection, processing and storage of Plant Medicines.</p> <p>6. Demonstration of drug Formulation and Herbal cosmetics.</p> <p>7. Organoleptic examination and physical and chemical properties.</p>

31. Biotechnology

S. No.	Name of the Programme	Course Code	Title of the Course	Years of Introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/Skill development
1	M.Sc. Biotechnology	BTH-101	Structure and functions of Biomolecules	2017	<ol style="list-style-type: none"> 1. Understand the classification of carbohydrates and their biochemical functions. 2. Correlate the reactions of amino acids that are basis for identification tests and biochemical pathways. 3. Know the structure of different classes of lipids and their roles in biological systems. 4. Comprehend the structure and functions of nucleic acids
2	M.Sc. Biotechnology	BTH-102	Advanced tools and techniques	2017	<ol style="list-style-type: none"> 1. Learn about various techniques for isolation and concentration of macromolecules. They

					<p>will also understand the principles and applications of different Microscopes</p> <p>2. Understand the techniques of chromatography, centrifugation and electrophoresis</p> <p>3. Achieve a basic understanding of characterization of biomolecules by different Spectroscopic techniques</p> <p>4. They learn safety measures in handling radioisotopes and familiarize with the various radioisotope tracer techniques and their role in biology.</p>
3	M.Sc. Biotechnology	BTH-103P	Practical related to Analytical methods	2017	1. Acquire the skill to perform experiments related to advanced tools and techniques
4	M.Sc. Biotechnology	BTH-104P	Practical related to Biochemical Preparations and Analysis	2017	1. Acquire the skill to perform experiments related to Biochemical preparations
5	M.Sc. Biotechnology	BTH-105	Microbiology and Immunology	2017	<p>5. Acquire the knowledge on classification and structure of different microorganisms</p> <p>6. Understand the microbial techniques for isolation, cultivation and maintenance of pure cultures</p> <p>3. Out line, compare and contrast the key</p>

					<p>mechanism of innate and adaptive immunity</p> <p>4. Apply knowledge in disease diagnosis through serological tests</p>
6.	M.Sc. Biotechnology	BTH-106	Human values and Professional ethics-I	2017	Learn the importance of Human values and Professional ethics
7.	M.Sc. Biotechnology	BTH-201	Enzymes and Intermediary metabolism	2017	<p>1. Gain knowledge on different enzymes and their significance</p> <p>2. Correlate how the living organisms exchange energy and matter with the surroundings for their survival, and store free energy in the form of energy-rich compounds</p> <p>3. Recognize how the catabolic breakdown of the substances is associated with release of free energy; whereas, free energy is utilized during synthesis of biomolecules i.e., anabolic pathways</p> <p>4. Apply the knowledge of metabolic pathways to biotechnological and biochemical research.</p>
8.	M.Sc. Biotechnology	BTH-202	Molecular Biology	2017	<p>1. Understand the biochemical composition and genome organization in living cells</p> <p>2. Learn about the mechanism of tissue specific</p>

					transcription and role of RNA polymerases 3. Appreciate the correlation of genetic code with protein synthesis in prokaryotic and eukaryotic cells. 4. Gain insights of mechanism of gene expression and regulations
9.	M.Sc. Biotechnology	BTH-203P	Practical related to Molecular Biology	2017	Learn the skill to perform experiments related to Molecular biology
10	M.Sc. Biotechnology	BTH-204P	Practical related to Enzymology	2017	Learn the skill to perform experiments related to Enzymology
11	M.Sc. Biotechnology	BTH-205	Technical writing, Biostatistics and Bioinformatics	2017	4. Discuss the various steps involved in conducting research 5. Learn to apply hypothesis testing via some of the statistical distributions 6. Develop understanding about Biological data and database search tools 7. Acquire hands on training on various computational tools and techniques employed in Biological sequence analysis
12	M.Sc. Biotechnology	BTH-206	Human values and Professional	2017	Learn the importance of Human values and

			ethics-II		Professional ethics
13	M.Sc. Biotechnology	BTH-301	Genetic Engineering	2017	<ol style="list-style-type: none"> 1. Familiar with the tools and techniques for isolation and purification of genes 2. Acquire knowledge on vectors for construction of genomic libraries and cDNA libraries 3. Understand the mechanism of cDNA synthesis 4. Know the techniques for transfer and expression of cloned gene and applications of genetic engineering in biological research.
14	M.Sc. Biotechnology	BTH-302	Cell and Tissue culture	2017	Gain the knowledge regarding plant and animal cell cultures. Get the skill to perform micropropagation.
15	M.Sc. Biotechnology	BTH-303P	Practical related to Microbiology	2017	Obtain the skill to perform experiments related to Microbiology and Cell Biology
16	M.Sc. Biotechnology	BTH-304P	Practical related to Tissue culture	2017	<ol style="list-style-type: none"> 1. Learn important milestones in the plant tissue culture and understand the concepts and principles of Plant tissue culture. 2. Learn different pathways of plant regeneration under in vitro conditions –

					<p>organogenesis, somatic embryogenesis, synthetic seeds and applications.</p> <p>3. Understand techniques of establishing cell suspension culture, techniques of virus elimination by meristem and shoot tip culture.</p> <p>Acquire skill of propagation of elite medicinal and economically important plants and establish micropropagation unit for commercialization.</p>
17	M.Sc. Biotechnology	BTH-305a	Bioprocess Engineering and Technology	2017	<p>1. Handle the axenic cultures of industrially important microbes and appreciate the relevance of microorganisms from industrial context.</p> <p>2. Gain an overview on design, operations and types of fermentation systems</p> <p>3. Calculate yield and production rates in a biological production process, and also interpret data</p> <p>4. Apply knowledge on separation and purification of end products of fermentation</p>
18	M.Sc. Biotechnology	BTH-305b	Legal, ethical and implications	2017	<p>1. Develop awareness on types IPR and</p>

			of Biotechnology		patenting process 2. Understand legal and ethical controversies in biotechnological innovations 3. Apply knowledge in providing safety of food, water and environment 4. Gain overview of GM crops and microbes and their impact on environment
19	M.Sc. Biotechnology	BTH-305c	Food and Industrial Biotechnology	2017	1. Acquire knowledge on food preservation, processing and control measures for food poisoning 2. Establish indoor and outdoor cultivation units for algal cultivation 3. Learn effective management of solid waste for energy production. 4. Appreciate the industrial role of microorganisms in production of biomolecules
20	M.Sc. Biotechnology	BTH-306a	Plant tissue culture	2017	1. Learn important milestones in the plant tissue culture and understand the concepts and principles of Plant tissue culture. 2. Learn different pathways of plant

					<p>regeneration under in vitro conditions – organogenesis, somatic embryogenesis, synthetic seeds and applications.</p> <p>3. Understand techniques of establishing cell suspension culture, techniques of virus elimination by meristem and shoot tip culture.</p> <p>4. Acquire skill of propagation of elite medicinal and economically important plants and establish micropropagation unit for commercialization</p>
21	M.Sc. Biotechnology	BTH-306b	Bioethics	2017	<p>1. Acquire the knowledge on IPR and procedures for patent filing</p> <p>2. Understand the Legal and Ethical aspects of gene therapy - cloning - Manipulation of human genome -Technology transfer.</p> <p>3. Learn role of Government, Industries and society in promoting, accepting and regulating the rDNA research</p> <p>4. Develop understanding on Environmental and Health aspects of Biotechnology</p>
22	M.Sc. Biotechnology	BTH-306c	Bioinformatics	2017	<p>1. Develop understanding about Biological data</p>

					<p>and database search tools</p> <p>2. Acquire hands on training on various computational tools and techniques employed in Biological sequence analysis</p> <p>3. Learn about pathway and enzyme databases, Sequence submission tools</p> <p>Develop understanding on protein folding and its significance</p>
23	M.Sc. Biotechnology	BTH-401	Environmental Biotechnology	2017	<p>1. Learn the relation between biotic and abiotic factors in different ecosystem models and predict how changes in free energy availability affect ecosystems.</p> <p>2. Appreciate the role of microorganisms in biodegradation and pollution detection</p> <p>3. Develop skill on large scale production and applications of bio pesticides and bio fertilizers fin agriculture</p> <p>4. Apply knowledge on solid waste management and reclamation of waste water</p>
24	M.Sc. Biotechnology	BTH-402	Plant Biotechnology	2017	<p>1. Develop skill in production of transgenic plants resistant to biotic and abiotic stress</p>

					<ul style="list-style-type: none"> 2. Apply knowledge for industrial production of plant metabolites 3. Cultivate the micro and macro algae of commercial importance on large scale 4. Identify different plant pathogens and apply biological control methods
25	M.Sc. Biotechnology	BTH-403P	Practical related to Immunology	2017	<ul style="list-style-type: none"> 1. Gain skill to perform immunology related experiments
26	M.Sc. Biotechnology	BTH-404	Project work	2017	<ul style="list-style-type: none"> 1. Select the appropriate research design and develop appropriate research hypothesis for a research project and acquire hands on training on various tools and techniques employed in executing the project.
27	M.Sc. Biotechnology	BTH-405a	Pharmaceutical Biotechnology	2017	<ul style="list-style-type: none"> 1. Gain knowledge on preparation and formulations of different drugs 2. Develop skill on commercial production of pharmaceutical products for human welfare 3. Learn the techniques of drug validation and vaccine production 4. Understand the bioethical principle, values, concepts and social and judicial implications of

					pharmaceutical biotechnology
28	M.Sc. Biotechnology	BTH-405b	Animal Biotechnology	2017	1. Understand the organization of reproductive organs and advances in contraception research 2. Learn the techniques of In Vitro Fertilization and artificial insemination 3. Develop skill in molecular techniques for production of transgenic animals 4. Apply knowledge on molecular farming for production of vaccines and hormones
29	M.Sc. Biotechnology	BTH-405c	Applications of Biotechnology	2017	1. Acquire the knowledge on applications of plant, animal and environmental biotechnology 2. Develop skill on organic farming and preparation of bio pesticides and bio fertilizers 3. Establish and maintain cell lines for vaccine production 4. Apply knowledge on waste management and recycling for environmental protection
30	M.Sc. Biotechnology	BTH-406a	Tools in Biotechnology	2017	1. Acquire the knowledge on analysis of DNA replication to map site specific points of

					<p>replication</p> <p>2. Learn to apply DNA microarrays to detect replication origins</p> <p>3. Understand the functions of helicase and polymerase in DNA replication</p> <p>4. Acquire knowledge on sophisticated programmed of genome replication</p>
31	M.Sc. Biotechnology	BTH-406b	Immunology	2017	<p>1. Out line, compare and contrast the key mechanism of innate and adaptive immunity</p> <p>2. Apply knowledge in disease diagnosis through serological tests</p> <p>3. Develop skill in production of monoclonal antibodies</p> <p>4. Gain knowledge on undesirable immunological reactions and their complications in health management</p>
32	M.Sc. Biotechnology	BTH-406c	Applications of Biotechnology	2017	<p>1.Acquire the knowledge on applications of plant, animal and environmental biotechnology</p> <p>2.Develop skill on organic farming and preparation of bio pesticides and bio fertilizers</p> <p>3.Establish and maintain cell lines for vaccine</p>

					production 4. Apply knowledge on waste management and recycling for environmental protection 1.

32. Chemistry

Analytical Chemistry

S.No.	Course Code	Title of the Course	Years of Introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/Skill development
1.	CHE-101	Inorganic Chemistry I	2017	<ol style="list-style-type: none"> 1. To understand the key features of coordination compounds, Crystal Field Theory, magnetic properties and bonding in transition metal complexes. 2. To learn about the polymorphic forms of Carbon, Sulphur and Phosphorus, synthesis and properties of sulphur-nitrogen compounds, boranes, carbides, silicates and to know Wades rules. 3. To explain the reactivity of complexes in terms of Valence bond and Crystal Field theories, Taube's classification, Trans effect and Electron Transfer Reactions 4. To gain knowledge on synthesis and structures of different metal carbonyls,

				synergistic effect and 18 electron rule.
2.	CHE-102	Organic Chemistry I	2017	<ol style="list-style-type: none"> 1. To detect stereochemical structures of the molecules, stereoselective and stereo controlled reactions 2. To ascertain the stereochemistry of the products with the effect of neighbouring group participation and to familiarize the various types of aromatic substitution reactions, their mechanism and the effect of substituents. 3. To know the concept of isotope effects, potential energy diagrams and transition states in different intermediates 4. To familiarize with stereospecific synthesis of naturally occurring terpenoids and degradation products of terpenoids
3.	CHE-103	Physical Chemistry-I	2017	<ol style="list-style-type: none"> 1. To know the concepts such as Operator algebra, Eigen values and Eigen functions, Degeneracy, Schrodinger wave equation and the postulates of Quantum Mechanics 2. To learn about theories of reaction rates, Lindemann, Lindemann-Hinshel wood, and RRKM theories. 3. To know about Thermodynamic concepts and entropy change in reversible process and irreversible process, Gibbs- Duhem equation, calculation of thermodynamic

				<p>properties.</p> <p>4. To study the Thermodynamic and Kinetic Derivation of Nernst Equation and the derivation of Debye-Huckle Equation and its Verification</p>
4.	CHE-104	Inorganic Practical- I	2017	<p>1. To demonstrate mastery of basic semi-micro qualitative analysis of simple salts and interprets analytical data and will make scientific claims that are supported by the observations</p> <p>2. To familiarize with techniques of titration and calculation of errors</p>
5.	CHE-105	Organic Practical-I	2017	<p>1. .To familiarize the systematic procedures of analysis of organic components, conformational tests for various functional groups</p> <p>2. To understand the mechanisms and familiarize with methodologies to prepare biologically important molecules.</p>
6.	CHE-106	Physical Practical I	2017	<p>1. To study the determination of critical solution temperature, eutectic composition, distribution coefficient, adsorption of different</p> <p>2. To calibrate the statistical data</p>

7.	CHE-107	General Chemistry-I	2017	<ol style="list-style-type: none"> 1. To know about mean and median values, standard deviation and coefficient of variation. 2. To acquire knowledge on principle and instrumentation of AAS and difference between flame AAS and furnace AAS.
8.	CHE-108	Human Values and Professional Ethics – I	2017	<ol style="list-style-type: none"> 1. To know about the needs and importance of professional ethics. 2. To analyze nature of Values, basic Moral Concepts character and Conduct. 3. To gain knowledge on individual and society ethical values, ahimsa, satya and brahmacharya 4. To understand values of Bhagavd Gita, various religions, religious tolerance, Gandhian ethics
9.	CHE - 201	Inorganic Chemistry II	2017	<ol style="list-style-type: none"> 1. To familiarize with the general methods of complex preparations and properties, nature of bonding and structural features of metal complexes 2. To know about Russel-Saunders coupling, splitting of energy levels in octahedral field and differentiate between Orgel diagrams and Tanabe-Sugano diagrams 3. To understand about the laws of Hunds, Curie and Weiss, magnetism and magnetic susceptibility determination by Gouy's and Farady methods 4. To gain knowledge on Induced reactions, Free radical reactions, Thermal

				decomposition reactions, Chain reaction
10.	CHE-202	Organic Chemistry II	2017	<ol style="list-style-type: none"> 1. To familiarize the mechanisms of E₁, E₂ and E_{1CB} reactions, stereoselectivity and synpyrolytic eliminations and use of isotopes, chemical trapping and crossover experiments. 2. To learn the rearrangements involving electron deficient carbon, nitrogen and oxygen atoms and electron rich carbon atom and familiarize with the limitations and applications of reactions. 3. To learn the synthesis of three and four membered heterocycles, mechanism of ring opening reactions and the effect of electron donating and withdrawing substituents in selectivity of ring opening reactions. 4. To understand the structural elucidation and synthesis of alkaloids using specific reagents.
11.	CHE -203	Physical chemistry II	2017	<ol style="list-style-type: none"> 1. To know about Pauli Exclusion principle and Slater determinant, atomic orbitals, Simple molecular orbitals and Huckel theory of conjugated systems 2. To learn Gibbs adsorption isotherm, BET equation and correlate limitations, critical micellar concentration (CMC) and factors

				<p>affecting the CMC of surfactants.</p> <p>3. To identify Relation between order of a finite group and its sub-group, conjugacy, Symmetry point group (MLS, MHS and MSS) and orthogonality theorem.</p> <p>4. To acquire knowledge on DC-Polarography, AC-Polarography, Controlled Potential Electrolysis, to derive equation for Tafel plots, half-wave potentials for reversible system</p>
12.	CHE 204	Inorganic Chemistry	2017	<p>1. To separate and determine the two component mixtures.</p> <p>2. To acquire knowledge in the preparation of metal complexes</p>
13.	CHE 106	Core practical II: Organic Chemistry	2017	<p>1. To familiarize with binary mixture separation and to gain hands-on-experience in purification of the</p> <p>2. To get knowledge about the chemical behavior of different components and mechanisms</p>
14.	CHE 206	Core practical II: Physical Chemistry	2017	<p>1. To study the determination of cell constant and verification of Onsager equation, strength of strong</p> <p>2. To get knowledge on the applications of conductometry, potentiometry, coulometry and pH metry.</p>
15.	CHE 207	General Chemistry II	2017	<p>1. To acquire knowledge on ion selective electrodes, solid membrane electrodes and glass electrodes</p> <p>2. To learn general principles and classifications of chromatographic separations and applications of TLC, GLC</p>

16.	CHE 208	Human Values and professional ethics-II	2017	<ol style="list-style-type: none"> 1. To understand the concepts of human values, responsibilities of family values and status of women in family and society 2. To acquire knowledge on different medical ethics the views of charaka and sushruta on moral responsibilities of medical practitioners 3. To gain knowledge on social ethics and understand the characteristics of ethical problems in management. 4. To familiarize environmental ethics, ethical theory and ecological crisis
17.	CHE-AC-301	Inorganic Spectroscopy and Thermal Methods of Analysis	2017	<ol style="list-style-type: none"> 1. To know about TG and DTA and applications of different scanning calorimetry. 2. To gain knowledge on Doppler shift and chemical shift, basic principles and applications of NQR spectroscopy 3. To learn zero field splitting and Kramer's degeneracy, relaxation processes, instrumentation and applications of ESR. 4. To know about photoelectric effect and Koopmans theorem and impart the applications of X-ray and UV photoelectron spectroscopy

18.	CHE AC 303 & 304	Core-Practical: Classical Methods of Analysis	2017	<ol style="list-style-type: none"> 1. To know the basic principles of instrumental methods of analysis 2. To gain knowledge on chemistry of alloys 3. To Understand the complexity, theory and working principle of colourimetry 4. To familiarize with laws of colorimetric titrations
19.	CHE-AC-305A	Organic Chemistry III	2017	<ol style="list-style-type: none"> 1. To familiarize with the specific functions of the reagents particularly diazomethane, N-bromosuccinimide, Ziegler Natta catalyst, 1,3-dithianes and Merrifield resin in the synthesis of a variety of complex molecules 2. To gain knowledge in the synthesis of different organometallic reagents and also stereo and regio specificity and selectivity of reactions with organometallic reagents 3. To understand diastereoselectivity, stereoselectivity and substrate controlled auxillary controlled reactions 4. To acquire knowledge about the reagents which causes oxidation in various compounds and also the reagents that causes selective and complete reductions to synthesize various compounds.

20.	CHE-AC-305B	Physical Chemistry III	2017	<ol style="list-style-type: none"> 1. To know the determination of Character Co-ordinate of C_{2v} point group based on 3N Coordinates and to learn the Mutual exclusion Principle. 2. To learn the Bragg conditions-Miller Indices-Laue method, Bragg method, Debye Scherrer method of X-ray structural analysis of crystals 3. To study the rigid rotator model, stark effect, vibration-rotation spectroscopy, PQR branches, selection rules and Vibrational-rotational Raman spectroscopy 4. To study the concepts on heat of dissolution, regular solution theory, Hildebrand solubility parameter, concept of Flory-Huggins theory of polymer solutions
21.	CHE AC 306	Spectral Techniques	2017	<ol style="list-style-type: none"> 1. To know the basic principles of spectroscopy. 2. To familiarize with the analysis of various functional groups by using different spectroscopic techniques. 3. To Understand the applications of AAS. 4. To gain knowledge about Mass spectral fragmentation of organic compounds and common functional groups
22.	CHE AC 306	Chromatographic Techniques	2017	<ol style="list-style-type: none"> 1. To know the stationary and mobile phases in chromatographic techniques. 2. To familiarize applications of different chromatographic methods. 3. To Understand the principle of chromatographic techniques 4. To gain knowledge on the normal phase and

				reverse phase.
23.	CHE-AC-401	Quality Control and General Principles	2017	<ol style="list-style-type: none"> 1. To diagnose problems in the quality improvement process and Explain each total quality implementation phase 2. To know about theoretical basis for the use of organic reagents in inorganic analysis. 3. To understand different types of kinetic methods and their evaluation and to determine the kinetics of enzyme 4. To understand the oxidation reactions with Ce (IV) sulphate solutions and applications of complexometric titrations
24.	CHE-AC 402	: Instrumental Methods of Analysis	2017	<ol style="list-style-type: none"> 1. To understand the working principles, instrumentation and applications of ICP-AES and ICP-MS, energy dispersive X-ray fluorescence (EDXRF), Wavelength dispersive X-ray fluorescence (WDXRF). 2. To understand the basic principles, procedure and components of the High-Performance Liquid Chromatography (HPLC), Gel Permeation Chromatography (GPC): Capillary Electrophoresis (CE), Supercritical Fluid Chromatography (SFC). 3. To get knowledge on instrumentation and applications of GCMS in drug analysis and environmental samples analysis 4. To improve the knowledge about

				coulometric techniques and their analysis of cations (As (III), Fe (II)) and anions (I ⁻ and S ²⁻) by using I ₂ liberations and Ce ⁴⁺ liberation in solutions
25.	CHE AC 403	Core practical I: Analytical Chemistry- Practical	2017	<ol style="list-style-type: none"> 1. Understand the common laboratory techniques including separation techniques 2. Polarography, atomic absorption spectroscopy in both emission and absorption mode. 3. Gain knowledge on implementation of gas chromatography and HPLC for separation of mixtures 4. Familiarize with interpretation of data to structures by NMR.
26.	CHE AC 404	Project Work	2017	<ol style="list-style-type: none"> 1. Perform experiments, collection and evaluation of data 2. Interpretation of results while adhering to scientific principles of responsible and ethical behaviour 3. Analysing and compiling the data and results in a chronological order in the form of dissertation. 4. Preparation of dissertation
27.	CHE-AC-405	Applied and Environmental Aspects	2017	<ol style="list-style-type: none"> 1. Have an idea about preparation of sampling, decomposition, separation and preconcentration of metal ions etc. 2. Gain experience on agrochemicals and fertilizers and their analysis 3. Have an idea on the analysis of fuels, alloys and explosives 4. Experience with environmental pollution

				monitoring techniques
28.	CHE-AC-406	Bioinorganic, Bioorganic, Biophysical Chemistry	2017	<ol style="list-style-type: none"> 1. Gain knowledge on metallo proteins in electron transfer processes. 2. Know the applications of trace metal ions and metal ions as chelating agents in medicine. 3. Achieve and develop highly stereoselective synthesis of organic compounds and drugs by adopting environmentally 4. Understand thermodynamics of biopolymer reactions and to correlate free energy and biopolymer parameters
29.	CHE AC 406A	Drug Chemistry	2017	<ol style="list-style-type: none"> 1. Know about natural products 2. Know Interpretation of cardiovascular drugs 3. Know the Analyzing about prostaglandins. 4. Know the Definition, Classification, Nomenclature, Structure and Synthesis of anti-inflammatory drugs.
30.	CHE AC 406 B	Electroanalytical Techniques	2017	<ol style="list-style-type: none"> 1. Know how to interpret potentiometry and conductometry 2. Know the Interpretation of results while adhering to DC Polarography 3. Know the Analysing and compiling the data and results in polarography . 4. Familiarize Types of ion sensitive electrodes

M.Sc., Environmental Chemistry

S.	Course Code	Title of the Course	Years of	Activities/Content with direct bearing on
----	-------------	---------------------	----------	---

No.			Introduction	Employability/Entrepreneurship/Skill development
1.	CHE-101	Inorganic Chemistry- I	2017	<ol style="list-style-type: none"> 1. To understand the key features of coordination compounds, Crystal Field Theory, magnetic properties and bonding in transition metal complexes. 2. To learn about the polymorphic forms of Carbon, Sulphur and Phosphorus, synthesis and properties of sulphur-nitrogen compounds, boranes, carbides, silicates and to know Wades rules. 3. To explain the reactivity of complexes in terms of Valence bond and Crystal Field theories, Taube's classification, Trans effect and Electron Transfer Reactions 4. To gain knowledge on synthesis and structures of different metal carbonyls, synergistic effect and 18 electron rule.
	CHE-102	Organic Chemistry I	2017	<ol style="list-style-type: none"> 1. To detect stereochemical structures of the molecules, stereoselective and stereocontrolled reactions 2. To ascertain the stereochemistry of the products with the effect of neighbouring group participation and to familiarize the various types of aromatic substitution reactions, their mechanism and the effect of substituents 3. To know the concept of isotope effects, potential energy diagrams and transition states in different intermediates 4. To familiarize with stereospecific synthesis of naturally occurring terpenoids and degradation products of terpenoids
		Physical Chemistry- I	2017	<ol style="list-style-type: none"> 1. To know the concepts such as Operator algebra,

	CHE-103			<p>Eigen values and Eigen functions, Degeneracy, Schrodinger wave equation and the postulates of Quantum Mechanics.</p> <ol style="list-style-type: none"> 2. To learn about theories of reaction rates, Lindemann, Lindemann-Hinshelwood, and RRKM theories 3. To know about Thermodynamic concepts and entropy change in reversible process and irreversible process, Gibbs- Duhem equation, calculation of thermodynamic properties 4. To study the Thermodynamic and Kinetic Derivation of Nernst Equation and the derivation of Debye-Huckel Equation and its Verification
	CHE-104	Inorganic Practical- I	2017	<ol style="list-style-type: none"> 1. To demonstrate mastery of basic semi-micro qualitative analysis of simple salts and interprets analytical data and will make scientific claims that are supported by the observations. 2. To familiarize with techniques of titration and calculation of errors
	CHE-105	Organic Practical-I	2017	<ol style="list-style-type: none"> 1. To familiarize the systematic procedures of analysis of organic components, conformational tests for various functional groups. 2. To understand the mechanisms and familiarize with methodologies to prepare biologically important molecules
	CHE-106	Physical Practical I	2017	<ol style="list-style-type: none"> 1. To study the determination of critical solution temperature, eutectic composition, distribution coefficient, adsorption of different 2. To calibrate the statistical data

	CHE-107	General Chemistry-I	2017	<ol style="list-style-type: none"> 1. To know about mean and median values, standard deviation and coefficient of variation 2. To acquire knowledge on principle and instrumentation of AAS and difference between flame AAS and furnace AAS
	CHE-108	Human Values and Professional Ethics – I	2017	<ol style="list-style-type: none"> 1. To know about the needs and importance of professional ethics. 2. To analyze nature of Values, basic Moral Concepts character and Conduct 3. To understand values of Bhagavd Gita, various religions, religious tolerance, Gandhian ethics
	CHE-201	Inorganic Chemistry- II	2017	<ol style="list-style-type: none"> 1. To familiarize with the general methods of complex preparations and properties, nature of bonding and structural features of metal complexes 2. To know about Russel-Saunders coupling, splitting of energy levels in octahedral field and differentiate between Orgel diagrams and Tanabe-Sugano diagrams 3. To understand about the laws of Hunds, Curie and Weiss, magnetism and magnetic susceptibility determination by Gouy's and Farady methods 4. To gain knowledge on Induced reactions, Free radical reactions, Thermal decomposition reactions, Chain reactions
	CHE-202	Organic Chemistry -II	2017	<ol style="list-style-type: none"> 1. To familiarize the mechanisms of E₁, E₂ and E_{1CB} reactions, stereoselectivity and synpyrolytic eliminations and use of isotopes, chemical trapping and crossover experiments 2. To learn the rearrangements involving electron deficient carbon, nitrogen and oxygen atoms and electron rich carbon atom and familiarize with the limitations and applications of reactions

				<ol style="list-style-type: none"> 3. To learn the synthesis of three and four membered heterocycles, mechanism of ring opening reactions and the effect of electron donating and withdrawing substituents in selectivity of ring opening reactions. 4. To understand the structural elucidation and synthesis of alkaloids using specific reagents.
	CHE-203	Physical Chemistry- II	2017	<ol style="list-style-type: none"> 1. To know about Pauli Exclusion principle and Slater determinant, atomic orbitals, Simple molecular orbitals and Huckel theory of conjugated systems 2. To learn Gibbs adsorption isotherm, BET equation and correlate limitations, critical micellar concentration (CMC) and factors affecting the CMC of surfactants 3. To identify Relation between order of a finite group and its sub-group, conjugacy, Symmetry point group (MLS, MHS and MSS) and orthogonality theorem 4. To acquire knowledge on DC-Polarography, AC-Polarography, Controlled Potential Electrolysis, to derive equation for Tafel plots, half-wave potentials for reversible system
	CHE-204	Inorganic Practical- II	2017	<ol style="list-style-type: none"> 1. To separate and determine the two component mixtures 2. To acquire knowledge in the preparation of metal complexes
	CHE-205	Organic Practical-II	2017	<ol style="list-style-type: none"> 1. To familiarize with binary mixture separation and to gain hands-on-experience in purification of the 2. To get knowledge about the chemical behavior of different components and mechanisms.

	CHE-206	Physical Practical -II	2017	<ol style="list-style-type: none"> 1. To study the determination of cell constant and verification of Onsagar equation, strength of strong 2. To get knowledge on the applications of conductometry, potentiometry, coulometry and pH metry.
	CHE-207	General Chemistry-II	2017	<ol style="list-style-type: none"> 1. To acquire knowledge on ion selective electrodes, solid membrane electrodes and glass electrodes and 2. To learn general principles and classifications of chromatographic separations and applications of TLC, GLC
	CHE-208	Human Values and Professional Ethics – II	2017	<ol style="list-style-type: none"> 1. To understand the concepts of human values, responsibilities of family values and status of women in family and society. 2. To acquire knowledge on different medical ethics the views of charaka and sushruta on moral responsibilities of medical practitioners 3. To gain knowledge on social ethics and understand the characteristics of ethical problems in management. 4. To familiarize environmental ethics, ethical theory and ecological crisis
	CHE-EC-301	Physical Chemistry III	2017	<ol style="list-style-type: none"> 1. To know the determination of Character Co-ordinate of C_{2v} point group based on 3N Coordinates and to learn the Mutual exclusion Principle 2. To learn the Bragg conditions-Miller Indices- Laue method, Bragg method, Debye Scherrer method of X-ray structural analysis of crystals 3. To study the rigid rotator model, stark effect, vibration-rotation spectroscopy, PQR branches, selection rules and Vibrational- rotational Raman spectroscopy

				4. To study the concepts on heat of dissolution, regular solution theory, Hildebrand solubility parameter, concept of Flory-Huggins theory of polymer solutions
	CHE-EC-302	Spectroscopy Applications	2017	<ol style="list-style-type: none"> 1. To get experience to calculate λ max values for dienes, enones, polyenes, aromatic and heteroaromatic compounds 2. To familiarize with the absorption bands of the molecules with specific functional groups 3. To interpret the data to different types of protons and carbons present in a molecule so as to ascertain the structure of the molecule based on the data provided 4. To acquire knowledge about specific fragmentation rules of different molecules which are unique
	CHE-EC-303	Water Analysis	2017	<ol style="list-style-type: none"> 1. To get an idea about water analysis 2. To understand the basic principles of soil analysis 3. To familiarize with instrumentation of potentiometric techniques 4. To gain knowledge on flame photometry and its applications
	CHE-EC-304	Instrumental Methods of Analysis-I	2017	<ol style="list-style-type: none"> 1. To get an idea about water analysis 2. To understand the basic principles of soil analysis 3. To familiarize with instrumentation of potentiometric techniques 4. To gain knowledge on flame photometry and its applications
	CHE-305	(a) Organic Chemistry III (b) Inorganic Spectroscopy & Thermal	2017	305 A <ol style="list-style-type: none"> 1. 	CHE-IC-401	Coordination compounds, Organo metallic chemistry & Chemistry of non-transition elements	2017	<p>1. To Gain an extensive knowledge about dinitrogen complexes of Ru(II), Os(II), Co(I), Mo(0) and dioxygen complexes of Ir(I) and Rh(I) and on cycloheptatriene and tropylium complexes of oxidative, reductive elimination reactions</p> <p>2. To understand mechanism, stereochemical aspects and regeneration of catalyst in olefin hydrogenation (Wilkinson's catalyst), olefin oxygenation (Wacker process or Smidt reaction), Olefin hydroformylation and Fischer –Tropsch process.</p>

				<ol style="list-style-type: none"> 3. To study the examples of metal complexes having metal-metal single or multiple bonds and analyse the spectroscopic evidences for the presence of metal-metal bond. 4. To understand the synthesis and structures of boranes, carboranes, borazines, silicates carbides, peroxo compounds and inter halogens, pseudohalides
	CHE-IC-402	Instrumental Methods of Analysis	2017	<ol style="list-style-type: none"> 1. To understand the working principles, instrumentation and applications of ICP-AES and ICP-MS, energy dispersive X-ray fluorescence (EDXRF), Wavelength dispersive X-ray fluorescence (WDXRF). 2. To understand the basic principles, procedure and components of the High-Performance Liquid Chromatography (HPLC), Gel Permeation Chromatography (GPC): Capillary Electrophoresis (CE), Supercritical Fluid Chromatography (SFC). 3. To get knowledge on instrumentation and applications of GCMS in drug analysis and environmental samples analysis. 4. To improve the knowledge about coulometric techniques and their analysis of cations (As (III), Fe (II)) and anions (I- and S²⁻) by using I₂ liberations and Ce⁴⁺ liberation in solutions
	CHE-IC-403	Instrumental Methods of Analysis-II	2017	<ol style="list-style-type: none"> 1. To understand the common laboratory techniques including separation techniques. 2. Polarography, atomic absorption spectroscopy in both emission and absorption mode. 3. To gain knowledge on implementation of gas chromatography and HPLC for separation of mixtures. 4. To Familiarize with interpretation of data to structures by NMR.

	CHE-IC-404	Project work	2017	<ol style="list-style-type: none"> 1. Ability to perform experiments, collection and evaluation of data 2. Interpretation of results while adhering to scientific principles of responsible and ethical behaviour. 3. Analysing and compiling the data and results in a chronological order in the form of dissertation 4. Preparation of dissertation.
	CHE-405	<p>(a) Solid state and Photo Chemistry</p> <p>(b) Bioinorganic, Bioorganic & Biophysical</p> <p>(c) Chemistry of Nanomaterials & Functional materials</p>	2017	<p>405 A</p> <ol style="list-style-type: none"> 1. To understand the working principles, instrumentation and applications of ICP-AES and ICP-MS, energy dispersive X-fluorescence (EDXRF), Wavelength dispersive X-ray fluorescence (WDXRF). 2. To understand the basic principles, procedure and components of the High-Performance Liquid Chromatography (HPLC), Gel Permeation Chromatography (GPC): Capillary Electrophoresis (CE), Supercritical Fluid Chromatography (SFC). 3. To get knowledge on instrumentation and applications of GCMS in drug analysis and environmental samples analysis 4. To improve the knowledge about coulometric techniques and their analysis of cations (As (III), Fe (II)) and anions (I^- and S^{2-}) by using I^2 liberations and Ce^{4+} liberation in solutions. <p>405 B</p> <ol style="list-style-type: none"> 1. Gain knowledge on metallo proteins in electron

				<p>transfer processes.</p> <ol style="list-style-type: none"> 2. Know the applications of trace metal ions and metal ions as chelating agents in medicine. 3. Achieve and develop highly stereoselective synthesis of organic compounds and drugs by adopting environmentally. 4. Understand thermodynamics of biopolymer reactions and to correlate free energy and biopolymer parameters
	CHE-406	(a)Drug Chemistry or (b) Electroanalytical Techniques	2017	<p>406 A</p> <ol style="list-style-type: none"> 1. Know about natural products. 2. Know Interpretation of cardiovascular drugs. 3. Know the Analyzing about prostaglandins. 4. Know the Definition, Classification, Nomenclature, Structure and Synthesis of anti-inflammatory drugs. <p>406 B</p> <ol style="list-style-type: none"> 1. Ability to interpret potentiometry and conductometry 2. Interpretation of results while adhering to DC Polarography. 3. Analysing and compiling the data and results in polarography. 4. Familiarize Types of ion sensitive electrodes

M.Sc., Organic Chemistry

S. No.	Course Code	Title of the Course	Years of Introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/Skill development
	CHE-101	Inorganic Chemistry- I	2017	<ol style="list-style-type: none"> 1. To understand the key features of coordination compounds, Crystal Field Theory, magnetic properties and bonding in transition metal complexes.

				<ol style="list-style-type: none"> 2. To learn about the polymorphic forms of Carbon, Sulphur and Phosphorus, synthesis and properties of sulphur-nitrogen compounds, boranes, carbides, silicates and to know Wades rules. 3. To explain the reactivity of complexes in terms of Valence bond and Crystal Field theories, Taube's classification, Trans effect and Electron Transfer Reactions 4. To gain knowledge on synthesis and structures of different metal carbonyls, synergistic effect and 18 electron rule
	CHE-102	Organic Chemistry I	2017	<ol style="list-style-type: none"> 1. To detect stereochemical structures of the molecules, stereoselective and stereocontrolled reactions. 2. To ascertain the stereochemistry of the products with the effect of neighbouring group participation and to familiarize the various types of aromatic substitution reactions, their mechanism and the effect of substituents 3. To know the concept of isotope effects, potential energy diagrams and transition states in different intermediates 4. To familiarize with stereospecific synthesis of naturally occurring terpenoids and degradation products of terpenoids
	CHE-103	Physical Chemistry- I	2017	<ol style="list-style-type: none"> 1. To know the concepts such as Operator algebra, Eigen values and Eigen functions, Degeneracy, Schrodinger wave equation and the postulates of Quantum Mechanics 2. To learn about theories of reaction rates, Lindemann, Lindemann-Hinshel wood, and RRKM theories. 3. To know about Thermodynamic concepts and entropy change in reversible process and irreversible process,

				Gibbs- Duhem equation, calculation of thermodynamic properties. 4. To study the Thermodynamic and Kinetic Derivation of Nernst Equation and the derivation of Debye-Huckle Equation and its Verification
	CHE-104	Inorganic Practical- I	2017	1. To demonstrate mastery of basic semi-micro qualitative analysis of simple salts and interprets analytical data and will make scientific claims that are supported by the observations 2. To familiarize with techniques of titration and calculation of errors
	CHE-105	Organic Practical-I	2017	1. To familiarize the systematic procedures of analysis of organic components, conformational tests for various functional groups 2. To understand the mechanisms and familiarize with methodologies to prepare biologically important molecules
	CHE-106	Physical Practical I	2017	1. To study the determination of critical solution temperature, eutectic composition, distribution coefficient, adsorption of different 2. To calibrate the statistical data
	CHE-107	General Chemistry-I	2017	1. To know about mean and median values, standard deviation and coefficient of variation. 2. To acquire knowledge on principle and instrumentation of AAS and difference between flame AAS and furnace AAS.
	CHE-108	Human Values and Professional Ethics – I	2017	1. To know about the needs and importance of professional ethics. 2. To analyze nature of Values, basic Moral Concepts

				character and Conduct 3. To gain knowledge on individual and society ethical values, ahimsa, satya and brahmacharya. 4. To understand values of Bhagavd Gita, various religions, religious tolerance, Gandhian ethics
--	--	--	--	---

	CHE-201	Inorganic Chemistry- II	2017	1. To familiarize with the general methods of complex preparations and properties, nature of bonding and structural features of metal complexes 2. To know about Russel-Saunders coupling, splitting of energy levels in octahedral field and differentiate between Orgel diagrams and Tanabe-Sugano diagrams 3. To understand about the laws of Hunds, Curie and Weiss, magnetism and magnetic susceptibility determination by Gouy's and Farady methods 4. To gain knowledge on Induced reactions, Free radical reactions, Thermal decomposition reactions, Chain reactions
	CHE-202	Organic Chemistry -II	2017	1. To familiarize the mechanisms of E_1 , E_2 and E_{1CB} reactions, stereoselectivity and synpyrolytic eliminations and use of isotopes, chemical trapping and crossover experiments 2. To learn the rearrangements involving electron deficient carbon, nitrogen and oxygen atoms and electron rich carbon atom and familiarize with the limitations and applications of reactions 3. To learn the synthesis of three and four membered heterocycles, mechanism of ring opening reactions and the effect of electron donating and withdrawing substituents in selectivity of ring opening reactions. 4. To understand the structural elucidation and synthesis of alkaloids using specific reagents.
	CHE-203	Physical Chemistry- II	2017	5. To know about Pauli Exclusion principle and Slater determinant, atomic orbitals, Simple molecular orbitals and Huckel theory of conjugated systems

				6. To learn Gibbs adsorption isotherm, BET equation and correlate limitations, critical micellar concentration (CMC) and factors affecting the CMC of surfactants 7. To identify Relation between order of a finite group and its sub-group, conjugacy, Symmetry point group (MLS, MHS and MSS) and orthogonality theorem 8. To acquire knowledge on DC-Polarography, AC-Polarography, Controlled Potential Electrolysis, to derive equation for Tafel plots, half-wave potentials for reversible system
	CHE-204	Inorganic Practical- II	2017	3. To separate and determine the two component mixtures 4. To acquire knowledge in the preparation of metal complexes
	CHE-205	Organic Practical-II	2017	3. To familiarize with binary mixture separation and to gain hands-on-experience in purification of the 4. To get knowledge about the chemical behavior of different components and mechanisms.
	CHE-206	Physical Practical -II	2017	3. To study the determination of cell constant and verification of Onsagar equation, strength of strong 4. To get knowledge on the applications of conductometry, potentiometry, coulometry and pH metry.
	CHE-207	General Chemistry-II	2017	3. To acquire knowledge on ion selective electrodes, solid membrane electrodes and glass electrodes and 4. To learn general principles and classifications of chromatographic separations and applications of TLC, GLC
	CHE-208	Human Values and Professional Ethics – II	2017	5. To understand the concepts of human values, responsibilities of family values and status of women in family and society. 6. To acquire knowledge on different medical ethics the views of charaka and sushruta on moral responsibilities of medical practitioners 7. To gain knowledge on social ethics and understand the

				<p>characteristics of ethical problems in management.</p> <p>8. To familiarize environmental ethics, ethical theory and ecological crisis</p>
	CHE-OC-301	Organic Chemistry III	2017	<p>1. To familiarize with the specific functions of the reagents particularly diazomethane, N-bromosuccinimide, Ziegler Natta catalyst, 1,3-dithianes and Merrifield resin in the synthesis of a variety of complex molecules</p> <p>2. To gain knowledge in the synthesis of different organometallic reagents and also stereo and regio specificity and selectivity of reactions with organometallic reagents</p> <p>3. To understand diastereoselectivity, stereoselectivity and substrate controlled auxillary controlled reactions</p> <p>4. To acquire knowledge about the reagents which causes oxidation in various compounds and also the reagents that causes selective and complete reductions to synthesize various compounds</p>
	CHE-OC-302	Organic Spectroscopy and Applications	2017	<p>1. To get experience to calculate λ max values for dienes, enones, polyenes, aromatic and heteroaromatic compounds</p> <p>2. To familiarize with the absorption bands of the molecules with specific functional groups</p> <p>3. To interpret the data to different types of protons and carbons present in a molecule so as to ascertain the structure of the molecule based on the data provided</p> <p>4. To acquire knowledge about specific fragmentation rules of different molecules which are unique</p>
	CHE OC 303 & 304	Core practical I: Organic Estimations - Practical	2017	<p>1. To gain knowledge about the estimation/percent purity of different organic molecules.</p> <p>2. To get hands-on-experience with the synthesis and determination of concentrations and purity</p> <p>3. To acquire knowledge in handling of toxic chemicals in multi step preparation of biologically important</p> <p>4. To gain experience in the proposal of synthetic routes to</p>

				functionalized derivatives
	CHE-OC-305 A	Inorganic Spectroscopy and Thermal Methods of Analysis	2017	<ol style="list-style-type: none"> 1. To know the basic principles of instrumental methods of analysis. 2. To gain knowledge on chemistry of alloys. 3. To Understand the complexity, theory and working principle of colourimetry 4. To familiarize with laws of colorimetric titrations.
	CHE-OC-305 B	Physical Chemistry III	2017	<ol style="list-style-type: none"> 1. To know the determination of Character Co-ordinate of C_{2v} point group based on 3N Coordinates and to learn the Mutual exclusion Principle. 2. To learn the Bragg conditions-Miller Indices- Laue method, Bragg method, Debye Scherrer method of X-ray structural analysis of crystals. 3. To study the rigid rotator model, stark effect, vibration-rotation spectroscopy, PQR branches, selection rules and Vibrational- rotational Raman spectroscopy. 4. To study the concepts on heat of dissolution, regular solution theory, Hildebrand solubility parameter, concept of Flory-Huggins theory of polymer solutions
	CHE OC 306 (A)	Spectral Techniques	2017	<ol style="list-style-type: none"> 1. To know the basic principles of spectroscopy 2. To familiarize with the analysis of various functional groups by using different spectroscopic techniques. 3. To Understand the applications of AAS. 4. To gain knowledge about Mass spectral fragmentation of organic compounds and common functional groups
	CHE OC 306 (B)	Chromatographic Techniques	2017	<ol style="list-style-type: none"> 1. To know the stationary and mobile phases in chromatographic techniques 2. To familiarize applications of different chromatographic methods 3. To Understand the principle of chromatographic techniques. 4. To gain knowledge on the normal phase and reverse phase.

	CHE-OC-401	Organic synthesis I	2017	<ol style="list-style-type: none"> 1. Familiarize with the unique reactivity of Boron, Phosphorus, Sulfur and Silicon reagents 2. Learn about photolytic reactions of carbonyl compounds, conjugated carbonyl derivatives, olefins, conjugated dienes CO₃:To gain knowledge in the determination of allowed or forbidden of chemical reactions viz., cycloaddition and 3. Learn the methods of preparation, properties, and industrial applications of various addition and condensation 4. Familiarize with the unique reactivity of Boron, Phosphorus, Sulfur and Silicon reagents
	CHE-OC 402	Organic Synthesis II	2017	<ol style="list-style-type: none"> 1. Familiarize with functionalization and interconversion of functional groups and the concept of organic synthesis by retrosynthetic approach 2. Gain knowledge in the formulation of synthetic routes for naturally occurring drugs. 3. Understand quinoline, acridine and guanidine group of alkaloids as antimalarials and to familiarize with the role of functioning of broad spectrum antibiotics. 4. Acquire knowledge about the classification, properties, structure & conformation and biological functions of peptides/proteins
	CHE OC 403	Core practical I: Spectral Identification of Organic Compounds	2017	<ol style="list-style-type: none"> 1. Calculate λ max values. 2. Ascertain functional groups. 3. Interpret the spectral data to the structure and stereochemistry of the molecules. 4. Analyse the fragmentation pattern of the molecules.
	CHE OC 404	Practical II: Project Work	2017	<ol style="list-style-type: none"> 1. Identify the problem, to collect the literature and understanding parameters to design the problem. 2. Perform experiments to synthesize the molecules with desired stereochemistry adopting modern techniques

				<ol style="list-style-type: none"> 3. Collect and interpretation of the data to the structures 4. Presentation of the data in the form of dissertation
	CHE-OC-405A	Heterocycles and Natural Products	2017	<ol style="list-style-type: none"> 1. Familiarize with the synthetic routes of five membered heterocycles with two heteroatoms and to justify the site of 2. Acquire knowledge on the synthetic methodologies of benzofused and six membered heterocycles and the effect of 3. Familiarize with the structural elucidation and synthesis of naturally occurring steroids and hormones 4. Know about isolation, structural determination and synthesis of flavonoids and isoflavonoids
	CHE-OC-405B	Bioinorganic, Bioorganic, Biophysical Chemistry	2017	<ol style="list-style-type: none"> 1. Gain knowledge on metallo proteins in electron transfer processes. 2. Know the applications of trace metal ions and metal ions as chelating agents in medicine. 3. Achieve and develop highly stereoselective synthesis of organic compounds and drugs by adopting environmentally. 4. Understand thermodynamics of biopolymer reactions and to correlate free energy and biopolymer parameters
	CHE OC 406A	Drug Chemistry	2017	<ol style="list-style-type: none"> 1. Know about natural products 2. Know Interpretation of cardiovascular drugs. 3. Know the Analyzing about prostaglandins 4. Know the Definition, Classification, Nomenclature, Structure and Synthesis of anti-inflammatory drugs.
	CHE OC 406B	Electroanalytical Techniques	2017	<ol style="list-style-type: none"> 1. Ability to interpret potentiometry and conductometry 2. Interpretation of results while adhering to DC Polarography. 3. Analysing and compiling the data and results in polarography. 4. Familiarize Types of ion sensitive electrodes

1	ENV-101	Ecology and Environment	2017	<ul style="list-style-type: none"> • To impart the knowledge on ecology and structure and functions of ecosystems. • To inculcate ethics and learning in ecosystem imbalance, health and environment. • To analyze soil profile and its importance of ecological balance. • To estimate the nutrients in the different soil samples. • Provide solutions to environmental problems using

				<p>appropriate tools and techniques.</p> <ul style="list-style-type: none"> • Develop both a quantitative and qualitative understanding of interactions between organisms and their consequences. • Gain the knowledge of functions of organisms and ecosystem. • Describe programmes environmental protection by implementing eco-friendly for human existence.
2	ENV -102	Environmental Chemistry	2017	<ul style="list-style-type: none"> • To understand emissions and distribution of the air pollutants and particles in the atmosphere. • To identify chemical properties and reactions of the compounds in the air. • To understand the primary and secondary pollutants and its effects. • To inculcate non polluted environment using green chemistry. • Demonstrate knowledge of chemical and biochemical principles of fundamental environmental processes in air, water and soil. • Apply basic chemical concepts to analyze chemical processes involved in different environmental problems.

				<ul style="list-style-type: none"> • By knowing pollution levels in the environment best possible fresh environment can be created in different methods like afforestation, natural parks and sanctuaries etc., for human concern. • Acquire the knowledge to implementation of biological alternatives for protection of the environment.
3	ENV-103P	Practical – I	2017	<ul style="list-style-type: none"> • To estimate population of flora and fauna in the ecosystem. • To examine nutrients levels in various samples of wastewater. • To estimate the protein, carbohydrates and nucleic acid in the different species. • To examine the natural condition for species survival. • Imparting practical knowledge about estimation of pH, Total Dissolved Solids, Hardness and Dissolved Oxygen, Chlorides and Sulphates in water samples. • Imparting practical knowledge about estimation of pH, Total Dissolved Solids, Hardness and Dissolved Oxygen, Chlorides and Sulphates in water samples. • Understand the environmental changes due to pollution levels.

				<ul style="list-style-type: none"> • Examine the various ecosystems and its biodiversity.
4	ENV-104P	Practical-II	2017	<ul style="list-style-type: none"> • To examine the contamination of the environment with chemical load by spectroscopic technology. • To analyze the concentration of the metals in the environment. • To inculcate the knowledge in scientific instrumentation. • To understand applications of organic matter in soils. • Understanding of various alkalinities present in the water sample by volumetric titration linked with theory. • By knowing water pollution potable water can be drawn out and wastewater can be treated. • By knowing various experiments of minerals fertility of the soil can be known which is advantage to farmers for agriculture. • Describe the advantages of organic forming.
5	ENV-105	Environmental Toxicology and Public Health	2017	<ul style="list-style-type: none"> • To introduce the applications of environmental toxicology in the context of public health. • To focus on the fate of chemicals in our environment and routes of exposure. • To understand the epidemic diseases and control

				<p>methods.</p> <ul style="list-style-type: none"> • To impart the knowledge in understanding of biotechnology for degradation of waste products in the environment. • Understand the role of toxicants in environment and methods used to quantify toxicity. • Inform, educate, and empower people about the potential hazards of toxic substances to environmental and human health. • By knowing the adverse health problems on human beings, safety, preventing measures can be implemented endemic and pandemic diseases can be controlled. • Understand the toxicity of pesticide, detoxification metals on public health.
6.	ENV-106	Human Values and Professional Ethics-I	2017	<ul style="list-style-type: none"> • To inculcate the knowledge on professional and ethical values. • To understand classification of moral and ethical values in traditional texts. • To describe enlightenment and social behavior towards the various religious and society. • To create social values and professional ethics.

				<ul style="list-style-type: none"> • Describe the human values, understand the commitment and responsibility. • They gain the ability to bring harmony to the society. • By studying human values reformation of man and reformation of policy shall be done and harmony of environment and society also can be achieved. • Moral code of conduct and social behavior towards religion and social harmony.
7.	EN-201	Energy and Environment	2017	<ul style="list-style-type: none"> • To understand energy concepts for conventional and renewable energy technologies and their application. • To provide energy production methods and consequent environmental impacts. • To understand sources of various green energy and applications. • To inculcate the bio-energy practices for maintain environmental quality. • Explain the key challenges and technologies in energy use, utilization of energy resources, energy conversion and environmental consequences. • They explain basic competence regarding environmental impacts arising from different energy

				<p>carriers and technical solutions.</p> <ul style="list-style-type: none"> • Enrichment of ecosystem will be achieved. • Explain energy planning for future generations.
8.	ENV-202	Environmental Pollution	2017	<ul style="list-style-type: none"> • To understand route way of pollutants and their impacts on the environment. • To impart the knowledge on diseases caused by pollution. • To understand classification of pollution, predictions and consequences of society. • To understand safe disposal of radioactive wastes. • Analyze sources of pollution, exposure pathways, fate and evaluate consequences of human exposure to pollution and its impacts to environmental quality. • Distinguish the effect of pollutants on human health, economy and wild environments. • Pollution free environment for human life will be achieved. • Explain the contamination of water bodies due to discharge of untreated wastewater into the drain.
9.	ENV-203P	Practical-I	2017	<ul style="list-style-type: none"> • To analyze wastewater and pond water samples. • To estimate the concentration of various metals is

				<p>environment.</p> <ul style="list-style-type: none"> • To analysis of toxicants in environmental samples. • To understand bioaccumulation of pesticides. • Describe the amount of pesticide/insecticide in water/vegetable samples. • Report the values of analyzed inferences of the experiments. • Assess the concentrations of pollutants. • Explain the formation of photochemicals.
10.	ENV-204P	Practical-II	2017	<ul style="list-style-type: none"> • To understand the difference of LC_{50} and LD_{50}. • To evaluate the samples like water, soil and biological. • To examine the growth rate of fauna in different habitats. • To assess micro and macro nutrients in the soil samples. • Identify the concentration of biochemical by using instrumental methods. • Applications of scientific methods for analysis of pollution. • Applications of basic scientific principle in the

				evaluation of pollution by instruments.
11	ENV-205	Instrumental Techniques and Applications	2017	<ul style="list-style-type: none"> • To impart the knowledge in instrumental techniques. • To understand in the operation and care of instruments used in the chemical laboratories. • To inculcate chromatographics in plant pigments. • To understand value of nanotechnology. • Integrate a fundamental understanding of the underlining physics principles as they relate to specific instrumentation used for atomic, molecular, and mass spectrometry, magnetic resonance spectrometry and chromatography. • Environmental potentiality will be achieved. This is indirect benefits to the society. • Understand the analysis and level of concentration of different metals through instrumental techniques. • Explain Nanotechnology and Nano Engineering and Nano Science.
12	ENV-206	Human Values and Professional Ethics-II	2017	<ul style="list-style-type: none"> • To create an awareness on professional ethics and Human Values. • To appreciate the rights of others. • To understand environmental ethics. • To create an awareness on social ethics.

				<ul style="list-style-type: none"> • Understand the core values that shape the ethical behaviour. • An ability to apply their broad education towards the understanding of the impact of engineering solutions in a global and societal context. • Making the students to full man, understanding the ethical values. • Ability to achieve ethics in medical, business, environment and social.
13	ENV -301	Waste Treatment and Management	2017	<ul style="list-style-type: none"> • To understand purification practices for wastewater. • To emphasize on design considerations of various unit operations and processes of water treatment facilities. • To characterize the waste and apply the knowledge of laws for handling of various wastes and management. • To understand the reduction of environmental pollution by recycling the waste products. • Describe the components of solid waste management and the laws governing it. • Discuss the solid waste collection systems, route

				<p>optimization techniques and processing of solid wastes.</p> <ul style="list-style-type: none"> • Biodegradation of waste through natural and artificial methods will be achieved. • Evaluating solid waste management practices in urban and rural environment. • Explain minimize and reduce waste generation through applications of 3 R's policy.
14	ENV -302	Environmental Assessment, Audit and Economics	2017	<ul style="list-style-type: none"> • To introduce and provide theoretical and practical education on environmental impact assessment. • To assess the economic burden of environmental cause. • To focus on the rationale and methodology of integrated environmental impact assessment (EIA) including consideration of the relevant bio-physical, social, cultural, economic and human health aspects of development proposals, programs and policies. • To understand financial impact of environmental policy. • Explain the concepts about the Environmental Impact Assessment (EIA) and describe the environment laws, aims and the necessity of EIA.

				<ul style="list-style-type: none"> • Critically examine assumptions inherent in impact assessment, examine a range of environmental impact assessments and identify and explore impact assessment fields and approaches. • Understand the sustainable development and controlling environmental pollution. • Describe the environmental economics for sustainable development.
15	ENV -303	Practical-I	2017	<ul style="list-style-type: none"> • To prepare EIA for project management and environmental statement for industries. • To estimate the presence of sedimentary particles by scientific methods. • To analyze environmental impact for will being of the society. • Understand the degradation of natural resources by constructions of various projects. • Understand requirement of oxygen for growth of organisms to break down organic matter in wastewaters. • Describe the low cost wastewater treatment practices in water demand areas.
16	ENV-304	Practical-II	2017	<ul style="list-style-type: none"> • To construct practical statistical models for several

				<p>processes in the real-world.</p> <ul style="list-style-type: none"> • To understand coefficient of two variable in samples. • To understand the basic operations of a computer system. • It helps to explain the relationships between variables of the real-world applications. • Analyze evaluation of two variables. • Develop the programming techniques and the problem solving skills through programming.
17	ENV-305A	Disaster Mitigation and Management	2017	<ul style="list-style-type: none"> • To obtain, analyze and communicate information on risks and relief needs. • To assess review and control the risk. • To develop methods of risks analysis and evaluation of accidents in industrial development. • To inculcate economic evaluation of risks after the disaster. • Understand the mitigation approaches, their choices and alternatives. • Develop foundations for hazard, risk and vulnerability assessment. • Explain the knowledge on disaster preparedness to meet risks in natural disasters.

				<ul style="list-style-type: none"> • Know about the economic evaluation of risks and frame work for sustainable development.
18	ENV-305B	Biodiversity Conservation and Management	2017	<ul style="list-style-type: none"> • To assess biodiversity loss and the importance of biodiversity conservation. • To emphasis regional diversity hotspots and important conservation areas. • To develop biotechnological methods in pollution abatement and develop eco-friendly bio-products for environmental health. • To acquire knowledge in environmental management through biological system. • Systematically understand biodiversity and its vital role in ecosystem function. • Understand the value of biodiversity and current threats to biodiversity. • Describe Environment of nature. • Explain the conservation of the environment by adopting bio treatment for waste degradation.
19	ENV-305C	Statistics, Computer Applications and Modeling	2017	<ul style="list-style-type: none"> • To assess the strengths of the conclusions and evaluating their uncertainty in the data. • To understand importance of computer applications in business, education and research.

				<ul style="list-style-type: none"> • To develop appropriate mathematical models to predict environmental changes. • To understand mathematical tools used in modeling. • Analyze data using standard statistical techniques. • Utilize the Internet Web resources and evaluate on-line e-business system. • Environmental analysis, forecasting of the environment can be achieved. • Evaluate test significant for ecological predictions.
20	ENV-306A	Natural Resources Conservation	2017	<ul style="list-style-type: none"> • To introduce the importance of natural resources and its management. • To integrate technical field knowledge with analytical skills to solve important natural resource management problems. • To understand different practices of agriculture and its impact on environment and food stock. • To understand use and exploitation of mineral and food resources daily life. • Application of theories and methods with interdisciplinary approach towards natural resource management. • Critically examining the gap in the resource

				<p>availability, use and conservation.</p> <ul style="list-style-type: none"> • Environment conservation and employment generation. • Describe sustainable agriculture management.
21	ENV-306B	Environmental Education and Sustainability	2017	<ul style="list-style-type: none"> • To indentify the interconnected and interdisciplinary nature of environmental studies. • To expand the knowledge of liberal arts for understanding the relationship between humans and their environment. • To analyze environmental priorities and develop appropriate strategies for programme implementation. • To understand environmental education and awareness for sustainable development. • Demonstrating an integrative approach to environmental issues with a focus on sustainability. • Communicating complex environmental information to both technical and non-technical audiences. • Enriches the students with knowledge of environmental problems and appropriate solutions to overcome them. • Describe the eco-friendly techniques to meet future

				challenges.
22	ENV-401	Water Resources and Watershed Management	2017	<ul style="list-style-type: none"> • To develop an understanding of the occurrence and availability of freshwater, its uses, and problems related to water resources management. • To learn more about managing our water resources and solve societal and environmental woes. • To understand traditional water conservation methods and equitable use of water for sustainable development. • To develop more rainwater conservation practices for future generations. • Understand water's importance as a precious resource. • Provide a basic understanding of the impact of water and water-related issues in a global, economic, environmental and societal context. • Describe the management of water resources through construction of watersheds for future generations. • Understand value and role of the water resources for sustainable growth and development.
23	ENV-402	Remote Sensing and GIS	2017	<ul style="list-style-type: none"> • To provide background knowledge and understanding of principles of RS and RS systems.

				<ul style="list-style-type: none"> • To enhance capacity to interpret images and extract information on the earth surface from multi-resolution imagery at multi-scale level. • To analyze satellite data in understanding forest, water resources, agricultural and soil coverage. • To find the degradation level of environmental parameters through remote sensing applications. • Laying foundations for understanding Remote Sensing and Geographic Information System as a powerful tool for geospatial analysis. • Evaluating the application of RS-GIS techniques to the matrices of environment and resource management. • Future predictions of the environment will be known about weather. • Explain the damages occurred in the environment by GIS.
24	ENV-403	Practical-I	2017	<ul style="list-style-type: none"> • To estimate the various metals by using instrumental techniques. • To understand the coverage of watershed development from aerial photos. • To recognize geomorphological characters from

				<p>aerial survey.</p> <ul style="list-style-type: none"> • Analyze the multi elements in various wastewater samples. • Understand the quality of ground water. • Describe extend of drainage area with its hazardous characters.
25	ENV-404	Project Work and Comprehensive Viva-Voce	2017	<ul style="list-style-type: none"> • To understand the concepts of project management for better execution of projects. • To identify the different funding agencies for environmental protection. • To develop valuable social networking which increases public participation in environmental management. • Understanding project characteristics at its various stages of implementation. • Estimating the cost of physical and human resources and making plans to obtain the necessary resources. • Developing young researchers with appropriate exposure and necessary training.
26	ENV-405 A	Ecotourism and Eco-restoration	2017	<ul style="list-style-type: none"> • To impart the knowledge in understanding the concepts of eco-tourism. • To describe about the Eco-tourism and wildlife

				<p>tourism in protected areas, planning and economics.</p> <ul style="list-style-type: none"> • To understand major sources of environmental degradation and its consequences on biodiversity. • To understand soil fertility by adopting eco-restoration. • Describe the challenging in eco-tourism and wildlife tourism. • Understand values of wildlife and minimizing impact on natural ecosystem due to tourism. • Rest and recreation to the public and income generation for the Government. • Eco solutions will be achieved.
27	ENV-405 B	Environmental Laws, Policies and Legislation	2017	<ul style="list-style-type: none"> • To prevent, minimize, remedy and punish actions that threaten or damage the environment. • To preserve and protect the nature's gifts from pollution by implementation of environmental laws and policies. • To understand environmental public policy strategies in pollution control. • To understand environmental laws and acts for protect and conservation of environment. • Understanding judicial response to environmental

				<p>issues in India.</p> <ul style="list-style-type: none"> • Acquiring the ability to evaluate the role of law and policy in conservation and management of natural resources and prevention of pollution. • It enhances the societies support for environment's protection programmes. • Develop the environmental quality through implementation of environmental laws and acts.
28	ENV-405 C	Environmental Management and Sustainable Development	2017	<ul style="list-style-type: none"> • To develop skill in management of environment in a global level. • To understand the environmental knowledge into action in order to achieve particular outcomes in the way landscapes, societies and/or natural ecosystems are used and managed. • To provide skills and an improved understanding of how firms and organisations work with sustainability issues. • To understand sustainable environmental management by implementing policy principles. • Explain the environmental management practices. • Ability to analyze environmental management in relation to the major principles of sustainable

				<p>development.</p> <ul style="list-style-type: none"> • The ability to work effectively to create environmental management analysis outputs of professional quality, both independently and within team environments. • Develop innovation strategies for sustainable development at local and national level.
29	ENV-406 A	Forest Resources and Management	2017	<ul style="list-style-type: none"> • To provide desired physical, chemical and biological soil processes and functions on the Forests to maintain and/or improve soil productivity. • To create basic strategies for forest management like plantation forestry, natural forest management and agroforestry. • To build synergy with national and international agencies on environmental conservation. • To awareness of the disadvantages of deforestation and further conservation. • Demonstrating knowledge of forest vegetation modeling to forecast its development over time. • Integrating knowledge of basic biology, physical and social sciences, forest and wildlife ecology. • Through forest management national economy will

				<p>be improved.</p> <ul style="list-style-type: none"> • Describe preparation and development of action plan for conservation of forests.
30	ENV-406 B	Global Environmental Issues	2017	<ul style="list-style-type: none"> • To promote an investigation of the scientific principles behind global environmental issues. • To develop a world which is eco-friendly and pro for sustainable development. • To develop new dimensions to environment – human relationships. • To develop non polluting energy resources. • Predicting the consequences of human actions on quality of human life and global economy. • Developing critical thinking for shaping strategies for environmental protection and its conservation. • Updating the global environmental laws binding on the Governments. • Establish awareness on environment to meet future challenges.

34. Fishery Sciences & Aquaculture

S. No.	Course Code	Title of the Course	Years of Introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/Skill development
1	AQC 101	Concepts of Aquatic Ecology	2017	<p>i. Understanding the General Characteristics, Principles of classification, Aquatic EcologyCommunities.</p> <p>ii. To understand the various Physical and chemical characteristics of water.</p>
2	AQC 102	Systematics And External Anatomy of Cultivable Organisms	2017	<p>i. Understand the concepts of finfish and shellfish systematics and anatomy.</p> <p>ii..</p> <p>iii. Gained knowledge on the factors influencing the pattern of Evolution including Mutations, Natural Selection and Genetic drift.</p> <p>iv. Understood the concepts of Micro, Macro evolution speciation categories, Protein evolution etc. to fortify the existing knowledge on Evolutionary patterns.</p>
3	AQC 103 A	Fish Nutrition and Water Quality Management	2017	<p>i. Understanding the General Characteristics, Principles of classification, general biology of</p>

				<p>Invertebrate Communities.</p> <p>ii. To understand the various biological functions, the evolutions of life from most primitive to most advanced form with respect to their habit and habitat.</p> <p>iii. Understanding the comparative aspects of different organs systems among chordate Phyla.</p> <p>iv. The students may apply this knowledge in taxonomy related research and job opportunities.</p> <p>v. Explain the ideas about Mendelian, non-Mendelian inheritance, genetic disorder, gene mutations and sex determination.</p> <p>vi. To understand PTC, Colorblindness test, how to solve genetic problems, pedigree analysis.</p>
4	AQC: 103 B	Environmental Monitoring and Bio deterioration	2017	<p>i. Students would gain expertise to develop understanding of biological processes at chemical; biochemical and molecular level to perform wide range of analytical techniques to explore biological activities.</p> <p>ii. The student will learn and understand about the Biosynthesis of Purines and Pyrimidine Nucleotides, degradation of Nucleotides, salvage</p>

				<p>pathways, biosynthesis and biodegradation of Amino acids, inborn errors of metabolism.</p> <p>iii. Students would be trained in various tools and techniques used to gain insight into biological processes.</p> <p>iv. Understood that the four propositions underlying Darwin's theory of evolution through natural selection are:</p> <p>(1) more individuals are produced than can survive;</p> <p>(2) There is therefore, a struggle for existence</p> <p>(3) Individuals within a species show variation</p> <p>(4) Offspring tend to inherit their parental characters.</p>
5	AQC- 104A	Coastal Aquaculture	2017	<p>i. The students will learn about chemical bonding patterns, chemical structures and classification of carbohydrates and their structural and metabolic role in cellular system i.e. different pathways associated with carbohydrate metabolism.</p> <p>ii. Students would gain expertise to develop understanding of biological processes at chemical; biochemical and molecular level to</p>

				<p>perform wide range of analytical techniques to explore biological activities.</p> <p>iii. The student will learn and understand about the Biosynthesis of Purines and Pyrimidine Nucleotides, degradation of Nucleotides, salvage pathways, biosynthesis and biodegradation of Amino acids, inborn errors of metabolism.</p>
6.	AQC 104 B	: Ornamental Fish Culture	2017	<p>i. The student will be enriched with several aspects pertaining to Human values and performing of Professional Ethics in day today life.</p> <p>ii. Introduction of several Nature of values to be performed by Humans to lead a good and Peaceful life by extending and imparting good behavior, character and conduct towards people of the society.</p> <p>iii. Introducing different concepts of Bhagavad Gita and its applications in uplifting of Religious values in the present society.</p>
7.	Practical-1 AQC 105	Identification and Morphology of Cultivable Organisms	2017	<p>i. Students will understand the structures, positions and functions of plasma membrane and</p>

				<p>all cellular organelles in details. They will acquire knowledge about chromosomes and cell divisions, both mitosis and meiosis. They will also know about cell signaling and cancers. They will know how to measure and stain different cell types.</p> <p>ii. Students would gain expertise in the ultra-structural information of animal cell besides the detailed views of the cell interior revealing the various events and actions of cell at the molecular level.</p> <p>iii. The study will help the students to understand the new discoveries about the structure and internal functioning of the cell due to technological improvements.</p> <p>iv. The student will learn and understand the rationale behind various assays used in immune diagnosis of diseases and will be able to transfer knowledge of immunology in clinical perspective.</p> <p>v. The course will aid in understanding the principles of Graft rejection, Auto immunity and</p>
--	--	--	--	--

				Antibody based therapy.
8.	Practical-2 AQC106	Fish Nutrition	2017	<p>i. The study of Molecular Biology stands as a tribute to human curiosity for seeking to discover, and to human creative intelligence for devising the complex instruments and elaborate techniques by which these discoveries can be made.</p> <p>ii. Students world gain expertise in understanding the complex molecular mechanisms occurring in cell and the applications of molecular technologies for betterment of life.</p> <p>iii. Understand and our apply the Principles and techniques of Molecular Biology which prepares students for further education employment in teaching, basic research or the health Professions.</p>
9.	AQC 107	Human Values and Professional Ethics – I	2017	<p>i. Students will acquire knowledge about replication, transcription, translation, post transcriptional and post translational modifications, gene regulation, DNA repair mechanisms and various molecular tools and</p>

				<p>techniques like PCR, southern and western blotting, recombinant DNA technology etc. they will also know the various tools and techniques related to bacterial microbiology.</p> <p>i. Students will understand the structures, positions and functions of plasma membrane and all cellular organelles in details. They will acquire knowledge about chromosomes and cell divisions, both mitosis and meiosis. They will also know about cell signaling and cancers. They will know how to measure and stain different cell types.</p>
10.	AQC 201	Principles of Aquaculture	2017	<p>i. The students will be able to explore an original query in Animal Physiology. The students will appreciate evolutionary changes and environmental adaptations in different taxa of Invertebrates and Vertebrates.</p> <p>ii. Understanding of how different groups of animals have different Physiological adaptations appropriate to carry out the required function to the fullest.</p>

				<p>iii. Learn the fundamental principles of immune response including molecular, biochemical and cellular basis of immune homeostasis.</p> <p>iv. The course will aid in understanding various aspects of immunological response and how it's triggered and regulated.</p>
11	AQC 202	Physiology of Cultivable Organisms	2017	<p>i. In depth understanding of Anatomical features of Integumentary, Circulatory, Reproductive, Respiratory, Receptor, Nervous systems among Chordate groups.</p> <p>ii. The students will be able to explore an original query in Animal Physiology. The students will appreciate evolutionary changes and environmental adaptations in different taxa of Invertebrates and Vertebrates.</p> <p>iii. An appropriate understanding of functioning of each system of different groups of animals with their comparison will be acquainted.</p> <p>iii. Understanding of the basic concepts of Physiological regulation, from cellular to organ to organismal.</p>

				iv. Understanding of how different groups of animals have different Physiological adaptations appropriate to carry out the required function to the fillet.
12	AQC 203A	Fresh Water Aquaculture	2017	<p>i. Student will know the values of ethics in various fields including medical, social and business ethics.</p> <p>ii. The student will be enriched with several aspects pertaining to Human values and performing of Professional Ethics in day today life.</p> <p>iii. Introduction of several Natural values to be performed by Humans to lead a good and Peaceful life.</p>
13	AQC 203B	Capture fisheries	2017	<p>i. Students would gain expertise in explaining how a variety of interacting processes generate an organism's heterogenous shapes, size and structural features that arise on the trajectory from embryo to adult or more generally throughout a life cycle.</p> <p>ii. Gains knowledge about gametogenesis,</p>

				<p>cleavage mechanisms, gastrulation and role of hormones in metamorphosis and regeneration.</p> <p>iii. After learning the development of life from cell to multicellularity complex and coordinated systems in organisms the students can apply this knowledge for research, and education, to solve the problems related to development in animals through research.</p>
14	AQC 204 A	Fishery Economics, Extension and Environmental Management	2017	<p>i. Students will be able to apply the scientific method and quantitative techniques to describe, monitor and understand environmental systems.</p> <p>ii. Students will be able to use interdisciplinary approaches such as ecology, economics, ethics and policy to devise solutions to environmental problems.</p> <p>iii. Students will be able to be proficient in ecological field methods such as wildlife survey, biodiversity assessment, mathematical modeling and monitoring of ecological systems.</p> <p>iv. Students will be able to use technology, such as geographical information systems and computer programming, to assist in problem</p>

				solving.
15	AQC 204 B	Limnology	2017	<p>i. Developmental Biology displays a rich array of material and conceptual practices that can be analyzed to better understand the scientific reasoning exhibited in experimental life sciences. Based on learning contents of embryology, students can have a systematic and organized learning about the knowledge and concepts of growth and development.</p> <p>ii. To understand the fundamental processes that underpins the fertilization of an egg cell and its step-by-step transformation into the fascinating complexity of a whole organism.</p> <p>iii. Students would be expertise techniques used for imaging, isolation, purification and characterization of various biological substances.</p> <p>iv. Students would gain basic knowledge of the underlying principles and practical strategy of the analytical and preparative techniques that are fundamental to study and understanding of life processes.</p>

16	Practical-1 AQC205	Soil and Water Characteristics	2017	<p>i. The student will get idea about the ecological process in its surrounding and at National and Global level and the use of student knowledge on Ecology, Behaviour can be applied to Education, Research and Extension programmes in his further career.</p> <p>ii. Students will be understanding the various features and aspects of population ecology, community ecology and ecosystem ecology. They might have the knowledge about environmental biology in details. They will acquire knowledge about various tools and techniques of field ecology.</p> <p>iii. Students learn about enzymes. Their classification and nomenclature</p> <p>iv. Students learn about specificity of enzymes</p> <p>v. Students learn about measurement of enzymatic activity</p> <p>vi. Students learn about isolation, purification of enzymes and intercellular distribution enzymes.</p>
17	Practical-2	Physiology of Fin Fish and Shell Fish	2017	i. Students would be expertise techniques used

	AQC206			<p>for imaging, isolation, purification and characterization of various biological substances.</p> <p>ii. Identify and describe the different equipment and tools used in a biology laboratory.</p> <p>iii. Correctly operate different laboratory instruments.</p> <p>iv. Correctly operate different types of microscopes.</p> <p>v. Prepare tissue for section cutting and correctly operate a microtome.</p>
18	AQC 206	Human Values and Professional Ethics – II (Audit course)	2017	<p>i. Students gain knowledge about regulation of enzyme activity with respective mechanisms</p> <p>ii. To understand about mechanism of enzymes in clinical diagnosis and their applications</p> <p>iii. Students gain knowledge about immobilization of enzymes, applications of immobilized enzymes.</p>
19	AQC 301	Microbiology and Fish Pathology	2017	<p>i. Familiar with various Applications of Bioinformatics by exploring the fundamentals of computer applications in Biology.</p> <p>ii. Describe different methods of data handling</p>

				<p>using computer.</p> <p>iii. Perform basic operations of gene sequence retrieval and compare them using different software.</p> <p>iv. Perform basic operations of protein structure retrieval and comparison using different software.</p> <p>v. The student will learn about the Computer basics like Operating systems, Programming, Data Access, Internet and Nucleic acid Sequence and Protein Data Banks.</p> <p>vi. The student will learn the basics of handling of data, measures of Central tendency like Mean, Median and Mode, Measures of dispersion like Mean deviation and Standard deviation and Co-efficient of Variation.</p> <p>v. The course will aid in learning Test of significance like Null hypothesis and Alternative hypothesis, t-test, F-test, Chi-square test, Correlation and Regression analysis.</p>
20	AQC 302	Fish Immunology	2017	<p>i. Creating the self-employment opportunities to rural students through Animal husbandry,</p>

				<p>Aquaculture, Vermiculture and Sericulture.</p> <p>ii. To understand the significance of Economically important animals including cultivable Fishes, Prawns and their culture practices.</p> <p>iii. Identification of Animal pathogenic diseases in Fisheries, Sericulture, Apiculture, Aquaculture and their management strategies.</p>
21	AQC: 303A	Cell Biology and Genetics	2017	<p>i. To understand the different pathogens causing disease in man.</p> <p>ii. Describe the different parasites causing disease and disability in man and animals.</p> <p>iii. Ability to elaborate about the life cycle and biology of disease carrying vectors; suggest preventive and control measures for the said diseases.</p> <p>iv. An understanding of the relationship between changes in physiology of host and</p> <p>v. The students after completion of the course based on the Expertise he/she may join as Parasitological Scientist.</p>

22	AQC 303 B	Bioinformatics In Aquaculture	2017	<p>i. Be able to access and analyse different case studies/examples of EIA in practice for evaluation/assessment</p> <p>ii. Explain the importance of environmental audits and other management tools in business for social benefit by improving environmental performance</p> <p>iii. Calculate the carbon footprint of any organization and identify suitable mitigation strategies for carbon reduction solutions.</p>
23	Practical's AQC 304	Microbiology and Fish Diseases	2017	<p>i. Understanding Electrophysiological techniques and Molecular mechanisms associated with action potentials</p> <p>ii. Students learnt and gain knowledge on structure and function of different types of Synapses</p> <p>iii. Gained information on different types of Neurotransmitters i.e. Amino acids and Peptides.</p>
24	Skill oriented course AQC 305	Fish Nutrition Technology	2017	<p>i. The awareness about toxic agents, their effects and knowledge about mode of transformation of toxicants will help in creating skilled personnel in the field of environment protection and</p>

				<p>research.</p> <p>ii. Understanding of the physiological and genotoxic effects of drugs and environmental toxins.</p> <p>iii. To understand various types of insecticides and understand their mode of action to kill/control the insects. Also, the students will learn about novel categories of insecticides that may be compatible with other control strategies.</p> <p>iv. The students will learn handling of the pesticides in crop protection and understand the therapy and antidotes at the time of poisoning.</p>
25	Open Elective (For other	a)AQC 306A: Fish Processing Technology	2017	<p>i. Learnt about structure, function and organization of Neurons in the Central nervous</p>

	department students)	b) AQC306B: Pollution and Toxicology		<p>system</p> <p>ii. Understanding Electrophysiological techniques and Molecular mechanisms associated with action potentials.</p> <p>iii. Identify microbiological techniques, the defining characteristics of the major groups of microorganisms and apply to study microbial phylogeny.</p> <p>iv. Apply the scientific method by stating a question; researching the topic; determining appropriate tests; performing tests; collecting, analyzing, and presenting data and effective communicate with both specialist and non-specialist audiences/community.</p>
26	AQC 401	Aquaculture Biotechnology	2017	<p>i. Skill development in environmental and occupational Toxicology.</p> <p>ii. It provides opportunities for student's research projects, internships in assessing the effects of toxic pollutants on the environment and in the food chain.</p> <p>iii. Identification of different routes of exposure</p>

				<p>of environmental toxins.</p> <p>iv. The students will learn handling of the pesticides in crop protection and understand the therapy and antidotes at the time of poisoning.</p> <p>v. To understand the overview of Animal Behavior and prominence of social organization in insects and primates.</p> <p>vi. Gained lot of information on different types of Learning phenomenon and their mechanisms.</p> <p>vii. To understand how to conserve the wild animals</p>
27	AQC402	Essentials Of Biochemistry	2017	<p>i. Understanding of in vitro culturing of organisms and production of transgenic animals.</p> <p>ii. Understanding of cloning of mammals, large scale culture and production from recombinant microorganisms and cloning vectors.</p> <p>iii. This insight allows students to take into consideration about ethical issues involved in production of transgenic animals and BT products.</p>

				<p>iv. Use in gene transfer technology, genetic manipulations and in a variety of Industrial processes and prominence of IVF, Artificial insemination and embryo transfer techniques.</p> <p>v. Identify microbiological techniques, the defining characteristics of the major groups of microorganisms and apply to study microbial phylogeny</p> <p>vi. Classify the nutritional types of microorganisms and measure microbial growth</p> <p>vii. Evaluate how microorganisms interact with the environment in beneficial or detrimental ways</p> <p>viii. Assess impact of plant- microbe interaction on agriculture in both beneficial and detrimental ways. Identify industrially important microbes.</p>
28	AQC403A	Computer Applications, Information Technology And Biostatistics In Aquaculture	2017	<p>i. Understand the overview of Animal Behavior and prominence of social organization in insects and primates</p> <p>ii. Gained lot of information on different types</p>

	AQC403B	Aquaculture Engineering		<p>of Learning phenomenon and their mechanisms.</p> <p>iii. To understand the how to conserve wild animals and management strategies.</p> <p>iv. To gain the knowledge about wild animals and animal products importance.</p>
29	Practical's AQC 404	Biotechnology And Biochemical Estimations	2017	<p>i. Understand the pathways associated with Biosynthesis and secretion of Endocrine hormones and their role in the control of metabolism.</p> <p>ii. Through understanding of several endocrines including Peptide hormones, Steroid hormones, Pituitary hormones, Sex hormones, Thyroid hormones etc. in the control of metabolic pathways.</p> <p>iii. Understanding the influence of hormones on Growth, Development and Reproduction and their regulatory pattern.</p>
30	Multidisciplinary course/ project work AQC405	Project Work / Fieldwork	2017	<p>i. This course exposes students to the applications of genetic engineering in biological research.</p> <p>ii. Students will be able to perform basic genetic</p>

				<p>engineering experiments at the end of course.</p> <p>iii. Students will acquire knowledge of advances in biotechnology- healthcare, agriculture and environment cleanup via recombinant DNA technology.</p>
31	Open Elective (For other department students) AQC 406(A)	General Principles and Practices of Aquaculture	2017	<p>i. Understand the evolution of protein structural motifs and domains and associate this with function;</p> <p>ii. Use on-line structural databases and tools to predict the properties, structure and function of proteins.</p> <p>iii. Understand and explain enzyme mechanisms in a structural context.</p> <p>iv. Describe mechanisms of protein folding and the roles of natively unstructured proteins in biology.</p> <p>v. Understand how cross-talk between proteins and post-translational protein modifications (e.g. phosphorylation, ubiquitination) facilitate information processing in cells.</p>
32	AQC 406 (B)	Fish Breeding and Hatchery Management	2017	<p>i. To understand the basic concepts of Infectious diseases and the role of immunity to control</p>

				<p>infections</p> <p>ii. Provides knowledge on the physiological mechanisms leading to diseased conditions.</p> <p>iii. Students gains knowledge on the pathogenesis and transmission of infectious diseases.</p> <p>iv. This insight allows the students to learn the treatment methods to control the growth and control of microbes.</p>

35. Geography

S. N o.	Course Code	Title of the Course	Years of Introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/Skill development
1	GEG-101	Geomorphology	2017	<ul style="list-style-type: none"> To understand the concept of place and how it is connected to people's sense of belonging to the physical environment, landscape and culture. To understand the fundamental concepts of spatial interaction and

				<p>diffusion, which explain how human activities are influenced by the concept of distance.</p> <ul style="list-style-type: none"> • To exposed to the nature of physical systems such as geomorphologic processes and natural hazards. • To read and interpret information on different types of physical features maps. • To learn how human, physical and environmental components of the world interact.
2	GEG-102	Economic Resource Studies	2017	<ul style="list-style-type: none"> • To acquire knowledge about the concepts of resources, classification, models of natural resource processes, their use and misuse, conservation and management of resources for sustainable development • To Provide a comprehensive introduction to basic concepts and key theoretical approaches in economic geography • To Introduce economic geography as a dynamic, diverse and contested body of knowledge • To enable you to apply this knowledge to key social and economic issues in the context of economic globalization
3	GEG-103P	Maps Scales and Map Projections	2017	<ul style="list-style-type: none"> • To apprise the students about the art and science of map making and representation. • To explain the usage of different types of projections • To focus on the importance of scale and projection in the process of represent

				ingtheearthsurface
4	GEG-104P	Terrain Mapping Techniques	2017	<ul style="list-style-type: none"> To apprise the students about the Terrain mapping techniques To project the representation of the land forms by using contour lines To explain the methods of slope analysis To develop the knowledge on the thematic maps To Understand the data representation through the diagrammatic form and log graphs
5	GEG-105	Advanced Cartography	2017	<ul style="list-style-type: none"> To apprise the student to various aspects of cartography. To introduce the basic concepts and key theoretical approaches in Advanced Cartography. <p>To describe the art and science of map making and map analysis</p>
6.	GEG-106	Human Values and Professional Ethics-I	2017	<p>i. The student will be enriched with several aspects pertaining to Human values and performing of Professional Ethics in day today life.</p> <p>ii. Introduction of several Nature of values to be performed by Humans to lead a good and Peaceful life by extending and imparting good behavior, character and conduct towards people of the society.</p> <p>iii. Introducing different concepts of Bhagavad Gita and its applications in uplifting of Religious values in the present society</p>
7.	GEG-201	Climatology and Oceanography	2017	<ul style="list-style-type: none"> To introduce to the students the fundamentals of atmospheric phenomena, global climate systems and climate change.

				<ul style="list-style-type: none"> • The atmosphere and climate are a critical part of the earth system, and climatic variability and change are central to the issue of current and future global environmental change. • To grasp the techniques for modeling the climate, covering both theoretical and technical aspects. • To understand the dynamics of the atmosphere and the overall climatological system. • To be able to analyse and interpret climatic data and classification of climate
8.	GEG-202	Principles of Remote Sensing	2017	<ul style="list-style-type: none"> <input type="checkbox"/> To focus on history and evolution of Remote sensing. <input type="checkbox"/> To explain the principle involved in remote sensing i.e. the Electromagnetic spectrum, reflection, refraction, diffusion, absorption and interaction with the earth's atmosphere. <input type="checkbox"/> To give the technical knowledge of satellite system. <input type="checkbox"/> To provide knowledge on the platforms and instruments used for remote sensing. <input type="checkbox"/> To give light on Aerial Remote sensing and satellite Remote sensing. <p>To explain about the specifications of sensors</p>
9.	GEG-203P	Interpretation of topographical and Weather Maps	2017	<ul style="list-style-type: none"> • To provide understanding and interpretation Skills of different Topographical maps. • To improve the knowledge on Indian weather maps and Interpretation skills.

10	GEG-204P	Techniques of Mapping and Map Analysis	2017	<ul style="list-style-type: none"> • To apprise the students about the Terrain mapping techniques • To project the representation of the land forms by using contour lines • To explain the methods of slope analysis • To develop the knowledge on the thematic maps
11	GEG-205	Geographical Thought	2017	<ul style="list-style-type: none"> • To acquaint the students with the Geographical philosophy and the Methodology and historical development of geography as a professional field. • The idea is to address the spirit and purpose of the changing geographies and to what we as geographers contribute towards knowledge production. • To developing critical thinking and analytical approaches and Students will acquire an understanding of and appreciation for the contributions of the eminent geographers to the subject.
12	GEG-206	Human Values and Professional Ethics-II	2017	<p>Student will know the values of ethics in various fields including medical, social and business ethics.</p> <p>ii. The student will be enriched with several aspects pertaining to Human values and performing of Professional Ethics in day today life.</p> <p>iii. Introduction of several Natural values to be performed by Humans to lead a good and Peaceful life.</p>

13	GEG-301	Urban Studies	2017	<ul style="list-style-type: none"> • To deal with the concept of urban settlements and evolution of urban population and to provide concept of Urban studies. • To explain the cause and effects of growth in urban population. • To explain the theories involved in classification of towns and relationship between towns and cities and their population. • To understand patterns of World urbanization with reference to India
14	GEG-302	Geographical Information System (G.I.S)	2017	<ul style="list-style-type: none"> • To understand the evolution of GIS. • To focus on collection, analyzing, interpretation and presenting the data related to Earth. • To explain the types of data collection with respect to time and terrain and Database management and retrieving the data from different sources. • To provide the theoretical knowledge on the Modeling surfaces and integration of Remote sensing with GIS. • To provide knowledge on GIS applications in different sectors.
15	GEG-303P	Geographical Information System (G.I.S)	2017	<ul style="list-style-type: none"> • To acquaint knowledge about especially Geographic Information System (GIS) softwares. • To develop the skill of geo-referencing and creation of different data files.

				<ul style="list-style-type: none"> • To improve the practical knowledge on attributed data and linkage. • To develop the skill on analysis methods of GIS.
16	GEG-304P	Statistical Techniques	2017	To analyze and represent the geographical data
17	GEG-305A	Agricultural Studies	2017	<ul style="list-style-type: none"> • To focus on evolution of Agriculture through at the different ages and approaches. • To understand the concepts and importance of determinants in different cropping patterns. <p>To understand agricultural allocation theories also the problem and prospect of Indian Agriculture</p>
18	GEG-305B	Regional Geography of India with special reference to Andhra Pradesh		<input type="checkbox"/> To develop the understanding about physical features of Indian Geography. <input type="checkbox"/> To familiarize the students with physiography, Drainage, Climate, soil and natural vegetation of India.
19	GEG-305C	Disaster Management Studies	2017	<input type="checkbox"/> To develop the skill of understanding about natural calamities and disaster and also realize the consequences as well as preparedness. <input type="checkbox"/> To create awareness on human and natural disasters <input type="checkbox"/> To understand classification of disasters and its impacts

20	GEG-306A	Regional Geography of Andhra Pradesh	2017	<ul style="list-style-type: none"> • To acquaint the students with re-organization of Andhra Pradesh and its new physical, climate and drainage aspects.. • To obtain the knowledge of demographic, irrigation and major crops. • To understand Andhra Pradesh mineral and industrial aspects with transportation. • To improve knowledge on the transportation and communication aspects of Andhra Pradesh
21	GEG-306B	Geographical information System (GIS) and Global Positioning System (GPS) applications	2017	<ul style="list-style-type: none"> • To develop the skill of understanding GPS and Survey. • To create awareness on post processing of GPS data and collection of data from GPS survey. • To develop skill of report writing by using GPS data and software and hardware To acquaint knowledge about especially Geographic Information System (GIS) softwares. • To develop the skill of geo-referencing and creation of different data files. • To improve the practical knowledge on attributed data and linkage. • To develop the skill on analysis methods of GIS.

22	GEG-401	Regional Planning	2017	<input type="checkbox"/> To apprise the concept of Region and its planning. <input type="checkbox"/> To explain the types of regions and regional hierarchy. <input type="checkbox"/> To explain the types of regional planning and planning process. <input type="checkbox"/> To the people participation in planning process and role of Panchayat Raj system <input type="checkbox"/> To explain the resource based and physiographic based regional planning.
23	GEG-402	Advanced Remote Sensing	2017	<ul style="list-style-type: none"> To give broad knowledge on photogrammetry, Principle, process, platforms and techniques and Aerial photographs. To provide knowledge on software and hardware required for digital image processing, image enhancement and restoration techniques. To understand the application of remote Sensing and Photogrammetry in various fields of study.
24	GEG-403P	Research Techniques	2017	<ul style="list-style-type: none"> To provide an understanding for the student on statistical concepts to include measurements of location and dispersion, and correlation analysis. To calculate and apply measures of location and measures of dispersion--grouped and ungrouped data cases. <p>To sensitize the different Research and agricultural techniques</p>
25	GEG-404P	Remote Sensing Applications	2017	<input type="checkbox"/> To explain practical knowledge on Remote sensing applications... <input type="checkbox"/> To help to understand Visual and digital interpretation of satellite Images.

				<input type="checkbox"/> To illustrate interpretation of Aerial photos. To acquaint knowledge on allocation of RS in different fields and sectors
26	GEG-405A	Water and Soil Resource Management	2017	<ul style="list-style-type: none"> To apprise the student to various water resources related aspects and hydrological cycle. To focus on groundwater and soil specifications. To develop skill of water and soil management and to study on some case studies
27	GEG-405B	Environmental Studies	2017	<ul style="list-style-type: none"> To create the environmental aptitude among students. To familiarize the students with concepts, issues, approaches about physical land To acquaint with contemporary environmental problems and challenges. To provide knowledge on Ecosystem, Biomes, food chain and hydrological cycle
28	GEG-405C	Geography for Research Extension and industry	2017	<input type="checkbox"/> To explain the historical evolution, of research in Geographical studies. <input type="checkbox"/> To help to understand about ethics, methods and factors in geographical research. <input type="checkbox"/> To provide the knowledge about forms of research and design. <input type="checkbox"/> To illustrate research methods and data collection. To acquaint research analysis and report writing
29	GEG-406A	Regional Geography of India	2017	<ul style="list-style-type: none"> To conceptualize the regional approaches and to examine regional differentiation in the study of Indian Geography. To expose to historical, economic, cultural, social and physical characteristics of India. To provide an introduction to the regions of the India in terms of both their uniqueness and simil

				arities
30	GEG-406B	Remote sensing Principles and Applications	2017	<input type="checkbox"/> To explain practical knowledge on Remote sensing applications... <input type="checkbox"/> To help to understand Visual and digital interpretation of satellite Images. <input type="checkbox"/> To illustrate interpretation of Aerial photos.

36. Geology

S. No.	Course Code	Title of the Course	Years of Introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/Skill development
1	GEO-101	Geomorphology and Paleontology	2017	1) Able to explain conceptual approaches in geomorphology. 2) Able to describe land forms and land forming processes in different climate zones and tectonic regimes. 3) Able to explain different theories and models for landscape evolution. 4) Obtain knowledge in recognizing and minimizing the mass wasting. 5) Able to apply geomorphological concepts in economically important

				<p>projects.</p> <p>6) <i>Palaeontology</i> is the study of prehistoric species, mostly ones that are extinct. It focuses primarily on fossil data, using a variety of physical, chemical and biological.</p> <p>7) Paleontology has essentially three basic goals: (1) to describe the world's past biodiversity; (2) to outline the history of life on earth; and (3) to develop new ideas about evolution and ecology.</p>
2	GEO-102	Crystallography & Mineralogy	2017	<p>1) Students will be able to describe crystal structures, crystal symmetry and twinning</p> <p>2) Students will learn the use of X-ray crystallography to determine the arrangement Atoms in a crystal.</p> <p>3) Students will be able to identify the mineralogical composition of geological materials by studying some of the optical properties and techniques in order to reveal their origin and evolution.</p> <p>4) Students will get thorough knowledge about the physical chemical and optical Characteristics of minerals could lead to the discovery of new uses for Earth's mineral resources.</p>
3	GEO-103P	Crystallography & Mineralogy	2017	<p>1. The student understands the importance of minerals to society and to the study of the Earth.</p> <p>2. Can explain how the properties of chemical elements and their bonds regulate the structure and composition of minerals.</p> <p>3. Demonstrate how the crystal structure of minerals affects the external</p>

				<p>morphology and physical properties of a mineral (e.g. crystal symmetry, crystal habit).</p> <p>4. Identify various minerals using Physical properties.</p> <p>5. Identify various crystal forms shown by minerals belonging to different crystal system.</p>
4	GEO-104P	Geomorphology & Paleontology	2017	<p>1) The practical application of geomorphological science now forms river restoration and environmental protection.</p> <p>2) the extensive experience gained through field work, analysis and input to the design process to provide thorough understanding of geomorphology in the river environment and describe</p> <p>3) Paleontology is highly relevant to the modern and future world. We can learn how climate change has effected past organisms as well as how organisms have changed the physical world. We can also better understand the principles of extinction, evolutionary change, and biodiversity.</p> <p>4) Paleontological resources, or fossils, are any evidence of past life preserved in geologic context. They are a tangible connection to life, landscapes, and climates of the past. They show us how life, landscapes, and climate have changed over time and how living things responded to those changes.</p> <p>5) Paleontology lies between biology and geology since it focuses on the record of past life, but its main source of evidence is fossils in rocks.</p> <p>6) paleontology, also spelled paleontology, scientific study of life of the geologic past that involves the analysis of plant and animal fossils, including</p>

				<p>those of microscopic size, preserved in rocks.</p> <p>7) Body fossils and trace fossils are the principal types of evidence about ancient life, and geochemical evidence has helped to decipher the evolution of life.</p>
5	GEO-105	Stratigraphy & Paleontology	2017	<p>1) Students would have acquired comprehensive knowledge on principles of Stratigraphy, correlation methods classification of Stratigraphy units, tectonic framework of India and Geological timescale.</p> <p>2) Ability to give an account of various stratigraphic units and give stratigraphic column distribution in India, fossil content and economic importance of given geological formation.</p> <p>3) Apply standard stratigraphic codes while preparing geological reports</p> <p>4) Describe morphology, classification, evolutionary trends of Invertebrate fossils with geological and geographic distribution and paleoecological and paleo-environmental relevance.</p> <p>5) Ability to identify, classify and describe the morphology of the invertebrate fossils and plant fossils.</p> <p>6) Application of fossils in establishing the age of the rock unit, correlation with other area, and Use of fossil in finding mineral deposits.</p> <p>7) Ability to apply micropalaeontological techniques in hydrocarbon exploration.</p>
6.	GEO-106	Human Values & Professional	2017	<p>1) After completion of this course the students will be able to know the importance of Ethics and Human Values in various professions.</p>

		Ethics-I		2) Students also will get in depth knowledge and understanding of moral values and ethical code of the Indian Society. Especially embedded in various scriptures.
7.	GEO-201	Structural Geology and Geotectonics	2017	<p>1) Able to demonstrate a basic understanding of stress, strain, rheology of earth's lithosphere and comprehend how to describe and classify brittle and ductile structures.</p> <p>2) Able to describe, identify and analyze the folds, faults and joints and their effects on outcrop pattern.</p> <p>3) Measure, plot and interpret structural field data and can relate these to geological Maps and knows how to read geological maps and geological cross-section.</p> <p>4) Obtain knowledge of shear zone characteristics and textures which are usually highly, Mineralized zones.</p>
8.	GEO-202	Remote Sensing and GIS	2017	<p>1) Develop knowledge in basics of Remote Sensing interpretation keys and applications.</p> <p>2) Formulate the relationship between EMR and satellite Remote Sensing.</p> <p>3) Application for Remote Sensing for important economic deposits.</p> <p>4) Operate GIS data model and demonstrate GIS techniques for various applications.</p> <p>5) Apply RS and GIS techniques to analyze the various geological materials.</p>
9.	GEO-203P	Structural Geology &	2017	1) The interpretation of geological maps and determination of strike and dip, Borehole problems and apparent dip, plunge and pitch of linear structures

		Sedimentology		<p>2) Structural geology concepts and tools to understand rocks deformation in hot environments</p> <p>3) Structural geology with interpretations and simple geomechanical problems and solutions</p> <p>4) Structural geology issues related to new instruments in measuring structural data from rocks, paleomagnetic studies in tectonics field studies in structural geology interdisciplinary aspects of structural geology.</p> <p>5) Sedimentology encompasses the study of modern sediments such as sand, silt, and clay, and the processes that result in their formation (erosion and weathering), transport, deposition and diagenesis.</p> <p>6) Sedimentology, the study of sedimentary rocks and the processes by which they are formed, includes and is related to a large number of phenomena.</p> <p>7) Sedimentology includes the five fundamental processes defined by the term sedimentation --weathering, erosion, transportation, deposition and diagenesis.</p>
10.	GEO-204P	Remote Sensing and GIS	2017	<p>1. Understand the concepts of Photogrametry and compute the heights of objects</p> <p>2. Understand the principles of aerial and satellite remote sensing, Able to comprehend the energy interactions with earth surface features, spectral properties of water bodies.</p> <p>3. Understand the basic concept of GIS and its applications, know different types of data representation in GIS.</p>

				<p>4. Understand and Develop models for GIS spatial Analysis and will be able to know what the questions that GIS can answer are.</p> <p>5. Apply knowledge of GIS software and able to work with GIS software in various application fields.</p> <p>6. Illustrate spatial and non spatial data features in GIS and understand the map projections and coordinates systems.</p> <p>7. Apply knowledge of GIS and understand the integration of Remote Sensing and GIS.</p>
11	GEO-205	Sedimentology	2017	<p>1) Able to identify different sedimentary rocks in both hand specimens and thin section and derive information on the depositional conditions and environments.</p> <p>2) Able to study the sequence of sedimentary rock strata and describe the tectonic framework of sedimentation to understand the earth's history including palaeoclimatology and history of life</p>
12	GEO-206	Human Values & Professional Ethics-II	2017	<p>1) After completion of this course the students will be able to follow and practice good behaviour with human values and moral support to their elderly family members.</p> <p>2) They also aware and get knowledge about medical ethics how the doctors will behave with patients, what type of ethics should be followed by business people. They also get in through knowledge about the protection of environment social ethics like family ethics, the role of print and electronic</p>

				media in prevention and protection of Human rights in Indian society.
13	GEO-301	Igneous Petrology	2017	<p>1) Acquire knowledge on the evolution of magma by different processes takes place from origin to emplacement with respect to different tectonic settings.</p> <p>2) Explain Igneous processes, formation, structures, classification and significance of texture in explaining rock history.</p> <p>3) Obtain knowledge on the crystallizing phase equilibrium of multi component magma system.</p> <p>4) Identify different Igneous rocks both in handspecimens and thin sections in terms of their petrogenesis by studying the petrographic characteristics.</p>
14	GEO-302	Metamorphic Petrology	2017	<p>1) This course has links directly with industry and share the knowledge about a wide range of ore deposits.</p> <p>2) Offers a detailed study of origin of economic mineral deposits its identification properties and distribution in India.</p> <p>3) Comprehensive knowledge in reflection light optic and ore textures.</p>
15	GEO-303P	Petrology	2017	<p>1) Describe the types and relative abundances of phases in a rock based on observations from hand specimens and thin sections</p> <p>2) Interpret the geologic history of igneous rocks based on mineral assemblage and textures using both hand sample and microscope techniques</p> <p>3) Use metamorphic mineral assemblages and textures to constrain deformation history and P-T conditions</p>

				<p>4) Use geochemical data (partition coefficients, REE plots, etc) to constrain petrogenetic processes</p> <p>5) Integrate their research findings with those of peers in developing a consensus model that (a) explains mineral occurrences and interplay (micro- and macroscopic) in field samples, and (b) holds up to public scrutiny (as a consensus model and as individual components) at a departmental mini-poster symposium</p> <p>6) Design and implement a field sampling campaign</p> <p>7) Use a portable X-Ray Fluorescence Spectrometer to collect elemental analyses</p> <p>8) Use MS Excel to organize, plot, and evaluate the petrogenesis of CRB using elemental data</p>
16	GEO-304P	Geochemistry	2017	<p>1) Geochemistry can play a key role in helping to protect the safety of drinking water by identifying the sources, concentration and forms of potentially harmful elements such as arsenic mercury and fluoride in natural water.</p> <p>2) Geochemistry and health establishes and explains links between the natural or disturbed chemical composition of the earth's surface and the health of plants animals and people.</p>
17	GEO-305	Geochemistry	2017	<p>1) Understand the behavior of elements in a geochemical context and relate</p>

		and Thermodynamic s		<p>this knowledge to how elements redistribute within the Earth.</p> <p>2) Learn to interpret and explain interactions between Earth reservoirs.</p> <p>3) Understand and interpret the major processes that form and modify the Earth's crust and mantle.</p> <p>4) Use isotopes to trace geological processes and age date specific events.</p>
18	GEO-306	Computer Applications and Geostatistics	2017	<p>1) Comprehend the database related to field geological data</p> <p>2) Prepare and Interpret graphical and pictorial data</p> <p>3) Exposure to some selected software's related to geology</p>
19	GEO-307	Dimensional Stones and Building Materials	2017	<p>1) Explain the distribution of dimensional stones and occurrence of construction materials</p> <p>2) Classify dimensional stones and construction materials</p> <p>3) Assess the suitability of various dimensional stones and construction materials</p>
20	GEO-308	Gemology	2017	<p>1) The course is focused on a comprehensive learning in gemology</p> <p>2) Understands the formation, classification and properties to final the grading and evaluation.</p> <p>3) Knowledge in order to identify original gemstones and stimulants</p> <p>4) Acquire skills which will be useful to them in gem industry</p>
21	GEO-309	Surveying and Field Geology	2017	<p>1) Understand the use of different surveying instruments, field equipment, aerial photographs and their use.</p> <p>2) Compute the area and earthwork for different works by using surveying instruments</p>

				<p>3) Analyze surveying techniques, tools, survey data and geological reports</p> <p>4) Prepare contour maps, geological maps and reports</p> <p>5) Solve survey issues using proper survey and interpretation.</p> <p>6) Use appropriate modern tools in surveying and mapping</p>
22	GEO-401	Economic Geology	2017	<p>1) Its chief objective is to guide the exploration for mineral resources and help determine which deposits are economically worthwhile to mine. Specialists in economic geology often assist in the extraction of the mineral commodities as well.</p> <p>2) <i>Economic geology</i> is concerned with earth materials that can be used for economic and/or industrial purposes. These materials include precious and base...</p> <p>3) Scientific discipline concerned with the distribution of mineral deposits, the economic considerations involved in their recovery, and an assessment of the reserves available.</p> <p>4) Economic geology deals with metal ores, fossil fuels (e.g., petroleum, natural gas, and coal), and other materials of commercial value, such as salt, gypsum, and building stone. It applies the principles and methods of various other fields of the geologic sciences, most notably geophysics, structural geology, and Stratigraphy. Its chief objective is to guide the exploration for mineral resources and help determine which deposits are economically worthwhile to mine. Specialists in economic</p>

				geology often assist in the extraction of the mineral commodities as well.
23	GEO-402	Mineral Exploration, Mining & Engineering Geology	2017	<p>1) This course linked to industry and acquires knowledge on techniques to locate ore bodies, methods for mineral exploration and geologic aspects of drilling.</p> <p>2) Acquire knowledge on geophysical methods for Ore reserve estimation.</p> <p>3) Acquire knowledge on Ore beneficiation processes and techniques.</p> <p>4) Confirm mining rules and regulations</p> <p>5) Able to determine the suitable mining methods</p> <p>6) Analyse different ores and ore beneficiation processes.</p> <p>7) Understand the different engineering properties of rock types and role of geologists in selecting the sites for different major engineering projects.</p>
24	GEO-403P	Economic Geology	2017	<p>1) This course has links directly with industry and share the knowledge about a wide range of ore deposits.</p> <p>2) Offers a detailed study of origin of economic mineral deposits its identification properties and distribution in India.</p> <p>3) Comprehensive knowledge in reflection light optic and ore textures.</p> <p>4) Acquire practical knowledge on microchemical techniques for identification ores and estimation of ore reserves.</p>
25	GEO-404P	Project Work	2017	Mining is global industry, which provides the raw material and energy

				<p>resources needed to sustain modern civilization.</p> <p>Demands for mineral consumptions are increasing day to day drastically and also expected to increase in decades to a head of population growth and rising and living standards.</p> <p>Environmental awareness in relating to proper protective and mitigation measures to the environment from its damage as soon as a great amount of improvement in mining sector</p>
26	GEO-405	Hydrogeology	2017	<p>1) Apply the knowledge of geological formations and the hydrological properties of rocks</p> <p>2) Analyze the suitability of water for domestic, irrigation and industrial purposes Conduct geological and geophysical investigations and give recommendations for drilling of borewells.</p> <p>3) Explain causes of pollution of groundwater give remedial measures to the society.</p> <p>4) Use modern methods and appropriate techniques to carrying out geophysical studies and artificial recharge methods</p> <p>5) Students will get critical knowledge on evaluation of geological condition at the major engineering project sites.</p>
27	GEO-406	Environmental Geology & Natural Hazards	2017	<p>1) Explain different aspects of environment and local, regional and global environmental problems.</p> <p>2) Classify and explain the environmental pollution and disaster control technologies</p>

				<p>3) Prepare, interpret and implement environment projects</p> <p>4) Identify the natural and environmental disasters, its causes and apply preventive measures.</p> <p>5) Adopt the laws and regulations towards hazard management</p> <p>6) Able to prepare controls of mitigating toward natural disasters.</p>
28	GEO-407	Water Shed Management	2017	<p>1) Explain the importance of watershed management</p> <p>2) Classify and explain the different water harvesting techniques</p> <p>3) Use modern tools for land erosion control</p> <p>4) Develop or improve the people's participatory approach for sustainable development and management of watersheds.</p>
29	GEO-408	Medical Geology	2017	<p>1) Explain about relationship of human Health and Geological Processes.</p> <p>2) Able to understand the importance of the Water quality standards and impact of micronutrient deficiencies in soils and crops on human health</p> <p>3) Analyse the interaction of abundance of elements and geological effects.</p>
30	GEO-409	Fuel Geology	2017	<p>1) The course offers a detailed study about natural fuels like coal and petroleum their formation and distribution especially in sedimentary basins.</p> <p>2) Students shall benefit to have basic ideas about formations, nomenclature in constitution of coal working detail of distribution of coals and coal industry in India, Sufficient idea of formation and entrapment of oil and gas.</p> <p>3) Get elaborate knowledge about occurrence of atomic minerals in nature, methods of prospecting, atomic fuels and environment.</p>

37. Home Science

Food Science Nutrition & Dietetics

S.No	Course Code	Title of the Course	Year of Introduction	Activities/Content with direct bearing on Employability/Entrepreneurship /Skill development
1	FSND 101	Food Chemistry and Analysis	2017	<p>Knowledge on chemical composition physical, chemical, and functional properties of Water, carbohydrate, Protein and Fats.</p> <p>Understand the principles and working applications of different analytical techniques associated with food.</p> <p>skills in qualitative and quantitative estimation of nutrients in different foods.</p> <p>This course gives on hands on experience which will help student to become food analyst at local, regional, national and global levels.</p>
2	FSND 102	Food Science and Experimental Foods	2017	<p>This course will give knowledge on Plant and Animal foods composition, and processing techniques on nutritive quality of foods.</p> <p>Understand the principles of cookery of different foods and methods of evaluation.</p> <p>This course is prerequisite for skill development in Food Product development.</p> <p>Standardization and experimentation on different foods leading to physical, chemical and sensory changes can be understood leading to become food</p>

				research analyst in industries at local, regional, national levels.
3	FSND 103	Clinical Nutrition and Dietetics-I	2017	<p>The concepts of nutrition and its relation to health and describe the role and responsibilities of Dietitian in Hospital will be dealt.</p> <p>Knowledge related to Therapeutic modification of diets and Plan and prepare diet for different diseases conditions.</p> <p>This will help the students to get employability in hospitals and also start their own diet and nutrition clinics.</p>
4	FSND 104	Food Chemistry and Analysis Practical	2017	<p>Developing skills in quantitative and qualitative analysis of Nutrients in foods.</p> <p>This course will help the students to develop skills as food analyst for employability.</p>
5	FSND 105	Food Science and Experimental Foods Practical	2017	<p>Standardization of foods using different processing techniques is included along with skills in processing, preparation and evaluation of bakery products.</p> <p>This helps in employability and entrepreneurial opportunities for the students</p>
6	FSND 106	Clinical Nutrition and Dietetics-I Practical	2017	<p>This course gives hands on experience in Therapeutic modifications of diet for different diseases by planning, preparing and evaluating.</p>
7	FSND 107	Essential of Food and Community Nutrition	2017	<p>Nutrients in food, their functions and consequences of deficiency is included in this course.</p> <p>Developing skills for planning diets for nutritional disorders like PEM, Iron, Vitamin A and Iodine and the knowledge of techniques to assess the</p>

				<p>nutritional status of different age groups.</p> <p>Acquire knowledge on government programs to prevent nutritional disorders according to regional and national needs.</p> <p>Community assessment skills in terms of anthropometry, dietary, clinical and biochemical for various disorders and planning programs for important days is given along with</p> <p>Applications of Computational skills in the Nutritional allowances during life span.</p>
8	FSND 108	Human Values and Professional Ethics-I	2017	The students understand the importance of good character, conduct and values embedded in various religions. Demonstrate knowledge of ethical values in non-class room activities, internships and field work.
9	FSND-201	Nutritional Bio chemistry	2017	<p>This course deals with the metabolism of nutrients such as carbohydrates, proteins, lipids, minerals and vitamins in human physiology acquire knowledge on factors affecting digestion, absorption of nutrients.</p> <p>Create awareness on enzymes and its role in nutrient metabolism and gain knowledge on role of vitamins and minerals as coenzymes in metabolism.</p>
10	FSND-202	Food Microbiology and Safety	2017	<p>Knowledge acquirement about important genera of microorganisms associated with food.</p> <p>This course makes the student to acquaint with the various factors associated with growth, food spoilage and food-borne diseases of different microorganisms and food contaminants and their sources.</p> <p>Gain knowledge on the characteristics of food borne diseases, infections</p>

				and intoxications and their identification and make the students to fit in as food microbiologist at national level.
11	FSND-203	Clinical Nutrition and Dietetics-II	2017	<p>The concepts of dietary principles for various diseases and comprehend knowledge in Dietary modifications for the management of diseases is included in the course.</p> <p>Application of principals in preparation and service of diets to the patients and assess the case studies and construct the diet charts will be explained.</p> <p>This course will be helpful in creating employability and entrepreneurship at local and national levels.</p>
12	FSND-204	Nutritional Bio chemistry Practical	2017	Developing skill and hands on experience in analysis of biochemical parameters in blood and serum will be carried out in this course.
13	FSND-205	Food Microbiology and Safety Practical	2017	Standard methods and procedures for the microbiological analysis of food will be dealt in this course to have skill development and employability in food industries at local, regional and national level.
14	FSND-206	Clinical Nutrition and Dietetics-II Practical	2017	<p>Application of principals in preparation and service of diets to the patients and assess the case studies and construct the diet charts will be explained.</p> <p>This course will be helpful in creating employability and entrepreneurship.</p>
15	FSND-207	Research Methodology	2017	The concept of doing research and terms like ‘variables’, ‘hypotheses, and ‘research ‘and different types of research like experimental, survey, applied, action research etc., and differentiate advantages and disadvantages each

				<p>type of research are dealt in this course.</p> <p>This course helps student to critically gain knowledge to select a sample by using different sampling methods like probability and non-probability sampling.</p> <p>Develop a research proposal in the appropriate scientific style to help students for skill development for higher learning.</p> <p>This course makes the student to understand about the scope of statistics in research, concepts of inferential statistics like t-test, chi-square, Correlation and Variance.</p> <p>Basics in computer and its application in statistics and development of skill in computing statistics by using statistical software will be imparted.</p>
16	FSND-208	Human Values and Professional Ethics-II	2017	<p>Understand the importance of value education and ethics in medical, business, environmental and social fields. The students apply the knowledge while joining in any profession and will contribute to society as socially responsible citizens.</p>
17	FSND 301	Food Processing and Preservation Technology	2017	<p>The course illustrates the principles and scope of food processing and preservation along with various techniques/methods.</p> <p>Knowledge acquirement on advanced emerging technologies and their applications in food processing and preservation is imparted to the students.</p> <p>This course creates opportunities in local, regional, national levels.</p>
18	FSND 302	Advances in Human Nutrition	2017	<p>The course appraises the advance concepts of nutrition of Brain, Immunity and Sports along with the concepts of dietary management in endemic</p>

				<p>nutrition problems.</p> <p>This course create knowledge on the dietary management during emergencies and the process and relation of immunity and nutrition.</p>
19	FSND - 303	Rural Work Experience	2017	<p>This course will help students to gain skill and have hands on experience in assessing a community in relation to nutrition, human development and extension activities.</p>
20	FSND-304	Internship	2017	<p>Internship as dietitian in government and corporate hospitals give practitioner skills and hands on experience for entry-level dietitians who are able to assume leadership roles to improve and maintain the nutritional care of diverse individuals, families and communities within national and global populations.</p>
21	FSND- 305	(a) Nutrition Research Techniques (b)Geriatric Nutrition (c)Nutrition in Emergencies and Disaster	2017	<p>(a). Understanding the methods of nutritional status assessment like Anthropometry, Biochemical, Clinical and Dietary will be dealt in this course.</p> <p>Application of knowledge on assessment techniques of protein quality in diets and Plan nutrition research using animal models is given in this course along with designing in nutrition research using Human models.</p> <p>(b). Understanding the physiological changes and theories of ageing and gaining knowledge on importance and consequences of diet in elderly is included in this course.</p> <p>Creating awareness on degenerative diseases, life style genesis and its management through diet and acquainting with the government programs</p>

				<p>and policies for elderly is included.</p> <p>(c). This course helps to assess the emergency situations related to food and Nutrition in natural and manmade disasters and nutrition surveillance and treatment in emergencies.</p>
22	FSND- 306	<p>(a) Fundamentals of Food, Nutrition and Health</p> <p>(b) Nutritional Assessment</p>	2017	<p>(a) The course will help students to gain knowledge on foods, food groups, balanced diet for different age groups and understand the importance of macro and micronutrients in daily diet.</p> <p>Comprehending knowledge on deficiency symptoms of different nutrients and developing skills and hands on experience to assess nutritional problems in community is included in the course.</p> <p>(b) Understanding the methods of nutritional status assessment like Anthropometry, Biochemical, Clinical and Dietary will be dealt in this course.</p> <p>Application of knowledge on assessment techniques of protein quality in diets and Plan nutrition research using animal models is given in this course along with designing in nutrition research using Human models.</p>
23	FSND 401	Food Safety Standards and Quality Control	2017	<p>This course includes the current food safety standards rules and regulations and gain knowledge on desirable and undesirable constituents and contaminants in foods.</p> <p>This course helps students to critical analysis on subjective and objective methods of quality of food and develop skills for quality analysis and assurance of food at national level.</p>

24	FSND 402	Food Product Development and Marketing	2017	<p>This course illustrates the new product categories in food market and their characteristics and elucidate the process of new food product development in food industry.</p> <p>Exemplifying various specialty food products and their applications and acquiring the skill to design and development of new food product and analyzing the quality of the product is imparted.</p>
25	FSND-403	Nutrition for Health and Fitness/ Dissertation	2017	<p>The course defines the concepts of Health, Nutrition, physical activity, physical fitness and methods of evaluation.</p> <p>Energy metabolism pathways during physical activity and describing the role of macronutrients in physical performance, weight management and obesity has been included.</p> <p>This course also explains the nutritional needs in different sports and the role of national agencies, thereby creating employability in Nutrition fitness centers at local, regional and national levels.</p>
26	FSND-404	Food Safety Standards and Product Development Practical's	2017	<p>This course helps students to critically analyse subjective and objective methods of quality of food and develop skills for quality analysis and assurance of food.</p> <p>Skill to design and development of new food product and analyzing the quality of the product is imparted thereby employability in national organizations like FSSAI.</p>
27	FSND-405	(a) Institutional Food Service Management	2017	<p>(a) The course will gain knowledge on the different types and management of food services and exposure to the dietary department in a hospital setting.</p>

		<p>(b)Baking Technology</p> <p>(c)Food Packaging</p>		<p>Knowledge on finance, personnel management, duties and responsibilities of dietitians will be learnt.</p> <p>(b) Gaining skills to act in a variety of capacities in clinical, administrative, and community settings and quantitative food production and planning diet plans for different diseases by placing in hospitals is practiced.</p> <p>(c) This course provide knowledge on packaging and packaging materials an overview of the scientific and technical aspects of food packaging. Enabling the students to understand the regulations of packaging and packaging material testing and applying skills of new innovations in food packaging to improve product stability and/or to extend the product shelf-life was included.</p>
28	FSND-406	<p>(a) Child Welfare Programmes</p> <p>(b)Disaster Management</p>	2017	<p>(a) The course helps the students to know the terms growth, development and stages of development across life span and understand the characteristics of children at different stages of childhood</p> <p>Explaining the different developments like physical, cognitive, language and social development during childhood and applying knowledge to understand normal development and developmental delays during childhood is studied.</p> <p>(b). The course helps to know about natural disasters: manmade disasters; chemical hazards; National and International strategies to mitigate disaster management and to understand natural disasters (like floods, drought,</p>

				<p>cyclone, earthquakes, global warming etc); Nuclear disasters; Biological disasters.</p> <p>Explaining the efforts made by the NGOs, Community based organizations and local administration in disaster management will be dealt in the course.</p>
--	--	--	--	---

Human Development and Child Welfare

S. No.	Course Code	Title of the Course	Years of Introduction	Activities/Content with direct bearing on Employability/ Entrepreneurship/ Skill development
1.	HDCW-101	Advanced Study of Child Development	2017	Students acquire the knowledge of holistic development of individuals from conception to adolescent period. The students can disseminate the knowledge to teachers and parents regarding normal and delayed development among children. The students can apply skills when they serve as teachers at local level or as extension officers in national schemes like ICDS.
2.	HDCW-102	Community Nutrition	2017	Students acquire knowledge about food groups, RDA and steps in planning a diet. The skills learnt in planning and calculation of nutritive values help when they work in local hospitals or in National programs like Zero budget natural forming , ICDS etc.
3.	HDCW-103	Trends in Early Childhood Education	2017	Students apply knowledge about appropriate approaches to teach pre- school children. They apply skills in the field of early childhood education, when they are placed as pre -school teachers at local level and as pre- school trainers at national level in Government organizations like ICDS or NGOs like Azim

				Premji foundation, PRATHAM, Bachpan etc.
4.	HDCW-104	Practical-I Developmental Assessment Practical		Students acquire skills on apply skills of observation of recording of all round development among infant and children below 5 years. They learnt how to assess cognitive ,physical, social &emotional development of children from late childhood to adolescent period, and life skills among adolescents.. The students can apply skills when they as teachers at local level or as extension officers in national schemes like ICDS.
5.	HDCW-105	Practical-II Community Nutrition Practical	2017	Students apply skills related to food groups, RDA and steps in planning a diet. The skills learnt in planning and calculation of nutritive values help when they work in local hospitals or in National programs like Zero budget natural forming , ICDS etc.
6.	HDCW-106	Practical-III Early Childhood Education Practical	2017	Students apply skills in the field of early childhood education, when they are placed as pre-school teachers at local level and as pre- school trainers at national level in Government organizations like ICDS or NGOs like Azim Premji foundation, PRATHAM, Bachpan etc.
7.	HDCW-107	Family Dynamics	2017	Students will get knowledge related to issues in family and society and understand laws related to marriage and family . Students utilize this knowledge when they work in national organizations like social welfare board and family counseling centers and in non-government organizations catering to the family welfare at local level like PASS ,RASS etc..
8.	HDCW-108	Human Values and Professional Ethics-	2017	Students understand the importance of good character , conduct and values embedded in various religions . Demonstrate knowledge of ethical values in

		I		non-class room activities, internships and field work.
9.	HDCW-201	Quality Standards in ECE Centers	2017	Students will get knowledge about planning activities for pre-school children .They understand different ways of teaching stories ,rhymes etc using different audio-visual aids.apply skills in planning a day's activities for pre -school children , prepare Teaching Learning Material (TLM) and participate as student teacher in SVU Laboratory nursery school. The practical experience helps in establishing preschools, as entrepreneurs also to serve in Non Government institutions like Azim Premji Foundation, PRATHAM at national level and in Government sectors as extension officer at National level programs that are providing pre- school education
10.	HDCW -202	Child Study Techniques	2017	Students are capable to use standardized techniques for assessment of IQ and personality of children. The knowledge and skills will be helpful when they work as school counselors in local schools and colleges and as counsellors in mental health institutions like VIMHANS ,Vijayawada and Child Guidance Clinics at local Government hospitals like SVRR hospital.
11.	HDCW -203	Children with Developmental Challenges	2017	Students gain knowledge about the causes for various impairments and principles of assessment of children with disabilities and gifted children. The practical skills of management of special children were to be treated when they are placed as special educators in local schools ,colleges and at national Government organizations like NIMH,NIHH at national level and non government organizations at local level like Nava Jeevan center for Visually Challenged, RASS, PASS etc.

12.	HDCW-204	Practical-I Participation in ECE Center Practical	2017	Students will be able to apply skills in planning a day's activities for pre - school children , prepare Teaching Learning Material (TLM) and participate as student teacher in SVU Laboratory nursery school. The practical experience helps in establishing preschools, as entrepreneurs also to serve in Non Government institutions like Azim Premji Foundation, PRATHAM at national level and in Government sectors as extension officer at National level programs that are providing pre- school education
13.	HDCW-205	Practical-II Child Study Techniques Practical	2017	Students are apply skillsfor assessment of IQ and personality of children. The knowledge and skills will be helpful when they work as school counselors in local schools and colleges and as counsellors in mental health institutions like VIMHANS,Vijayawada and Child Guidance Clinics at local Government hospitals like SVRR hospital
14.	HDCW-206	Practical-III Children with Developmental Challenges Practical	2017	Students are capable to use standardized techniques for assessment of IQ and personality of children. The knowledge and skills will be helpful when they work as school counselors in local schools and colleges and as counsellors in mental health institutions like VIMHANS ,Vijayawada and Child Guidance Clinics at local Government hospitals like SVRR hospital.
15.	HDCW-207	Research Methodology	2017	Student gain knowledge about types of research ,different methods of sampling and preparation of schedules/questionnaires. The students get skills in preparation of a research proposal. The knowledge helps the students to write articles for journals at national and international levels.
16.	HDCW -208	Human Values of	2017	Understand the importance of value education and ethics in medical ,business

		Professional Ethics - II		,environmental and social fields. The students apply the knowledge while joining in any profession and will contribute to society as socially responsible citizens.
17.	HDCW -301	Parent Education	2017	Students gain knowledge about different child rearing practices and parenting styles adopted by parents. Gain skills in planning education materials for parents ,conduct parent education programs in schools and community, when they work as a teachers at local schools. It helps to disseminate the knowledge related to impact of parenting styles on child behavior to parents , teachers and significant others in the community.
18.	HDCW-302	Theories and Approaches to Child Guidance	2017	Students describe different theories related to child development and understand the reasons for maladaptive behavior. Apply the knowledge of theories to understand the behavior of individuals and also in counselling , when they join as counselors at local schools and mental health institutions at regional level like VIMHANS ,Vijayawada , at national level like NIMH ,Hyderabad and at local level Child Guidance clinics run by Government hospitals like SVRR hospital.
19.	HDCW-303	Practical -I Rural Work Experience	2017	Students develop an understanding of rural life situations and problems related to nutrition and child development relevant to real field situations through practical training. They gain knowledge and skills to impart education related to health and nutrition to the rural audience. This experience will helpful when they join rural development programs run by government like Health and Nutrition Natural Farming Fellow in Natural Farming Project.

20.	HDCW-304	Practical-II Internship	2017	Students get hands-on experience in real life work settings relevant to the human development like SODHANA, Vijayanagaram, Christian Counselling Centre,Vellore, Sudheesha Counselling Centre, Hyderabad, VIMHANS, Vijayawada.
21.	HDCW-305	Generic Elective* a) Infant Development and Stimulation b Family Life Education c) Planning For Project Management	2017	(a)Students gain knowledge of stimulation activities for physical ,language ,cognitive and social development of infants. The knowledge and skills will help to plan stimulation activities for infants ,when they establish crèche as entrepreneurs or serve in Day care centers. (b)Students understands the concepts of family life populationexplosion and education of family and population. The knowledge helps to understand the impact of over population and skills for obtain managing quality family life. (c) Students gain knowledge in identification of problem for a research project, apply skills in selection of tools ,data collection and report writing .The knowledge helps the students to write articles for national and international levels and also to take up small projects.
23.	HDCW -401	Guidance and Counselling in Human Development	2017	Students gain the knowledge of different approaches to counselling. This will apply counselling skills to practice counselling process. The knowledge helps the students towards employment as counsellors in mental health institutions like VIMHANS ,Vijayawada and local non government organizations like RASS ,PASS ,VIMHANS ,Vijayawada etc.
24.	HDCW -402	Advanced Human Development	2017	Students understand the characteristics and problems of early, middle and late adulthood persons. This knowledge helps when they get employment in Day

				care (or) foster care centers for elderly citizens (or) employment in Govt and , local old age homes run by non govt organizations like RASS and PASS etc.
25.	HDCW -403	Rehabilitation and Management of Children with Special Needs	2017	Students understand the importance of Rehabilitation of children with developmental challenges through multi disciplinary approach. Gets practical knowledge about functioning of Govt and voluntary organizations that are managing children with developmental challenges .This helps students when they join as special educators at govt organizations like NIMH, Hyderabad and non govt organizations like RASS,PASS.
26.	HDCW-404	Practical Guidance and Counseling Practical	2017	Students gain the knowledge of different approaches to counselling. This will apply counselling skills to practice counselling process. The knowledge helps the students towards employment as counsellors in mental health institutions like VIMHANS ,Vijayawada and local non government organizations like RASS ,PASS ,VIMHANS ,Vijayawada etc.
27.	HDCW-404	Generic Elective* (a) Child and Human Rights or (b) Organization and management of Child welfare Institutions	2017	a).Students gain knowledge about human rights ,child rights and women rights. They can explains issues faced by women and children in difficult circumstances . The knowledge helps to understand the rights and problems of women and children when they work in Government organizations like Child Protection Officers. b).Students gain knowledge about the organizations striving for child welfare at national and international level. The knowledge helps when students join as supervisors in national schemes like ICDS and at regional level organization like RASS and PASS etc.

		(c) Care For Elderly		c).Students understand the characteristics of old age theories relating to aging and causative factors for problems during old age. This knowledge helps when they establish care centers for elderly as entrepreneurs or work in organization catering to the welfare of elderly like “Karunadamam” run by TTD and Nava Jeevan old age home at local level.
28.	HDCW-406	Open Elective* (For other departments) a) Child Welfare Programs or (b) Disaster management	2017	a). Students gain knowledge about the organizations striving for child welfare at national and international level. The knowledge helps when students join as supervisors in national schemes like ICDS and at regional level organization like RASS and PASS etc. b).Students gain in-depth knowledge about natural disasters; manmade disasters; chemical hazards : disaster management. This helps to understand efforts made by the NGOs, Community based organizations and local administration in disaster management and also to help Government in times of disasters.

Extension Management and Communication Technology

S. No.	Course Code	Title of the Course	Years of Introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/Skill development
1	EMCT-101	Extension Education in Community	2017	The students can gain understanding on the Extension Management community development and panchayat raj system to study the community

		Development		by using PRA and various approaches of extension education. The students will get jobs as extension officers, and various placements in community development projects, as well as rural co-operative sector.
2	EMCT-102	Community Nutrition	2017	The students know about nutrients in food and know about the nutritional deficiencies and the community level problems and policies and programmes of Nutrition.
3	EMCT-103	Communication and Media Preparation	2017	The concept of Communication –Recent trends in Instructional technology: Extension literature and the role of different factors influencing and effecting communication process- Dyad setting small group and mass communication. This course will help the students to improve their communication skills.
4	EMCT-104	Extension Education in Community Development Practical	2017	The students will acquire skill to study the community by using PRA techniques and develop the skill of critical analysis on various approaches of extension education.

5	EMCT-105	Community Nutrition Practical	2017	Students gain practical knowledge on the role of nutrients in different stages of human life and methods of nutritional assessment and community level problems and policies.
6.	EMCT-106	Communication and Media Preparation Practical	2017	Students analyze the role of different factors influencing and effecting communication process, preparation and use of different teaching aids in teaching different groups of people and in different learning situations.
7.	EMCT-107	Dynamics of Rural Society	2017	The students will gain knowledge on social structure; characteristics of rural people; rural social problems - social institutions, learn the factors affecting social change and gain insight about the welfare policies and programmes for rural society.
8.	EMCT-108	Human Values and Professional Ethics-1	2017	Students will apply knowledge of professional ethics and correlate the concepts in addressing the ethical issues outside the class room.
9.	EMCT-201	Entrepreneurial Development and Empowerment of Women	2017	Students acquire knowledge on Entrepreneurship, about the strategies for empowering women; rights of women and develop the entrepreneurship skills and learn about the institutional support of entrepreneurship. This course will help the students to become good entrepreneurs and also to start their own business enterprise.
10.	EMCT-202	Educational	2017	The students gain knowledge on concept of teaching learning process; forms

		Technology		and levels of teaching and learning; curriculum design, development knowledge on genesis and trends in modern education. This will help the students to develop the curriculum and to choose their career in the teaching field.
11	EMCT-203	Community organization and Leadership	2017	Students will know about community organization, process of Community organization, rural institutions, leadership, analyze different patterns of leadership; techniques of identification of leaders; steps to organize youth clubs; Role of Panchayat in developing rural women.
12	EMCT-204	Entrepreneurial Development and Empowerment of Women Practical	2017	Students will realize the role of entrepreneurship in economic development. Develop the skill of writing the business proposal and starting of business enterprise.
13	EMCT-205	Educational Technology Practical	2017	Students will develop the skill on developing a course curriculum; Preparation of lesson plans of selected topics and use of different instructional materials.
14	EMCT-206	Community Organization and Leadership Practical	2017	Students will develop the skill on different patterns of leadership, techniques of identification of leaders, and appraise the ongoing programmes in the locality.
15	EMCT-207	Research	2017	Students get knowledge on 'variables', 'hypothesis', research 'and recognize

		Methodology		the purpose of doing a research, sampling methods and develop a research proposal in the appropriate scientific style.
16	EMCT-208	Human values and Professional Ethics-II	2017	Students gain knowledge on 'value education' 'self-introspection' and 'self-esteem develop well balanced personality, socially responsible persons of the society.
17	EMCT-301	Rural Development Administration	2017	Students gain insight about administration in Extension and rural development: coordination and supervision in rural development administration, the purpose and principles of administration; human relation in extension administration the recent ongoing rural development programmes etc. This course will help the students to get jobs as rural development officers, and get jobs in National NGOs like PRADHAN, CARE, SEWA etc
18	EMCT-302	Training and Development	2017	Students will learn the concept of training, goals of training; learning and types of learning, factors affecting learning among adult, current trends in training methodologies; training strategies and designs and acquire skills in developing; selection and use of different training methods- case study; role play; and brain storming; etc. This course will help the students to get jobs as Trainee- motivators, Trainers, consultants etc.
19	EMCT-303	Rural Work Experience	2017	Students will develop an understanding of rural life situations prevailing in villages with special reference to Home science among the student will know about socioeconomic conditions of people and their problems and several

				agencies and institutions involved in rural development.
20	EMCT-304	Internship	2017	Students will gain first-hand exposure of working with NGOs. This will provide a practice-oriented and 'Hands-on' working experience in the NGOs / Government organizations and to enhance the students learning experience.
21	EMCT-305	(a) Managerial Skills for Extension Professionals (b) Communication Technologies in Extension (c) Sustainable Livelihood Systems	2017	<p>Students will know about the conceptualization of management process and its major functions, managerial skill; nature and importance for extension professionals. To understand the concept; scope and relevance of media in society; functions and future prospects of media systems</p> <p>To understand the concept; scope and Communication technologies, relevance of media in society; functions and future prospects of media systems etc</p> <p>Students will know about the livelihoods of rural/urban people; resources – land, soil; climate; water and forests; processes and relationships among agro-climatic and natural resources, understand the production systems- farming and non-farming activities; their linkage with the livelihoods of rural people, food security; livelihood security, indicators of environmental sustainability.</p>
22	EMCT-306	(a) Fundamentals of Food. Nutrition and Health	2017	Students gain knowledge on foods, food groups, balanced diet for different age groups, understand the importance of macro and micronutrients in daily diet.

		(or) (b) Nutritional Assessment		Students will learn the determinants of nutritional surveillance; understand the direct and indirect methods of nutritional assessment. Gain knowledge on dietary assessment at individual and house hold level. Identify the clinical symptoms and biochemical tests for different nutritional problems.
23	EMCT-401	Principles of Guidance and Counseling	2017	Develop knowledge about the concept; purpose; functions and role of guidance; types of services in a guidance programme , counseling and counseling theories, group guidance and counseling; concept; characteristics; Individual v/s group techniques. This course will help the students to get jobs as counselors and in Government and Non-government organizations, as counselors, consultant research co-coordinators etc
24	EMCT-402	Extension Programme Planning and Evaluation	2017	Students will get knowledge about Programme planning in Extension; Programme Implementation; Programme Evaluation, Documentation, Programme Planning; the Preparation of plan of work ; Purpose, types and tools of Evaluation; Programme planning and implementation, documentation in Programme implementation. This course will help the students to get jobs as rural development officers, and get jobs in National NGOs like PRADHAN, CARE, SEWA etc
25	EMCT-403	Thesis/ Community Health Management	2017	Students gain knowledge about the concept of community health and global health; Primary Health Care – definitions; principles; components;

				comprehensive health care; levels of prevention, major health problems in India, management information systems in health, health needs of special groups – women, infants; and children; health of adolescents; geriatric health needs and problems.
26	EMCT-404	Principles of Guidance and Programme Planning Practical	2017	Assess the guidance programmes and counseling process in school and out of school settings and analyze use of standard test of study habits and attitudes (SSHA) for analyzing the study habits and attitudes.
27	EMCT-405	(a)Extension Management (b) Science & Technology for Rural Women	2017	<p>Students will know about administration and management; process of management and organizational climate, understand the qualities and functions of extension personnel; Problems and issues of extension management in India.</p> <p>Analyze the management skills of extension personnel.</p> <p>Students will learn about the Science and Technology for rural development; Energy saving devices-application of solar energy; bio-gas etc., application of Science and Technology in Home science, safe water supply methods suitable for rural areas; health- hygiene and environmental sanitation.</p> <p>,agencies involved in research and application of Science and Technology.</p>

		(c) Environmental Management		Students will get the knowledge about the life and the environment; physical-chemical factors in the environment; changes in the environment; eco-system-earth, methods of waste management; women and environment government and non-governmental agencies in promoting better health, factors affecting changes in ecosystem and environment
28	EMCT-406	(a) Child Welfare Programmes or (b) Disaster Management	2017	<p>Students will learn concepts of ‘child’ and ‘child welfare’, enlist children in need of care and difficult circumstances, understand the role of government, child welfare programmes developmental and rehabilitative manner to the disadvantaged people in the society, monitoring and evaluation</p> <p>Students will get an insight about natural disasters: manmade disasters; chemical hazards; National and International strategies to mitigate disaster management., global warming etc)efforts made by the NGOs, & Community based organizations and local administration in disaster management.</p>

Food Technology

S. No.	Course Code	Title of the Course	Years of Introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/Skill development
1	FT-101	Food Chemistry and Analysis	2017	<ul style="list-style-type: none"> - Students will acquire knowledge about physical, chemical, and functional properties of foods. - Learn the fundamental principles and working applications of different analytical techniques associated with food. - Students will be able to explore and perform skills in qualitative and quantitative estimation of nutrients in different foods.
2	FT-102	Food Science and Experimental Foods	2017	<ul style="list-style-type: none"> - Students will acquire knowledge on structure, composition and functional properties of plant and Animal foods. - Understand the principles of cookery of different foods and methods of evaluation. - Students will be able to apply the scientific method and quantitative techniques in standardisation of foods using different processing techniques.
3	FT-103	Cereal Grains, Legumes and Oilseed Technology	2017	<ul style="list-style-type: none"> - Students will gain knowledge on the structure and composition of cereal grains, pulses and oil seeds.

				<ul style="list-style-type: none"> - Understanding of the basic concepts of Post harvest technology, mechanism of equipments and processing of cereals, pulses and oilseeds - Know about various processing, milling process and evaluate Traditional and commercially processed foods with cereals, pulses and oilseeds
4	Practical-I	Food Chemistry and Analysis	2017	<ul style="list-style-type: none"> - The students will know about principles and working applications of different analytical techniques associated with food. - Perform skills in qualitative and quantitative estimation of nutrients in different foods.
5	Practical-II	Food Science and Experimental Foods	2017	<ul style="list-style-type: none"> - Comprehensive knowledge on techniques of analysing, evaluating and application of foods in different processing techniques in foods.
6.	Practical-III	Cereal Grains, Legumes and Oilseed Technology	2017	<ul style="list-style-type: none"> - The students will be able to explore knowledge on various processing techniques of cereals, legumes and oilseeds. - Students acquire knowledge in various food applications and product preparations.

7.	FT-104	Essentials of Food and Community Nutrition	2017	<ul style="list-style-type: none"> - Students gain knowledge about nutrients in food and their functions. - Understand the nutritional problems of the community and consequences of deficiency of taking nutrients. - Apply skills for planning diets and techniques to assess the nutritional status of different age groups
8.	FT-105	Human Values and Professional Ethics - I	2017	<ul style="list-style-type: none"> - The student will be enriched with several aspects pertaining to Human values and performing of Professional Ethics in day today life. - Values to be performed by Humans to lead a good and Peaceful life by extending and imparting good behavior, character and conduct towards people of the society. - Introducing different concepts of Bhagavad Gita and its applications in uplifting of values in the present society.
9.	FT-201	Technology of Horticulture produce	2017	<ul style="list-style-type: none"> - Attain an overview on the classification composition and post-harvest handling technologies of fruits and vegetables to reduce postharvest losses and their value addition. - Impart the knowledge of processing, preservation and manufacture of fruits and vegetable based food products of fruits and vegetables. - Expertise in development of various Fruits & vegetables based products and assess the quality of fruit and vegetables and their products.
10.	FT-202	Food Microbiology and Safety	2017	<ul style="list-style-type: none"> - Obtain knowledge about important genera of microorganisms associated with food and food spoilages.

				<ul style="list-style-type: none"> - Understand the various factors associated with growth, food spoilage and food-borne diseases of different microorganisms. - Demonstrate the use of standard methods and procedures for the microbiological analysis of food
11	FT-203	Dairy Technology	2017	<ul style="list-style-type: none"> - Impart the knowledge of milk grading , composition and technologies of processing of milk and milk products. - Provide in-depth knowledge in various unit operations and developments in dairy processing. - Demonstrate the manufacturing of various dairy products and exemplify the quality of dairy products.
12	Practical-I	Technology of Horticulture produce	2017	<ul style="list-style-type: none"> - Student will know about various fruit and vegetable processing techniques and attain practical knowledge in production and preparation of products
13	Practical-II	Food Microbiology and Safety	2017	<ul style="list-style-type: none"> - Acquire knowledge on laboratory techniques to identify microorganisms in food. - Demonstrate the various microbial estimations in foods by applying standard techniques.
14	Practical-III	Dairy Technology	2017	<ul style="list-style-type: none"> - Students acquire knowledge of grading, composition, quality evaluation and processing techniques of milk and milk products.

15	FT-204	Research Methodology	2017	<ul style="list-style-type: none"> - Awareness about terms like ‘variables’, ‘hypothesis’, research ‘and recognize the purpose of doing research. - Understand different types of research like experimental, survey, applied, action research etc., and differentiate advantages and disadvantages each type of research. - Critically apply knowledge to select a sample by using different sampling methods like probability and non-probability sampling and development of research proposal.
16	FT-205	Human Values and Professional Ethics – II	2017	<ul style="list-style-type: none"> - Student will know the values of ethics in various fields including medical, social and business ethics. - The student will be enriched with several aspects pertaining to Human values and performing of Professional Ethics in day today life. - Introduction of several Natural values to be performed by Humans to lead a good and Peaceful life.
17	FT-301	Food processing and Preservation Technology	2017	<ul style="list-style-type: none"> - Students able to understand the scope, principles and different methods of processing and preservation techniques. - Acquire knowledge of emerging technologies and their applications in food processing and preservation. - Understand the applications and limitations of food processing and preservation technology.

18	FT-302	Live Stock and Sea Food technology	2017	<ul style="list-style-type: none"> - Acquire knowledge of the structure, composition, nutritional quality of various, livestock and seafood. - Gain insight knowledge of slaughtering, carcass processing, processing methods used for processing meat poultry and fish. - Prepare various value-added products of egg, meat, poultry and sea foods.
19	Practical-I	Food Processing and Preservation Technology	2017	<ul style="list-style-type: none"> - Student acquires knowledge of emerging technologies and their applications in various processing techniques and products of various foods by processing and preservation methods.
20	Practical-II	In plant training	2017	<ul style="list-style-type: none"> - Provide hands on experience with regard to different areas in food industries. - Acquaint and gain knowledge related to production, unit operations, quality control and marketing aspects of food industry. - Emphasize the prominence of food plant sanitation, food safety, standards, laws and regulation in food industry.
21	FT -303(a)	a)Unit operations in Food Industry.	2017	<ul style="list-style-type: none"> - Important preliminary operations in food processing industries and understand the principle of Unit operation in food industry. - Impart knowledge on Safety, sanitation and Effluent Treatment in food industry.

				<ul style="list-style-type: none"> - Know the different pre and post processing operations as storage and packaging foods etc.
22	FT -303(b)	b) Spices, Condiments and Plantation Crops	2017	<ul style="list-style-type: none"> - Students acquire knowledge, identification and post-harvest technologies of various spices, condiments and plantation crops. - Illustrate various value added products of spices, condiments and plantation crops. - Perceive Standards, specifications, packaging and Quality control measures of spices, condiments and plantation crops.
23	FT -303(c)	c) Nutrition in Emergencies and Disaster	2017	<ul style="list-style-type: none"> - Explain concepts on Epidemiology and its application in planning programs during emergencies and emergency situations in natural and manmade disasters. - Gain knowledge on nutrition surveillance and treatment in emergencies. - Knowledge on planning nutrition relief and rehabilitation in emergencies.
24	FT -304(a)	(a) Fundamentals of Food, Nutrition and Health	2017	<ul style="list-style-type: none"> - Gain knowledge on foods, food groups, balanced diet and importance of macro and micronutrients for different age groups in daily diet. - Comprehend knowledge on deficiency symptoms of different nutrients.

				<ul style="list-style-type: none"> - Apply skills to assess on nutritional problems in community.
25	FT -304(b)	b)Nutritional Assessment	2017	<ul style="list-style-type: none"> - Understand the nutritional problems of the community and consequences of deficiency of taking nutrients. - Apply skills for planning diets and techniques to assess the nutritional status of different age groups.
26	FT-401	Food Safety Standards and Quality Control	2017	<ul style="list-style-type: none"> - Gain knowledge in current rules and regulations of food safety standards and quality assurance. - Understand the insight quality evaluation of different foods by standard methods. - Develop skills for quality analysis and assurance of food quality.
27	FT-402	Food Product Development and Marketing	2017	<ul style="list-style-type: none"> - Elucidate the process of new food product development process to generate ideas, develop concept to test market and in food industry. - Acquire the skill to design and development of new food product and analyse the quality of the product. - Student able to design, demonstrate the skills in food process, organoleptic evaluation and nutritional label of food products as a team work.
28	FT-403	Nutrition for Health and Fitness/Project Work	2017	<ul style="list-style-type: none"> - Understand the concepts of Health, Nutrition, physical activity, physical fitness and methods of evaluation. - Describe the role of nutrients in physical performance, weight

				<p>management, obesity and Energy metabolism pathways during physical activity.</p> <ul style="list-style-type: none"> - Gain knowledge on concepts of physical activity, physical fitness and the importance of nutrients in Sports.
29	Practical-I	Food Safety standards and Product Development	2017	<ul style="list-style-type: none"> - Gain knowledge on subjective and objective evaluation methods of foods with safety and standards. - Exemplify various speciality food products and their applications, acquire the skill to design and development of new food product and analyse the quality of the product.
30	FT-404(a)	(a) Institutional food service management	2017	<ul style="list-style-type: none"> - Gain knowledge on principles of safe food preparation and cooking methods and service management
31	FT-404(b)	(b)Basic Food Engineering	2017	<ul style="list-style-type: none"> - Student understands the basic Principles, overview of processing techniques and methods of food. - Able to describe the types and properties of agro processing equipments like pasteurizer, spray drier and sealing equipments. - Enumerate processing equipments and maintenance of processing equipments
32	FT-404(c)	(c)Food Packaging	2017	<ul style="list-style-type: none"> - Enable the students to understand the regulations of packaging and packaging material testing. - Knowledge of the new innovations in food packaging to improve product stability and/or to extend the product shelf-life.

				<ul style="list-style-type: none"> - Able to utilize some of the new innovations in food packaging to improve product stability and/or to extend the product shelf-life.
33	FT- 405(a)	(a) Child Welfare Programmes	2017	<ul style="list-style-type: none"> - Understand the different developments like physical, cognitive, language and social development during childhood. - Apply knowledge to understand normal development and developmental delays during childhood.
34	FT- 405(b)	(b)Disaster Management	2017	<ul style="list-style-type: none"> - Understand natural disasters (like floods, drought, cyclone, earthquakes, global warming etc); Nuclear disasters; Biological disasters;. - Illustrate the efforts made by the NGOs, Community based organizations and local administration in disaster management.

38. Mathematics

S.No	Course Code	Name of the Course	Year of introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/ Skill development	Link to the relevant
1.	MA 101	Algebra	2017	1. Identify the concept of action and conjugation. 2. Analyze the maximal, prime, nilpotent and Nil ideals.	

2.	MA 102	Real Analysis	2017	<ol style="list-style-type: none"> 1. Understand the concepts of Riemann Stieltjes integration and Differentiation. 2. Understand Uniform Convergence and continuity. 	
3.	MA 103	Ordinary Differential Equations	2017	<p>Course outcomes: From this course students will be able to</p> <ol style="list-style-type: none"> 1. Learn boundary value problems, Eigen values and Eigen functions 	
4.	MA 104	Complex Analysis	2017	<ol style="list-style-type: none"> 1. Decide when and where a given function is analytic . 2. Understand the Mobius Transformation. 3. Describe basic properties of complex integration and having the ability to compute such integrals. 	
5.	MA 105	Computer Oriented Numerical Methods	2017	<ol style="list-style-type: none"> 1. Apply numerical methods to obtain approximate solutions to mathematical problems. 2. Derive numerical methods for various mathematical operations and tasks, such as interpolation, differentiation, integration, the solution of linear and non linear equations, and the solution of differential equations. 3. Solve any numerical problem by using programming. 	

6.	MA 106	Human Values and Professional Ethics-I	2017	<ol style="list-style-type: none"> 1. Develop Morals, Values and Ethics, Integrity, Work Ethic, Service Learning, Civic virtue, Respect for others, Living Peacefully, Caring, Sharing, Honesty, Courage, Cooperation, Commitment, Empathy, Self Confidence character, Spirituality, Case study. 2. Understand human values . 3. Develop character, affection and love towards other human beings. 	
7.	MA 201	Galois Theory	2017	<ol style="list-style-type: none"> 1. Apply the knowledge on polynomials solvable by radicals, Extension field. 2. Understand the normal and separable extensions. 3. Study the roots of polynomials specially quintic polynomials which is the cause to develop Galois theory. 	
8.	MA 202	Partial Differential Equations	2017	<ol style="list-style-type: none"> 1. solve Pfaffian differential equations and find orthogonal trajectories of a curve. <ol style="list-style-type: none"> 1. Analyze the origin of first order PDEs and Integral surfaces passing through a given curve 2. Identify linear and nonlinear PDE and solve nonlinear PDE by Charpit's method. 	

9.	MA 203	Topology	2017	<ol style="list-style-type: none"> 1. Understand to construct topological spaces from metric spaces and using general properties of neighborhoods, open sets, closed sets, basic and sub-basis. 2. Understand Topological Spaces, definition & examples. 3. Know the concepts connectedness, compactness, and Hausdorff property and their general characteristics. 4. Understand the Countability axioms, the separation axioms and normal spaces. And also the classical 	
10.	MA 204	Advanced Complex Analysis	2017	<ol style="list-style-type: none"> 1. To learn Laurent Series-Singular Points. 2. Explain the basic properties of complex integration and compute such integrals. 3. Learn topics of contemporary Advanced complex analysis in particular spaces of holomorphic functions, entire functions, harmonic functions and conformal mapping functions. 4. Understand the Infinite product and Partial Fraction 	
11.	MA 205	Measure and Integration	2017	<ol style="list-style-type: none"> 1. Compute Lebesgue measures. 2. Compute Lebesgue integrals of bounded functions over a set of finite measure 3. Solving the Differentiation and Integration of Monotone functions. 	

12.	MA 206	Human Values and Professional Ethics-II	2017	<ol style="list-style-type: none"> 1. Understand the fundamental responsibilities and respect towards women 2. Know the value of education. 3. Question the illegal practices in the medical and business fields. 4. Understand the value of ecological balance and act in 	
13.	MA 301	Commutative Algebra	2017	<p>To understand the ideals, Modules and operations on them.</p> <p>2.To learn the structures of composition series with ACC and DCC</p>	
14.	MA 302	Functional Analysis	2017	<ol style="list-style-type: none"> 1) Work with different distance metrics and normed spaces,understand continuous linear transformations and the Hahn-Banach Theorem. 2) Comprehend the Open mapping theorem and Closed graph theorem. 3) Construct orthonormal sets and conjugate spaces. 4) Understand the relevance of self-adjoint operators, normal, unitary operators and 	

15.	MA 303	Classical Mechanics	2017	1) Understand D' Alembert's Principle and simple applications of the Lagrangian Formulation. 2) Derive the Lagrange's Equation from Hamilton's Principle. 3) Study the concept of the Equations of Motion and the Equivalent One-Dimensional Problems. 4) Distinguish the concept of the Hamilton Equations of Motion and the Principle of Least	
-----	--------	---------------------	------	---	--

16.	MA 304	A) Differential Geometry B) Cryptography C) Linear Algebra D) Discrete Mathematics	2017	1. Define space curves , curvature and torsion of a curve. 2. Parameterize surfaces and isometric correspondence. 3. Understand geodesic curves and conformal mapping. 4. calculate and analyse curvature of surfaces in different settings. 1) Understand various Cryptographic Techniques. 2) Apply various public key cryptography techniques. 3) Understand the various Security Applications. 4) Implement system level security applications. 5) Be familiar with secure random bit generator and linear feedback shift register sequences. 6) Know classical ciphers such as Vigenere Cipher and Hill Cipher. 7) Know of RSA, attacks on RSA, Diffie-Hellman key exchange and ElGamal, public key crptosystem. Solve the system of linear equations 2 .Understand the concept of vector space, basis, dimension and linear Transformation	
-----	--------	---	------	--	--

17.	MA 305	A) Business Mathematics B) Basic Mathematics for social sciences	2017	<ol style="list-style-type: none"> 1. Apply the knowledge in mathematics (algebra, matrices, calculus) in solving business problems. 2. Analyse and demonstrate mathematical skills required in mathematically intensive areas in Economics and business. 3. Explain the concepts and use equations, formulae and mathematical expressions and relationships in a variety of contexts 4. Understand The Binary Octal , Octal, Decimal and Hexadecimal Systems. 5. Understand the concepts of vector spaces with bases, algebra of Transformations and orthogonal components. 6. Understand the concepts of Limit, continuity & differentiation of functions. 	
18.	MA 401	Number Theory	2017	<p>.</p> <ol style="list-style-type: none"> 1. Understand the concepts of vector spaces with bases, algebra of Transformations and orthogonal components. 2. Understand the concepts of Limit, continuity & differentiation of functions. 3. Apply Integrals to find areas, length & volume of regions. 	

19.	MA 402	Banach Algebra	2017	1. Understand different types of Banach Algebras with examples. 2. Know the essence of Gelfand mapping 3. Understand the Application of Commutative C^* - algebras. 4. Derive the applications of Banach Algebra in analysis, Fourier series Boolean Algebras and other significant areas	
20.	MA 403	Graph Theory	2017	Able to define basic concepts of graphs 2. Utilize the Algorithms to find the shortest path, Optimal tree from a given graph. 3. construct reliable communication network.	
21.	MA 404	A) Mathematical Statistics B) Approximation Theory C)Algebraic Coding Theory D)Operations Research	2017	To learn the fundamental concepts of statistics and techniques required for data analysis. 2. Apply the knowledge of Binomial, Poisson, Gamma, chi-square, normal distribution in solving various problems,.	

22.	MA 405	A) Theoretical Computer science B) Biomechanics	2017	1) Know the Basic concepts of Metric spaces And Normed Linear space. 2) Knows existence and uniqueness theorems for the best approximations in various Banach spaces. 3) Knows Bernstein's lethargy theorem and its practical and theoretical implications. 4) Be able to use and analyze the basic methods for polynomial approximations.	
-----	--------	--	------	---	--

APPLIED MATHEMATICS:

S.No	Course Code	Name of the Course	Year of introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/ Skill development	Link to the relevant
23.	AMA101	METHODS OF APPLIED MATHEMATICS	2017	1. Expand a function in a Fourier series and able to know under what conditions such an expansion is valid. 2. Aware of the connection between integral transforms (Fourier and Laplace) and be able to use the latter to solve mathematical problems relevant to the physical sciences. 3. Understand the applications of Sylow theorems.	
24.	AMA 102	Real Analysis	2017	5. Understand the concepts of Riemann Stieltjes integration and Differentiation. 6. Understand Uniform Convergence and continuity.	

25.	AMA 103	Ordinary Differential Equations	2017	Course outcomes: From this course students will be able to 5. Learn boundary value problems, Eigen values and Eigen functions	
26.	AMA 104	Complex Analysis	2017	5. Decide when and where a given function is analytic . 6. Understand the Mobius Transformation. 7. Describe basic properties of complex integration and having the ability to compute such integrals.	
27.	AMA 105	Computer Oriented Numerical Methods	2017	4. Apply numerical methods to obtain approximate solutions to mathematical problems. 5. Derive numerical methods for various mathematical operations and tasks, such as interpolation, differentiation, integration, the solution of linear and non linear equations, and the solution of differential equations. 6. Solve any numerical problem by using programming.	

28.	AMA 106	Human Values and Professional Ethics-I	2017	<p>5. Develop Morals, Values and Ethics, Integrity, Work Ethic, Service Learning, Civic virtue, Respect for others, Living Peacefully, Caring, Sharing, Honesty, Courage, Cooperation, Commitment, Empathy, Self Confidence character, Spirituality, Case study.</p> <p>6. Understand human values .</p> <p>7. Develop character, affection and love towards other human beings.</p>	
29.	AMA 202	Partial Differential Equations	2017	<p>1. solve Pfaffian differential equations and find orthogonal trajectories of a curve.</p> <p>1. Analyze the origin of first order PDEs and Integral surfaces passing through a given curve</p> <p>2. Identify linear and nonlinear PDE and solve nonlinear PDE by Charpit's method.</p>	

30.	AMA 203	Topology	2017	<p>5. Understand to construct topological spaces from metric spaces and using general properties of neighborhoods, open sets, closed sets, basic and sub-basis.</p> <p>6. Understand Topological Spaces, definition & examples.</p> <p>7. Know the concepts connectedness, compactness, and Hausdorff property and their general characteristics.</p> <p>8. Understand the Countability axioms, the separation axioms and normal spaces. And also the classical</p>	
31.	AMA 204	Advanced Complex Analysis	2017	<p>5. To learn Laurent Series-Singular Points.</p> <p>6. Explain the basic properties of complex integration and compute such integrals.</p> <p>7. Learn topics of contemporary Advanced complex analysis in particular spaces of holomorphic functions, entire functions, harmonic functions and conformal mapping functions.</p> <p>8. Understand the concepts of Limit, continuity & differentiation of functions.</p>	
39.	AMA 401	Number Theory	2017	<p>.</p> <p>5. Understand the concepts of vector spaces with bases, algebra of Transformations and orthogonal components.</p> <p>6. Understand the concepts of Limit, continuity & differentiation of functions.</p> <p>7. Apply Integrals to find areas, length & volume of regions.</p>	

40.	AMA402	FLUID DYNAMICS	2017	<p>1) Be familiar with continuum model of fluid flow and classify fluid/flows based on physical properties of a fluid/flow along with Eulerian and Lagrangian descriptions of fluid motion.</p> <p>2) Derive and solve equation of continuity, equations of motion, vorticity equation, equation of moving boundary surface, pressure equation and equation of impulsive action for a moving inviscid fluid.</p>	
41.	AMA 403	Graph Theory	2017	<p>Able to define basic concepts of graphs</p> <p>2. Utilize the Algorithms to find the shortest path, Optimal tree from a given graph.</p> <p>3. construct reliable communication network.</p>	
42.	AMA 404	<p>A) Mathematical Statistics</p> <p>B) Approximation Theory</p> <p>C)Algebraic Coding Theory</p> <p>D)Operations Research</p>	2017	<p>To learn the fundamental concepts of statistics and techniques required for data analysis.</p> <p>2. Apply the knowledge of Binomial, Poisson, Gamma, chi-square, normal distribution in solving various problems,.</p>	

43.	AMA 405	A) Theoretical Computer science B) Biomechanics	2017	<p>5) Know the Basic concepts of Metric spaces And Normed Linear space.</p> <p>6) Knows existence and uniqueness theorems for the best approximations in various Banach spaces.</p> <p>7) Knows Bernstein's lethargy theorem and its practical and theoretical implications.</p> <p>8) Be able to use and analyze the basic methods for polynomial approximations</p>

39. Microbiology

Course Code	Title of the Course	Years of Introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/Skill development
MB-102	Enzymology & Microbial Physiology & Metabolism	2017	<p>Be able to know about the nutrition and microbial growth. Be able to know about photosynthesis and carbon. Be able to know in depth details about aerobic and anaerobic respiration.</p> <p>Be able to know in depth about various pathways in protein and nucleotide metabolisms</p>
MB-105	Introductory Microbiology	2017	<p>Demonstrate theory and practical skills in microscopy and their handling techniques and staining procedures Understand the basic microbial structure and function and study the comparative characteristics of prokaryotes and eukaryotes and also Understand the structural similarities and differences among various physiological groups of bacteria/archaea Know various Culture media and their</p>

			applications and also understand various physical and chemical means of sterilization Know General bacteriology and microbial techniques for isolation of pure cultures of bacteria, fungi and algae
MB-106	Human Values and Professional Ethics – I	2017	Nature of Values- Good and Bad, Ends and Means, Actual and potential Values, Objective and Subjective Values, Analysis of basic moral concepts- right, ought, duty, obligation, justice, responsibility and freedom. Good behavior and respect for elders, Character and Conduct.
MB-202	Medical Microbiology	2017	Be able to explain about various infections. Be able to understand the diagnostic methods. Be able to explain the symptoms of bacterial infections. Be able to explain the symptoms of viral, fungal and parasitic diseases.
MB-204P	Practical – II Medical Microbiology	2017	Able performs various immune precipitations tests. Be able to perform various types of ELISA methods. Be able to gain practical knowledge about immunoglobulin's and there separation. Be able to perform widal, VDRL and types. Be able to perform various staining procedures. Be able to identify blood cell types.
MB-205	Basics of Virology	2017	Explaining the biological and physical properties of viruses. Describing the differences between viruses vs. virion. Summarizing the different methods of

			<p>viral study. Explaining tissue and cell culture. Discussing cloning genes and genomes, DNA sequencing and PCR. Listing analysis of components SDS treatment & electrophoresis for nucleic acids.</p> <p>Classifying plants viruses as: single stranded RNA (SS RNA), double stranded RNA (DS RNA); single stranded DNA (SS DNA) and double stranded DNA (DS DNA). Demonstrating knowledge about the genetic composition of plant viruses. Demonstrating knowledge of different viruses shape (rods, polyhedral and bullets). Describing the structure, replication and diseases caused by viruses in the families, Picornaviridae, Togaviridae, Flaviviridae, Caliciviridae, Astoviridae, Coronaviridae, and Arteriviridae. Explaining the structure, replication and diseases caused by viruses in the families, Rhabdoviridae, Paramyxoviridae, Filoviridae, Orthomyxoviridae, and Bunyaviridae</p>
MB-206	Human Values and Professional Ethics –II	2017	<p>Medical ethics- Views of Charaka, Sushruta and Hippocrates on moral responsibility of medical practitioners. Code of ethics for medical and health care professionals. Euthanasia, Ethical obligation to animals, Ethical issues in relation to health care professionals and patients.</p> <p>Business ethics- Ethical standards of business-Immoral and illegal practices and their solutions.</p> <p>Characteristics of ethical problems in management, ethical theories, causes of unethical behavior, ethical abuses and work ethics.</p>
MB 302	Recombinant DNA technology	2017	<p>This course teaches rDNA technology techniques and their application in the field of genetic engineering. They learn about plasmids, vectors and gain knowledge on</p>

	& Bioinformatics		the construction of cDNA libraries. Student of this course have knowledge on gene manipulation, gene expression, etc which prepares them for further studies in the area of genetic engineering
MB 305	b) food microbiology	2017	Through this course, they also learn about microbiology of milk, fermented dairy products, industrially important microorganisms and process of industrial production of alcohol, beer, wine, SEP and mushrooms.
MB-306	b) Industrial food Microbiology	2017	Students in this course will learn about microbes in food, spoilage of food and preservation techniques of food. Through this course, they also learn about microbiology of milk, fermented dairy products, industrially important microorganisms and process of industrial production of alcohol, beer, wine, SEP and mushrooms. At the end of the course, the student will be able to use the preservation techniques for food and use this experience to be employed as quality control experts
MB 405b	Bioprocess engineering	2017	After completing this course, the student will be able to define a bacterium, a fungus, a virus and archaea, give examples of structurally different microbes, and list microbes by their energy metabolism and carbon sources. The student will be able to evaluate the cultivation, enrichment and growth prevention methods for microbes. The student will be able to explain the roles of microbes in elemental cycles on Earth and, the waste decontamination methods based on microbial activities. He/she will be able to judge how microbes and enzymes could be applied in industry.
MB-406a	Fermentation	2017	The course aims to provide fundamental insights to exploit microbes for

	technology		manufacturing of products which have huge industrial significance. The course blends science and engineering with various biochemical processes to obtain products such as food, chemicals, vaccines, medicine . At the end of the course, the student will have a better appreciation for the role of microbes in industry using technology Able to design procedures, record research methodology and interpret the research
MB-406b	Pharmaceutical Microbiology	2017	This course prepares the students in appreciating the its benefits and applications in biotechnological, pharmaceutical, medical field.

INDUSTIAL MICROBIOLOGY:

Course Code	Title of the Course	Years of Introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/Skill development
IMB-102	Enzymology & Microbial Physiology & Metabolism	2017	Be able to know about the nutrition and microbial growth. Be able to know about photosynthesis and carbon. Be able to know in depth details about aerobic and anaerobic respiration. Be able to know in depth about various pathways in protein and nucleotide metabolisms
IMB-105	Introductory Microbiology	2017	Demonstrate theory and practical skills in microscopy and their handling techniques and staining procedures Understand the basic microbial structure and function and study the

			comparative characteristics of prokaryotes and eukaryotes and also Understand the structural similarities and differences among various physiological groups of bacteria/archaea Know various Culture media and their applications and also understand various physical and chemical means of sterilization Know General bacteriology and microbial techniques for isolation of pure cultures of bacteria, fungi and algae
IMB-106	Human Values and Professional Ethics – I	2017	Nature of Values- Good and Bad, Ends and Means, Actual and potential Values, Objective and Subjective Values, Analysis of basic moral concepts- right, ought, duty, obligation, justice, responsibility and freedom. Good behavior and respect for elders, Character and Conduct.
IMB-202	Medical Microbiology	2017	Be able to explain about various infections. Be able to understand the diagnostic methods. Be able to explain the symptoms of bacterial infections. Be able to explain the symptoms of viral, fungal and parasitic diseases.
IMB-204P	Practical – II Medical Microbiology	2017	Able performs various immune precipitations tests. Be able to perform various types of ELISA methods. Be able to gain practical knowledge about immunoglobulin's and there separation. Be able to perform widal, VDRL and types. Be able to perform various staining procedures. Be able to identify blood cell types.

IMB-205	Basics of Virology	2017	<p>Explaining the biological and physical properties of viruses. Describing the differences between viruses vs. virion. Summarizing the different methods of viral study. Explaining tissue and cell culture. Discussing cloning genes and genomes, DNA sequencing and PCR. Listing analysis of components SDS treatment & electrophoresis for nucleic acids.</p> <p>Classifying plants viruses as: single stranded RNA (SS RNA), double stranded RNA (DS RNA); single stranded DNA (SS DNA) and double stranded DNA (DS DNA). Demonstrating knowledge about the genetic composition of plant viruses. Demonstrating knowledge of different viruses shape (rods, polyhedral and bullets). Describing the structure, replication and diseases caused by viruses in the families, Picornaviridae, Togaviridae, Flaviviridae, Caliciviridae, Astoviridae, Coronaviridae, and Arteriviridae. Explaining the structure, replication and diseases caused by viruses in the families, Rhabdoviridae, Paramyxoviridae, Filoviridae, Orthomyxoviridae, and Bunyaviridae</p>
IMB-206	Human Values and Professional Ethics –II	2017	<p>Medical ethics- Views of Charaka, Sushruta and Hippocrates on moral responsibility of medical practitioners. Code of ethics for medical and health care professionals. Euthanasia, Ethical obligation to animals, Ethical issues in relation to health care professionals and patients.</p> <p>Business ethics- Ethical standards of business-Immoral and illegal practices and their solutions.</p> <p>Characteristics of ethical problems in management, ethical theories, causes of unethical behavior, ethical abuses and work ethics.</p>
IMB 305	b) Bioprocess Engineering and	2017	<p>Give elaborate knowledge on Health care products.</p> <p>Provide in depth knowledge about microbial antibodies and recombinant products.</p>

	Technology		Provide detailed knowledge about organic acids and enzymes. Gives in depth knowledge on oxidative transformation.
IMB-306	a) Industrial Biotechnology	2017	Be able to gain knowledge on strain improvement. Be able understand the whole broth processing. Gain knowledge on production of industrial products
	b)Immuno Technology and Human Health	2017	Immunology and Human Health is designed to advance your understanding of the Immune system and to apply this knowledge to basic immunological research of human diseases. The immune system is composed of numerous cells and molecules that act in concert to maintain health, to overcome infection, prevent tumour growth and repair damaged tissues. The study of the immune system provides us with a fascinating insight into the relationship between animals, and the organisms that infect them (bacteria, viruses, protozoans and fungi). This subject provides a greater understanding of the complexity of the immune system and its responses to stresses such as infection. It demonstrates how modulation, or activation, of the immune system can either help overcome infection or may lead to autoimmune disease. Understanding the immune system gives us the potential to develop therapies to control events such as infection or autoimmune conditions. This subject helps students expand their understanding of current concepts in immunology and the potential application of applied immunology in medicine, research and industry.
IMB-404	Field Trip/ Industrial Tour	2017	Able to design procedures, record research methodology and interpret the research Able to design procedures,

	Report / Dissertation		record research methodology and interpret the research
IMB-405	a) Biostatistics & Bioinformatics	2017	<p>Be able to gain knowledge on basic concepts in statistics.</p> <p>Be able to design the experimental and statistical basics of biological assays.</p> <p>Be able to give familiarize with microbial genomes</p> <p>Be able to acquaint themselves with metagenomics</p> <p>Be able to learn basics of protein identification method</p> <p>Be able to gain knowledge on drug discovery</p>
IMB-406	a) Microbes in Human Welfare	2017	<p>Microbes are the major components of biological system on this earth. They are present everywhere, even at sites where no other life could possibly exist. Many microbes are useful to human beings. We use microbes and microbial derived products almost every day like curd and other fermented foods like idli, dosa, bread, etc. Microbes are also used in most of the industries. Alcohol, antibiotics, vinegar, etc are important microbial products.</p> <p>Microbes are very helpful in sewage treatment, biogas production and preparation of biofertilizers as well. So it's clear from this chapter that microbes play a very important role in welfare of human society.</p>
	b) Medical and Diagnostic	2017	Describe the aetiologies, epidemiology and basic mechanisms of pathogenesis of infectious diseases.

	Microbiology		<p>Describe the basic principles of diagnosis, antimicrobial treatment, prevention and control of infectious diseases in the hospital and community.</p> <p>Describe the host immune system and explain the host response to infection</p> <p>Understand and interpret basic laboratory tests for the diagnosis of infectious diseases.</p> <p>Apply the principles of molecular and immunological techniques for the diagnosis of infectious diseases.</p> <p>Analyze and solve case studies involving bacterial and fungal agents</p>
--	--------------	--	---

40. Physics

S.No	Course Code	Name of the Course	Year of introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/ Skill development	Link to the relevant
1.	PHY 101	Classical Mechanics and Statistical Mechanics	2017	<p>1. Understanding the Lagrangian and Hamiltonian mechanics and solving the related problems.</p> <p>2. Learn the concepts of Poisson brackets, Hamilton-Jacobi equations and action angle variables.</p> <p>3. Learn different ensembles and partition functions in statistical mechanics and their applications.</p>	

2.	PHY 102	Analog and Digital Electronics	2017	<p>1. Utilize the basic knowledge in Electronics and Communication Engineering field.</p> <p>2. Understand the design and working of BJT/FET/ MOSFETs based electronic circuits and perceive the effect of positive feedback on working of Op-Amps based Oscillators.</p> <p>3. Develop the skills to design and analyze analog and digital</p>	
3.	PHY 103	General Physics lab 1	2017	<p>Understand the laws related to electrostatics and magnetostatics and also light propagation.</p> <p>2. Understand the basics of atomic physics.</p> <p>3. Understand the Zeeman effect , Paschen-Back effect and Stark effects in detail.</p> <p>4. Know the importance of Rotational and Vibrational spectra</p>	
4.	PHY 104	Electronics lab 1	2017	<p>1. Understand the core values that shape the ethical behaviour in various professions.</p> <p>2. Expose awareness on professional ethics and human values.</p> <p>3. Get awareness on the importance of spirituality.</p>	
5.	PHY 105	Electro magnetic theory, Atomic and Molecular Physics	2017	<p>Determining the value of Planck's constant and Seebeck coefficient of a thermocouple, and also determination of wavelength.</p> <p>2. Learn structural determination using X-ray diffraction method.</p> <p>3. Improve demonstration of skills related to the said experiments in Physics</p>	

6.	PHY 106	Human values & Professional Ethics-I	2017	<p>1. Identify relevant information to supplement the Analog Electronic Circuits.</p> <p>2. Set up testing strategies and select proper instruments to evaluate the performance characteristics of the electronic circuit.</p> <p>3. Choose testing and experimental procedures on different types</p>	
7.	PHY 201	Lasers and Modern optics	2017	<p>Understand the properties of lasers and various applications in different fields.</p> <p>2. Know the importance of non linearity in physics problems and solutions.</p> <p>3. Understand the principles and different types of holography; and its applications</p>	
8.	PHY 202	Mathematical Physics	2017	<p>Understand and apply the mathematical skills to solve quantitative problems in physics.</p> <p>2. Apply Laplace and Fourier transforms in solving different problems of mechanics, electronics etc.</p> <p>3. Solve different physical problems related to partial differential</p>	
9.	PHY 203	General Physics lab 2	2017	<p>Understand different bonds in solids, importance of lattice vibrations, their models and elastic properties.</p> <p>2. Explain electronic properties of solids in classical, quantum and the nearly free electron model.</p> <p>3. Able to classify materials as metals, insulators and semiconductors and sketch the band diagram for each</p>	

10.	PHY 204	Electronics lab 2	2017	<p>1. Understand the issues which will help to sensitize students to be broader towards the social, cultural, economic and human issues, involved in social changes</p> <p>2. Know the nature of the individual and the relationship between the self and the community</p> <p>3. Understanding major ideas, values, beliefs, and experiences</p>	
11.	PHY 205	Solid State Physics	2017	<p>1. Lasers and its slit width calculation and refractive index measurement, Young's modulus finding through interference and Stefan's constant calculation</p> <p>2. Intensity variation of light, photo transistor working, absorption and decay of nuclear radiation</p>	
12.	PHY 206	Human values & Professional Ethics-II	2017	<p>1. Identify relevant information to supplement the Analog Electronic Circuits.</p> <p>2. Set up testing strategies and select proper instruments to evaluate the performance characteristics of the electronic circuit.</p> <p>3. Choose testing and experimental procedures on different types</p>	

13.	PHY 301	Quantum Mechanics – I	2017	<p>1. Solve the problems in quantum mechanics using Schrodinger's equation and Dirac representation.</p> <p>2. Grasp the importance of quantum dynamics in solving the problems.</p>	
14.	PHY 302	Physics of semiconductor devices	2017	<p>1. Classify different diodes and its importance in different applications.</p> <p>2. Understand the basic principles of diodes .</p>	
15.	PHY 303	<p>a. Applied spectroscopy</p> <p>b. condensed matter physics</p> <p>c. electronics embedded systems</p>	2017	<p>1. Understand the molecular structure.</p> <p>2. Know the importance of various molecular transitions and also about rotational, vibrational and Raman spectra of molecules.</p> <p>3. Understand the instrumentation techniques that are used in different regions of spectra.</p> <p>4. Familiar with fluorescence and phosphorescence spectroscopy and their applications.</p> <p>1. Learn the various crystal growth techniques and their importance, and also to analyze the defects</p> <p>2. Know the different dielectric properties and methods to study dielectrics behavior.</p> <p>3. Differentiate between ferroelectric, anti-ferroelectric, piezoelectric and pyroelectric materials.</p> <p>4. Understand excitons, photoconductivity, types of</p>	

16.	PHY 304	Elective A Elective B Elective C	2017	<p>1. Learn the concept of lasers and their applications...</p> <p>2. Understand the fundamental properties of lasers and laser systems</p> <p>3. Know about the different optoelectronic devices and their behavior.</p> <p>4. Aware of wide variety of applications of opto-electronic components.</p> <p>1. Understand the fundamentals of solar energy, particularly the thermal energy component.</p> <p>2. Acquire knowledge on solar radiation measurement techniques and procedures.</p> <p>3. Demonstrate skills related collector performance analysis</p>	
17.	PHY 305	Elective	2017		
18.		A) Applied Spectroscopy-I	2017	<p>1. Gain experience with some statistics to analyse data in laboratory.</p> <p>2. Handle the spectrophotometers and could analyse the data.</p> <p>3. Identify the compounds based on qualitative analysis.</p>	
19.		B) Condensed Matter Physics-I	2017	<p>1. Minority charge carrier current in calculation of band gap</p> <p>2. Analysis of magnetic materials in terms of coercivity and saturation magnetization,</p> <p>3. Creep importance in materials characteristics analysis</p> <p>4. Transition temperature determination by finding dielectric</p>	

20.		C) Electronics-embedded systems	2017	1. Define the arithmetical and logical assembly language for microcontroller PIC 16F877A 2. Know the downloading procedure on hardware into flash ROM of PIC 16F877A	
21.	PHY 306	A) Computational methods and Programming	2017	1. Demonstrate both the theory and experiments related to propagation and modulation of light 2. Learn the optical fibre working 3. Design the Hologram 4. Propose and design new experiments based on the verification	
22.		B)Energy Harvesting Systems	2017	1. Demonstrate the skills related to measurement of direct, diffuse and global solar radiation. 2. Understand the working of a solar cell and its efficiency measurement 3. Verify the influence of different parameters on the solar cell	
23.		C) Thin Films Physics	2017	1. Understand the working of rotary and diffusion pumps. 2 Determine the thermoelectric emf of any semiconductors. 3 Study the characteristics of any solar cells. 4. Demonstrate the skill acquired in connection with thin film	
24.	PHY 307	Computational Methods and Programming	2017	1. Write a C programme for analytical problems, algorithms for numerical problems and execute them. 2. Solve many problems including algebraic/transcendental equations, simultaneous equations, boundary value problems, data analysis, numerical differentiation and	

25.	PHY 307(a)	ENERGY HARVESTING SYSTEMS	2017	<p>1. Gain knowledge on energy sources and economic development.</p> <p>2. Understand the energy flow diagram and environmental</p>	
26.	PHY 401	Quantum Mechanics - II	2017	<p>1. Learn distinguishability and indistinguishability of identical particles, construct symmetric and anti symmetric wave functions.</p> <p>2. Grasp the concepts of spin and angular momentum as well as their quantization and addition rules.</p>	
27.	PHY 402	Advances in Physics	2017	<p>1. Understand the synthesis of nanomaterials, their application and impact on the environment.</p> <p>2. Acquire the knowledge about MEMS and their applications.</p> <p>3. Learn the basics of remote sensing, different payloads, sensors and satellite platforms.</p>	

28.	PHY 403	<p>Elective A</p> <p>Elective B</p> <p>Elective C</p>	2017	<p>1. Have the knowledge on crystal field theory and the effect of weak crystal field on S, P, D and F terms.</p> <p>2. Understand the importance of rare earth doped materials and able to evaluate various laser parameters.</p> <p>3. Know the instrumentation techniques used in various spectrophotometers and uses of various detectors.</p> <p>4. Acquire the knowledge on two photon spectroscopy.</p> <p>1. Learn the relation between stress and strain and gain knowledge on elastic constants and velocity of elastic waves.</p> <p>2. Understand the classical and quantum theories of specific heat and also about Gruneisen parameter and lattice thermal conductivity.</p> <p>3. Know the theories of different bands and experimental determination of Fermi surface.</p>	
-----	---------	---	------	--	--

29.	PHY 404	Project work- Elective A Elective B Elective C	2017	<p>1. Learn the basics of fibre optic components, sensors and their applications.</p> <p>2. Select appropriate fiber optic components for communication.</p> <p>3. Understand the different components involved in optical signal processing.</p> <p>4. Demonstrate their skills related to lasers, fiber optics, photonic and opto-electronic devices.</p> <p>1. Understand the fundamental concepts of solar cells, manufacturing processes and limitations.</p> <p>2. Acquire knowledge on cell efficiency study techniques and procedures for fault analysis.</p> <p>3. Demonstrate skills related cell performance and fault analysis through hands on experience.</p> <p>4. Comprehend the applications of solar photovoltaic energy in day-to-day applications</p>	
30.	PHY 405	Elective A) Applied Spectroscopy-II	2017	<p>1. Use standardized material to determine an unknown concentration.</p> <p>2. Handle the spectrophotometers and could analyse the data.</p>	
31.		B) Condensed Matter Physics-II	2017	<p>1. Magnetic susceptibility determination, liquid crystal phases with temperature.</p> <p>2. working of temperature sensor, heat capacity calculation.</p>	

32.		C) Electronics-Wireless communications	2017	1. Understand and visualize the digital and optical modulation techniques. 2. Demonstrate the theoretical concepts in the laboratory. 3. Gain hands on experience and will be able to envisage the concepts more clearly.	
33.	PHY 406		2017	1. Get the experience on literature collection 2. Get the experience on selection of a problem independently related to recent work 3. Able to plan and execute the problem	
34.		A)Analytical techniques and Nuclear Physics	2017	1. Learn the basics and applications of analytical techniques. 2. Gain knowledge related to various spectroscopic techniques. 3. Get advanced knowledge in nuclear interactions in nuclear physics	
35.		B) Nanomaterials and devices	2017	1. Understand the classification of nano materials. 2. Know different synthesis methods to grow variety of nanostructures. 3. Describe allotropic forms of carbon and to understand	

41. Psychology

S. No.	Course Code	Title of the Course	Years of Introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/Skill development
1	PSY 101	General Psychology-I	2017	<ul style="list-style-type: none"> To understand the concepts and scope of psychology To comprehend the biological basis of behavior To study the perception and learning theories
2	PSY 102	Social Psychology	2017	<ul style="list-style-type: none"> To understand the concepts of social psychology To comprehend the social perception and cognition. To study the socialization and attitudes
3	PSY 103	Psychopathology-I	2017	<ul style="list-style-type: none"> To understand the abnormal behavior and historical and current trends To comprehend the models of abnormal behaviour and approaches to therapies
4.	PSY 104	Psychological Measurements-I	2017	<ul style="list-style-type: none"> To understand the psychological measurements To comprehend the development of psychological tests and principles of test construction.
5	PSY 105P	Practical-I&II	2017	<ul style="list-style-type: none"> To understand the knowledge about psychological assessment To analyze the observed and the collected data to prove the theoretical
6.	PSY-106	Human Values and Professional	2017	

		Ethics-I		
7.	PSY 201	General Psychology-II	2017	<ul style="list-style-type: none"> • To understand fundamentals of motivation and emotion • To understand basic concepts of memory and forgetting • To comprehend the thinking, intelligence and personality of individuals
8.	PSY 202	Applied Social Psychology	2017	<ul style="list-style-type: none"> • To understand the Social Influence, Social Exchange Process in social behaviour. • To comprehend the Prejudice and Discrimination and group and individuals.
9.	PSY 203	Psychopathology-II	2017	<ul style="list-style-type: none"> • To understand anxiety and mood disorders and somatic disorders. • To study Psychosis and Cognitive Disorders across life span
10.	PSY 204a	Psychological Measurements & Statistics	2017	<ul style="list-style-type: none"> • To understand the psychological measurements • To comprehend the development of psychological tests and principles of test construction.
	PSY 204b	Research Methodology	2017	<ul style="list-style-type: none"> • To get knowledge of psychological tests and their use in diagnosis. • To make students able to diagnose patients with the

				<p>help of projective tests.</p> <ul style="list-style-type: none"> • To get understanding of different diagnostic systems. • Learn how to take case history of patients. • To be able to make differential diagnosis.
	PSY 204c	Computer Applications in Psychological Research	2017	<ul style="list-style-type: none"> • To understand the basic components of computer and working in Ms Office, power point and internet services. • To comprehend the application of computer knowledge through creating emails, scientific journals and data scoring
11	PSY 205P	Practical - I & II	2017	<ul style="list-style-type: none"> • To understand the knowledge about psychological assessment • To analyze the observed and the collected data to prove the theoretical
12	PSY 206	Human values and Professional Ethics-II	2017	
13	PSY 301	Lifespan Developmental Psychology - Infancy to Adolescence	2017	<ul style="list-style-type: none"> • To understand the scope of life span development of infancy and babyhood • To comprehend the Early and Late Childhood and Adolescence.
14.	PSY 302	Personality	2017	<ul style="list-style-type: none"> • To introduce nature of personality.

				<ul style="list-style-type: none"> To help determinants and development. To understand the Assessment of personality
15	PSY 303	Counseling Psychology-I	2017	<ul style="list-style-type: none"> To understand the meaning of counseling and ethics in counseling To comprehend the process of counseling and techniques
16	PSY 304a	School Psychology	2017	<ul style="list-style-type: none"> To introduce nature of school psychology To help children with emotional, social, and academic issues. To collaborate with parents, teachers, and students to promote a healthy learning environment.
	PSY 304b	Organizational Behaviour and HRM	2017	<ul style="list-style-type: none"> To understand organization and the Individual differences To comprehend the motivation and leadership To study the decision making and organizational effectiveness.
	PSY 304c	Health Psychology	2017	<ul style="list-style-type: none"> To understand the need of Health psychology and various models related to health and illness. To comprehend the health behaviour enhancement and management
	PSY 304d	Psychology of Disability	2017	<ul style="list-style-type: none"> To understand historical development – Models of

				<p>disabilities in the past and present scenario</p> <p>To comprehend Learning and behavioral disability, Needs and concerns of disabled in all groups</p>

COUNSELLING PSYCHOLOGY:

S.No	Course Code	Name of the Course	Year of introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/ Skill development	Link to the relevant
1.	PSY 101	General Psychology-I	2017	1. Understood the concepts and scope of psychology 2. Comprehended the biological basis of behavior 3. Studied the perception and sensation	
2.	PSY 102	Social Psychology	2017	1. Understood the concepts of social psychology 2. Comprehended the social perception and cognition. 3. Studied the Socialization	
3.	PSY 103	Psychopathology-I	2017	1. Understood the meaning abnormal behavior and historical and current trends 2. Comprehended the models of abnormal behaviour and approaches to therapies 3. Learned about classification and assessment of abnormal behaviour	

4.	PSY 104	Psychological Measurements-I	2017	<ol style="list-style-type: none"> 1. Understood the assessment and psychological measurements 2. Comprehended the development of psychological tests and principles of test construction. 3. Learned the Principles of Test Construction 	
5.	PSY 201	General Psychology-II	2017	<ol style="list-style-type: none"> 1.The students understood the fundamentals of motivation and emotion 2. They understood the basic concepts of memory and forgetting 	
6.	PSY 202	Applied Social Psychology	2017	<ol style="list-style-type: none"> 1. Students understood about Social Influence 2. Acquainted with social exchange process in social behaviour. 3. Comprehended the prejudice and discrimination 4. To understand what is psychological groups and 	
7.	PSY 203	Psychopathology-II	2017	<ol style="list-style-type: none"> a. Understood anxiety and mood disorders b. Acquainted with somatic disorders. c. Studied Psychosis and Cognitive Disorders d. Understood Psychological Disorders Across the Life 	

8.	PSY 204	a. Psychological Measurements & Statistics b. Research Methodology c. Computer Applications in Psychological Research	2017	1. The students acquainted with intelligence and achievement tests 2. The students learned the measurement of personality tests 3. They are clear in understanding the Statistics for Psychological Measurement 4. They have knowledge on Distribution of Scores on Variables 1. Understood basic research and applied research including experimental research. 2. The students comprehended the problem & hypothesis 3. Gained knowledge on Sampling & Data Collection 4. Understood the application of research designs 1. Understood the basic components of computer	
9.	CPSY 301	Counselling Process	2017	1. Understood the counseling as helping profession 2. To acquire the relation with other helping professions 3. To know the legal and ethical issues	

10.	CPSY 302	Counselling Skills	2017	<ol style="list-style-type: none"> 1. Understood the micro-skills of counseling through a series of practices. 2. Got an idea about who to understand the people and interpret their feelings with positive appreciation 3. To provide a space where participants can grow, in the sense of allowing an encounter with them first and based on this encounter to achieve a better understanding of how they impact on other people. 	
11.	CPSY 303	Therapeutic Approaches in Counselling –I	2017	<ol style="list-style-type: none"> 1. Understood the various Therapeutic Approaches of counseling. 2. Understood the techniques relevant to therapies. 3. To acquires the basic procedures. 4. Learned how to work in the insight of the client. 	
12.	CPSY 304A	a. Foundations of Personality	2017	<ol style="list-style-type: none"> 1. Understood nature of personality. 2. Realized the determinants of personality 3. Found that the development of Personality. 	
13.	CPSY 304B	b. Lifespan Developmental Psychology – Infancy to Adolescence	2017	<ol style="list-style-type: none"> 1. Exposed the students to the basics of human development 2. Helped the student understand the stages of development 3. Understood the biological, social and emotional development 	

14.	CPSY 304C	c. Psychology of Disability	2017	<ol style="list-style-type: none"> 1. Understood the historical development and models of disabilities 2. Acquire the knowledge of assessment of disability. 3. Expertised on handling the disabled Behavior 4. Collected the knowledge about various service organizations 	
15.	CPSY 305	Practical I & II	2017	<ol style="list-style-type: none"> 1. Studied biological, psychological determinants 2. The students aware of socio cultural determinants & Soft Skills 	
16.	CPSY 401	Applications of Counselling in Special Areas	2017	<ol style="list-style-type: none"> 1. Understood how to handle the client with various problems and hailing into different age groups. 2. Learned how to handle the clients with specific problems 3. To attained what is career, personal, vocational and other applied areas of counseling 4. Gained how to organize Counseling programs to handle 	
17.	CPSY 402	Therapeutic Approaches in Counselling –II	2017	<ol style="list-style-type: none"> 1. Understood the therapeutic approaches of counseling 2. Improve the major skills in therapeutic techniques 3. Gained specific methods involved in therapy 4. Adopted the different psycho therapeutic models of 	

18.	CPSY 403	Family Counselling	2017	<ol style="list-style-type: none"> 1. Understand the need and importance of family counseling. 2. Improved how to handle the family issues 3. To maximized use of tools in counseling 	
19.	CPSY 404A	a. Theories of Personality	2017	<ol style="list-style-type: none"> 1. Understood the Psychoanalytic Approach 2. Learned on behavioural approaches to personality. 3. The students comprehended the Humanistic approach 4. The students acquainted with the eastern theories of 	
20.	CPSY 404B	b. Lifespan Developmental Psychology – Adulthood and Later Maturity	2017	<ol style="list-style-type: none"> 1. Understood about adult hood 2. Aware of infancy late adult hood problems 3. Identified the early and late old age issues. 	
21.	CPSY 404C	c. Rehabilitation Psychology	2017	<ol style="list-style-type: none"> 1. The students understood historical development – Models of disabilities in the past and present scenario 2. The students comprehended Assessment of Disability, Psychological Aspects 3. The students are aware of Behavioral Management 	
22.	CPSY 405	Practical I & II	2017	<ol style="list-style-type: none"> 1. Learned the concept of life skills and its importance in relation to personality development of an individual. 2. They became aware of the components of life skills and the method of imparting knowledge of life skills. 2. The students have learned more on Life Skills in 	

42. Statistics

23.	ST - 101	Linear Algebra	2017	<ol style="list-style-type: none"> 1. Students understood for estimation of elementary transformations in matrix and their solutions. 2. Students learnt about characteristic roots and vectors with numerical examples. They also know theoretical proofs of theorems. 3. Discriminate between diagonalizable and non-diagonalizable matrices; orthogonally diagonalizable symmetric matrices and quadratic forms 4. Combine methods of matrix algebra to compose the 	
24.	ST - 102	Probability Theory	2017	<ol style="list-style-type: none"> 1. Students must have knowledge about random variables, expectations, sets and their properties and inequalities where ever necessary. 2. Students also know the weak law, strong law and central limit theorem and their importance. 3. Students get the knowledge of the Central limit theorem and their real life uses. 	

25.	ST - 103	Distribution Theory	2017	<ol style="list-style-type: none"> 1. Students know about different continuous and discrete distributions and their properties. 2. They have awareness about central and non-central sampling distributions and order Statistics. Idea about simple, partial and multiple correlation coefficients. 3. Students get the knowledge of the statistical Tests and their real life uses and applications. 4. Students get the knowledge of Regression and 	
26.	ST - 104	Practical-I (75 Practical + 25 Record)	2017	<ol style="list-style-type: none"> 1. Numerical problems related to, Linear Algebra and Sampling Techniques are solved by executing programs of computers. 2. Linear algebra concepts when working with data preparation, such as one hot encoding and dimensionality reduction. 	
27.	ST - 105	Statistical Computing	2017	<ol style="list-style-type: none"> 1. Students get the basic Programming Skills of C and C++. 2. Students learnt how the Data enter in the Excel with Headings. 3. Students get the knowledge of creating data ase using the MS-Access. <p>Students get the knowledge how to create the reports using MS.</p>	

28.	ST - 106	Human Values and Professional Ethics-I	2017	<ol style="list-style-type: none"> 1. Students get the knowledge of the Ethical values. 2. Students get the idea about the Value education. 3. Students learn how to behave in Society. 4. Students get the knowledge of the Bhagavat Geetha and 	
29.	ST - 201	Statistical Inference	2017	<ol style="list-style-type: none"> 1. Students know about point estimation, non-parametric models, Game theory, theorems and Proofs where ever necessary. 2. They can understand the concept of random sample from a distribution, sampling distribution of statistic, standard error of important estimates such as mean and proportions. 3. Students may gain the knowledge of testing of hypotheses (both large sample test and small sample test). 	
30.	ST - 202	Multivariate Analysis	2017	<ol style="list-style-type: none"> 1. Students learnt about importance of multivariate variables and their distributions 2. T^2, D^2, MANOVA models are understood and know it's importance. 3. Implement dimension reduction techniques using software on real life problems. 	

31.	ST-203 A & B & C	(a) Linear Models and Applied Regression Analysis (b) Stochastic Processes (c) Mathematical Analysis	2017	<p>A. Linear Models and Applied Regression Analysis</p> <ol style="list-style-type: none"> 1. Students learnt about different linear and non-linear regression models and their appropriate computational procedures. 2. They know R^2, adjusted R^2 and C_p criteria for model selection. 3. They will get the knowledge of building and fitting linear regression models with software. <p>They also learn about the theory underlying point estimation, hypothesis and confidence intervals for linear regression models.</p> <p>(b) Stochastic Processes</p> <ol style="list-style-type: none"> 1. Students understood stochastic processes, Markov chains, Poisson process, Renewal theory, Branching process, etc. 2. Explain Random walk, Gambler ruins problem and apply Poisson process in real life situations. 3. Understand the consequences of the Intermediate value theorem for continuous function. 4. Know the chain rule and use it to find derivatives of composite functions and obtain expression for higher order derivatives of a function using the rule of 	
-----	------------------	--	------	---	--

32.	ST - 204	Practical-II (75 Practical + 15 Viva- voce + 10 Record)	2017	<ol style="list-style-type: none"> 1. Students know about the solving of Numerical problems related to Multivariate data. 2. Students can learn how the Statistical tests uses in their real life's by doing the tests on the Real times Data. 3. They can also use the statistical tools and techniques for analyzing the statistical data. 	
33.	ST - 205	Sampling Techniques	2017	<p>Students can solve the agriculture related problems using the</p> <ol style="list-style-type: none"> 1. Students learnt different sampling techniques of with replacement/ without replacement and Different sampling models. 2. Students studied non-Sampling errors and different remedies. 3. Implement Cluster sampling, Ratio and Regression estimation in real life problems 	
34.	ST - 206	Human Values and Professional Ethics-II	2017	<ol style="list-style-type: none"> 1. Students get the Knowledge of Status of Women in the family and society. 2. Students get the idea of the Medical Rights and Their responsibilities in the medical practitioners. 3. Students get the idea about the environmental Ethics. 4. Students Get the knowledge of Human Rights 	

35.	ST - 301	Econometric Methods	2017	<ol style="list-style-type: none"> 1. Students learnt heteroscedasticity, multicollinearity and autocorrelation and their estimation procedures. 2. Students understood about different lag models and simultaneous linear equations model with their estimation methods. 3. Explain core concepts and techniques in econometrics, with a special focus on the classical linear regression model. 	
36.	ST - 302	Design and Analysis of Experiments	2017	<ol style="list-style-type: none"> 1. Students learnt ANOVA, ANCOVA technique for one way and two-way classifications. Multiple comparisons tests using Tukey's, Duncans, Sheffe's and Dunnet's tests. 2. Students understood about Latin squares and their construction, missing plot technique etc. 3. Students explained about Incomplete Block Designs and their analysis, etc. 	
37.	ST -303	Operations Research-I	2017	<ol style="list-style-type: none"> 1. Students understood about Dual primal, Revised simplex methods. 2. Students learnt non-linear programming, integer programming, CPM, PERT, different models of games. 3. Students can think the real-life problems in the way of Linear Programming Problems and try to solve the problems in Mathematical Way. 	

38.	ST -304	Practical-III (75 Practical + 25 Record)	2017	<p>Students can understand the Statical Methos in Economical Views.</p> <p>Students solved the Numerical problems related to operations research.</p> <p>Students Understand the Life Tables in Demography.</p> <p>Students can understand how the statistics use in biological</p>	
39.	ST-305A	(a)Bio-Statistics	2017	<p>1. Students learnt about biological assay, their distribution and theorems, dose response relationships, basic concepts of biological assay, estimation methods of gene frequencies, etc.</p> <p>2. Describe single and multi-species population growth models.</p> <p>3. Analyzed the data of biological assay.</p>	
40.	ST - 306	(a) Statistics for Biological and Earth Sciences	2017	<p>a) Statistics for Biological and Earth Sciences</p> <p>1. Students learnt about Graphs, measures of averages, measures of dispersion etc.</p> <p>2. Students understood about Basic probability and important distributions with workout examples.</p> <p>3. Students used t, F, χ^2, ANOVA and ANCOVA and non-parametric tests with examples.</p> <p>4. Students used Advanced statistics tools with working</p>	

41.	ST - 401	Time Series Analysis and Forecasting Methods	2017	<ol style="list-style-type: none"> 1. Students understood Time series analysis with some important growth models and their fitting 2. Students forecasting using regression, non-linear regression techniques, single, double, triple and adoptive exponential smoothing models. 3. Students obtained knowledge on AR, MA, ARMA, ARIMA, models fitting, diagnostic checking, etc. 	
42.	ST - 402	Demography and Official Statistics	2017	<ol style="list-style-type: none"> 1. Students know the growth rates, life tables, GRR, NRR and growth models. 2. Students understood about gene frequencies, genotypes, phenotypes etc. 3. Students learnt about population census methods, organizations in India and their functions. 4. Useful to students as a means of analyzing and predicting 	

43.	ST - 403	Operations Research-II	2017	<ol style="list-style-type: none"> 1. To perform Dynamic programming and their applications and computation procedure with illustration. 2. To discuss different Queuing models steady state solutions with examples. 3. To explain Inventory models with and without shortages, S-splicy, EOQ estimation with simple examples. <p>To understand Replacement problems such as block and age replacement problems, individual and group replacement policies</p>	
44.	ST - 404	Practical-IV (75 Practical + 15 Viva-voce + 10 Record)	2017	<ol style="list-style-type: none"> 1. Students can understand the Statical Methos in Economical Views. 2. Students solved the Numerical problems related to operations research. 3. Students Understand the Life Tables in Demography. 4. Students can understand how the statistics use in biological aspects 	

45.	ST-405 A	(a) Statistical Process and Quality Control	2017	<p>1. Students understood the basic concepts of control charts for variables and their indices.</p> <p>2. Students performed different control charts like Shewart's moving average, multivariate etc. with their applications.</p> <p>3. Students used different sequential sampling plans and six sigma tool etc. in solving the problems.</p> <p>4. Students have awareness about Total Quality</p>	
46.	ST-405 B	Statistics for research, industry and Communitydevelopment	2017	<p>1. Students have done Simulation models, response surface models, demand analysis, social survey and their related measures.</p> <p>2. Students can understand the basic of research blooms taxonomy of learning levels.</p> <p>3. Find the topic from current research in statistics education</p>	

47.	ST-405 C	Advanced Econometric Models	2017	<ol style="list-style-type: none"> 1. Students understood GLM, SURE, nested and non-nested statistical models. 2. Students learnt about specification error, adding, switching models. 3. Students performed probit, logit models and their estimation. <p>Students can understand the qualitative and limited dependent</p>	
48.	ST - 406 A	Business Analytics	2017	<ol style="list-style-type: none"> 1. Students learnt Graphs, measures of averages, measures of dispersion etc. 2. Students studied basic probability and important distributions with workout examples. 3. Students used t, F, χ^2, ANOVA and ANCOVA and non-parametric tests and discussed with examples. 4. Students performed advanced statistics tools for solving the problems. 	

49.	ST-406 B	(b) Survival Analysis	2017	<ol style="list-style-type: none"> 1. Students learnt about survival functions, their estimating methods, Distributions and their comparison for survival distributions. 2. Understand the elements of reliability, hazard function and its applications. 3. Understand the concept of censoring, life distributions and ageing classes.

Students have done Simulation models, response surface models, demand analysis, social survey and their related measures.</p> <p>6. Students can understand the basic of research blooms taxonomy of learning levels.</p> <p>7. Find the topic from current research in statistics education</p>

25.	APST-405 C	Actuarial Statistics	2017	<ol style="list-style-type: none"> 1. Students get the knowledge of the Economic interest rates and discount rates. 2. Students know how to construct the life tables based on the Expectancy. 3. Students to get awareness of the life annuities. 4. Students ensure how to build joint life annuities and life survivor annuities.
26.	APST - 406 A	Statistics for Marketing Research	2017	<ol style="list-style-type: none"> 1. Students learnt about Research design and how to frame questionnaire etc. 2. Statistics relating to research like univariate test like Z, t, F, ANOVA, CRD, RBD and LSD are done. 3. Multivariate statistical techniques like factor analysis, dissemination analysis and cluster analysis are used. 4. Students can understand how the marketing is happening in the real life.

27.	APST-406 B	(b) Statistical analysis using SPSS	2017	<ol style="list-style-type: none"> 1. Able to create and manipulate vectors, matrices, arrays, data frames and lists. 2. Should be able to work with character data, factor data and dates. 3. Able to write scripts and function in R and read data from .csv files, EXCEL files and SPSS files.
-----	------------	-------------------------------------	------	--

43. Virology

S. No.	Course Code	Title of the Course	Years of Introduction	Activities/Content with direct bearing on Employability/Entrepreneurship /Skill development
1	VR-101	General Microbiology	2017	<ul style="list-style-type: none"> - To learn about fundamentals aspects of microbiology including origin, evolution of microorganisms, different groups of microorganisms and their importance, microscopy principles and applications, morphology, and structure of bacteria, - To learn about Microbiological media, isolation, cultivation and enumeration methods of microorganisms, microbial growth characteristics, maintenance, and preservation of microbial cultures. - To develop knowledge on microbial taxonomy, transport of nutrients in microbes, control strategies of microorganism,

				<ul style="list-style-type: none"> - To develop knowledge on general characteristics, structure and reproduction of fungi, algae, and protozoan parasites.
2	VR-102	General Virology	2017	<ul style="list-style-type: none"> - Learn the discovery, nature, origin and evolution of viruses and the physical, biochemical, and biological properties of viruses, criteria used for nomenclature and classification of bacteria, plant and animal viruses. - Describe the methods used for isolation, cultivation, and purification of viruses and criteria of purity. - Define biological, physical, biochemical, and serological methods used for quantitation of viruses, major characteristics of important plant and animal virus families and biology and applications of major RNA and DNA viruses of insects. - Understand the biology of major bacteriophages, algal and fungal viruses, subviral agents and importance of viruses in human welfare with suitable examples.

3	VR-103	General Microbiology and Virology	2017	<ul style="list-style-type: none"> - Define laboratory safety measures that needs to be followed in Virology and Microbiology laboratories and know the concepts and protocols of using different sterilization methods and preparation of media. - Acquire the practical skills to use various methods for cultivation, staining and characterization of different microorganisms and to check their stability under various conditions. - Learn to isolate bacteriophages from different sources and cultivate viruses in embryonated eggs and plants. - Demonstrate the mechanical, aphid and graft transmission of plant viruses and methods used to check the stability of viruses and determine the effect of virus infection on plants through chlorophyll estimation.
4	VR-104	Biological Chemistry and Analytical Techniques	2017	<ul style="list-style-type: none"> - : Learn to calculate normality, molarity, molecular weight and percentage of chemical substances and qualitative and quantitative estimation of proteins, carbohydrates, lipids, and nucleic acids. - Know how to isolate and check the activity of enzymes from various

				<p>sources.</p> <ul style="list-style-type: none"> - Learn to use ultrafiltration, chromatography, and electrophoresis techniques for isolation and characterization of biomolecules. - Acquire the skills to use spectroscopic and centrifugal methods for isolation and characterization of biomolecules apply this practical oriented knowledge in Cell Biology and Immunology to foster employability in private industries, higher education in premier institutes.
5	VR-105	Biological Chemistry and Analytical Techniques	2017	<ul style="list-style-type: none"> - Acquire knowledge on major elements and biomolecules of life and their chemical composition, bonding and primary characteristics, classification, structure, functions of carbohydrates, nucleic acids, amino acids, peptides, proteins and lipids and mechanism of protein synthesis and degradation. - Understand the types, properties, biological functions of enzymes, nucleic acids, hormones, growth regulators, vitamins, porphyrins and other pigments and nucleic acid metabolism. - Describe the approaches involved in characterization and concentration of biomolecules and discuss the principles and applications of various techniques applied for characterization of biomolecules in biological research such as chromatography,

				<p>centrifugation, electrophoresis,</p> <ul style="list-style-type: none"> - Learn about electrochemical techniques, basic principles and applications of flow cytometry, radioisotopes, spectroscopy, amino acid, and nucleotide sequencers
6	VR-106	Human values and Professional ethics - I	2017	<ul style="list-style-type: none"> - To enable the students to imbibe and internalize the moral values and ethical principles - 2. To learn ethics moral and social values and ethical behavior in the personal and Professional lives. - 3.To learn the rights and responsibilities and to appreciate the rights of others and to create awareness on religious values and other good acts and facts of life. - 4.To acquire knowledge about the important facts of Bhagavad Gita, values hidden in religions, religious tolerance and aware of crime, and punishment theories
8	VR-201	Microbial Genetics and Molecular Biology	2017	<ul style="list-style-type: none"> - To gain understanding of prokaryotic and eukaryotic genome organization, modern concept of genes, plasmids, mobile genetic elements - To learn gene transfer and mapping mechanisms in bacteria, genetics of viruses and requirements and mechanism of DNA replication. - To attain knowledge about the mechanism of DNA damage and repair, concept of mutations and their importance, processes involved

				<p>in transcription,</p> <ul style="list-style-type: none"> - To attain knowledge about the mechanism of translation, regulation of gene expression and gene silencing mechanisms.
9	VR-202	Recombinant DNA Technology	2017	<ul style="list-style-type: none"> - To learn basic and advanced tools and techniques, approaches and strategies used in gene manipulation in prokaryotic and eukaryotic systems. - 2. To learn the major techniques and applications of gene manipulation such as DNA sequencing, nucleic acid hybridization - 3. To understand the strategies used for gene expression in heterologous hosts, proteomics, genomics. - 4. To generate knowledge on genetically modified plants and animals and applications/implications of genetic engineering in agriculture, medicine, industry, and biology.
10	VR-203	Microbial Genetics and Molecular Biology & Recombinant DNA	2017	<ul style="list-style-type: none"> - Learn the safety practices and precautions to be followed in setting up Cell and Molecular Biology laboratory with ribonuclease free environment. - Isolate and estimate DNA and RNA from microbial, plant and animal tissues and demonstrate curing of plasmids, replica plating techniques,

		Technology		<p>conjugation in bacteria, Ames test, induction of mutations in bacteria by physical/chemical agents, isolation of microbial mutants by gradient plate method.</p> <ul style="list-style-type: none"> - Acquire practical skills to isolate plasmids from bacteria, restriction enzyme digestion of recombinant plasmid DNA, recovery of DNA from gels, transformation of bacteria and demonstrate the preparation of southern and dot blots for hybridization. - Solve the problems related to Molecular Genetics/Biology and Recombinant DNA Technology and compete for the competitive exams such as UGC-CSIR-NET, GATE, APSET and other scientific examinations.
11	VR-204	Cell biology and Immunology	2017	<ul style="list-style-type: none"> - Acquire the practical skills in conducting various experiments related to Cell Biology such as isolation of cells, preparation of cell cultures. - Learn isolation of mitochondria, study of chromosomes, identification of stages of mitosis in onion root tips. - Identify of primary and secondary lymphoid organs in virtual animal model and illustrate basic immunology techniques such as counting of

				<p>RBC and WBC, estimation of hemoglobin, identification of the blood groups and Rh.</p> <p>- Demonstrate antigen-antibody interactions by conducting <i>in vitro</i> serological tests such as immunodiffusion and immune-electrophoresis, DAC-ELISA, Dot-ELISA and western blotting and apply this practical oriented knowledge in Cell Biology and Immunology to foster employability in private industries, higher education in premier institutes.</p>
12	VR-205	Cell biology and Immunology	2017	<p>1.To understand the structure and contents of prokaryotic and eukaryotic cells, general principles and pathways of cell communication and cell signaling.</p> <p>2. To describe the concepts and methodologies of plant and animal tissue and organ cultures, cell counting and introduction to stem cell cultures.</p> <p>3..To learn about the historical perspectives of immunology, innate and adaptive immunity mechanisms, various components of immune system, antigens, antibodies, <i>in vitro</i> and <i>in vivo</i> antigen and antibody interactions and</p> <p>4.To understand the mechanism of humoral and cell mediated immune responses, immune effector mechanisms, MHCs, hypersensitivity reactions, autoimmune and immunodeficiency disorders, transplantation and transfusion immunology and concepts and applications of conventional and modern</p>

				vaccines.
13	VR-206	Human values and Professional ethics - II	2017	<ul style="list-style-type: none"> - Understand the definition of value education, concept of human and family values, components, structure, and responsibilities of family system and acquire reflective thinking, rational skepticism. - Describe the moral responsibilities and ethical issues of medical and health care professionals, avoid unethical things, learn ethical issues raised in genetic engineering and new biological technologies. - Learn to practice ethical standards in business by understanding ethical theories and maintain work ethics to build trust between businessman and consumer and avoid unethical behavior and ethical abuse and develop scientific temper, digital literacy. - Learn to practice environmental ethics by taking responsibility to protect environment and ecosystem and understand the importance of maintenance of social ethics and ethics of media.
14	VR-301	Plant Virology	2017	<ul style="list-style-type: none"> - Understand the induction of plant virus diseases, virus-host interactions and movement strategies. - Learn the vector and non-vector modes of plant virus transmission,

				<p>virus-vector relationships and molecular mechanisms involved in virus vector interactions and the approaches used for identification and characterization of the viruses and virus strains.</p> <ul style="list-style-type: none"> - Acquire the knowledge on plant virus spread and survival in nature and approaches used to detect plant viruses and diseases. - Describe the approaches used for the control and management of plant viruses and vectors and strategies used for acquiring plant virus resistance.
15	VR-302	Plant Viruses and Diseases	2017	<ul style="list-style-type: none"> - To understand the distribution, incidence and impact, symptoms, causal virus characteristics, diagnosis, disease cycle and management of the virus diseases of cereals and millets, oil seed crops - To understand the distribution, incidence and impact, symptoms, causal virus characteristics, diagnosis, disease cycle and management of the virus diseases of vegetable, and tuber crops. - To acquire knowledge on the distribution, incidence and impact, symptoms, causal virus characteristics, diagnosis, disease cycle and management of the virus diseases of food legumes, fruit crops - To acquire knowledge on the distribution, incidence and impact, symptoms, causal virus characteristics, diagnosis, disease cycle and management of the virus diseases of cash, spice and beverage crops

				and flowering and foliage ornamentals.
16	VR-303	Plant Virology or Plant Viruses and Diseases	2017	<ul style="list-style-type: none"> - Identify major virus diseases of local economically important crop plants and weeds through theory exercises, local field surveys, agricultural research station visits. - Determine and compare the effect of virus on cell size, chloroplast number, total carbohydrates, proteins, and lipids with healthy counterparts. - :Detect unknown viruses through ELISA and PCR (theory exercise and practical) and demonstrate plant virus transmission by seed and vegetative propagules and generation of virus free plants through apical meristem tip culture. - Identify local plant virus vectors, determine virus disease incidence, and progress curves through local field visits. -
17	VR-304	a) Molecular Virology (OR)	2017	<ul style="list-style-type: none"> - Acquire the skills to use the techniques involving purification of viruses such as maintenance of virus cultures on propagation hosts, clarification using organic solvents and low speed centrifugation,

		b) Biostatistics and Bioinformatics		<p>precipitation using sodium chloride or ammonium sulphate or polyethylene glycol or differential centrifugation, preparation of step and linear density gradients, further purification of viruses using sucrose density gradient centrifugation and final pelleting by ultrafiltration or ultracentrifugation and to check the quality and quantity of viruses using spectroscopy or transmission electron microscopy.</p> <ul style="list-style-type: none"> - Isolate virus coat proteins and determine its quantity and molecular weight through spectroscopy and SDS-PAGE, respectively. - Isolate virus nucleic acids (dsRNA, RNA and DNA), estimate their quantity by spectroscopy, determine their size and molecular weight through agarose gel electrophoresis. Determine the stability of virus by studying effect of physical and chemical agents on virus inactivation.
18	VR-305	(a) Molecular Virology (OR) (b) Biostatistics and	2017	<ul style="list-style-type: none"> - To understand molecular architecture of viruses and molecular mode of inactivating agents on viruses - To learn about types of viral genomes and steps involved in virus replication and replication strategies of DNA viruses. - 3.To understand basic concepts of statistics, construction of

		Bioinformatics		<p>histogram, normal distribution, mean, median and standard deviation, comparison of means and variances, examples of proportion and count data</p> <ul style="list-style-type: none"> - 4.To learn about analysis of variance, correlation and regression and statistical parameters for biological assays.
19	VR-306	(a) Biology of Viruses and their Management (OR) (b) Biology of Virus Vectors and their Management	2017	<ul style="list-style-type: none"> - To understand the basics of general entomology, collection, preservation, maintenance and transportation of virus vectors and vector-borne viruses of animals and humans - To learn about the biology and ecology of mosquitoes, blood sucking mites and prevention and control methods of animal and human virus vectors in urban and rural settings. - To describe the methods of collection, culturing and identification of plant virus vectors, virus vector transmission mechanisms, - To learn about the soil-borne vectors, epidemiology of vector-borne viruses, management of plant virus vectors and concepts of vector resistant crops
20	VR-401	Animal and Human Virology	2017	<ul style="list-style-type: none"> - To acquire knowledge on virus-host interactions, host innate and adaptive immune response to viruses, molecular mechanisms of viral pathogenesis, - To acquire knowledge on transmission of viruses, mechanism of virus, persistence, infection and spread in the body.

				<ul style="list-style-type: none"> - To learn the epidemiological concepts and methods of virus diseases, measures of disease occurrence, disease determinants, ecology, epidemiology - To learn the surveillance of virus diseases, strategies of virus maintenance in communities, basic concepts, types and patterns of disease survey, prevention, and control methods of viruses.
21	VR-402	Animal and Human Virus Diseases	2017	<ul style="list-style-type: none"> - Learn the safety practices and To describe the etiology, transmission, clinical manifestations, diagnosis, prevention and control of important (+) sense ssRNA viruses infecting animals and humans. - To describe the etiology, transmission, clinical manifestations, diagnosis, prevention and control of important (-) sense ssRNA viruses infecting animals and humans - To understand the etiology, transmission, clinical manifestations, diagnosis, prevention, and control of important DNA viruses infecting animals and human - To learn about the prion diseases, biology, prevention, and management of major viruses of silkworm, poultry, fish and prawn, emerging and reemerging virus diseases. -
22	VR-403	Animal and Human Virology	2017	<ul style="list-style-type: none"> - Understand the biosafety, biosecurity, and ethical guidelines to be followed in the Molecular Virology laboratory.

		& Animal and human virus diseases		<ul style="list-style-type: none"> - Learn the technologies related to preparation of media for cell/tissue cultures, preparation of cell cultures/embryonated eggs for virus cultivation and isolation and quantitation of viruses using differential centrifugation and symptomatology/spectroscopy, respectively. - Develop skills to test the plant and human viruses using serological and molecular tests and kit-based methods. - Acquire knowledge on virus-based nanotechnology protocols, virus epidemiology by doing extension activities and visiting field, poultry, agriculture research station and aqua forms.
23	VR-404	Project work related to Virology (OR) (a) Applied Virology (OR)	2017	<ul style="list-style-type: none"> - Acquire the skills to prepare the cell cultures and embryonated eggs for cultivation of plant, animal and human viruses and to isolate and quantitate viruses. - Learn the methods to detect plant and animal viruses and able to analyze various types of results obtained from serological and molecular viral diagnostic methods. - Apply the skills acquired to prepare NPV as biopesticides and virus-based nanoparticles and their isolation using analytical methods. - Participate in extension activities and field, poultry, agriculture

				<p>research station and aqua form visits.</p> <ul style="list-style-type: none"> -
		(b)Tumor Biology and Viruses		<ul style="list-style-type: none"> - Acquire skills to detect carcinogens and mutagens using standard tests such as Ames test. - Distinguish transformed and normal cell lines and determine the anticancer property of biologically active compounds. - Design and execute PCR and other point of care methods using commercial kits for detection of tumor viruses (HCV, HIV, HPV). - Perform cultivation of poultry tumor viruses in cell cultures and acquiring the knowledge on histopathology of animal tumor viruses. -
24	VR-405	(a) Applied Virology (OR)	2017	<ul style="list-style-type: none"> - Understand the basic concepts, types, requirements and methodologies of plant/animal cell and tissue cultures used for cultivation of plant and animal viruses. - Learn the production of recombinant DNA technology-based antibodies and vaccines to viruses and the concepts and methods of production of virus resistant/tolerant crops and virus-based biopesticides.

				<ul style="list-style-type: none"> - Acquire knowledge about common virus infections caused to human beings through vector and non-vector borne modes and basic principles of biosafety, biosecurity, and ethical/regulatory issues in Virology and basics in Intellectual Property Rights (IPR). - Understand the utilization of viruses as viral genes/sequences as unique genetic resources, novel enzymes, gene expression activators and silencers, gene delivery systems, epitope display platforms and model systems in understanding the replication of nucleic acids and regulation of gene expression strategies and cancer biology, phage display and therapy technologies and viruses as biological weapons.
		b)Tumor Biology and Viruses		<ul style="list-style-type: none"> - Acquire knowledge about the basic aspects of tumors, distinguish normal and transformed cells and describe the role of oncogenes and tumor suppressor genes in causing cancers. - Understand the role and mechanism of carcinogens in inducing carcinogenesis and molecular viral mechanisms of transformation and tumorigenesis. - Describe the role of oncogenes, tumor suppressor genes, viral

				<p>oncogenes, types, and mechanism of RNA viruses in inducing tumors.</p> <ul style="list-style-type: none"> - List the DNA viruses causing tumors and learn their tissue transformation mechanisms, role of tumor suppressor genes in tumor suppression, immune mechanisms against tumors, immunotherapy, and physical and chemical therapeutic interventions against tumors
25	VR-406	<p>(a) Clinical Virology</p> <p>(OR)</p>	2017	<ul style="list-style-type: none"> - Acquire basic understanding of virus properties, virus replication and learn methods of virus isolation and characterization of viruses using serological and molecular techniques. - Learn to collect, preserve the virus samples, and detect the viruses using biological, serological, and molecular methods, laboratory biosafety and quality control practices. - Understand the principles of epidemiology, disease occurrence patterns, disease surveillance and control strategies, concept, and methods of modern vaccines to viruses. - Learn about the approaches used for prevention and control of clinically important infectious caused by human viruses, unconventional slow viruses, and prions.

		(b) Emerging Infectious Viral Diseases		<ul style="list-style-type: none"> - Understand the evolution, biology, epidemiology, and emergence of infectious virus diseases, biology of emerging infectious diseases, zoonotic infections - Learn about the biology, clinical symptoms, epidemiology, diagnosis, and control of viruses causing AIDS and SARS and host defense mechanisms against infectious virus diseases. - Describe the biology, clinical symptoms, epidemiology, diagnosis, and control of vector borne emerging infectious viral diseases. - Acquire knowledge on impact of social and environmental change on emergence of viruses, vector control and antiviral therapies, vaccines, public health measures and bioterrorism.

44. Zoology

S. No.	Course Code	Title of the Course	Years of Introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/Skill development
1	ZOO-101	Invertebrata & Chordata	2017	<p>i. Understanding the General Characteristics, Principles of classification, general biology of Invertebrate Communities.</p> <p>ii. To understand the various biological functions, the evolutions of life from most primitive to most advanced form with respect to their habit and habitat.</p> <p>iii. In depth understanding of Anatomical features of Integumentary, Circulatory, Reproductive, Respiratory, Receptor, Nervous systems among Chordate groups.</p>
2	ZOO-102	Genetics & Evolution	2017	<p>i. Students will appreciate the concept of epigenetics as a key mechanism of regulation of gene expression steering development and cell fate that can ultimately be affected in disease condition</p> <p>ii. Explain the ideas about Mendelian, non-Mendelian inheritance, genetic disorder, gene mutations and sex determination.</p> <p>iii. Gained knowledge on the factors influencing the pattern of Evolution including Mutations, Natural Selection and Genetic</p>

				<p>drift.</p> <p>iv. Understood the concepts of Micro, Macro evolution speciation categories, Protein evolution etc. to fortify the existing knowledge on Evolutionary patterns.</p>
3	ZOO-103P	Practical-I Invertebrata & Chordata and Genetics	2017	<p>i. Understanding the General Characteristics, Principles of classification, general biology of Invertebrate Communities.</p> <p>ii. To understand the various biological functions, the evolutions of life from most primitive to most advanced form with respective to their habit and habitat.</p> <p>iii. Understanding the comparative aspects of different organs systems among chordate Phyla.</p> <p>iv. The students may apply this knowledge in taxonomy related research and job opportunities.</p> <p>v. Explain the ideas about Mendelian, non-Mendelian inheritance, genetic disorder, gene mutations and sex determination.</p> <p>vi. To understand PTC, Colorblindness test, how to solve genetic problems, pedigree analysis.</p>
4	ZOO-104P	Practical-II Metabolic Regulation & Cell Function and Evolution	2017	<p>i. Students would gain expertise to develop understanding of biological processes at chemical; biochemical and molecular level to perform wide range of analytical techniques to explore biological activities.</p>

				<p>ii. The student will learn and understand about the Biosynthesis of Purines and Pyrimidine Nucleotides, degradation of Nucleotides, salvage pathways, biosynthesis and biodegradation of Amino acids, inborn errors of metabolism.</p> <p>iii. Students would be trained in various tools and techniques used to gain insight into biological processes.</p> <p>iv. Understood that the four propositions underlying Darwin's theory of evolution through natural selection are:</p> <p>(1) more individuals are produced than can survive;</p> <p>(2) There is therefore, a struggle for existence</p> <p>(3) Individuals within a species show variation</p> <p>(4) Offspring tend to inherit their parental characters.</p>
5	ZOO-105	Metabolic Regulation & Cell Function	2017	<p>i. The students will learn about chemical bonding patterns, chemical structures and classification of carbohydrates and their structural and metabolic role in cellular system i.e. different pathways associated with carbohydrate metabolism.</p> <p>ii. Students would gain expertise to develop understanding of biological processes at chemical; biochemical and molecular level to perform wide range of analytical techniques to explore biological activities.</p> <p>iii. The student will learn and understand about the</p>

				Biosynthesis of Purines and Pyrimidine Nucleotides, degradation of Nucleotides, salvage pathways, biosynthesis and biodegradation of Amino acids, inborn errors of metabolism.
6.	ZOO-106	Human Values and Professional Ethics-I	2017	<p>i. The student will be enriched with several aspects pertaining to Human values and performing of Professional Ethics in day today life.</p> <p>ii. Introduction of several Nature of values to be performed by Humans to lead a good and Peaceful life by extending and imparting good behavior, character and conduct towards people of the society.</p> <p>iii. Introducing different concepts of Bhagavad Gita and its applications in uplifting of Religious values in the present society.</p>
7.	ZOO-201	Cell Biology & Immunology	2017	<p>i. Students will understand the structures, positions and functions of plasma membrane and all cellular organelles in details. They will acquire knowledge about chromosomes and cell divisions, both mitosis and meiosis. They will also know about cell signaling and cancers. They will know how to measure and stain different cell types.</p> <p>ii. Students would gain expertise in the ultra-structural information of animal cell besides the detailed views of the cell</p>

				<p>interior revealing the various events and actions of cell at the molecular level.</p> <p>iii. The study will help the students to understand the new discoveries about the structure and internal functioning of the cell due to technological improvements.</p> <p>iv. The student will learn and understand the rationale behind various assays used in immune diagnosis of diseases and will be able to transfer knowledge of immunology in clinical perspective.</p> <p>v. The course will aid in understanding the principles of Graft rejection, Auto immunity and Antibody based therapy.</p>
8.	ZOO-202	Molecular Biology	2017	<p>i. The study of Molecular Biology stands as a tribute to human curiosity for seeking to discover, and to human creative intelligence for devising the complex instruments and elaborate techniques by which these discoveries can be made.</p> <p>ii. Students world gain expertise in understanding the complex molecular mechanisms occurring in cell and the applications of molecular technologies for betterment of life.</p> <p>iii. Understand and our apply the Principles and techniques of Molecular Biology which prepares students for further education employment in teaching, basic research or the health Professions.</p>

9.	ZOO-203P	Practical-I Molecular Biology and Cell Biology	2017	<p>i. Students will acquire knowledge about replication, transcription, translation, post transcriptional and post translational modifications, gene regulation, DNA repair mechanisms and various molecular tools and techniques like PCR, southern and western blotting, recombinant DNA technology etc. they will also know the various tools and techniques related to bacterial microbiology.</p> <p>i. Students will understand the structures, positions and functions of plasma membrane and all cellular organelles in details. They will acquire knowledge about chromosomes and cell divisions, both mitosis and meiosis. They will also know about cell signaling and cancers. They will know how to measure and stain different cell types.</p>
10.	ZOO-204P	Practical-II Comparative Animal Physiology and Immunology	2017	<p>i. The students will be able to explore an original query in Animal Physiology. The students will appreciate evolutionary changes and environmental adaptations in different taxa of Invertebrates and Vertebrates.</p> <p>ii. Understanding of how different groups of animals have different Physiological adaptations appropriate to carry out the required function to the fullest.</p> <p>iii. Learn the fundamental principles of immune response</p>

				<p>including molecular, biochemical and cellular basis of immune homeostasis.</p> <p>iv. The course will aid in understanding various aspects of immunological response and how it's triggered and regulated.</p>
11	ZOO-205	Comparative Animal Physiology	2017	<p>i. The students will be able to explore an original query in Animal Physiology. The students will appreciate evolutionary changes and environmental adaptations in different taxa of Invertebrates and Vertebrates.</p> <p>ii. An appropriate understanding of functioning of each system of different groups of animals with their comparison will be acquainted.</p> <p>iii. Understanding of the basic concepts of Physiological regulation, from cellular to organ to organismal.</p> <p>iv. Understanding of how different groups of animals have different Physiological adaptations appropriate to carry out the required function to the fillet.</p>
12	ZOO-206	Human Values and Professional Ethics-II	2017	<p>i. Student will know the values of ethics in various fields including medical, social and business ethics.</p> <p>ii. The student will be enriched with several aspects pertaining to Human values and performing of Professional Ethics in day today life.</p> <p>iii. Introduction of several Natural values to be performed by</p>

				Humans to lead a good and Peaceful life.
13	ZOO-301	Developmental Biology	2017	<p>i. Students would gain expertise in explaining how a variety of interacting processes generate an organism's heterogeneous shapes, size and structural features that arise on the trajectory from embryo to adult or more generally throughout a life cycle.</p> <p>ii. Gains knowledge about gametogenesis, cleavage mechanisms, gastrulation and role of hormones in metamorphosis and regeneration.</p> <p>iii. After learning the development of life from cell to multicellularity complex and coordinated systems in organisms the students can apply this knowledge for research, and education, to solve the problems related to development in animals through research.</p>
14	ZOO-302	Environmental Biology	2017	<p>i. Students will be able to apply the scientific method and quantitative techniques to describe, monitor and understand environmental systems.</p> <p>ii. Students will be able to use interdisciplinary approaches such as ecology, economics, ethics and policy to devise solutions to environmental problems.</p> <p>iii. Students will be able to be proficient in ecological field methods such as wildlife survey, biodiversity assessment, mathematical modeling and monitoring of ecological systems.</p>

				iv. Students will be able to use technology, such as geographical information systems and computer programming, to assist in problem solving.
15	ZOO-303P	Developmental Biology and Tools & Techniques	2017	<p>i. Developmental Biology displays a rich array of material and conceptual practices that can be analyzed to better understand the scientific reasoning exhibited in experimental life sciences. Based on learning contents of embryology, students can have a systematic and organized learning about the knowledge and concepts of growth and development.</p> <p>ii. To understand the fundamental processes that underpins the fertilization of an egg cell and its step-by-step transformation into the fascinating complexity of a whole organism.</p> <p>iii. Students would be expertise techniques used for imaging, isolation, purification and characterization of various biological substances.</p> <p>iv. Students would gain basic knowledge of the underlying principles and practical strategy of the analytical and preparative techniques that are fundamental to study and understanding of life processes.</p>
16	ZOO-304P	Environmental Biology and Enzymology	2017	i. The student will get idea about the ecological process in its surrounding and at National and Global level and the use of student knowledge on Ecology, Behaviour can be applied to

				<p>Education, Research and Extension programmes in his further career.</p> <p>ii. Students will be understanding the various features and aspects of population ecology, community ecology and ecosystem ecology. They might have the knowledge about environmental biology in details. They will acquire knowledge about various tools and techniques of field ecology.</p> <p>iii. Students learn about enzymes. Their classification and nomenclature</p> <p>iv. Students learn about specificity of enzymes</p> <p>v. Students learn about measurement of enzymatic activity</p> <p>vi. Students learn about isolation, purification of enzymes and intercellular distribution enzymes.</p>
17	ZOO-305A	Tools & Techniques	2017	<p>i. Students would be expertise techniques used for imaging, isolation, purification and characterization of various biological substances.</p> <p>ii. Identify and describe the different equipment and tools used in a biology laboratory.</p> <p>iii. Correctly operate different laboratory instruments.</p> <p>iv. Correctly operate different types of microscopes.</p> <p>v. Prepare tissue for section cutting and correctly operate a microtome.</p>

18	ZOO-305B	Enzymology		<p>i. Students gain knowledge about regulation of enzyme activity with respective mechanisms</p> <p>ii. To understand about mechanism of enzymes in clinical diagnosis and their applications</p> <p>iii. Students gain knowledge about immobilization of enzymes, applications of immobilized enzymes.</p>
19	ZOO-305C	Bioinformatics & Biostatistics	2017	<p>i. Familiar with various Applications of Bioinformatics by exploring the fundamentals of computer applications in Biology.</p> <p>ii. Describe different methods of data handling using computer.</p> <p>iii. Perform basic operations of gene sequence retrieval and compare them using different software.</p> <p>iv. Perform basic operations of protein structure retrieval and comparison using different software.</p> <p>v. The student will learn about the Computer basics like Operating systems, Programming, Data Access, Internet and Nucleic acid Sequence and Protein Data Banks.</p> <p>vi. The student will learn the basics of handling of data, measures of Central tendency like Mean, Median and Mode, Measures of dispersion like Mean deviation and Standard deviation and Co-efficient of Variation.</p> <p>v. The course will aid in learning Test of significance like Null</p>

				hypothesis and Alternative hypothesis, t-test, F-test, Chi-square test, Correlation and Regression analysis.
20	ZOO-306A	Economic Zoology	2017	<p>i. Creating the self-employment opportunities to rural students through Animal husbandry, Aquaculture, Vermiculture and Sericulture.</p> <p>ii. To understand the significance of Economically important animals including cultivable Fishes, Prawns and their culture practices.</p> <p>iii. Identification of Animal pathogenic diseases in Fisheries, Sericulture, Apiculture, Aquaculture and their management strategies.</p>
21	ZOO-306B	Environmental Impact Assessment & Green Auditing	2017	<p>i. Be able to access and analyse different case studies/examples of EIA in practice for evaluation/assessment</p> <p>ii. Explain the importance of environmental audits and other management tools in business for social benefit by improving environmental performance</p> <p>iii. Calculate the carbon footprint of any organization and identify suitable mitigation strategies for carbon reduction solutions.</p>
22	ZOO-306C	Biodiversity and conservation	2017	<p>i. Student will gain knowledge about the diversity distribution pattern of the enormous number of species and different kinds of ecosystems in the natural world.</p>

				<p>ii. The interaction between the various species and environment and the impact of social development on biodiversity</p> <p>iii. The importance of conservation of biodiversity which serving to the mankind and the ecosystem, and the major threats to biodiversity due to human developmental activities. The loss of biodiversity and the impact to the humankind.</p>
23	ZOO-401	Neurobiology		<p>i. Understanding Electrophysiological techniques and Molecular mechanisms associated with action potentials</p> <p>ii. Students learnt and gain knowledge on structure and function of different types of Synapses</p> <p>iii. Gained information on different types of Neurotransmitters i.e. Amino acids and Peptides.</p>
24	ZOO-402	Toxicology	2017	<p>i. The awareness about toxic agents, their effects and knowledge about mode of transformation of toxicants will help in creating skilled personnel in the field of environment protection and research.</p> <p>ii. Understanding of the physiological and genotoxic effects of drugs and environmental toxins.</p> <p>iii. To understand various types of insecticides and understand their mode of action to kill/control the insects. Also, the students will learn about novel categories of insecticides that may be compatible with other control strategies.</p>

				iv. The students will learn handling of the pesticides in crop protection and understand the therapy and antidotes at the time of poisoning.
25	ZOO-403P	Neurobiology and Animal Biotechnology & Microbiology	2017	<p>i. Learnt about structure, function and organization of Neurons in the Central nervous system</p> <p>ii. Understanding Electrophysiological techniques and Molecular mechanisms associated with action potentials.</p> <p>iii. Identify microbiological techniques, the defining characteristics of the major groups of microorganisms and apply to study microbial phylogeny.</p> <p>iv. Apply the scientific method by stating a question; researching the topic; determining appropriate tests; performing tests; collecting, analyzing, and presenting data and effective communicate with both specialist and non-specialist audiences/community.</p>
26	ZOO-404P	Toxicology and Animal Behavior & Wild life	2017	<p>i. Skill development in environmental and occupational Toxicology.</p> <p>ii. It provides opportunities for student's research projects, internships in assessing the effects of toxic pollutants on the environment and in the food chain.</p> <p>iii. Identification of different routes of exposure of</p>

				<p>environmental toxins.</p> <p>iv. The students will learn handling of the pesticides in crop protection and understand the therapy and antidotes at the time of poisoning.</p> <p>v. To understand the overview of Animal Behavior and prominence of social organization in insects and primates.</p> <p>vi. Gained lot of information on different types of Learning phenomenon and their mechanisms.</p> <p>vii. To understand how to conserve the wild animals</p>
27	ZOO-405A	Animal Biotechnology & Microbiology	2017	<p>i. Understanding of in vitro culturing of organisms and production of transgenic animals.</p> <p>ii. Understanding of cloning of mammals, large scale culture and production from recombinant microorganisms and cloning vectors.</p> <p>iii. This insight allows students to take into consideration about ethical issues involved in production of transgenic animals and BT products.</p> <p>iv. Use in gene transfer technology, genetic manipulations and in a variety of Industrial processes and prominence of IVF, Artificial insemination and embryo transfer techniques.</p> <p>v. Identify microbiological techniques, the defining characteristics of the major groups of microorganisms and</p>

				<p>apply to study microbial phylogeny</p> <p>vi. Classify the nutritional types of microorganisms and measure microbial growth</p> <p>vii. Evaluate how microorganisms interact with the environment in beneficial or detrimental ways</p> <p>viii. Assess impact of plant- microbe interaction on agriculture in both beneficial and detrimental ways. Identify industrially important microbes.</p>
28	ZOO-405B	Animal Behavior & Wild life	2017	<p>i. Understand the overview of Animal Behavior and prominence of social organization in insects and primates</p> <p>ii. Gained lot of information on different types of Learning phenomenon and their mechanisms.</p> <p>iii. To understand the how to conserve wild animals and management strategies.</p> <p>iv. To gain the knowledge about wild animals and animal products importance.</p>
29	ZOO-405C	Endocrinology	2017	<p>i. Understand the pathways associated with Biosynthesis and secretion of Endocrine hormones and their role in the control of metabolism.</p> <p>ii. Through understanding of several endocrines including Peptide hormones, Steroid hormones, Pituitary hormones, Sex hormones, Thyroid hormones etc. in the control of metabolic</p>

				<p>pathways.</p> <p>iii. Understanding the influence of hormones on Growth, Development and Reproduction and their regulatory pattern.</p>
30	ZOO-406A	Genetic Engineering	2017	<p>i. This course exposes students to the applications of genetic engineering in biological research.</p> <p>ii. Students will be able to perform basic genetic engineering experiments at the end of course.</p> <p>iii. Students will acquire knowledge of advances in biotechnology- healthcare, agriculture and environment cleanup via recombinant DNA technology.</p>
31	ZOO-406B	Structural Biology	2017	<p>i. Understand the evolution of protein structural motifs and domains and associate this with function;</p> <p>ii. Use on-line structural databases and tools to predict the properties, structure and function of proteins.</p> <p>iii. Understand and explain enzyme mechanisms in a structural context.</p> <p>iv. Describe mechanisms of protein folding and the roles of natively unstructured proteins in biology.</p> <p>v. Understand how cross-talk between proteins and post-translational protein modifications (e.g. phosphorylation, ubiquitination) facilitate information processing in cells.</p>
32	ZOO-406C	Human Health and Infectious	2017	<p>i. To understand the basic concepts of Infectious diseases and</p>

		diseases		<p>the role of immunity to control infections</p> <p>ii. Provides knowledge on the physiological mechanisms leading to diseased conditions.</p> <p>iii. Students gains knowledge on the pathogenesis and transmission of infectious diseases.</p> <p>iv. This insight allows the students to learn the treatment methods to control the growth and control of microbes.</p>
--	--	----------	--	---

Animal Biotechnology

S. No.	Course Code	Title of the Course	Years of Introduction	Activities/Content with direct bearing on Employability/ Entrepreneurship/ Skill Development
1	ABT- Core-101	Metabolic Regulation & Cell Function (MRCF)	2017	<ul style="list-style-type: none"> Knowledge on chemicals bonds, thermodynamics principles and metabolisms of Glycolysis, TCA Cycle and their biomedical importance will be gained. Metabolic discords of urea cycle and importance of proteins structure and functions can

				<p>be understood.</p> <ul style="list-style-type: none"> • Biosynthesis of purine and pyrimidine nucleotide and Clinical disorders of purine and pyrimidine metabolism can be learnt • To become proficient in Biomedical importance of lipids and over view metabolism of carbohydrate, protein and lipids
2	ABT- Core-102	Tools & Techniques (TT)	2017	<ul style="list-style-type: none"> • Skills will be acquired on chromatography, centrifugation, electrophoresis and blotting techniques • To get knowledge on cell and tissue culture, cell types, culture media and overview of stem cell biology • To acquire skill on electrganetic spectrum, type of detectors, electrophysiological methods and brain activity recording techniques • Microscopic techniques, different fixation and staining techniques, tissue processing for microtomy, cryotechniques will be learnt
3	ABT-Core-P-103	Metabolic Regulation & Cell Function	2017	<ul style="list-style-type: none"> • Practical knowledge will be gained on biochemical assays like estimation of proteins,

				<p>structural proteins, soluble proteins, free amino acids, total carbohydrates and total cholesterol.</p> <ul style="list-style-type: none"> To gain knowledge in handling equipments like cooling centrifuge, autoclave, laminar air flow etc., and, maintenance of animal cell culture laboratory. <p>To learn microbial media preparation for their culture and identification</p>
4	ABT-Core-P-104	Tools & Techniques	2017	<ul style="list-style-type: none"> Isolation of DNA from chick liver Agarose gel electrophoresis Estimation of DNA and RNA by diphenyl aniline method and orcinol method Paper chromatography Plating procedures Gram staining Anti microbial susceptibilities test
5	ABT-CF-105	Microbiology and Diseases	2017	<ul style="list-style-type: none"> Microorganisms classification and structure of prokaryotic and eukaryotic microorganism can be understood To get knowledge on Nutritional requirements to microorganisms, growth of microorganism, control of microorganism and

				<p>microbes of biotechnological importance</p> <ul style="list-style-type: none"> To become proficient in chemical nature of gene, plasmids incompatibility, horizontal transfer of genome among the microbial community and Benzer's classical studied on II locus To learn diseases caused by microorganism
6	ABT -EF-106	Human Values & Professional Ethics (HVPE)-I	2017	<ul style="list-style-type: none"> Knowledge will be gained on nature of ethics its relation to religion. Politics, Business To understand nature of values Good and Bad, end and means, analysis of basic moral concepts, good behavior and respect for elders, character and conduct Proficient on hagavad Githa Crime and theories of punishment will be learnt
7	ABT- Core-201	Molecular Biology (MB)	2017	<ul style="list-style-type: none"> To gain knowledge on DNA structure, genome of Nuclear and mitochondrial and maternal Inheritance To understand replication in prokaryotes, Enzymology of DNA replication, Discontinuous replication and Bidirectional replication Synthesis of RNA, Types of RNA, Genetic

				code and Ribosome structure will be understood Knowledge will be gained regulation I and II and Operon concepts
8	ABT- Core- 202	Animal Cell culture & Stem Cell Biology (ACC-SCB)	2017	<ul style="list-style-type: none"> • To understand animal cell culture, biology of stemcells and embryonic stem cell • To learn propagation of embryonic stem cells, nuclear transfer technology, animal cloning and stem cell differentiation • To gain knowledge on stem cell plasticity, stem cell assay and protocols, stem cell separations and stem cell therapies <p>To learn stem cells and tissue engineering, human embryonic stem cells and society, intellectual property results</p>
9	ABT-Core- P-203	Molecular Biology & Immunology	2017	<ul style="list-style-type: none"> • Effect of UV radiation on bacterial growth • SDS PAGE • Electrophoresis • Blood grouping • Blood smear preparation • RBC count • Radial Immuno Diffusion • Neubauer chamber

10	ABT-Core-P-204	Animal Cell culture & Stem Cell Biology & Cell Biology	2017	<ul style="list-style-type: none"> • Laboratory safety rules and regulations • Animal handling and care • Preparation of cell culture media • Staining of animal cells • Preparation of cell lines • Culture of virus in chick embryo
11	ABT- CF-205	Cell Biology & Immunology (CB&IM)	2017	<ul style="list-style-type: none"> • Able to learn organization of prokaryotic and eukaryotic cell, Nucleus structure, Eukaryotic chromosome and polytene and lamp brush chromosomes • To learn mechanism of cell division, regulation of eukaryotic cellcycle, chromosomal abnormalities and tumor biology • To understand types of immunity, types of cell involved in immune response, structure and function of antibody and complimentarily cascade • To gain knowledge on Antigen presentation, hypersensitivity reactions, immune tolerance and immunopathology
12	ABT- EF-206	Human Values & Professional Ethics (HVPE)-II	2017	<ul style="list-style-type: none"> • To gain knowledge on value education • To learn medical ethics • To become proficient on business ethics

				<ul style="list-style-type: none"> To understand environmental ethics and social ethics
13	ABT- Core-301	Enzymology (ENZ)	2017	<ul style="list-style-type: none"> To understand enzyme specificity, enzyme catalysis and isolation and purification of enzymes To gain knowledge on theories of enzymes kinetics, enzyme kinetics and its importance, effect of reactant concentrations and effect of temperature of pH and enzyme concentration reaction rate To become proficient on clinical aspects of enzymology, immobilized enzymes, isoenzymes and enzyme engineering
14	ABT- Core-302	Animal Reproduction, Breeding & Transgenic Technology (ARBTT)	2017	<ul style="list-style-type: none"> To become proficient on structure and function of male and female reproductive system; reproductive cycles and contraception in male and females To gain skill on sex determination, selection for qualitative inherited characters, parental determination and verification and progeny testing To understand artificial insemination techniques, in vitro fertilization, embryo transfer technology, microinjection and macroinjection To learn transgenic technology

				development, generation of chimeric, transgenic and knockout mice
15	ABT-Core-P-303	Enzymology & Genetic Engineering	2017	<ul style="list-style-type: none"> • To determine the effect of substrate concentration, enzyme concentration and temperature on enzyme activity • Measures of central tendency • regression and correlation analysis • T-test
16	ABT-Core-P-304	Animal Reproduction, Breeding & Transgenic Technology & Environmental Biotechnology	2017	<ul style="list-style-type: none"> • To estimate the sperm motility, sperm count , sperm membrane integrity test and pH of semen. • Determination sperm viability • Retrieval of gene and protein sequence from gene and protein bank, redelivery
17	GE-305A	Genetic Engineering (GE)	2017	<ul style="list-style-type: none"> • Use of enzymes in DNA and RNA synthesis, restriction enzymes and ligation and modification o DNA • To learn vectors for constructions of genomic libraries, expression vectors, promoters and vectors used for cloning

				<ul style="list-style-type: none"> • To gain knowledge on DNA fragments, cDNA synthesis, PCR • To become proficient on ligation between cohesive and blunt end DNA fragments, introduction of cloned genes into host and expression of cloned genes
18	GE-305B	Environmental Biotechnology (EBT)	2017	<ul style="list-style-type: none"> • To gain knowledge on waste and pollutants, hazards from wastes and pollutants and hazards from chemicals in wastes • Waste treatment, treatment of liquid wastes, treatment of solid waste and contributions of biotechnology to waste treatment will be understood • To become proficient in aerobic waste water treatment and measurement of pollution levels • To learn anaerobic treatment of waste water, biodegradation of xenobiotics compounds, hazards from xenobiotics and bioremediation
19	GE-305C	Biostatistics & Bioinformatics	2017	<ul style="list-style-type: none"> • To understand prediction of protein structure and protein sequence database, prediction of gene structure, submission of sequence to

				<p>database, phylogenetic analysis</p> <ul style="list-style-type: none"> • To learn biostatistics, measures of location and dispersion, curve fitting and correlation and regression • To understand probability distribution, tests of significance, student t-test and F-test, chi square test and their application
20	OE-306A	Animal Biotechnology & Industrial Applications	2017	<ul style="list-style-type: none"> • To gain knowledge on preservation animals engineered bacteria/yeast/ cell lines, metabolic engineering, fermentative production and glycolytic pathway • To understand monoclonal antibodies production and genetically engineered products • To know the DBT guidelines, Global scenario of transgenic micro organisms and ethical issues related to biotechnology products
21	OE-306B	Cancer Biology	2017	<ul style="list-style-type: none"> • To gain knowledge on cancer types and tumor development • To learn oncogenes, mechanisms of onogene activation and chromosomal translocation • To understand cell cycle regulation and

				<p>cancer, DNA Damage and repair</p> <ul style="list-style-type: none"> • To learn tumor immunology, Vaccine development, tumor cell evasion of immune defenses
22	ABT- Core- 401	Medical Biotechnology (MBT)	2017	<ul style="list-style-type: none"> • To understand disease diagnosis, use of monoclonal antibodies in detection of genetic disease • To learn Disease treatment, interferons, growth factor, and antisense nucleotide as therapeutic agent • To gain knowledge on gene therapy, types of gene therapy, augmentation therapy and targeted transfer • To become proficient on forensic medicine, preparation of DNA sample. Approaches for DNA analysis and applications of forensic medicine
23	ABT- Core- 402	Fermentation Technology and Down streaming Process (FTDSP)	2017	<ul style="list-style-type: none"> • To understand cell distribution methods, separation techniques, purification by chromatographic techniques and isolation and screening and maintenance of industrially importance microbes • To learn bioreactor design, fermentation

				<p>economics, upstream processing, membrane based separations</p> <p>To gain knowledge on importance of downstream processing economics of downstream processing</p>
24	ABT-Core-P-403& 404	Project and Viva- Voce	2017	<ul style="list-style-type: none"> Students must perform project work which includes experiments related to Toxicology, Animal Tissue culture, Fermentation technology or any work related to biology. <p>After completion of project work students have to prepare dissertation by their own and submit to the committee members.</p> <ul style="list-style-type: none"> Evaluation of dissertation will be conducted by committee members through Viva-Voce
25	GE-405A	Biosafety, Bio Ethics & Intellectual Property rights	2017	<ul style="list-style-type: none"> To understand socio-economic and legal impact of biotechnology, use of genetically modified organisms, moral and ethical issues in biotechnology and safety issues with GMO To learn intellectual property right, evaluation of patenting, application of GATT and IPR and WTO Act and global and Indian

				<p>biodiversity</p> <ul style="list-style-type: none"> • To gain knowledge on Indian Patent Act 1970, role of country patent office, U.S. Patent trademark office and U.S. Patent system Vs Indian Patent system • To gain knowledge on Ethics and genetic engineering, patent of genes, human cloning, stem cell, regulatory requirements for drugs and biologics, GLP and GMP
26	GE-405B	Drug design and Development	2017	<ul style="list-style-type: none"> • To learn drug design, analog approach of drug designing • To understand SAR Vs QSAR, Partition coefficient, Hammett's substituent constant and Taft's steric constant, Free Wilson model, 3D-QSAR approach like COMFA and COMIA • To gain knowledge on pharmacological screening and assays, pharmacological screening models for therapeutic areas, cell based assay, biochemical assay, radiological binding assay, small molecule manufacturing • To learn Drug Laws, FDA, OECD, ICH, Schedule Y, drug registration, Regulations of

				human pharmaceuticals and biological products, and clinical trial design
27	GE-405C	Animal Cell Culture Techniques	2017	<ul style="list-style-type: none"> • To understand Animal cell culture, culture medium, characteristics of cell in culture, measurement of viability and cytotoxicity , cell types and apoptosis • To gain knowledge in scaling up of animal cell culture, cell transformation, tissue engineering, transgenic animals, animal cloning • To become proficient in improvement of biomass, pharming products, plasminogen activator and ethical issues related to biotechnology products
28	OE-406A	Advanced Genomics and Proteomics	2017	<ul style="list-style-type: none"> • To learn structure of Prokaryotic and Eukaryotic genomes, Isolation and purification of genomic DNA, Construction of Physical maps and Whole genome sequence alignment • To understand genome annotation, methods for gene identification, functional genomics, transcript profiling

				<ul style="list-style-type: none"> To learn protein structure, sample preparation and separation 2D-analysis, Multidimensional liquid chromatography, protein-protein interactions analysis <p>To gain knowledge on DNA /protein sequence homologies, Gene duplication and</p>
29	OE-406B	Bio resource Technology (Apiculture, Sericulture , Aquaculture, Vermiculture)	2017	<ul style="list-style-type: none"> To understand Types of honey bees, life history of honey bees, management of apiculture and by products of honey bees and economic importance disease and their control To become proficient on fresh water fin fish culture, shell fish (prawn and Pearls) culture To understand historical background of vermicompost, methods of vermiculture and problems involved in vermicompost

45. Business Management

S.No	Course Code	Name of the Course	Year of introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/Skill development
1	MBA 101	Management And Organisational Baheaviour	2017	<p>Examine the Management concepts and functions.</p> <p>Apply the concepts of planning, decision making.</p> <p>Apply the concepts of delegation of authority, decentralisation and departmentation in real life situations.</p> <p>Analyse the controlling principles and practices, Ethics and corporate social responsibility.</p> <p>Evaluate the basic concepts of organizational conflicts and climate.</p>
2	MBA 102	Managerial Communications	2017	<p>Apply the basic concepts of communication for business correspondence.</p> <p>Distinguish different forms of communication.</p> <p>Evaluate different types of communication.</p> <p>Adapt report writing skills of different types on need basis.</p> <p>Acquire presentation skills along with the interview techniques.</p>

3	MBA 103	Managerial Economics	2017	<p>Describe the importance of managerial economics and its contribution to decision making in different types of business organizations by the managerial economist.</p> <p>Apply the basic principles of managerial economics.</p> <p>Apply demand analysis concept in the real life business situations.</p> <p>Discuss the meaning and usefulness of the production function and cost function in analysing the firm's production activity.</p>
4	MBA 104	Accounting For Managers	2017	<p>Outline the basic knowledge of accounting, bookkeeping, accounting Principles, accounting cycle.</p> <p>Apply the concepts of journal, ledger and Trail balance.</p> <p>Identify the nature of expenditure and revenue for preparation of financial statements of business.</p> <p>Examine the role of accounting policies like depreciation.</p>
5	MBA 105	Quantitative Analysis For Management Decisions	2017	<p>Recall the fundamentals in Mathematics and Statistics.</p> <p>Demonstrate the methods to solve derivatives, progressions and gaming.</p> <p>Choose decision making in a competitive situation.</p> <p>Solve transportation Problem with minimum cost of</p>

				transport of commodities.
6	MBA 106	Information Technology For Managerial Applications	2017	Identify various network topologies. Apply Various Mathematical & Statistical Operations Using MS office &MS-Excel. Create Effective basic power point Presentations
7	MBA 107	Business Statistics	2017	About the information needs, sources of data and measures of central tendency . The concept of Scientific Research and the methods of conducting Scientific Enquiry. The Statistical Tools of Data Analysis.
8	MBA 108	Human Values And Professional Ethics	2017	About ethics, values and morals. The concepts of value based education and its relevance. Learn about environmental and social ethics
9	MBA 201	Marketing Management	2017	Outline the concepts of marketing. Create the segmentation, targeting and positioning in marketing. Analyse various phases of product life cycle. Evaluate various methods of pricing and identify the best pricing strategy. Evaluate marketing communication strategies.
10	MBA 202	Financial Management	2017	Outline the basic concepts of Financial Management. Comprehend the various methods of Investment

				<p>Analysis and apply various techniques of capital budgeting.</p> <p>Adapt the concepts of leverage, capital structure and its effect on the long term survival of the firm.</p> <p>Appraise various methods of computation of cost of capital.</p>
11	MBA 203	Human Resources Management	2017	<p>Outline the functions and challenges of HRM.</p> <p>Apply different concepts of HR Planning, Recruitment, Selection, Training, Interviewing Techniques and Executive Development Programs.</p> <p>:Apply the uses of job analysis, job description, job specification, ergonomics in industry and the methods of job evaluation.</p> <p>Utilize the various methods of performance appraisal.</p>
12	MBA 204	Production Management	2017	<p>Apply the basic concepts of production and operations management and identify types of manufacturing processes.</p> <p>Define and explain concept of production planning and control.</p> <p>Identify effective plant location and plant layout.</p> <p>Design strategies to improve productivity.</p>
13	MBA 205	Business Research Methods	2017	<p>Adapt the fundamentals of Business research</p>

				<p>methodology.</p> <p>Identify research problem.</p> <p>Apply sample and census survey and measuring techniques.</p> <p>Design data collection techniques.</p> <p>Develop data processing procedures and apply tools.</p> <p>Draft thesis/report writing.</p>
14	MBA 206	Management Information Systems	2017	<p>Understand various types of information systems.</p> <p>Analyse the various functional information systems</p>
15	MBA 207	Operation Research	2017	<p>Understand various concepts and techniques of OR.</p> <p>Apply various OR techniques to improve the efficiency of the organisations.</p>
16	MBA 208	Leadership Values	2017	<p>Identify the leadership qualities to run an organization successfully.</p> <p>Appraise the various concepts of value based leadership.</p>
17	MBA 301	Business Environment	2017	<p>Outline the basic concepts of business environment and its components.</p> <p>Analyze the structure of Indian economy.</p> <p>Discuss the components of fiscal policy and balance of payments.</p> <p>Evaluate different trade related policies.</p>
19	MBA 302	Entrepreneurship	2017	<p>Understand the concept of entrepreneurship.</p>

				Analyse entrepreneurship development programs in India and contents for training for entrepreneurial competencies. Develop Creativity in entrepreneurship. Design the project reports & make project evaluation
20	MBA 311	Consumer Behaviour	2017	Evaluate the consumer behaviour and business strategies. Apply the various consumer behaviour models. Build the psychological process and develop the effective strategy in terms of impact on consumer behaviour.
21	MBA 312	Customer Relationship Management	2017	Develop the concepts of CRM and strategies in business. Appraise the customer profile and perception of customer behavior in relationship perspectives. Analyse strategies for customer acquisition, models of CRM.
22	MBA 313	Marketing Research And Information Systems	2017	Understand basic concepts of research and methodology of conducting researches in marketing domain. <ul style="list-style-type: none"> Pursue the summer training/ project work and a winter project work and a professional career in

				Marketing Research domain.
23	MBA 314	Advertising And Sales Promotion Management	2017	<p>Discuss the basic concepts of advertising for better understanding the challenges and opportunities in advertising .</p> <p>Analyse the relations of advertising with segmentation and budget decision .</p> <p>Design better advertising strategies for the company .</p> <p>Identify media options which are suitable for the company for better promotion .</p> <p>Develop an effective advertising campaign for the company .</p>
24	MBA 315	Product And Brand Management	2017	<p>Discuss the importance of brand image in marketing .</p> <p>Formulate brand vision which communicates better the organisations' policy on Branding .</p> <p>Analyse brand promotion methods in brand communication .</p> <p>Analyse factors influencing brand extension decisions .</p> <p>Design brand marketing programmes and for better brand performance .</p>
25	MBA 316	Digital Marketing	2017	<p>Get knowledge regarding basic concepts of Digital Marketing.</p> <p>Analyse and Choose different channels of digital</p>

				<p>marketing according to the changing requirements of the markets</p> <p>Construct different digital marketing plans on situational basis.</p> <p>Manage digital by conducting a marketing research and adapt the changes by creating new goals for further reputation.</p>
26	MBA 321	Financial Services	2017	<p>Have awareness on insurance industry & its regulations.</p> <p>Create awareness on different financial services.</p>
27	MBA 322	Investment Management	2017	<p>Analyse various investment alternatives for effective investment decision .</p> <p>Discuss the importance of security analysis in investment decision process .</p> <p>Design bond management strategies to realise good return on bond investment .</p> <p>Apply different equity valuation methods for the valuation of securities .</p> <p>Construct optimal portfolio for higher return at lower risk .</p> <p>Analyse different schemes of mutual funds for better investment decision .</p>
28	MBA 323	Business Taxation	2017	<p>Conclude the fundamentals of Taxation .</p>

				Discuss taxation methods of companies and individuals . Analyse income sources from business through taxation . Evaluate Tax management strategies
29	MBA 402	Strategic Management	2017	Develop vision, mission and objectives of the organization. Analyse industry and develop techniques of competitive analysis. Appraise strategic leadership styles and actions. Formulate effective strategies in business. Develop a frame work for the implementation strategies in business. Evaluate the strategy controls by measuring performance of organization.
30	MBA 403	Business Laws And Ethics	2017	Analyze the Indian Contract Act. Evaluate Sales of Goods Act and the machinery for redressal of consumer grievances. Elaborate rights and duties of agent and principal, Principal's liability for the acts of agent and the procedure for termination of agency. Examine the rights and duties of partners, dissolution of

				partnership firm.
--	--	--	--	-------------------

46. Computer Science

S. No.	Course Code	Title of the Course	Years of Introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/Skill development
1	MCA 101	Discrete Mathematical Structures	2017	<ol style="list-style-type: none"> 1. The students become familiar with the Sampling Distributions like with replacement and without replacement 2. The problems in OR, Computer science, Probability, statistics deals with functions of two or more variables. To optimize something means to maximize or minimize some aspects of it. 3. Student uses a variety of strategies to investigate mathematical models of situations involving Binomial, Poisson's and Normal distribution
2	MCA 102	Object Oriented Programming with Java	2017	<ol style="list-style-type: none"> 1. Solve and Implement solution for the problem using java basic elements like variables, control structures.

				<ol style="list-style-type: none"> 2. Handle Object Oriented Concepts effectively in the real time problems. 3. Understand the architecture and working procedure of platform independent language JAVA SDK.
3	MCA 103	Computer Organization	2017	<ol style="list-style-type: none"> 1. To gain knowledge about the Micro Processors. 2. To study the hierarchical memory system including cache memories and virtual memory.
4	MCA 104	Operating Systems	2017	<ol style="list-style-type: none"> 1. Learn evaluation of different types Operating System and their functionalities. 2. Learn Internal structure and the function procedure of Operating system in detail.
5	MCA 105	105A.Accounting and Financial management 105B.Accounting Essentials for Computer Applications	2017	<ol style="list-style-type: none"> 1. Use of Accounting information to managers with in the organization. 2. Informs the business decision & control the Management Functions.
6.	MCA 106 P	Software Lab I (based on 101 & 103)	2017	<ol style="list-style-type: none"> 1. The students become familiar with the Sampling Distributions like with replacement and without replacement

				<ol style="list-style-type: none"> 2. The problems in OR, Computer science, Probability, statistics deals with functions of two or more variables. To optimize something means to maximize or minimize some aspects of it. 3. Student uses a variety of strategies to investigate mathematical models of situations involving Binomial, Poisson's and Normal distribution. 4. To gain knowledge about the Micro Processors. 5. To study the hierarchical memory system including cache memories and virtual memory
7.	MCA 107 P	Object Oriented Programming Lab	2017	<ol style="list-style-type: none"> 1. Solve and Implement solution for the problem using java basic elements like variables, control structures. 2. Handle Object Oriented Concepts effectively in the real time problems. 3. Understand the architecture and working procedure of platform independent language JAVA SDK.

8.	MCA 108P	Operating Systems Lab	2017	<ol style="list-style-type: none"> 1. Learn evaluation of different types Operating System and their functionalities. 2. Learn Internal structure and the function procedure of Operating system in detail.
9.	MCA 201	Computer Oriented Operations Research	2017	<ol style="list-style-type: none"> 1. solve the problems using special solution algorithms and use CPM and PERT techniques, to plan, schedule, and control project activities. 2. formulate and solve problems as networks and graphs and set up decision models and use some solution methods for nonlinear optimization problems. 3. analyse the general nonlinear programming problems. 4. formulate the nonlinear programming models.
10.	MCA 202	Data Structures using Java	2017	<ol style="list-style-type: none"> 1. Develop a program a structured Programming Using JAVA. 2. Develop a Memory Handling work & Sequential Data file handling. 3. Maintain data using proper data

				organizing structures.
11	MCA 203	Data Communication and Computer Networks	2017	<ol style="list-style-type: none"> 1. Understand the Network Terminologies and the components used to build networks. 2. Understand Network Models (Topologies) to establish networked systems. 3. Understand the internal architecture, working procedure of OSI Layer and Protocols.
12	MCA 204	Advanced Database Management Systems	2017	<ol style="list-style-type: none"> 1. Students will get an attempt to provide with the advanced information about ADBMS and their development. 2. This Subject also provides the conceptual background necessary to design and develop distributed database System for real life applications and also helps to learn Query optimization, centralized query optimization, Distributed query optimization algorithms. 3. How SQL Programs are implemented as a series of primitive operations and how

				DDBs are implemented and how applications are design for those DDB
13	MCA 205	205A. E-Commerce	2017	<ol style="list-style-type: none"> 1. Understand the basic concepts and technologies used in the field of management information systems. 2. Have the knowledge of the different types of management information systems. 3. Understand the processes of developing and implementing information systems and be aware of the ethical, social, and security issues of information systems;
14		205B. Cyber Security	2017	<ol style="list-style-type: none"> 1. Analyze and evaluate the cyber security needs of an organization and determine and analyze software vulnerabilities and security solutions to reduce the risk of exploitation. 2. Measure the performance and troubleshoot cyber security systems and implement cyber security solutions and use of cyber security, information assurance, and cyber/computer forensics software/tools.

				<ol style="list-style-type: none"> 3. Comprehend and execute risk management processes, risk treatment methods, and key risk and performance indicators, Design and develop a security architecture for an organization and design operational and strategic cyber security strategies and policies.
15		205C. Neural Networks	2017	<ol style="list-style-type: none"> 1. Define what is Neural Network and model a Neuron and Express both Artificial Intelligence and Neural Network. 2. Analyze ANN learning, Error correction learning, Memory-based learning, Hebbian learning, Competitive learning and Boltzmann learning. 3. Implement Simple perception, Perception learning algorithm, Modified Perception learning algorithm, and Adaptive linear combiner, Continuous perception, learning in continuous perception.
16	MCA 301	Software Engineering	2017	<ol style="list-style-type: none"> 1. Develop a system in a systematic way by using various Prescriptive Process models

				<p>like Waterfall and SDLC.</p> <ol style="list-style-type: none"> 2. Develop Systems with low cost and High Performance. And Know about different types of software product types and their process and Plan a software engineering process life cycle , including the specification, design, implementation, and testing of software systems that meet specification, performance, maintenance and quality requirements. 3. Analyze and translate a specification into a design, and then realize that design and students are able to use modern engineering tools necessary for software project management, time management and software reuse
17	MCA 302	Computer Graphics	2017	<ol style="list-style-type: none"> 1. Understand the basics of computer graphics, different graphics systems and applications of computer graphics. 2. Discuss various algorithms for scan conversion and filling of basic objects and their comparative analysis and Use of

				<p>geometric transformations on graphics objects and their application in composite form.</p> <p>3. Extract scene with different clipping methods and its transformation to graphics display device, Explore projections and visible surface detection techniques for display of 3D scene on 2D screen and Render projected objects to naturalize the scene in 2D view and use of illumination models for this.</p>
18	MCA 303	Web Technologies	2017	<p>1. Explain the history of the internet and related internet concepts that are vital in understanding web development.</p> <p>2. Discuss the insights of internet programming and implement complete application over the web and students can Demonstrate the important HTML tags for designing static pages and separate design from content using Cascading Style sheet.</p> <p>3. Utilize the concepts of JavaScript and</p>

				Java, Use web application development software tools i.e. Ajax, PHP and XML etc. and identify the environments currently available on the market to design web sites.
19	MCA 304	304A.Data warehousing and Data mining	2017	<ol style="list-style-type: none"> 1. To identify the scope and essentiality of Data Warehousing and Mining and to analyze data, choose relevant models and algorithms for respective applications. 2. To study spatial and web data mining. 3. Students develop research interest towards advances in data mining.
20		304B.Big Data Analytics	2017	<ol style="list-style-type: none"> 1. Understand the key issues in big data management and its associated applications in intelligent business and scientific computing. 2. Acquire fundamental enabling techniques and scalable algorithms like Hadoop, Map Reduce and NO SQL in big data analytics. 3. Students Interpret business models and scientific computing paradigms, and apply software tools for big data analytics and

				achieve adequate perspectives of big data analytics in various applications like recommender systems, social media applications
21		304C System Programming	2017	<ol style="list-style-type: none"> 1. Adequate knowledge in system programs (assemblers, loaders, linkers, macro-processors, text editors, debuggers, interpreters, compilers, operating systems). 2. Ability to use theoretical and applied information in these areas to design system software with realistic constraints. 3. Ability to conduct experiments, gather data, analyze and interpret results for investigating solutions to real life applications with assembly language programming and Unix shell programming.
22	MCA 305	305A. Cryptography and Network Security	2017	<ol style="list-style-type: none"> 1. Provide security of the data over the network and do research in the emerging areas of cryptography and network security.

				<ul style="list-style-type: none"> 2. Implement various networking protocols. 3. Protect any network from the threats in the world
23		305B.Artificial Intelligence	2017	<ul style="list-style-type: none"> 1. Demonstrate fundamental understanding of the history of artificial intelligence (AI) and its foundations and Apply basic principles of AI in solutions that require problem solving, inference, perception, knowledge representation, and learning. 2. Demonstrate awareness and a fundamental understanding of various applications of AI techniques in intelligent agents, expert systems, artificial neural networks and other machine learning models. 3. Demonstrate proficiency developing applications in an 'AI language', expert system shell, or data mining tool, Demonstrate proficiency in applying scientific method to models of machine learning and Demonstrate an ability to share in discussions of AI, its current scope and limitations, and

				societal implications.
24		305C.Mobile Application Development	2017	<ol style="list-style-type: none"> 1. Identify various concepts of mobile programming that make it unique from programming for other platforms, Critique mobile applications on their design pros and cons. 2. Utilize rapid prototyping techniques to design and develop sophisticated mobile interfaces, 3. Program mobile applications for the Android operating system that use basic and advanced phone features, and deploy applications to the Android marketplace for distribution.
25	MCA 401	401A.Cloud Computing	2017	<ol style="list-style-type: none"> 1. Explain the core concepts of the cloud computing paradigm: how and why this paradigm shift came about, the characteristics, advantages and challenges brought about by the various models and services in cloud computing. 2. Apply fundamental concepts in cloud infrastructures to understand the tradeoffs

				<p>in power, efficiency and cost, and then study how to leverage and manage single and multiple datacenters to build and deploy cloud applications that are resilient, elastic and cost-efficient.</p> <p>3. Discuss system, network and storage virtualization and outline their role in enabling the cloud computing system model.</p> <p>4. Illustrate the fundamental concepts of cloud storage and demonstrate their use in storage systems such as Amazon S3 and HDFS.</p>
26		401B. Dot Net Technologies	2017	<p>1. To explore .NET technologies for designing and developing dynamic, interactive and responsive web applications.</p> <p>2. Provide a consistent, object-oriented programming environment whether object code is stored and executed locally, executed locally but webdistributed, or executed remotely.</p>

				<ol style="list-style-type: none"> 3. Make the developer experience consistent across widely varying types of apps, such as Windowsbased apps and Web-based apps.
27		401C. Software Testing	2017	<ol style="list-style-type: none"> 1. List a range of different software testing techniques and strategies and be able to apply specific(automated) unit testing method to the projects. 2. Distinguish characteristics of structural testing methods and demonstrate the integration testing which aims to uncover interaction and compatibility problems as early as possible. 3. Discuss about the functional and system testing methods and demonstrate various issues for object oriented testing.
28	MCA 402	402A. Essentials of Data Science	2017	<ol style="list-style-type: none"> 1. Having a clear understanding of the subject related concepts and contemporary issues. 2. Having problem-solving ability- to assess social issues and engineering problems. 3. Having a clear understanding of

				<p>professional and ethical responsibility.</p> <p>4. Having cross-cultural competency exhibited by working as a member or in teams. And having a good working knowledge of communicating in English – communication with the engineering community and society</p>
29		402B.Deep Learning	2017	<p>1. Understand the role of deep learning in machine learning applications and get familiar with the use of TensorFlow/Keras in deep learning applications.</p> <p>2. Compare Various deep learning Algorithms used for Classification Segmentation and detection.</p> <p>3. Apply various concepts related with Deep Learning to solve Problems. Analyse different deep learning models in Image related projects.</p>
30		402C.Internet of Things	2017	<p>1. Able to understand the application areas of IOT.</p> <p>2. Able to realize the revolution of Internet</p>

				in Mobile Devices, Cloud & Sensor Networks. 3. Able to understand building blocks of Internet of Things and characteristics.
31	MCA 403	Major Project Work	2017	

M.Sc (CS) : Master of Computer Science

S. No.	Course Code	Title of the Course	Years of Introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/Skill development
1	MSCS -101C	Computer Organization	2017	<ol style="list-style-type: none"> 1. To gain knowledge about the Micro Processors. 2. To study the hierarchical memory system including cache memories and virtual memory.
2	MSCS -102C	Programming in Java & Data Structures	2017	<ol style="list-style-type: none"> 1. Develop a program a structured Programming Using JAVA. 2. Develop a Memory Handling work & Sequential Data file handling.

				3. Maintain data using proper data organizing structures.
3	MSCS -103C	Operating Systems	2017	<ol style="list-style-type: none"> 1. Understand fundamental operating system abstractions such as processes, threads, files, semaphores, IPC abstractions, shared memory regions, etc.,. 2. Analyze important algorithms eg. Process scheduling and memory management algorithms. 3. Categorize the operating system's resource management techniques, dead lock management techniques, memory management techniques. 4. Demonstrate the ability to perform OS tasks in Red Hat Linux Enterprise.
4	MSCS – 104 GE – A	Mathematical Foundations For Computer Science	2017	<ol style="list-style-type: none"> 1. Ability to apply mathematical logic to solve problems. 2. Understand sets, relations, functions, and discrete structures. 3. Able to use logical notation to define and reason about fundamental mathematical

				<p>concepts such as sets, relations, and functions.</p> <p>4. Able to formulate problems and solve recurrence relations.</p> <p>5. Able to model and solve real-world problems using graphs and trees.</p>
5	MSCS – 104 GE - B	ComputerOriented Operational Research	2017	<p>1. Solve the problems using special solution algorithms and use CPM and PERT techniques, to plan, schedule, and control project activities.</p> <p>2. Formulate and solve problems as networks and graphs and set up decision models and use some solution methods for nonlinear optimization problems.</p> <p>3. Analyse the general nonlinear programming problems.</p> <p>4. Formulate the nonlinear programming models.</p>
6	MSCS - 05CF	Environmental Studies	2017	<p>1. Articulate the interconnected and interdisciplinary nature of environmental studies.</p> <p>2. Demonstrate an integrative approach to</p>

				<p>environmental issues with a focus on sustainability.</p> <ol style="list-style-type: none"> 3. Use critical thinking, problem-solving, and the methodological approaches of the social sciences, natural sciences, and humanities in environmental problem solving. 4. Communicate complex environmental information to both technical and non-technical audiences. 5. Understand and evaluate the global scale of environmental problems and reflect critically on their roles, responsibilities, and identities as citizens, consumers and environmental actors in a complex, interconnected world.
7	MSCS - 106EF	1. A. PC HardwareBasics	2017	<ol style="list-style-type: none"> 2. Identify the hardware components of a computer. Lists the hardware components such as processor, memory, disk, main board, etc. 3. Explains the features of the hardware components of a computer. Explains the

				<p>relationships between the components of a computer and how data are transferred among the components.</p> <ol style="list-style-type: none"> 4. identify the peripheral devices outside computer. Uses computer using input devices, such as keyboard and mouse. 5. Transfers data outside the computer using output devices, such as screen and printer. Saves files to removable devices and loads files from removable devices. 6. Connects to the Internet using network cards. identify the software's running on a computer. Identifies BIOS and changes settings in BIOS.
8	MSCS - 106EF	B. Statistical Methods	2017	<ol style="list-style-type: none"> 1. Calculate and interpret the correlation between two variables. Calculate the simple linear regression equation for a set of data. 2. Employee the principles of linear regression and correlation, including least square method, predicting a particular value of Y for a given value of X and

				<p>significance of the correlation coefficient.</p> <ol style="list-style-type: none"> 3. Know the association between the attributes. Know the construction of point and interval estimators. 4. Evaluate the properties of estimators. Demonstrate understanding of the theory of maximum likelihood estimation.
9	MSCS -201C	Advanced Data Base Management System	2017	<ol style="list-style-type: none"> 1. Explain and evaluate the fundamental theories for advanced database architectures and query operators. 2. Design and implement parallel database systems with evaluating different methods of storing, managing of parallel database. 3. Assess and apply database functions of distributed database. Evaluate different database designs and architecture. 4. Administer and analyze database with query optimization techniques and develop Web interface with database. 5. Understand advanced querying and decision support system.

10	MSCS -202C	Computer Networks	2017	<ol style="list-style-type: none"> 1. Describe the general principles of data communication. Describe how computer networks are organized with the concept of layered approach. 2. Describe how signals are used to transfer data between nodes. Implement a simple LAN with hubs, bridges and switches. 3. Describe how packets in the Internet are delivered. Analyze the contents in a given data link layer packet, based on the layer concept. 4. Design logical sub-address blocks with a given address block. Decide routing entries given a simple example of network topology. 5. Describe what classless addressing scheme and how routing protocols work.
11	MSCS -203C	Computer Graphics	2017	<ol style="list-style-type: none"> 1. The course introduces the basic concepts of computer graphics. It provides the necessary theoretical background and demonstrates the application of computer science to graphics. The course further

				<p>allows students to develop programming skills in computer graphics through programming assignments.</p> <ol style="list-style-type: none"> 2. Understands the core concepts and mathematical foundations of computer graphics knows fundamental computer graphics algorithms and data structures. 3. Has an overview of different modeling approaches and methods and has detailed knowledge about basic shading and texture mapping techniques. 4. Understands light interaction with 3D scenes.
12	MSCS- 204 GE – A	E- Commerce	2017	<ol style="list-style-type: none"> 1. Understand the basic concepts and technologies used in the field of management information systems. 2. Have the knowledge of the different types of management information systems. Understand the processes of developing and implementing information systems. 3. Be aware of the ethical, social, and security issues of information systems;

13	MSCS- 204 GE B	Accounting And Financial Management	2017	<ol style="list-style-type: none"> 1. Use of Accounting information to managers within the organization. 2. Informs the business decision & control the Management Functions.
14	MSCS- 205CF	Human Rights And Value Education	2017	<ol style="list-style-type: none"> 1. understand the historical growth of the idea of human rights. 2. demonstrate an awareness of the international context of human rights. 3. demonstrate an awareness of the position of human rights in the UK prior to 1998. 4. understand the importance of the Human Rights Act 1998, analyse and evaluate concepts and ideas.
15	MSCS- 206 EF A	Principles Of Management	2017	<ol style="list-style-type: none"> 1. Understand the concepts related to Business. 2. Demonstrate the roles, skills and functions of management. 3. Analyze effective application of PPM knowledge to diagnose and solve organizational problems and develop optimal managerial decisions. 4. Understand the complexities associated

				with management of human resources in the organizations and integrate the learning in handling these complexities.
16	MSCS- 206 EF B	Internet Of Things	2017	<ol style="list-style-type: none"> 1. Able to understand the application areas of IOT. 2. Able to realize the revolution of Internet in Mobile Devices, Cloud & Sensor Networks. 3. Able to understand building blocks of Internet of Things and characteristics.
17	MSCS-301C	Data Warehousing and Data Mining	2017	<ol style="list-style-type: none"> 1. Understand the functionality of the various data mining and data warehousing component. 2. Appreciate the strengths and limitations of various data mining and data warehousing models. 3. Explain the analyzing techniques of various data. 4. Describe different methodologies used in data mining and data ware housing. 5. Compare different approaches of data ware housing and data mining with

				various technologies.
18	MSCS-302C	Web Technologies	2017	<ol style="list-style-type: none"> 1. Analyze a web page and identify its elements and attributes. 2. Create web pages using XHTML and Cascading Style Sheets. 3. Build dynamic web pages using JavaScript (Client side programming). Create XML documents and Schemas. 4. Build interactive web applications using AJAX.
19	MSCS-303C	Software Engineering	2017	<ol style="list-style-type: none"> 1. Develop a system in a systematic way by using various Prescriptive Process models like Waterfall and SDLC. 2. Develop Systems with low cost and High Performance. And Know about different types of software product types and their process and Plan a software engineering process life cycle , including the specification, design, implementation, and testing of software systems that meet specification, performance, maintenance and quality requirements.

				<ol style="list-style-type: none"> 3. Analyze and translate a specification into a design, and then realize that design and students are able to use modern engineering tools necessary for software project management, time management and software reuse
20	MSCS GE-A	-304-	Systems Programming	2017 <ol style="list-style-type: none"> 1. Adequate knowledge in system programs (assemblers, loaders, linkers, macro-processors, text editors, debuggers, interpreters, compilers, operating systems). 2. Ability to use theoretical and applied information in these areas to design system software with realistic constraints. 3. Ability to conduct experiments, gather data, analyze and interpret results for investigating solutions to real life applications with assembly language programming and Unix shell programming. 4. Ability to devise, select, and use modern techniques and tools needed for the

				design and implementation of system programs.
21	MSCS -304-GE-B	Computer Algorithms	2017	<ol style="list-style-type: none"> 1. Apply design principles and concepts to algorithm design (c) 2. Have the mathematical foundation in analysis of algorithms (a, j) 3. Understand different algorithmic design strategies (j) 4. Analyze the efficiency of algorithms using time and space complexity theory (b)
22	MSCS -304-GE-C	UID Using .NetTechnologies	2017	<ol style="list-style-type: none"> 1. Provide a consistent, object-oriented programming environment whether object code is stored and executed locally, executed locally but web distributed, or executed remotely. 2. Build all communication on industry standards to ensure that code based on .NET Framework integrates with any other code. 3. Building multi-tier enterprise applications.

				4. Client-side programming: HTTP, CGI, Cookies, JavaScript, HTML, XML.
23	MSCS -304-GE-D	IT in Forensic Science	2017	<ol style="list-style-type: none"> 1. Approach analysis of evidence without bias. 2. Develop a conceptual understanding of criminal justice system, rules of evidence, legal system. 3. develop professional, ethical graduates whose competence in problem-solving, legal analysis and application, quantitative reasoning, investigation and scientific laboratory procedures can be applied to immediate employment or advanced study.
24	MSCS -304-GE-E	Software Testing	2017	<ol style="list-style-type: none"> 1. Various test processes and continuous quality improvement, Types of errors and fault models. 2. Methods of test generation from requirements. 3. Behavior modeling using UML: Finite state machines (FSM), Test generation from FSM models, Input space modeling

				<p>using combinatorial designs.</p> <p>4. Combinatorial test generation, Test adequacy assessment using: control flow, data flow, and program mutations, The use of various test tools.</p> <p>5. Application of software testing techniques in commercial environments.</p>
25	MSCS -305 GE-A	Cloud Computing	2017	<p>1. Understand the concepts, characteristics, delivery models and benefits of cloud computing</p> <p>2. Understand the key security and compliance challenges of cloud computing</p> <p>3. Understand the key technical and organisational challenges</p> <p>4. Understand the different characteristics of public, private and hybrid cloud deployment models.</p>
26	MSCS -305 GE-B	Big Data Analytics	2017	<p>1. Understand Big Data and its analytics in the real world, Analyze the Big Data framework like Hadoop and NOSQL to efficiently store and process Big Data to</p>

				<p>generate analytics.</p> <ol style="list-style-type: none"> 2. Design of Algorithms to solve Data Intensive Problems using Map Reduce Paradigm, Design and Implementation of Big Data Analytics using pig and spark to solve data intensive problems and to generate analytics. 3. Implement Big Data Activities using Hive.
27	MSCS -305 GE-C	Artificial Neural Networks	2017	<ol style="list-style-type: none"> 1. Know the main provisions neuro mathematics, Know the main types of neural networks; 2. Know and apply the methods of training neural networks; 3. Know the application of artificial neural networks; 4. To be able to formalize the problem, to solve it by using a neural network.
28	MSCS -305 GE-D	Cyber Security	2017	<ol style="list-style-type: none"> 1. Analyze and resolve security issues in networks and computer systems to secure an IT infrastructure. 2. Design, develop, test and evaluate secure

				<p>software.</p> <ol style="list-style-type: none"> 3. Develop policies and procedures to manage enterprise security risks. 4. Evaluate and communicate the human role in security systems with an emphasis on ethics, social engineering vulnerabilities and training. 5. Interpret and forensically investigate security incidents.
29	MSCS -305 GE-E	Mobile App Development	2017	<ol style="list-style-type: none"> 1. Describe those aspects of mobile programming that make it unique from programming for other platforms, 2. Critique mobile applications on their design pros and cons, 3. Utilize rapid prototyping techniques to design and develop sophisticated mobile interfaces, 4. Program mobile applications for the Android operating system that use basic and advanced phone features, and 5. Deploy applications to the Android marketplace for distribution.

47. Commerce

M.Com (Regular)

S. No .	Course Code	Title of the Course	Years of Introduction	Activities/Content with direct bearing on Employability/Entrepreneurship /Skill development
1	101	Accounting Standards & Reporting	2017	<ul style="list-style-type: none">i. Increase the knowledge of students on accounting principles and standards and To enable the students to do inventory valuationii. Impart the ability to find out the cash flows and provide the skills to value goodwilliii. Create awareness about IFRS and segment reporting
2	102.	Financial Management	2017	<ul style="list-style-type: none">i. Describe meaning, functions and objectives; role of financial manager.ii. Examine investment decision, capital budgeting, techniques of CB and methods of CB.iii. Investigate management of working capital, needs and concepts.iv. Asses financing decision, capital structure and capital theories.v. Design dividend decision and theories of dividend.

3	103.	Business Environment and Policy	2017	<ul style="list-style-type: none"> i. Examine business environment, concept, nature and scope; scanning, monitoring, changing dimensions of business environment. ii. Illustrates economic environment nature and scope and new economic policy. iii. Develop political, legal environment; reasons for state intervention and government business interface. iv. Study the socio cultural environment nature, impact of social responsibility and business ethics. v. Interpret global environment; benefits and problems of MNCs and WTO.
4	104.	Organisational Behaviour	2017	<ul style="list-style-type: none"> i. Acquire knowledge on the conceptual frame work and emerging issues of OB and Study different theories of personality and motivation ii. Form a clear idea on group dynamics and inculcate the skills to become a leader and Learn about Organizational structures and clear understanding of management of Interpersonal conflicts. iii. Obtain knowledge on Organization dynamics as to organization culture, organizational change and know the significance of OB today.

5	105a	Quantitative Techniques for Business Decisions	2017	<ul style="list-style-type: none"> i. Appreciate the use of quantitative techniques, methods of business forecasting and quantitative techniques in business decisions. ii. Formulate F distribution and multiple co-relations co-efficient and study probability and non-probability distributions. iii. Formulate sampling theory, testing of hypothesis and type I and type II errors and Identify linear programming advantages and disadvantages; graphical and simplex method.
7	201	Advanced cost Accounting	2017	<ul style="list-style-type: none"> i. Obtain knowledge on the concept of cost accounting and know how it is different from financial and management accounting; ii. Understand the features and objectives of process costing and calculation of process losses and Inter-process profits. iii. Know the concept of equivalent production and accounting treatment for joint and by-products and acquire knowledge on budgetary control and preparation of various functional budgets. iv. Perceive the significance of ABC in cost ascertainment and control.
8	202.	Financial Markets and	2017	<ul style="list-style-type: none"> i. To understand the framework of Indian financial system and money market and evaluate the metrics of primary market and secondary

		Services		<p>capital market.</p> <p>ii. Demonstrate the role of merchant bankers and to analyze the metrics involved in credit rating the financial instruments issued by companies in primary market.</p> <p>iii. Create plans and understand the metrics for getting finance from venture capital firms.</p>
9	203.	Strategic Financial Management	2017	<p>i. Describe strategic management concept, importance and purpose; strategic planning concept and characteristics,</p> <p>ii. Explain Strategic financial management success factors and constraints.</p> <p>iii. Illustrate corporate valuation approaches and guidelines; value based management.</p> <p>iv. Identify financial distress and restructuring; countering financial distress.</p> <p>v. Justify corporate sickness and financial engineering; fund raising and fund deployment strategies.</p>
10	204.	Corporate Governance	2017	<p>i. Obtain knowledge on CG Mechanism and emerging issues in CG and Know the genesis of CG in China USA and UK and also the</p>

				<p>code of the best practices.</p> <p>ii. Gain Knowledge on the historical backdrop of CG in India and the guild lines pronounced by various committees for effective practice in India.</p> <p>iii. Discern knowledge on the composition of Board of Directors and Audit Committees and know the role of internal Auditors in India.</p> <p>iv. Understand the CG standards and practices in India with focus on IT and futures of CG in India.</p>
11	205a	Working Capital Management	2017	<p>i. To impart basic knowledge on working capital concepts and source of WCand to provide the skills to estimate working capital</p> <p>ii. To enables the students familiarise with the cash management techniques and comprehend the concept of receivables and its management.</p> <p>iii. To provide the skills of inventory management with different techniques.</p>
12	206a	e-Banking Operations	2017	<p>i. To understand the RBI's financial norms to be followed by commercial banks and to investigate into the roles of various commercials banks in India.</p> <p>ii. To analyze the mechanism of offline and online borrowing and</p>

				<p>lending of funds and familiarize with merits and demerits o e-banking applications.</p> <p>iii. Categorize the financial frauds in e-banking sector.</p>
13	301	Security Analysis and Portfolio Management	2017	<p>i. Find security analysis, basics of investment and objectives; fundamental analysis and technical analysis and outline valuation of securities, constant growth and multiple growth models.</p> <p>ii. Illustrate portfolio theory, CAPM, SMLand APT models and investigate portfolio evaluation; sharpe's, treynor's and Jensen's performance index.</p> <p>iii. Synthesize portfolio revision, need and strategies.</p>
14	302.	Accounting for Managerial Decisions	2017	<p>i. Learn the concept of management accounting, cost analysis for pricing decision and different methods of pricing and understand different managerial decisions influencing short and long-term financing.</p> <p>ii. Study the concept of Responsibility Accounting and its uses and trends.</p> <p>iii. Know the essential parameters for evaluation of divisional performance and the emerging issues today</p> <p>iv. Obtain comprehensive knowledge on management reporting and</p>

				reporting practices of Indian corporates.
15	303a.	Tally with GST Application	2017	<ul style="list-style-type: none"> i. To acquaint oneself with skills to prepare financial statements through Tally ERP. ii. To understand basics of GST system and to know steps involved in generating GSTR reports. iii. To know the metrics in calculation and generation of TDS and service tax reports and to acquire skills to create payroll receipts.
16	303c.	Tax planning & Management	2017	<ul style="list-style-type: none"> i. To comprehend the basic knowledge about tax concepts and planning and To provide knowledge on sources of income under different heads ii. Acquire the knowledge on tax planning with regard to location iii. To provide the skills of tax planning regard to managerial decisions and create awareness about tax incentive of exports.
18	305a	Fundamentals of Accounting	2017	<ul style="list-style-type: none"> i. To provide basic knowledge on accounting and its preparation and enable the students to prepare final accounts ii. To help the students to acquire the skills of financial statement analysis iii. To provide the basic knowledge on cost accounting and develop the

				student ability to use the tools of management accounting.
19	401	Financial Derivatives	2017	<ul style="list-style-type: none"> i. Outline financial derivatives concepts, features and types; traders in financial derivatives markets and identify forwards and future contracts concepts, types, uses and functions. ii. Prioritise options in financial derivatives and option pricing models. iii. Compose swap market futures, types and interest rate; pricing swaps. iv. Synthesize stock index futures, options and trading of stock futures and options.
20	402.	Project Planning & Control	2017	<ul style="list-style-type: none"> i. Define a project and operations of corporate long range planning and phases of capital budgeting. ii. Distinguishes project ideas and technical analysis, project rating index and methods of forecasting. iii. Illustrates financial analysis project planning, forms of project organization and performance evaluation of project. iv. Understand Social cost benefit analysis and methods of SCBA v. Contrast public projects context of Indian projects, approval procedure and guidelines for preparation of feasibility report.

21	403a.	Insurance Management	2017	<ul style="list-style-type: none"> i. Perceive the concept of RM, Socio-economic relevance, regulatory framework and latest development in Insurance sector. ii. Acquire knowledge on various types of life insurance policies and the terminology relating to the concept of insurance. iii. Understand different types of non-life insurance with reference to marine and fire insurance and their progress and claim settlement thereon. iv. Seek awareness on miscellaneous insurance including health, personal accident crop insurance and practical problems in implementation and claim settlement. v. Understand different aspects of management of investments of funds by LIC and GIS, Legal restrictions on their investments. Also exhibit the global insurance scenario and future prospects of India insurance.
23	405a	Security Market Operations	2017	<ul style="list-style-type: none"> i. Learn the basic concepts of Indian securities market. ii. Explore the areas of secondary markets in special reference to SEBI guidelines and exemplify about listing of securities in BSE and NSE. iii. Investigate into Indian stock exchanges and Illustrate about stock market with special reference to BSE senssex and NSE indices.

M.Com Accounting & Finance

S. No.	Course Code	Title of the Course	Years of Introduction	Activities/Content with direct bearing on Employability/Entrepreneurship /Skill development
1	101	Accounting Standards & Reporting	2017	iv. Increase the knowledge of students on accounting principles and standards and To enable the students to do inventory valuation v. Impart the ability to find out the cash flows and provide the skills to value goodwill vi. Create awareness about IFRS and segment reporting
2	102.	Financial Management	2017	vi. Describe meaning, functions and objectives; role of financial manager. vii. Examine investment decision, capital budgeting, techniques of CB and methods of CB. viii. Investigate management of working capital, needs and concepts. ix. Assess financing decision, capital structure and capital theories. x. Design dividend decision and theories of dividend.
3	103.	Business	2017	vi. Examine business environment, concept, nature and scope; scanning,

		Environment and Policy		<p>monitoring, changing dimensions of business environment.</p> <p>vii. Illustrates economic environment nature and scope and new economic policy.</p> <p>viii. Develop political, legal environment; reasons for state intervention and government business interface.</p> <p>ix. Study the socio cultural environment nature, impact of social responsibility and business ethics.</p> <p>x. Interpret global environment; benefits and problems of MNCs and WTO.</p>
4	104.	Organisational Behaviour	2017	<p>iv. Acquire knowledge on the conceptual frame work and emerging issues of OB and Study different theories of personality and motivation</p> <p>v. Form a clear idea on group dynamics and inculcate the skills to become a leader and Learn about Organizational structures and clear understanding of management of Interpersonal conflicts.</p> <p>vi. Obtain knowledge on Organization dynamics as to organization culture, organizational change and know the significance of OB today.</p>
5	105a	Quantitative Techniques for Business Decisions	2017	<p>iv. Appreciate the use of quantitative techniques, methods of business forecasting and quantitative techniques in business decisions.</p> <p>v. Formulate F distribution and multiple co-relations co-efficient and study probability and non-probability distributions.</p>

				<p>vi. Formulate sampling theory, testing of hypothesis and type I and type II errors and Identify linear programming advantages and disadvantages; graphical and simplex method.</p>
7	201	Advanced cost Accounting	2017	<p>v. Obtain knowledge on the concept of cost accounting and know how it is different from financial and management accounting;</p> <p>vi. Understand the features and objectives of process costing and calculation of process losses and Inter-process profits.</p> <p>vii. Know the concept of equivalent production and accounting treatment for joint and by-products and acquire knowledge on budgetary control and preparation of various functional budgets.</p> <p>viii. Perceive the significance of ABC in cost ascertainment and control.</p>
8	202.	Financial Markets and Services	2017	<p>iv. To understand the framework of Indian financial system and money market and evaluate the metrics of primary market and secondary capital market.</p> <p>v. Demonstrate the role of merchant bankers and to analyze the metrics involved in credit rating the financial instruments issued by companies in primary market.</p> <p>vi. Create plans and understand the metrics for getting finance from venture</p>

				capital firms.
9	203.	Strategic Financial Management	2017	<p>vi. Describe strategic management concept, importance and purpose; strategic planning concept and characteristics,</p> <p>vii. Explain Strategic financial management success factors and constraints.</p> <p>viii. Illustrate corporate valuation approaches and guidelines; value based management.</p> <p>ix. Identify financial distress and restructuring; countering financial distress.</p> <p>x. Justify corporate sickness and financial engineering; fund raising and fund deployment strategies.</p>
10	204.	Corporate Governance	2017	<p>v. Obtain knowledge on CG Mechanism and emerging issues in CG and Know the genesis of CG in China USA and UK and also the code of the best practices.</p> <p>vi. Gain Knowledge on the historical backdrop of CG in India and the guild lines pronounced by various committees for effective practice in India.</p> <p>vii. Discern knowledge on the composition of Board of Directors and Audit Committees and know the role of internal Auditors in India.</p> <p>viii. Understand the CG standards and practices in India with focus on IT and futures of CG in India.</p>

11	205a	Working Capital Management	2017	<p>iv. To impart basic knowledge on working capital concepts and source of WC and to provide the skills to estimate working capital</p> <p>v. To enable the students familiarise with the cash management techniques and comprehend the concept of receivables and its management.</p> <p>vi. To provide the skills of inventory management with different techniques.</p>
12	206a	e-Banking Operations	2017	<p>iv. To understand the RBI's financial norms to be followed by commercial banks and to investigate into the roles of various commercial banks in India.</p> <p>v. To analyze the mechanism of offline and online borrowing and lending of funds and familiarize with merits and demerits of e-banking applications.</p> <p>vi. Categorize the financial frauds in e-banking sector.</p>
13	301	Security Analysis and Portfolio Management	2017	<p>iv. Find security analysis, basics of investment and objectives; fundamental analysis and technical analysis and outline valuation of securities, constant growth and multiple growth models.</p> <p>v. Illustrate portfolio theory, CAPM, SML and APT models and investigate portfolio evaluation; Sharpe's, Treynor's and Jensen's performance index.</p> <p>vi. Synthesize portfolio revision, need and strategies.</p>

14	302.	Accounting for Managerial Decisions	2017	<p>v. Learn the concept of management accounting, cost analysis for pricing decision and different methods of pricing and understand different managerial decisions influencing short and long-term financing.</p> <p>vi. Study the concept of Responsibility Accounting and its uses and trends.</p> <p>vii. Know the essential parameters for evaluation of divisional performance and the emerging issues today</p> <p>viii. Obtain comprehensive knowledge on management reporting and reporting practices of Indian corporates.</p>
15	303a .	Tally with GST Application	2017	<p>iv. To acquaint oneself with skills to prepare financial statements through Tally ERP.</p> <p>v. To understand basics of GST system and to know steps involved in generating GSTR reports.</p> <p>vi. To know the metrics in calculation and generation of TDS and service tax reports and to acquire skills to create payroll receipts.</p>
16	303c .	Tax planning & Management	2017	<p>iv. To comprehend the basic knowledge about tax concepts and planning and To provide knowledge on sources of income under different heads</p> <p>v. Acquire the knowledge on tax planning with regard to location</p> <p>vi. To provide the skills of tax planning regard to managerial decisions and</p>

				create awareness about tax incentive of exports.
18	305a	Fundamentals of Accounting	2017	<p>iv. To provide basic knowledge on accounting and its preparation and enable the students to prepare final accounts</p> <p>v. To help the students to acquire the skills of financial statement analysis</p> <p>vi. To provide the basic knowledge on cost accounting and develop the student ability to use the tools of management accounting.</p>
19	401	Financial Derivatives	2017	<p>v. Outline financial derivatives concepts, features and types; traders in financial derivatives markets and identify forwards and future contracts concepts, types, uses and functions.</p> <p>vi. Prioritise options in financial derivatives and option pricing models.</p> <p>vii. Compose swap market futures, types and interest rate; pricing swaps.</p> <p>viii. Synthesize stock index futures, options and trading of stock futures and options.</p>
20	402.	Project Planning & Control	2017	<p>vi. Define a project and operations of corporate long range planning and phases of capital budgeting.</p> <p>vii. Distinguishes project ideas and technical analysis, project rating index and methods of forecasting.</p> <p>viii. Illustrates financial analysis project planning, forms of project</p>

				<p>organization and performance evaluation of project.</p> <p>ix. Understand Social cost benefit analysis and methods of SCBA</p> <p>x. Contrast public projects context of Indian projects, approval procedure and guidelines for preparation of feasibility report.</p>
21	403a	Insurance Management	2017	<p>vi. Perceive the concept of RM, Socio-economic relevance, regulatory framework and latest development in Insurance sector.</p> <p>vii. Acquire knowledge on various types of life insurance policies and the terminology relating to the concept of insurance.</p> <p>viii. 48. B. Pharmacy

S.No.	Course Code	Title of the Course	Years of Introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/Skill development
1	BPH 101A	Mathematics (For Bi.P.C. Stream)	2017	1. This program shall create an awareness about the mathematical problems, to develop an statistical evaluation.

				<p>2. To adopt skills in identifying and solving problems.</p> <p>3. Know the theory and their application in Pharmacy research</p> <p>4. Solve the different types of problems by applying theory in drug discovery</p>
2	BPH 101B	Biology (For M.P.C. Stream)	2017	
3	BPH 101C	Biology Practicals (For M.P.C. Stream)	2017	
4	BPH 102	English & Soft Skills	2017	<p>1.To equip students with Pre-presentations and to understand the structure of a good presentation and devise various techniques for delivering a successful presentation. To help students overcome stage fear and take questions.</p> <p>2.To enable the students to become global citizens.</p> <p>3.This course will prepare the young pharmacy student to interact effectively with doctors, nurses and other health workers.</p> <p>4.At the end of the course the students will get the soft skills set to work cohesively with the team as a team player and add value to the</p>

				pharmaceutical business.
5	BPH 103	Pharmaceutical. Inorganic Chemistry	2017	<p>1.To understand the history and concept of pharmacopoeia and its editions.</p> <p>2. Knowledge about the sources of impurities and methods to determine the impurities in inorganic pharmaceuticals.</p> <p>3. Identification of limit tests of different pharmaceutical inorganic compounds.</p> <p>4. To understand the method to prepare inorganic pharmaceuticals.</p> <p>5. To justify the medicinal importance of acidifiers, antacids, cathartics and antimicrobial agents as gastrointestinal agents.</p> <p>6. To discuss the handling and applications of radiopharmaceuticals.</p>
6.	BPH 104	Pharmaceutical Organic Chemistry-I	2017	<p>1.Guess and write the structure, systematic/ trivial name, and pharmaceutical uses (if any) associated with the specified organic compounds.</p> <p>2.Understand the general concept of isomerism and distinguish structural isomers.</p> <p>3.Infer the chemical nature of the compounds on</p>

				<p>the basis of qualitative chemical tests.</p> <p>4. Understand the significance of certain electronic effects with respect to the reactivity/stability of organic compounds specified.</p> <p>5. Understand and gain insight into the organic reactions by analyzing their fair reaction mechanisms</p>
7.	BPH 105	Human Anatomy and Physiology	2017	<p>1. Know the fundamental knowledge on the structure and functions of the various systems of the human body.</p> <p>2. understanding all the homeostatic mechanisms of the body</p> <p>3. Understand the relationship of anatomy with various disciplines of pharmacy.</p> <p>4. Understand the dynamic constancy of the body, cell and its components, tissue and types of tissue, blood and its function and composition</p>
8.	BPH 106	Pharmaceutical Inorganic Chemistry Practicals	2017	<p>1. To recall the sources of limit tests, preparation and identification of compounds.</p> <p>2. To demonstrate the preparation of inorganic pharmaceuticals</p>

				<p>3. To apply knowledge to perform modified limit tests.</p> <p>4. To analyze various inorganic pharmaceutical compounds.</p> <p>5. To select suitable method for the preparation of inorganic pharmaceuticals.</p> <p>6. To assess quality of inorganic pharmaceuticals.</p>
9.	BPH 107	Pharmaceutical Organic Chemistry-I Practicals	2017	<p>1. Assess the identity in terms of the physico-chemical properties of the compounds of specified chemical classes</p> <p>2. Get hands-on experience in basic techniques of organic synthesis</p>
10.	BPH 108	Human Anatomy and Physiology Practicals	2017	<p>1. Differentiate the structures of the various systems of the human body.</p> <p>2. Perform the experiments like blood cell count, hemoglobin content, bleeding and clotting time and various physiological Parameters theoretically and practically.</p> <p>3. Identify the structural (microscopically and</p>

				macroscopically) and functional details about different organ systems such as cardiovascular, lymphatic, digestive, muscular system
11	BPH 109	General & Dispensing Pharmacy	2017	Course enables the student to understand and appreciate the influence of pharmaceutical additives and various pharmaceutical dosage forms on the performance of the drug product
12	BPH 110	Pharmaceutical Organic Chemistry-II	2017	<p>1. Guess and write the structure, systematic/ trivial name, and pharmaceutical uses (if any) associated with the specified organic compounds.</p> <p>2. Understand the general concept of isomerism and distinguish structural isomers.</p> <p>3. Infer the chemical nature of the compounds on the basis of qualitative chemical tests.</p> <p>4. Understand the significance of certain electronic effects with respect to the reactivity/ stability of organic compounds specified.</p> <p>5. Understand and gain insight into the organic reactions by analyzing their fair reaction mechanisms</p>

13	BPH 111	Computer applications	2017	<p>1. know the various types of application of computers in pharmacy profession</p> <p>2. know the various types of databases used in profession</p> <p>3. know the usage of softwares in pharmacy</p>
14	BPH 112	Pharmacognosy I	2017	<p>The main purpose of subject is to impart the students the knowledge of how the secondary metabolites are produced in the crude drugs, how to isolate and identify and produce them industrially. Also this subject involves the study of producing the plants and phytochemicals through plant tissue culture, drug interactions and basic principles of traditional system of medicine.</p>
15	BPH 113	Human Anatomy and Physiology and Pathophysiology	2017	<p>1. Identifies Name the signs, symptoms and complications of the diseases.</p> <p>2. Students Get thorough knowledge of the relevant aspects of pathology of various conditions with reference to its pharmacological applications, and understanding of basic pathophysiological mechanisms.</p> <p>3. To Study the aetiology and pathogenesis of the</p>

				<p>selected disease states</p> <p>4.The baseline knowledge required to practice medicine safely, confidently, rationally and effectively.</p>
16	BPH 114	General & Dispensing Pharmacy Practicals	2017	This is help to understand the basic information of formulation process and how to optimise quality control solid, semisolid and parenteral dosage forms
17	BPH 115	Pharmaceutical Organic Chemistry-II Practicals	2017	This subject is designed to impart fundamental knowledge on the structure,chemistry and therapeutic value of drugs. The subjectemphasizes on structure activity relationships of drugs, importance of physicochemical properties and metabolism ofdrugs. The syllabus also emphasizes on chemicalsynthesis of important drugs under each class
18	BPH 116	Computer applications Practicals	2017	<ol style="list-style-type: none"> 1. know the various types of application of computers in pharmacy profession 2. know the various types of databases used in profession 3. know the usage of softwares in pharmacy

19	BPH 117	Pharmacognosy I Practicals	2017	To know the modern extraction techniques, characterization and identification of the herbal drugs and phytoconstituents by use chromatographic technique
20	BPH 201	Physical pharmacy –I (Theory)	2017	1.The course deals with the various physical and physicochemical properties, and principles involved in dosage forms/formulations. 2.Theory and practical components of the subject help the student to get a better insight into various areas of formulation research and development, and stability studies of pharmaceutical dosage forms.
21	BPH 202	Pharmaceutical Engineering (Theory)	2017	1. To know various unit operations involved in manufacturing of pharmaceuticals. 2. To understand the concepts of flow of fluids, size reduction and size separation. 3 To perform different mechanisms of heat transfer. 4 To compare and contrast different types of evaporation and distillation process. 5 To determine the factors influencing

				<p>mixing, filtration and centrifugation.</p> <p>6 To elaborate various preventive methods used for corrosion control in pharmaceutical industries.</p>
22	BPH 203	Pharmaceutical organic chemistry III (Theory)	2017	<ul style="list-style-type: none"> • Guess and write the structure according to the stereochemical specifications. • Fairly understand the aspects of heterocyclic chemistry in terms of naming and reactivity. • Assess and understand the pharmaceutical applications and importance of the specified named reactions.
23	BPH 204	Pharmaceutical Biochemistry (Theory)	2017	<p>1. Understand the principles of various fields of chemistry and biology (organic chemistry, analytical chemistry, biochemistry, genetics, metabolism, and molecular biology)</p> <p>2. Develop as independent thinkers who are responsible for their own learning. Develop transferable quantitative skills.</p>

24	BPH 205	Environmental studies (Theory)	2017	<p>This program shall create an awareness about environmental problems, develop an attitude towards of concern for the environment.</p> <p>2 To compare the natural, renewable and non-renewable resources and the problems associated with them.</p> <p>3 To motivate the learners to participate in environment protection and improvement.</p> <p>4 To analyze the concepts of eco system including structure and functions.</p> <p>5 To adopt skills in identifying and solving environmental problems.</p> <p>6 To develop an attitude of concern for the environment</p>
25	BPH 206	Physical pharmacy –I (Practical)	2017	<p>This course helps to compare and evaluate the solubility of various combination compound modify for better solubility approaches by use different level of methods</p>
26	BPH 207	Pharmaceutical Engineering (Practical)	2017	<p>To understand the basic principles involved in unit operations such as size reduction, size separation, distillation and drying.</p> <p>2. To demonstrate and explain about the</p>

				<p>construction, working and applications of pharmaceutical equipment's such as colloid mill, planetary mixer, fluidized bed dryer and freeze dryer.</p> <p>3. To experiment with the process variables of filtration, evaporation and infer the same.</p> <p>4. To determine radiation constant of brass, iron, unpainted and painted glass.</p> <p>5. To determine overall heat transfer coefficient by heat exchanger and calculate the efficiency of steam distillation.</p> <p>6. To estimate moisture content, loss on drying and construct drying curves for calcium carbonate and starch.</p>
27	BPH 208	Pharmaceutical organic chemistry III (Practical)	2017	<p>1. Guess and write the structure, systematic/trivial name, and pharmaceutical uses (if any) associated with the specified organic compounds.</p> <p>2. Understand the general concept of isomerism and distinguish structural isomers.</p> <p>3. Infer the chemical nature of the</p>

				<p>compounds on the basis of qualitative chemical tests.</p> <p>4. Understand the significance of certain electronic effects with respect to the reactivity/ stability of organic compounds specified.</p> <p>5. Understand and gain insight into the organic reactions by analyzing their fair reaction mechanisms</p>
28	BPH 209	Pharmaceutical Biochemistry (Practical)	2017	<p>.1. Understand the principles of various fields of chemistry and biology (organic chemistry, analytical chemistry, biochemistry, genetics, metabolism, and molecular biology)</p> <p>2. Develop as independent thinkers who are responsible for their own learning.</p> <p>3. Develop transferable quantitative skills.</p>
29	BPH 210	Physical Pharmacy II (Theory)	2017	<p>1. The course deals with the various physical and physicochemical properties, and principles involved in dosage forms/formulations.</p> <p>2. Theory and practical components of the</p>

				subject help the student to get a better insight into various areas of formulation research and development, and stability studies of pharmaceutical dosage forms
30	BPH 211	Pharmaceutical Analysis I (Theory)	2017	<p>1) To understand selected instrumental analytical techniques (spectroscopic and chromatographic methods) and differentiate with volumetric analysis.</p> <p>To gain knowledge on interaction of EMR with matter and to build the analytical understanding at the level of atom, group and molecular structure of organic and inorganic compounds with different functional groups and their applications in pharmacy.</p> <p>3) To maximize knowledge on characterization and estimation of ions by spectroscopical techniques</p> <p>4) To simplify affinity of matter with stationary phase and mobile phase, physical and chemical.</p>
31	BPH 212	Pharmaceutical Technology I (Theory)	2017	<p>1. basic concepts in the field of drug delivery systems that is used in Pharmaceutical Technology.</p>

				<ol style="list-style-type: none"> 2. uses pharmaceutical information sources medical 3. Lists in the form of liquid drug delivery systems. 4. Defines the concepts of dissolution, solubility and stability. 5. Design Solution formulations.
32	BPH 213	Pharmacognosy II (Theory)	2017	<p>This subject is intended to impart students about the fundamental knowledge of how the secondary metabolites are produced in the crude drugs, how to isolate and identify and produce them industrially, involved in the study of producing plants and phytochemicals through plant tissue culture, drug interactions and basic principles of traditional system of medicine.</p> <ol style="list-style-type: none"> 1. Significance of pharmacognostic parameters & study of crude drugs. 2. Understand the underlying reason of evolutionary significance of secondary metabolites production in plants & other organisms & deduce their significance as medicinal molecules.

				<p>3. How these primarymetabolites are used comprehensively as a source to develop Pharmaceutical & industrial applications.</p> <p>Study about the source, name, chemical structures, methods of extraction, qualitative & quantitative analysis of glycosides & tannin compounds of plant origin.</p>
--	--	--	--	---

33	BPH 214	Pharmacoinformatics & Basics in drug discovery (Theory)	2017	<ol style="list-style-type: none"> 1. Thorough Knowledge on Bioinformatics and its classification. 2. Importance of drug discovery, lead molecules in the preparation of drugs in pharmaceutical industries. 3. Good information about drug design, ligand – receptor mechanism and its applications. 4. How this subject is collaborate with other disciplinary subjects, Understanding Genomics & transcriptomics.
34	BPH 215	Pharmaceutical pharmacy II (Practical)	2017	This course helps to compare and evaluate the solubility of various combination compound modify for better solubility approaches by use different level of methods
35	BPH 216	Pharmaceutical Analysis I (Practical)	2017	<ol style="list-style-type: none"> 1. Discusses the effect of impurities on the quality of drugs and behavioural pattern of drugs 2. Aids in understanding the SOP and usage of software associated with various analytical instruments <p>Helps in gaining knowledge of interpretation of</p>

				spectra and of chromatograms
36	BPH 217	Pharmaceutical technology I (Practical)	2017	1.Preparing the solutions 2.Preparing the emulsions 3.Preparing the syrups 4.Preparing the semisolid dosage forms
37	BPH 218	Pharmacognosy II (Practical)	2017	1. Demonstrate chemical tests to identify unorganized crude drugs 2. Evaluate the quality and purity of crude drugs 3. Perform linear measurements for crude drug identification Develop quality control methods for standardisation of herbal drugs
38	BPH 301	Pharmaceutical Technology-II	2017	Course enables the student to understand and appreciate the influence of pharmaceutical manufacture of various pharmaceutical dosage forms on the performance of the drug product by use of specific technology
39	BPH 302	Medicinal chemistry - I	2017	1. Gain knowledge on physicochemical and

				<p>biological aspects of various drug classes.</p> <p>2. Judge the effect of structural medications with respect to biological activity</p> <p>Develop awareness about the application of organic synthesis with respected preparation of drugs</p>
40	BPH 303	Pharmacology - I	2017	<p>1. Gain knowledge on pharmacokinetic and pharmacodynamic aspects of drugs in general.</p> <p>2. Develop understanding about physiological, pathological, and pharmacological concepts of nervous system.</p>
41	BPH 304	Pharmaceutical microbiology	2017	<p>1.To know the various types of sterile products with their formulation in large scale industries.</p> <p>2.To acquire knowledge on GMP standards sanitation, personal hygiene in sterile product manufacturing facilities.</p>
41	BPH 305	Drug store and Industrial Management and Marketing	2017	<p>1.This course helps to understand the students how to establish the drug store and functioning the proper channels and also procurement and dispensing of drugs procedure as per government norms.</p> <p>2. Gain knowledge on functioning and management of pharma industry and know the regulating process in all aspects</p>

42	BPH 306	Pharmaceutical Technology-II	2017	This course helps to Identify, formulate, research on pharmaceutical solid and parenteral dosage form and solve complex problems in quality control of product
43	BPH 307	Medicinal chemistry-I practicals	2017	This course helps to how to separation and identification compound given unknown mixture. It imparts take it knowledge on crude separation and identification technique
44	BPH 308	Pharmaceutical Microbiology practicals	2017	1.This course help to able to understand the different levels of microorganism growth at different conditions. 2.Gain knowledge of the various types of sterile products with their formulation in large scale industries and acquire knowledge on GMP standards sanitation, personal hygiene in sterile product manufacturing facilities
45	BPH 309	Medicinal chemistry-II (theory)	2017	1.Gain knowledge on physicochemical and biological aspects of various drug classes. 2.Judge the effect of structural modification with respect to biological activity 3.Develop awareness about the application of organic synthesis with respected preparation of drugs

46	BPH310	Pharmacology II– Theory	2017	<p>1. In continuation with the previous semester, this subject would have continued describing about the different drugs used for the treatment of diseases.</p> <p>2. Students understood the mechanism of drug action and its relevance in the treatment of different diseases.</p> <p>3. Have understood about the drugs used to treat respiratory disorders, metabolic disorders, coagulants and anti-coagulants.</p> <p>4. Recognise and explain the rationales behind the use of widely used, national organization approved treatment for the management and treatment of common diseases and conditions.</p> <p>5. Gained knowledge on the new targets of several disease conditions for the treatment</p>
47	BPH311	Pharmaceutical. Analysis II(Theory)	2017	<p>1.Gain knowledge on identification of functional groups of various drugsand other excipients.</p> <p>2.Judge the chemical interaction between the compound that effect on structural modification ions with respect to biological activity</p> <p>3.Develop awareness about the analytical equipment which are help to obtaina good quality control of</p>

				pharmaceutical formulation as per pharmacopeia's
48	BPH312A	Forensic Pharmacy– Theory	2017	<p>1.To recall the pharmaceutical legislations, ethics, right to information, medical termination of pregnancy and intellectual property rights.</p> <p>2.To relate the significance of Drugs and cosmetics act 1940 and its rules 1945 in relation to import and manufacture of drugs.</p> <p>3. To apply the knowledge on schedules pertaining to Drugs and cosmetics act 1940 and its rules 1945 and also administration of the act and rules.</p> <p>4. To understand the functions of pharmacy councils and implementation of education regulations in pharmacy.</p> <p>5. To appraise the importance of medicinal and toilet preparations act and narcotic drugs and psychotropic substances act and rules.</p> <p>6 To discuss the salient features of drugs and magic remedies act, prevention of cruelty to animals' act and drugs price control order.</p>
49	BPH312B	Clinical Trials– Theory	2017	1.Know the regulatory requirements for conducting clinical trial

				<p>2.To understand the various types of clinical trial designs</p> <p>3.To gain knowledge on basic concepts and establishment of pharmacovigilance</p> <p>4.To know the ADRreporting, methods and tools used in pharmacovigilance</p>
50	BPH312 C	Industrial.Pharmacy & Cosmetic Technology– Theory	2017	
51	BPH313	Medicinal Chemistry-II Practicals	2017	<p>This course helps to how to separation and identification compound given unknown mixture.</p> <p>It imparts take it knowledge on crude separation and identification technique</p>
52	BPH314	Pharmacology-II Practicals	2017	<p>1.Handling of different instruments used in Experimental Pharmacology.</p> <p>2.Know about the different routes of drug administration, blood withdrawal etc.,</p> <p>3.Evaluate the different activities on animals.</p> <p>4.Demonstration of different simulation methods.</p> <p>5.They would have finally learnt to apply the knowledge of drugs practically using simulated pharmacological experiments.</p>

53	BPH315	Pharmaceutical. Analysis II Practicals	2017	<p>1. Handling of different analytical instruments.</p> <p>2. Know about the different spectroscopy and chromatography techniques that helps to attain desired quality control of all pharmaceutical aspects as per the standard pharmacopoeias</p> <p>5. Finally learnt to apply the knowledge to make good stability of pharmaceutical product by using of pharmaceutical analytical technical method.</p>
54	BPH 401	Medicinal Chemistry-III	2017	<ol style="list-style-type: none"> 1. To develop an understanding of the physico-chemical properties of drugs. 2. To understand how current drugs were developed by using pharmacophore modelling and docking technique. 3. To acquire knowledge in the chemotherapy for cancer and microbial diseases and different anti-viral agents. 4. To acquire knowledge about the mechanism pathways of different class of medicinal compounds. 5. To have been introduced to a variety of drug classes and some pharmacological properties.

				6. To acquire knowledge on thrust areas for further research
55	BPH 402:	Pharmacology-III	2017	<ol style="list-style-type: none"> 1. Students would have understood the pharmacological actions of different categories of drugs 2. They would have studied in detail about mechanism of drug action at organ system/sub cellular/ macromolecular levels. 3. They would have understood the application of basic pharmacological knowledge in the prevention and treatment of various diseases. 4. They would have observed the effect of drugs on animals by simulated experiments 5. They would get an idea about correlation of pharmacology with other bio medical sciences. 6. They would have understood the signal transduction mechanism of various receptors
56	BPH 403:	Pharmacognosy-III	2017	<ol style="list-style-type: none"> 1. Terpenes, Polyphenols, Alkaloids, Pharmacology, Toxicity, 2. Formulations and Preparations of Herbal Medicines. 3. How herbs influence our physiology and can be

				<p>helpful against several disorders.</p> <p>DNA Finger printing.</p>
57	BPH 404:	Biopharmaceutics & Pharmacokinetics	2017	<ol style="list-style-type: none"> 1. Understand the basic concepts in biopharmaceutics and pharmacokinetics and them 2. Use of plasma drug concentration-time data to calculate the pharmacokinetic parameters to describe the kinetics of drug absorption, distribution, metabolism, excretion, 3. To understand the concepts of bioavailability and bioequivalence of drug products and them <p>Understand various pharmacokinetic parameters, their significance & applications</p>
58	BPH 405A:	Chemistry Of Natural Products	2017	<ol style="list-style-type: none"> 1. To attain detailed knowledge about chemistry of medicinal compounds from natural origin. 2. To understand general methods of structural elucidation of medicinally active natural compounds. 3. To attain knowledge regarding isolation and purification of medicinal compounds from natural origin.
59	BPH 405B:	Hospital & Community Pharmacy	2017	<ol style="list-style-type: none"> 1. Discuss the roles and responsibilities of hospital pharmacist, hospital drug policies and guidelines

				<p>for hospital pharmacy</p> <ol style="list-style-type: none"> 2. Discuss various drug distribution methods in a hospital pharmacy 3. Apply various methods of inventory control 4. Formulate parenteral preparations Contribute to a newsletter for providing continuous education and awareness 5. Explain about handling and packaging of radiopharmaceuticals
60	BPH 405C	Pharmacovigilance	2017	<ol style="list-style-type: none"> 1. Explain the regulatory requirements for conducting clinical trial 2. Describe in detail about various types of clinical trial designs 3. Explain the responsibilities of key players involved in clinical trials 4. Describe the documentary requirements for Clinical trials 5. Explain Adverse drug reaction and its management 6. Describe basic concepts, and establishment of Pharmacovigilance 7. Explain ADR reporting, methods and tools used

				<p>in Pharmacovigilance</p> <p>8. Describe Pharmacoeconomics and safety pharmacology</p>
61	BPH 406	Medicinal Chemistry-III Practicals	2017	<p>Synthesis compounds of medicinal interest</p> <p>2. Conduct monograph analysis of the pharmaceutical compounds</p> <p>3. Determine the amount of drug present in an unknown solution</p> <p>4. Estimate the purity of drugs by performing assays</p> <p>5. Determine partition coefficient and dissociation constant of a given compound</p> <p>6. Conduct planned experiments and prepare laboratory report in a standard format</p>
62	BPH 407	Pharmacology-III Practicals	2017	<p>1. Demonstrate intraperitoneal and intramuscular routes of administration of drugs in animals and describe different anaesthetics used in laboratory animals</p> <p>2. Identify and select laboratory appliances used in experimental pharmacology</p> <p>3. Recommend the physiological salt solution for different isolated tissue preparations</p>

				<p>4. Perform a bioassay procedure and create a Dose Response Curve</p> <p>5. Demonstrate the screening of a drug for CNS activity</p> <p>6. Conduct planned experiments and prepare laboratory report in a standard format</p>
63	BPH 408	Pharmacognosy-III Practicals	2017	<p>1. Identify cell wall constituents and cell inclusions</p> <p>2. Identify the crude drugs by its morphological characteristics and study the anatomical characters by preparing slides</p> <p>3. Perform chemical tests to identify unorganized crude drugs and lipids</p> <p>4. Prepare herbarium sheets</p> <p>5. Conduct planned experiments and prepare laboratory report in a standard format</p>
64	BPH 409	Biopharmaceutics & Pharmacokinetics Practicals	2017	<p>1. Compare the in-vitro drug release profile of different marketed products</p> <p>2. Perform the solubility enhancement techniques for improvement of drug release of poorly water-soluble drugs</p> <p>3. Estimate the bioavailability (absolute and relative) and bioequivalence from the given clinical data</p> <p>4. Calculate the drug content in blood sample using</p>

				<p>Area Under Curve approach</p> <p>5. Calculate and interpret various pharmacokinetic parameters from the given clinical data</p>
65	BPH 410:	Novel Drug Delivery Systems	2017	<p>1. The use raw data and derive the pharmacokinetic models</p> <p>2. and parameters the best describe the process of drug absorption, distribution, metabolism and elimination.</p> <p>3. The critical evaluation of biopharmaceutic studies involving drug product equivalency.</p> <p>4. The design and evaluation of dosage regimens of the drugs using pharmacokinetic and biopharmaceutic parameters.</p> <p>5. The potential clinical pharmacokinetic problems and application of basics of pharmacokinetic</p>
66	BPH 411	Pharmaceutical Biotechnology (Theory)	2017	<p>1. To know the basics of biotechnology techniques and the various systems used.</p> <p>2. To understand the method of genetic engineering for production of rDNA products including monoclonal antibodies.</p> <p>3. To clarify application of geetic engineering in</p>

				<p>animals.</p> <ol style="list-style-type: none"> 4. To understand enzymes and their uses by immobilization. 5. To illustrate the use of fermenter for the production of fermentation products and purification by downstream process.
67	BPH 412:	Clinical Pharmacy & Therapeutics	2017	<ol style="list-style-type: none"> 1. Ability to apply the concepts of Pharmacokinetics to individualize the drug dosage regimen in clinical settings. 2. Ability to design a dosage regimen of a drug based on its route of administration 3. Ability to design and implement pharmacokinetic services 4. Intravenous to Oral conversion of dosage regimens
68	BPH 413:	Comprehensive Viva Voce	2017	<ol style="list-style-type: none"> 1. There shall be a Comprehensive Viva-Voce in IV-year II semester. The Comprehensive Viva-Voce will be conducted by a committee consisting of Head of the Department and two Senior Faculty members of the Department. 2. The Comprehensive Viva-Voce is intended to assess the students understanding of the subjects he studied during the B. Tech. course of study.

				<p>3. The Comprehensive Viva-Voce is evaluated for 100 marks by the Committee.</p> <p>There are no internal marks for the Comprehensive Viva-Voce.</p>
69	BPH 414:	Project Work &Seminar	2017	<ol style="list-style-type: none"> 1. Final Year Projects represent the culmination of study towards the Bachelor of Pharmaceutical sciences degree. 2. Projects offer the opportunity to apply and extend material learned throughout the program. 3. Assessment is by means of a seminar presentation, submission of a thesis, and a public demonstration of work undertaken. 4. In contrast to the majority of courses studied elsewhere in the program, projects are undertaken individually or in small groups. 5. This necessarily introduces the dimension of workload management into the program to enable completion of a large, relatively unstructured "assignment" over the course of the semester.

M.Pharmacy (Pharmacology)

S.No	Course Code	Title of the Course	Years of Introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/Skill development
1	MPH 101A(Pharmacology)	General & Systemic Pharmacology	2017	<ol style="list-style-type: none"> 1. Describe the instruments in experimental pharmacology. 2. Know CPCSEA guidelines and OECD guidelines. 3. Know animal physiology with their biochemical reference values in various animal species. 4. Do collection of blood, body fluids and urine from experimental animals. 5. Record the effect of drug on Concentration Response Curves (CRC) using suitable isolated tissue preparations (Synergism and Antagonism).
2	MPH 102A(Pharmacology)	Clinical Pharmacology & Toxicology	2017	<ol style="list-style-type: none"> 1. The pathophysiology of selected disease states and the rationale for drug therapy. 2. The controversies in drug therapy. 3. The importance of preparation of

				<p>individualized therapeutic plans based on diagnosis.</p> <p>4. Understanding the concepts of Clinical research;Therapeutic drug monitoring (TDM) ; concepts of Pharmacotherapeutics, Management & Current Good Clinical Practice of various diseases.</p> <p>5. Studying of various types, mechanisms of Drug interaction; rational for drug combinations; Drug Toxicity and its prevention; Adverse drug reactions and its monitoring</p>
3	MPH 103	Practical 1	2017	<p>1. Recording of concentration response curve (CRC) of acetylcholine</p> <p>2. Record of the CRC of 5-HT on rat fundus preparation.</p> <p>3. Record of the CRC of histamine on guinea pig ileum</p> <p>4. Inotropic and chronotropic effects of drugs on isolated frog heart</p>
4	MPH 104	Practical-II(MAT)	2017	<p>1. Explains the importance of modern</p>

				<p>instrumentation in pharmaceutical analysis</p> <ol style="list-style-type: none"> 2. Describes the fundamental principles and applications of spectroscopic techniques Viz., UV- Visible, IR, FTIR. 3. Discusses the principle and applications of chromatographic techniques 4. Identify appropriate instrumental techniques for the analysis of drugs in bulk or in various dosage forms
5	MPH 105	Modern Analytical Techniques and biostatics Theory	2017	<ol style="list-style-type: none"> 1. Explains the importance of modern instrumentation in pharmaceutical analysis 2. Describes the fundamental principles and applications of spectroscopic techniques Viz., UV- Visible, IR, FTIR. 3. Discusses the principle and applications of chromatographic techniques 4. Identify appropriate instrumental techniques for the analysis of drugs in bulk or in various dosage forms. <p>Explains the concepts of Statistics and their</p>

				applications in pharmacy
6.	MPH 106	Human Values and Professional Ethics-I	2017	<ol style="list-style-type: none"> 1. Awareness of ethical issues and basic ethical approaches. 2. Improved writing skills and understanding of ethical conflict. 3. Enables students to develop ability for moral reasoning and act with ethical deliberations. 4. After studying ethics one is equipped with the ethical sensitivity and moral understanding required to solve complex ethical dilemmas. 5. Learn how to live peacefully
7.	MPH 107	Comprehensive Viva	2017	<ol style="list-style-type: none"> 1. Know the fundamental knowledge on the structure and functions of the various systems of the human body. 2. understanding all the homeostatic mechanisms of the body 3. Understand the relationship of anatomy with various disciplines of pharmacy. 4. Understand the dynamic constancy of the

				body, cell and its components, tissue and types of tissue, blood and its function and composition
8.	MPH 201A (Pharmacology)	Molecular Pharmacology	2017	<ol style="list-style-type: none"> 1. Explain the modes of action of drug at the cellular level by describing their interactions with target proteins 2. Explain the receptor signal transduction processes. 3. Explain the molecular pathways affected by drugs. 4. Understanding the applicability of molecular pharmacology and biomarkers in drug discovery process. 5. Outline the molecular features that are responsible for agonist and antagonist binding, and coupling to effector processes, with reference to the nicotinic, muscarinic, and β-adrenergic receptors
9.	MPH 202 A	Methods in Drug Evaluation	2017	<ol style="list-style-type: none"> 1. Know the commonly used instruments in experimental pharmacology. 2. describe the animal physiology with their biochemical reference values in various

				<p>animal species.</p> <p>3. Study of methods for collection of blood, body fluids and urine from experimental animals.</p> <p>4. Record the effect of drug on Concentration Response Curves (CRC) using suitable isolated tissue preparations (Synergism and Antagonism).</p>
10.	MPH 203	Practical 1	2017	<p>1. Calculation of the PA_2 Calculate the PA_2 Value</p> <p>2. Interpolation bioassay</p> <p>3. Matching or bracketing bioassay</p> <p>4. Three point bioassay</p> <p>5. Four point bioassay</p>
11	MPH 204	Practical-II(BPK)	2017	<p>1. Compare and differentiate between compartmental and non compartmental analysis</p> <p>2. Identify the physiological, Physicochemical and dosage form related factors that affects drug absorption from</p>

				<p>different dosage forms</p> <ol style="list-style-type: none"> 3. Examine the absolute and relative bioavailability of drugs form different dosage forms using either plasma or urine data. 4. Compare the bioequivalence of two drug prodcts
12	MPH 205	BIO-PHARMACEUTICS& PHARMACOKINETICS	2017	<ol style="list-style-type: none"> 1. Understand the concept of ADME of drug in human body. 2. Determine the various pharmacokinetic parameters from either plasma concentration or urinary excretion data for drug 3. Apply the various regulations related to developing BA -BE study protocol for the new drug molecule
13	MPH 206	Human Values and Professional Ethics-II	2017	<ol style="list-style-type: none"> 1. Identify and analyze an ethical issue in the subject matter under investigation or in a relevant field 2. Learn about morals, values & work ethics. 3. Develop commitment

				<p>4. Learn about the different professional roles.</p> <p>5. Ethical, social and environmental awareness</p> <p>6. Professional rights and responsibilities act in morally desirable ways, towards moral commitment and responsible conduct</p>
14	MPH 207	Comprehensive Viva	2017	
15	MPH 301	Mid-Term Evaluation of Research project	2017	<p>6. Final Year Projects represent the culmination of study towards the Master of Pharmaceutical sciences degree.</p> <p>7. Projects offer the opportunity to apply and extend material learned throughout the program.</p> <p>8. Assessment is by means of a seminar presentation, submission of a thesis, and a public demonstration of work undertaken.</p> <p>9. In contrast to the majority of courses studied elsewhere in the program, projects are undertaken individually or in small groups.</p> <p>10. This necessarily introduces the dimension</p>

				of workload management into the program to enable completion of a large, relatively unstructured "assignment" over the course of the semester.
16	MPH 401	Project thesis submission & presentation and Project Viva voce	2017	<ol style="list-style-type: none"> 1. Final Year Projects represent the culmination of study towards the Master of Pharmaceutical sciences degree. 2. Projects offer the opportunity to apply and extend material learned throughout the program. 3. Assessment is by means of a seminar presentation, submission of a thesis, and a public demonstration of work undertaken. 4. In contrast to the majority of courses studied elsewhere in the program, projects are undertaken individually or in small groups. 5. This necessarily introduces the dimension of workload management into the program to enable completion of a large, relatively unstructured "assignment" over the course

M. Pharmacy (Pharmaceutics)

S.No.	Course Code	Title of the Course	Years of Introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/Skill development
1	MPH 101B	ADVANCED PHARMACEUTICAL TECHNOLOGY	2017	<ol style="list-style-type: none"> 1. Course designed to impart advanced knowledge and skills required to learn various aspects and concepts at pharmaceutical industries. 2. The Active Pharmaceutical Ingredients and Generic drug Product 3. The elements of Preformulation studies, Objectives Upon completion of the course, student shall be able to understand Optimization Techniques. 4. Industrial Management and GMP Considerations, development & Stability Testing, sterilization process, Pilot Plant

				Scale Up Techniques & packaging of dosage forms
2	MPH 102B(Pharmaceutics)	Advanced Pharmaceutics	2017	<ol style="list-style-type: none"> 1. Upon completion of this program the student will have fundamental knowledge in preparing conventional dosage forms, pharmaceutical calculation involved in formulation and appreciate the importance of good formulation for effectiveness. 2. The need, concept, design and evaluation of various customized, sustained and controlled release dosage forms using solubility studies and basic theories of dissolution. 3. To formulate and evaluate various novel drug delivery systems based on the molecular weight determination of polymers and its stability studies.
3	MPH 103	Practical-I(PHARMACEUTICS)	2017	<ol style="list-style-type: none"> 1. The passage of drugs, biopharmaceutical parameters. 2. How to do dissolution studies for the dosage forms to know the

				<p>bioavailability of the drugs.</p> <p>3. Solubility studies for the drugs based on its pH and its applications in the formulations of drug delivery systems.</p> <p>4. To determine the molecular weight of the polymers.</p> <p>5. Gives an fundamental knowledge on the stability studies</p>
4	MPH 104	Practical-II(MAT)	2017	<p>5. Explains the importance of modern instrumentation in pharmaceutical analysis</p> <p>6. Describes the fundamental principles and applications of spectroscopic techniques Viz., UV- Visible, IR, FTIR.</p> <p>7. Discusses the principle and applications of chromatographic techniques</p> <p>8. Identify appropriate instrumental techniques for the analysis of drugs in bulk or in various dosage form</p>
5	MPH 105	Modern Analytical Techniques and biostatics Theory	2017	<p>5. Explains the importance of modern instrumentation in pharmaceutical analysis</p>

				6. Describes the fundamental principles and applications of spectroscopic techniques Viz., UV- Visible, IR, FTIR. 7. Discusses the principle and applications of chromatographic techniques 8. Identify appropriate instrumental techniques for the analysis of drugs in bulk or in various dosage forms. 9. Explains the concepts of Statistics and their applications in pharmacy
6.	MPH 106	Human Values and Professional Ethics-I	2017	6. Awareness of ethical issues and basic ethical approaches. 7. Improved writing skills and understanding of ethical conflict. 8. Enables students to develop ability for moral reasoning and act with ethical deliberations. 9. After studying ethics one is equipped with the ethical sensitivity and moral understanding required to solve complex

				ethical dilemmas. 10. Learn how to live peacefully
7.	MPH 107	Comprehensive Viva	2017	
8.	MPH 201B (Pharmaceutics)	INDUSTRIAL PHARMACY	2017	<ol style="list-style-type: none"> 1. The elements of preformulation studies. 2. Acquire skill in preparation of different types of tablets. 3. Acquire knowledge for evaluation of various dosage forms. 4. Acquire the knowledge of processing of dosage form on large scale that suit pharma industry
9.	MPH202B(Pharmaceutics)	PROCESS VALIDATION & CGMP	2017	<ol style="list-style-type: none"> 1. Acquire knowledge on various quality assurance systems, processes and current regulatory guidelines related to manufacturing and distribution. 2. Address quality issues and provide solutions needed to attain Quality leadership in an environment of continual improvement. 3. Understand the importance of effective documentation. 4. To prepare professionally competent

				individuals with Quality concept being engrained to achieve global quality standards in pharmaceutical industries
10.	MPH 203	Practical-I	2017	<p>1. Gain knowledge and acquire skills to prepare different types of tablets.</p> <p>2. Highlights the handling of different equipment's for the preparation and evaluation of various dosage forms</p>
11	MPH 204	Practical-II(BPT)	2017	<p>5. Compare and differentiate between compartmental and non compartmental analysis</p> <p>6. Identify the physiological, Physicochemical and dosage form related factors that affects drug absorption from different dosage forms</p> <p>7. Examine the absolute and relative bioavailability of drugs form different dosage forms using either plasma or urine data.</p> <p>8. Compare the bioequivalence of two drug prodcts</p>

12	MPH 205	BIO-PHARMACEUTICS& PHARMACOKINETICS	2017	<ol style="list-style-type: none"> 1. Understand the concept of ADME of drug in human body. 2. Determine the various pharmacokinetic parameters from either plasma concentration or urinary excretion data for drug 3. Apply the various regulations related to developing BA -BE study protocol for the new drug molecule
13	MPH 206	Human Values and Professional Ethics-II	2017	<ol style="list-style-type: none"> 7. Identify and analyze an ethical issue in the subject matter under investigation or in a relevant field 8. Learn about morals, values & work ethics. 9. Develop commitment 10. Learn about the different professional roles. 11. Ethical, social and environmental awareness 12. Professional rights and responsibilities act in morally desirable ways, towards moral commitment and responsible conduct

14	MPH 207	Comprehensive Viva	2017	
15	MPH 301	Mid-Term Evaluation of Research project	2017	<ol style="list-style-type: none"> 1. Final Year Projects represent the culmination of study towards the Master of Pharmaceutical sciences degree. 2. Projects offer the opportunity to apply and extend material learned throughout the program. 3. Assessment is by means of a seminar presentation, submission of a thesis, and a public demonstration of work undertaken. 4. In contrast to the majority of courses studied elsewhere in the program, projects are undertaken individually or in small groups. 5. This necessarily introduces the dimension of workload management into the program to enable completion of a large, relatively unstructured "assignment" over the course of the semester.

16	MPH 401	Project thesis submission & presentation and Project Viva voce	2017	<ol style="list-style-type: none"> 1. Final Year Projects represent the culmination of study towards the Master of Pharmaceutical sciences degree. 2. Projects offer the opportunity to apply and extend material learned throughout the program. 3. Assessment is by means of a seminar presentation, submission of a thesis, and a public demonstration of work undertaken. 4. In contrast to the majority of courses studied elsewhere in the program, projects are undertaken individually or in small groups. 5. This necessarily introduces the dimension of workload management into the program to enable completion of a large, relatively unstructured "assignment" over the course of the semester.

1.1.3 Activities/Content with direct bearing on Employability/Entrepreneurship/ Skill development

2018-2019

SVU COLLEGE OF ARTS

1. Adult & Continuing Education

S.No	Course Code	Name of the Course	Year of introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/ Skill development	Link to the relevant Document
1	MAAE -1.1	Alternative Learning Systems	2018	<ol style="list-style-type: none">1. Remembrance of different forms of learning.2. Application of different technology support services for effective learning.3. Organization and administration of nonformal education programmes.4. Evaluation of nonformal education programmes.	
2	MAAE-1.2	Policy Studies In Adult/Continuing Education	2018	<ol style="list-style-type: none">1. Identify the socio-political movements during pre-independence period for the promotion of literacy.2. Analyze the trends of adult education programmes during post-independence period from social education to saakshar Bharat Mission.3. Describe the National and International organizations efforts for the promotion of literacy at various levels.4. Explain the State & Central Govt policies on adult education and special reference to literacy, post-literacy and continuing education.	
3	MAAE-1.3	Adult Psychology And Learning	2018	<ol style="list-style-type: none">1: Acquire knowledge on psychological foundations and its relevance to Adult Education and Learners.	

				<p>2: Learn classification of motives and motivation techniques to motivate the Adult Learner.</p> <p>3: Compare the Adult Personality & Child personality based on three Domain principles.</p> <p>4: Examine the Adult Learning characteristics and theories of learning, eventually he/she will apply all aspects in adult class room activity.</p>	
4	MAAE-1.4	Socio-Philosophical Foundatons Of Adult Education	2018	<ol style="list-style-type: none"> 1. Create thinking capacity to survival in the present society with philosophical approach. 2. Know great eminent leaders biography, sacrifices their lives for society. 3. Aware Dalit movement, women movement, co-operative movement in society especially rural areas. 4. Examine the problems of society with reference to bonded labor, child labour, untouchability, transgender and provide awareness on human rights. 	
5	MAAE-1.5	Communication Methods in Adult Education	2018	<ol style="list-style-type: none"> 1. Remembering the concept and methods of communication and their application to adult Education 2. Identifying different models of 	

				<p>communication.</p> <p>3. Describing the media of communication and their utility in continuing education.</p> <p>4. Realising the use of different Audio-visual aids in teaching learning process.</p>	
6	MAAE-1.6	Human Values And Professional Ethics-I	2018	<p>know the importance of professional ethics and to implement the ethical values in various professions.</p> <p>2. understand about the Good and bad values and to analyze the basic moral concepts.</p> <p>3. inculcate the students in the aspects of pursharthas .</p> <p>4. Know different crimes and its impact on personal and social life and theories of punishment</p>	
7	MAAE-2.1	Recent Trends In Adult And Continuing Education	2018	<p>.Identify the variations of literacy growth among States and Nation with reference to gender, rural and urban.</p> <p>2.Recognize the functions, activities of JSS and Saakshar Bharat Mission, to promote Life Long learning.</p> <p>3. Understand the five-year plan period programmes in terms of literacy, non-</p>	

				formal and functional literacy. 4. Examine the significance of the extension activities as third dimension of literacy programmes at field level.	
8	MAAE-2.2	Curriculum And Methods Of Literacy Teaching	2018	<ol style="list-style-type: none"> 1. Remembering the meaning, foundations and theories of curriculum development with reference to adult learners. 2. Distinguishing different principles and approaches of curriculum development. 3. Interpreting the needs and interests of lifelong learners. 4. Executing to evaluate Adult Education programmes 	
9	MAAE-2.3	Research Methods In Adult Education	2018	<ol style="list-style-type: none"> 1. Understanding the concepts and methods of research. 2. Adopting the suitable sampling methods for research studies. 3. Developing tools for research studies. 4. Ability of research report writing. 	
10	MAAE-2.4	Field Work & Practical Assignments	2018	Application of knowledge and	

				<p>skills in project designing</p> <p>2.Ability to do research work.</p> <p>3.Finding solutions to the problems identified in his research work.</p> <p>4.Preparing the research report.</p>	
11	MAAE-2.5	Management Of Adult/Continuing Education	2018	<ol style="list-style-type: none"> 1. Know the principles of Management, Planning and Organizing capacity to conduct Adult Education Programmes. 2. Develop Social and Communication Skills to organize village, Mandal, District, State and Central level programmes. 3. Acquire project techniques for sustainable programmes. 4. Learn and enhance research skills to write project report, monitoring and evaluation of data of Adult Education Programme. 	
12	MAAE-2.6	Human Values And Professional Ethics-Ii	2018	Understand and recognize the importance of Value Education & Human Values and also try to follow the traditional values of family,	

				<p>women and elders in the society.</p> <p>2: Examine code of ethics for medical and health care professionals. They Can sensitize the rural people on Health Issues & Problems.</p> <p>3: Explain the Environmental Protection and relationship between Man and Nature, causes of pollution and impact on environmental health.</p> <p>4: Recognize the need of Social ethics and fight against the anti-social activities, Organ trade, Human trafficking etc.</p>	
13	MAAE-3.1	Training In Adult And Continuing Education	2018	<ol style="list-style-type: none"> 1. Identify the importance of training in Adult and Continuing Education programmes and differences between training and education. 2. Know the training methods, training materials to organize the Adult and Continuing Education programmes. 3. Follow the teaching methods like Lecture, discussion, demonstration and Role Play methods. 4. Recognize training facilities at different levels like National, State, District and Local. 	
14	MAAE-3.2	Comparative Studies In Adult	2018	1: Compare the Adult Education Programmes	

		Education		<p>of different countries based on its aims and significance.</p> <p>2: Compare and contrast of Adult Education movement and progress in different countries like UK, USA, Denmark etc with reference to India.</p> <p>3: Find out the similarities and dissimilarities of Adult Education Programs in selected countries.</p> <p>4: Identify the problems of Adult Education in terms of Planning, Organization and Budget activities in developing countries and India.</p>	
15	MAAE-3.3	Material Development For Adult And Continuing Education	2018	<ol style="list-style-type: none"> 1. Identify the significance of learning materials in Adult Education classes. 2. Design the teaching learning activity objectives for better performance of Teacher educator in Adult Education Programmes. 3. Enhance language forms and competence and tune with the needs of the learner. 4. Develop teaching learning materials for self-learning 	
16	MAAE-3.4a	Peoples' participation And Development	2018	<ol style="list-style-type: none"> 1. Analysing the role and functions of people committees, 	

				<ol style="list-style-type: none"> 2. Understanding the functions of Panchayat Raj institutions. 3. Knowledge on the role of co-operatives in rural development. 4. Ability to catalyse the performance of PRIs and co-operatives. 	
17	MAAE-3.4b	Vocational Education And Skill Development	2018	<ol style="list-style-type: none"> 1. Identify the relationships of Vocational Education and Adults development. 2. Understand the institution training importance and its practices in vocational training. 3. Identify the issues of Rural Vocational training in India and Asian Countries. 4. Provide Vocational Guidance and Counselling for Adult trainees. 	
18	MAAE-3.4c	Guidance And Counselling In Adult And Continuing Education	2018	<ol style="list-style-type: none"> 1. Remembering the concept and theories and perspectives of guidance and counselling in educational process. 2. Recollecting understanding and analysis of educational problems 	

				<p>of a clientele group.</p> <ol style="list-style-type: none"> 3. Knowing the roles and functions of guidance counsellor. 4. Analysing the use of computers and internet in guidance and counselling. 	
19	MAAE-4.1	Monitoring And Evaluation	2018	<p>Identify the concept of monitoring and monitoring systems in adult education</p> <ol style="list-style-type: none"> 2. Describe the different evaluation models. 3. Demonstrate the tools and techniques of evaluation. 4. Understand the importance of learner evaluation. 	
20	MAAE-4.2	Human Resource Development And Management In Lifelong Learning	2018	<ol style="list-style-type: none"> 1. Understand the importance of human resource development and its historical background. 2. Analyze the human capital and its functions in Adult Education. 3. Explain the cost benefit process and problems of measurements. 4. Identify the need of planning in human resource development and relation to Adult Education. 	

21	MAAE-4.3a	Environment And Education	2018	<p>1.Understand the fundamental aspects of environment and need of environmental protection.</p> <p>2: Interpret the environmental crisis with reference to pollutions and its impact of human life need of Environmental Conservation.</p> <p>3: Know the environmental laws and role of individual and community to Control environmental pollution.</p> <p>4: Explain Ecology and eco factors for Ecological Balance.</p>	
22	MAAE-4.3d	Population Education	2018	<p>1. Recollecting the concepts, needs and importance of population related terminologies.</p> <p>2. Analysing the causes and consequences of population growth.</p> <p>3. Distinguishing the roles of different agencies in promotion of population education and control.</p> <p>4. Identifying the different National population policies and influences fertility, mortality and migration.</p>	

23	MAAE-4.4	Dissertation / Project Work	2018	<p>Application of knowledge and skills in project designing</p> <p>2.Ability to do research work.</p> <p>3.Finding solutions to the problems identified in his research work.</p> <p>4.Preparing the research report.</p>	
----	----------	-----------------------------	------	---	--

2. Ancient Indian History, Cultural Archeology

S.No	Course Code	Name of the Course	Year of introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/ Skill development	Link to the relevant Document
1	AIHC&A-304(B)	b) Social and Political Institutions in Ancient India	2018	<ul style="list-style-type: none"> ➤ The student will be able to understand the basic features of various theories and thoughts used in archaeological interpretations. ➤ They can formulate a research proposal and decide on appropriate materials and methods of analysis. ➤ They can present the findings and the process of conducting research in written and verbal formats. 	

2	AIHC&A-305(A)	a) Outlines of Indian History	2018	➤ The non-history students as an external elective course become familiar in understanding the broad phases of Indian history and culture	
3	AIHC&A-404(B)	b) India's Early Cultural Contacts with other Countries	2018	➤ Cross regional cultural diffusion has been an important aspect of historical evolution. ➤ A strong and vibrating civilization having its impact felt upon other contemporary cultures has been a common phenomenon of history ➤ The students were able to understand the influence of Indian culture on Central Asia, south east asia, Japan, Tibet, Persia, Greece, Rome, Indo- China	

3. Area Studies Programme

S.No	Course Code	Name of the Course	Year of introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/ Skill development	Link to the relevant Document
1. 1	SEAP-104	Ancient Indian History Upto 1206 A.D.	2018	1) Students understand the causes for the spread of Indian culture in Southeast Asia. 2) Know the different Indian dynasties of the past in Southeast Asia. 3) Students will be able to learn the impact of Indian cultural on Southeast Asian societies	

2.	SEAPS-203	Regional Geography Of South Pacific And East Asia	2018	1) Students identify physical setting, landforms, climate and soils of South Pacific. 2) Comprehend on Australia, New Zealand, Japan and China Recognize the economic trends in South Pacific and East Asian nations	
3.	SEAPS-303	India And The World	2018	1) Students acquaint knowledge on Opening of Japan and its early western contacts. 2) Knows Japan's militarization, Russo Japanese war and the First World War 3) Gain knowledge on US Occupation of Japan and Post World War-II developments and Japanese foreign relations.	
4.	SEAPS-402	Developing Blue Economy	2018	1) Develop an understanding of the rise of industrial economies like Singapore, Malaysia, Thailand and Indonesia. 2) Comprehend of the economies of Australia and New Zealand. 3) Ability to know the Regional Economic Groups like ASEAN, ESCAP, APEC and EAS.	

TOURISM:

S.No	Course Code	Name of the Course	Year of introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/ Skill development	Link to the relevant Document

1.	T-102	Planning And Development Of Tourism	2018	<ul style="list-style-type: none"> 1) Students understand geographical profile of different countries of Southeast Asia. 2) Know the trends in population movement within Southeast Asia. 3) Students will be able to assess location significance and various infrastructural developments. 	
2	T. 201	Historical Application Of Tourism In India	2018	<ul style="list-style-type: none"> 1) Students list the Christian Missionary activities in Southeast Asian countries. 2) Knows the factors of Indian Emigration, and Chinese economic contribution in Southeast Asia. 3) Comprehensive grasp over different cultures and religions in Southeast Asia 	
3	T 301	Travel Agency And Tour Operations Management	2018	<ul style="list-style-type: none"> 1) Students learn about the different political regimes in Southeast Asian nations. 2) Comprehend on the contemporary political and economic conditions in Southeast Asian countries 3) Analyse the reasons to address some of the questions of contemporary world politics 	
4	T 303	Airline Ticketing And Information Management	2018	<ul style="list-style-type: none"> 1) Students acquaint knowledge on Opening of Japan and its early western contacts. 2) Knows Japan's militarization, Russo Japanese war and the First World War 3) Gain knowledge on US Occupation of Japan and Post World War-II developments and Japanese foreign relations. 	

- 4. Centre for Extension Studies
- 5. Centre for Gandhian Studies
- 6. Centre for Womens Studies

S.No	Course Code	Name of the Course	Year of introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/ Skill development	Link to the relevant document
1	SVUWS 206b	Familial values and Ethics	2018	<ul style="list-style-type: none"> This course helps to define behavior in various situations, help youth make good choices, and solidify the bond of the family values. 	
2	SVUWS-304D	Women's participation in Agriculture & Allied sectors	2018	<ul style="list-style-type: none"> To understand the Role of Women in Agriculture and allied fields and Policies and Programmes for Women in Agriculture importance's in our country and to know the possible oppournities to create agri-business 	

7. Econometrics

S.No	Course Code	Name of the Course	Year of introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/ Skill development	Link to the relevant Document

1	EMT 101	MicroeconomicTheoryI	2018	<ul style="list-style-type: none"> • The microeconomic theory is to analyze how individual decision-makers, both consumers and producers, behave in a variety of economic environments. • The common goal in all of these issues is to identify the incentives of the various participating agents and the trade-offs that they face. • Microeconomics is a branch of economics that studies the behavior of individuals and firms in making decisions regarding the allocation of scarce resources and the interactions among these individuals and firms. • Microeconomics shows conditions under which free markets lead to desirable allocations. • The fundamental concepts of supply and demand, rational choice, efficiency, opportunity costs, incentives, production, profits, competition, monopoly, externalities, and public goods will help you to understand the world around you. 	
---	---------	----------------------	------	---	--

2	EMT 102	MacroeconomicTheoryI	2018	<ul style="list-style-type: none"> • Define and explain the process of calculating national income, identify its components, demonstrate circular flow of income, analyse the various income identities with government and international trade, define the concept of green accounting. • Understand Say's law of market, classical theory of employment and Keynes objection to the classical theory, demonstrate the principle of effective demand and income determination. • Explain the meaning of consumption function, relationship between APC and MPC, consumption and income, concept of multiplier and analyse the theories of absolute and relative income hypotheses. • Understand the relationship between investment and savings, demonstrate investment multiplier, and understand the meaning of MEC and MEI. CO5. Illustrate the meaning of interest, analyse the various theories of interest • The goals are supported by objectives such as minimizing unemployment, increasing productivity, controlling inflation, and more. The macro economy of a country is affected by many forces, and as such, economic indicators are invaluable to assessing different aspects of performance. 	
---	---------	----------------------	------	---	--

3	EMT 103	MathematicalMethods	2018	<ul style="list-style-type: none"> • Formulate mathematical models describing the dynamics of economic systems. Demonstrate the role of quantitative techniques in the field of business/industry, illustrate different types of equations, solve equations and system of equations, understand the concept of sets, illustrate and apply basic set operations. • Explain the rules for calculating derivatives, uses and application in calculating inter-relationship among total, marginal and average cost and revenue, calculate maxima, minima, elasticity, decide the optimal level of production for a firm. • Demonstrate the rules for calculating integration, describe the importance and application of integration in consumers' and producers' surpluses, total revenue and cost. • Illustrate matrix operation, minors, cofactors, use cofactor method to find inverse of a matrix, use Cramer's rule to solve systems of equations. • Students will get to learn applications of mathematical tools to economy. 	
---	---------	---------------------	------	---	--

4	EMT 104	Practical I	2018	CO1 Able to find Mean, Median, Mode, Range, Quartile Deviation and Standard Deviation and Coefficient of Variation. CO2 Able to apply Binomial, Poisson, Normal and Log-Normal Distribution Correlation and Regression Analysis CO3 Able to test small sample tests based on t, F and Chi-square distributions CO4 Able to find Inverse of a Matrix, System of Simultaneous Linear Equations and Cramer's Rule method. CO5 Student can identify the relationship between the economic variables and test their significance which is key factor for economic analysis and policy making or business decisions.	
5	EMT 105	Statistical Methods	2018	CO1 Able to find Mean, Median, Mode, Range, Quartile Deviation and Standard Deviation and Coefficient of Variation. CO2 Able to apply Binomial, Poisson, Normal and Log-Normal Distribution Correlation and Regression Analysis. CO3 Able to test small sample tests based on t, F and Chi-square distributions CO4 formulate Statistical Methods describing the dynamics of economic systems such as production function analysis and solve econometric analysis of underlying data use with knowledge advanced econometric tools and techniques can solve easily. CO5 Student can identify the relationship between the economic variables and test their significance which is key factor for economic analysis and policy making or business decisions.	
6	EMT 106	Human Values and Professional Ethics-I	2018		
7	EMT 201	Microeconomic Theory II	2018	Course Objectives: The microeconomic theory is to analyze how individual decision-makers, both consumers and producers, behave in a variety of economic environments. The factor prices	

8	EMT 202	Macroeconomic Theory II	2018	<p>CO1 The overarching goals of macroeconomics are to maximize the standard of living and achieve stable economic growth</p> <p>CO2 The goals are supported by objectives such as minimizing unemployment, increasing productivity, controlling inflation, and more.</p> <p>CO3 The macro economy of a country is affected by many forces, and as such, economic indicators are invaluable to assessing different aspects of performance.</p> <p>CO4 Meaning and Types of Inflation – Demand-Pull inflation – Cost-Push Inflation – The Phillips curve – The Inflation – Unemployment trade-off.</p> <p>CO5 Objectives of Macroeconomic policies – Objectives of Monetary policy. New-classical and Real Business cycles Theorem – Post-Keynesians - Implications for Stabilization Policies.</p>	
9	EMT 203	Basic Econometrics	2018	<p>CO1 Adequate competency in the frontier areas of economic theory and methods.</p> <p>CO2 Formulation and estimation of a multiple regression model.</p> <p>CO3 Decision about the statistical significance of individual explanatory variable and also over all models</p> <p>CO4 Impacts for the violation of one of the important assumptions for application of OLS regression.</p> <p>CO5 Estimation of system of equations, estimation of panel data models, generalized method of moments, discrete response models, censored regression models and estimation of average treatment effects.</p>	

10	EMT 204	Practical II	2018	<p>CO1 Students can Identify Inter industrial relationships using Input-output analysis,</p> <p>CO2 analyse maximization of profits and minimization of costs can evaluate using Linear Programming,</p> <p>CO3 Analyse relationship of economic variables using simple and multiple regression models which are covered in basic Econometrics</p> <p>CO4 Able to estimate and interpret linear regression models and be able to distinguish between economic and statistical importance</p> <p>CO5 They should be able to critique reported regression results in applied academic papers and interpret the results for someone who is not trained as an economist.</p>	
----	---------	--------------	------	--	--

11	EMT 205	Mathematical Economics	2018	<p>CO1 Students can deal Mathematical calculation of static optimization, Application of Lagrange's method and also student can evaluate Differential Equations and with Economic Applications.</p> <p>CO2 Able to estimate and interpret Inter industrial relationships using Input-output analysis, also analyse maximization of profits and minimization of costs of the firms using Linear Programming method</p> <p>CO3 Economic Applications of Differential Equations – Dynamic Multiplier – Harrod-Domar Model.</p> <p>CO4 Homogeneous Linear Difference Equations with Constant Coefficients – Particular Solution of Non-homogeneous Linear Equations – Linear First Order and Second Order Difference Equations with constant coefficients – Cobweb Model –Market model with Stocks</p> <p>CO5 Formulation of LPP – Basic and Feasible Solutions – Graphical Solution - Simplex Method – Duality in Linear Programming – Elements of Data envelop Analysis and its Applications.</p>	
12	EMT 206	Human Values and Professional Ethics II	2018		

13	EMT 301	<i>Indian Economy</i>	2018	<p>Course Outcomes: At the end of the course, the student will be able to</p> <p>CO1 Students will develop ideas of the basic characteristics of Indian economy, its potential on natural resources. Understand the importance, causes and impact of population growth and its distribution, translate and relate them with economic development.</p> <p>CO2 Understand agriculture as the foundation of economic growth and development, analyse the progress and changing nature of agricultural sector and its contribution to the economy as a whole. Students will obtain information regarding various agricultural issues in India and remedies for it</p> <p>CO3 Students will aware about recent economic affairs such as demonetization, universal basic income, cashless economy, skill and training development schemes, make in India etc</p> <p>CO4 Students will get benefit about various economic issues at local, national and global level.</p> <p>CO5 Grasp the importance of planning undertaken by the government of India, have knowledge on the various objectives, failures and achievements as the foundation of the ongoing planning and economic reforms taken by the government.</p>	
----	---------	------------------------------	------	---	--

14	EMT 302	<i>Economics of Insurance</i>	2018	<p>Course Outcomes: At the end of the course, the student will be able to</p> <p>CO1 Demonstrate knowledge of insurance contracts and provisions, and the features of property-liability insurance, life and health insurance, and employee benefit plans.</p> <p>CO2 Demonstrate knowledge of the operation and management of insurance entities, and the economic implications of organizational design and structure.</p> <p>CO3 Develop skills to facilitate insurance product cost and pricing, marketing, and distribution.</p> <p>CO4 Develop practical skills through professional development seminars, internships, and/or a practicum in insurance and risk management.</p> <p>CO5 Examine the role of public policy including social insurance in personal financial planning and risk management.</p>	
----	---------	-------------------------------	------	--	--

15	EMT 303	<i>Advanced Econometrics</i>	2018	<p>Course Outcomes: At the end of the course, the student will be able to</p> <p>CO1 Concepts of Heteroscedasticity & Multicollinearity. Possible reasons behind the presence of Heteroscedasticity & Multicollinearity. Skill to judge the reliability of estimation in case of violation of basic assumptions for the application of ordinary linear regression method.</p> <p>CO2 Concepts of Autocorrelation reasons behind the presence of Heteroscedasticity & Multicollinearity. Describe the variance/covariance matrix for the regression errors under the assumption that the errors are correlated</p> <p>CO3 Apply modern econometric methods covering time series analysis, financial econometrics, microeconometrics, macroeconometrics and structural econometric modelling;</p> <p>CO4 Interpret and critically evaluate applied economics research literature; demonstrate programming skills and numerical methods; and</p> <p>CO5 Apply methods learned to address policy and business decision questions.</p>	
----	---------	------------------------------	------	---	--

16	EMT 304	<i>Computer Applications and Data Analysis</i>	2018	<p>Course Outcomes: At the end of the course, the student will be able to</p> <p>CO1 Students will get basic knowledge of computers i.e., block diagram, evolution of computer, input/output devices, storing information in computer etc.</p> <p>CO2 At the end of this course student will gain Examine spreadsheet concepts and explore the Microsoft Office Excel environment. Import and export data.</p> <p>CO3 Work with pivot tables and charts. Create and edit charts. Learn to use functions and formulas. Perform analysis tasks using Data analysis pack</p> <p>CO4 Student gained and evaluate Econometric Methods such as OLS, LPM, Logistic regression analyses and conclude using SPSS Package</p> <p>CO5 Finally, student will be able to write programme for Simple statistical analyse and interpret through R-programming.</p>	
----	---------	--	------	---	--

17	EMT 305	Public Finance	2018	<p>.</p> <p>Course Outcomes: At the end of the course, the student will be able to</p> <p>CO1 Understand the sources of finance both public and private, demonstrate the role of government to correct market failures and possible advantage of public financing</p> <p>CO2 Attain the advantages and knowledge of public investments and other government expenditures. Understand the causes of growing public expenditures for various programmes and policies within and outside the country.</p> <p>CO3 Understand the possible burden, benefits and distribution of various types of taxes among various classes of people, know the general trend and impact on general welfare and arouse them to suggest good and bad tax system.</p> <p>CO4 Understand the needs of public borrowing from all possible sources to meet necessary public investment/expenditures. Also be alerted to find sources for repayment</p> <p>CO5 Deliver effectively the preparation of budget and how they are passed in the house. Understand the changes in size and flexibility of state and central budget along with the role played by Finance Commission.</p>	
----	---------	-----------------------	------	---	--

18	EMT 306	<i>Financial Institutions and Markets</i>	2018	<p>Course Outcomes: At the end of the course, the student will be able to</p> <p>CO1 Explain the broad features of Indian financial institutions with its apex banks' objectives and purview. Also understand the instruments to control credit in the country.</p> <p>CO2 Effectively narrate the kinds and components of money with its regulatory system, be aware of the functions, objectives and limitations of commercial banks.</p> <p>CO3 Identify the existence and development of non-banking financial institutions, know the important role of Mutual funds, LIC, investment companies etc., utilize and effectively participate in the development process.</p> <p>CO4 Understand the conditions of financial markets and its impact in the economy</p> <p>CO5 Demonstrate the role and significance of foreign exchange rate and its markets with its impact on various sectors in the economy.</p>	
19	EMT 307	<i>Practical III</i>	2018	<p>Course Outcomes: At the end of the course, the student will be able to</p> <p>CO1 Student will gain Examine spreadsheet. Work with pivot tables and charts. Create and edit charts. Learn to use functions and formulas.</p> <p>CO2 Perform analysis tasks using Data analysis pack using MS-Excel.</p> <p>CO3 Student gained and evaluate Econometric Methods such as OLS, LPM, Logistic regression analyse and conclude using SPSS Package</p> <p>CO4 Student will able to test of Multicollinearity, Heteroscedasticity and Autocorrelation.</p> <p>CO5 Student will be able to write programme for Simple statistical analyse and interpret through R-programming.</p>	

20	EMT 308	IntroductiontoEconometrics	2018	<p>CO1 students will have adequate competency in the frontier areas of economic theory and methods</p> <p>CO2 Use basic econometric estimation techniques such as Ordinary Least Squares to estimate bivariate and multivariate regression models.</p> <p>CO3 Decision about the statistical significance of individual explanatory variable and also over all model.</p> <p>CO4 Impacts for the violation of one of the important assumptions for application of OLS regression.</p> <p>CO5 Students will acquire additional specialization topics are estimation of system of equations, estimation of panel data models, generalized method of moments, discrete response models, censored regression models and estimation of average treatment effects.</p>	
----	---------	----------------------------	------	--	--

14	CO- 401	Dissertation and Viva-Voce	2018	<p>a. Identify key research questions within the field of Demography on which you will carry out independent research.</p> <p>b. Manage your time effectively whilst working on your independent research.</p> <p>c. Demonstrate appropriate referencing and develop skills in other aspects of academic writing.</p> <p>d. Demonstrate knowledge and understanding of report writing.</p> <p>e. Apply the demographic/statistical research training</p>

				acquired in the taught element of the programme by designing an appropriate research strategy and research methodology to carry out your research
15	CO – 402a	Law of Consumer Protection	2018	<ul style="list-style-type: none"> a. Define provision under the Consumer Protection and Right to Information Act and apply them to situations accordingly b. Draft a consumer complaint with ease c. Confidently approach a Consumer Forum and get aware of the redressal mechanism d. To expose the students about Consumer Protection Laws; e. To develop the conceptual understanding of Consumer Protection regime.
16	CO- 404 b	International Human Rights (MOOC / ONLINE COURSE)	2018	<ul style="list-style-type: none"> a. Analyze and comment on key controversies surrounding the development of international human rights law b. Use conceptual tools to follow the developments of human rights law c. Be most effective in contributing to the enforcement of international human rights law

16. Library and Information Science

No.	Course Code	Title of the Course	Years of Introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/Skill development
1	LIS-101	Foundation of Library and Information Science	2018	1.Know the various types of libraries and their role in the society

				<ul style="list-style-type: none"> 2. Learn the Professional ethics and library Legislation in India 3. Understand LIS education in India and various library associations in India
2	LIS102	Knowledge Organization: Classification Theory	2018	<ul style="list-style-type: none"> 1.. Understand the definition, need and purpose of classification 2. Learn the Fundamental Categories, Facet Analysis, types of Isolates in all schemes of classification 3. Understand the Notation, trends and developments in Classification
3	LIS-103P	Knowledge Organization: Classification Practice	2018	<ul style="list-style-type: none"> 1.Learn the Dewey Decimal Classification Scheme 2. Get the skill regarding assigning the class numbers 3.Have knowledge on Tables and Schedules of DDC
4	LIS-104	Knowledge Management	2018	<ul style="list-style-type: none"> 1.Get an idea on the concepts of knowledge management, types of knowledge 2.Understand the knowledge creation models, knowledge transfer in E-World 3.know the tools for knowledge management and neural network and datamining
5	LIS-105	Introduction to Information Technology	2018	<ul style="list-style-type: none"> 1.Gain knowledge on the concepts of computer basics and Network technologies 2.Understand the concepts of Operating Systems, Programming Languages and types of softwares

				3.Learn the Database Management systems, steps in development of databases and get an idea on different library software packages
6.	LIS-106	Human Values and Professional Ethics-I	2018	<p>i. The student will be enriched with several aspects pertaining to Human values and performing of Professional Ethics in day today life.</p> <p>ii. Introduction of several Nature of values to be performed by Humans to lead a good and Peaceful life by extending and imparting good behavior, character and conduct towards people of the society.</p> <p>iii. Introducing different concepts of Bhagavad Gita and its applications in uplifting of Religious values in the present society.</p>
7.	LIS-201	Information Sources and Services	2018	<p>1.Learn documentary and non-documentary sources and different types of information sources</p> <p>2.Know about the Indian and British National Bibliographies, and Electronic Books</p> <p>3.Understand the virtual reference service and translation Services</p>

8.	LIS-202	Knowledge Organization: cataloguing Theory	2018	<p>1.Understand the basic ideas on catalogue, forms of the catalogue, Main Entry and added entries</p> <p>2. Know the Canons, Principles and Laws of Cataloguing</p> <p>3.Gain the knowledge on different types of subject headings, Cooperative and Centralized cataloguing</p> <p>.</p>
9.	LIS-203P	Knowledge Organization: cataloguing Practice	2018	<p>1.Gain knowledge on Anglo American Cataloguing Rules</p> <p>2.Learn the preparation of Main entry and added entries for monographs and serial publications</p> <p>3. Gain the skills on preparation of entries on cartographic materials, manuscripts and sound recordings</p>
10.	LIS-204P	Meta data Standards- Practice	2018	<p>1.Know the Metadata and its types, standards</p> <p>2. Learn the skills on KOHA Software</p> <p>3.Learn the skills on MARC 21 and Dublincore</p>
11	LIS-205	Library Management	2018	<p>1.Gain knowledge on meaning and purpose of management, Organizational Structures</p> <p>2.Able to identify the factors behind selection, procurement and accessioning of documents</p>

				3.Gain knowledge on a circulation system suitable for a library, different budgetary methods and its standards, norms and principles
12	LIS-206	Human Values and Professional Ethics-II	2018	<p>i. Student will know the values of ethics in various fields including medical, social and business ethics.</p> <p>ii. The student will be enriched with several aspects pertaining to Human values and performing of Professional Ethics in day today life.</p> <p>iii. Introduction of several Natural values to be performed by Humans to lead a good and Peaceful life.</p>
13	LIS-301	Information Processing and Retrieval Theory	2018	<p>1.Understand the basic concepts on Information procession and Retrieval and various schemes on classification</p> <p>2.Learn the Indexing Systems and Techniques and their Evaluation Criteria and Studies</p> <p>3.Gain knowledge on Web based Information Retrieval Systems</p>
14	LIS-302	Library Automation and Digital Library	2018	<p>1.Learn the basics of Library Automation, various modules of library automation software packages and their features</p> <p>2.Gain knowledge on basic concepts and characteristics of digital libraries</p> <p>3.Know about network and communication devices, digitization and metadata</p>
15	LIS-303	Search and Search strategies	2018	

				1.Gain knowledge on search strategies, various types of databases, internet searching tools 2.Understand Z39.50 protocol and Wide area information servers 3. 3.Learn the search engines and meta search engines.
16	LIS-304B	Internship	2018	1.Attain skills on all types of sections and its maintenance in libraries in which they underwent training 2.Get skills on maintenance of Digital Library 3.Learn the skills on preservation and conservation of manuscripts and digitization.
17	LIS-304C	Academic Library System	2018	1.Know the basic objectives, growth and development of Academic Libraries in India, UK and USA 2.Learn about an overview of higher education in India, UGC, its powers and functions and its role in the development of academic libraries 3.Understand the total design of the building, techniques of financial management, and know the organization of library and information services needed by distance learners and special users
18	LIS-305A	Information Literacy (OE)	2018	1.Learn the concepts of Information Literacy and sources of Print and Electronic Information 2.Get the skills on information access through INFLIBNET Network 3.Able to understand the Internet and its search techniques and Intellectual Property Right

19	LIS-401	Research Methodology	2018	1.Understand the definition, need and purpose of various research methods 2.Get the knowledge on Research design, techniques and tools 3.Gain the skills on Data analysis and Interpretation of Data in SPSS.
20	LIS-402P	Software for Libraries-Practice	2018	1.Attain knowledge on D Space, GreenstoneDigital Library Softwares 2.Learn about Koha : Library Management Software, E-Resources, Directory of Open Access Journals, 3.Get an idea on designing of Web Page and Data Mining
21	LIS-403	Dissertation/Project Work	2018	1.Gain Knowledge on how to select the theme for their work 2.Learn the writing styles, preparation of questionnaire, data analysis and interpretation and Citation styles 3.Get the skills on findings and conclusion in dissertation
22	LIS-403A	Management of Information System	2018	1.Know the basic concepts in Management, and various methods of decision-making and its application to Library and Information Centers 2.Understand the budgeting techniques and methods and policies and procedures 3.Gain knowledge on system analysis, PERT/CPM
23	LIS -404C	Information Processing and Retrieval: UDC and Indexing Practice	2018	1. 1.Gain knowledge on Universal Decimal Classification 2.Learn different Indexing systems 3.Understand the design and development of

				thesaurus
24	LIS-405-B	Technical Writing	2018	1.Know the definition and types of technical writing 2.Attain the idea on technical writing process and styles 3.Get the skills on technical writing techniques, use of MS-Office for preparation and presentation of technical writing

28. Anthropology

S. No.	Name of the Programme	Course Code	Title of the Course	Years	Activities/Content with direct bearing on Employability/Entrepreneurship/Skill development
1	M.Sc. Anthropology	ANO : 101	Introduction to Social Cultural Anthropology	2018	<ul style="list-style-type: none"> a. Exposed to the basic introductory background about Socio-cultural Anthropology, its historical background and relation to other branches b. Provides knowledge about the entire subject matter of the socio-cultural anthropology as well as its different sub-branches. c. Exposed to social institutions d. Know the religion beliefs, rituals and myth
2	M.Sc. Anthropology	ANO : 102	Introduction to Biological Anthropology	2018	<ul style="list-style-type: none"> a. Exposed to the basic concept, meaning and scope of Biological Anthropology b. Explain how human being acts as the central figure of Anthropology c. Elucidate the major divisions of Biological/ physical Anthropology d. Know the inter-relationship between Biological Anthropology and other sciences e. To know how Man evolved in animal kingdom f. To understand how evolution has

					occurred and what are the evidences of evolution and addresses human variation and the causes of variations
3	M.Sc. Anthropology	ANO-103	Introduction to Archaeological Anthropology	2018	<ul style="list-style-type: none"> a. Able to define archaeological anthropology and its branches b. Understand the geological timescale, tool typology and technology c. The Course will explain the basic concepts and terminology used in prehistoric archaeology d. Understand chronological and cultural determinants of Indian and European prehistory
4	M.Sc. Anthropology	ANO-104P	Somatometry & Somatoscopy	2018	
5	M.Sc. Anthropology	ANO 105p	Archaeological Anthropology	2018	
6.	M.Sc. Anthropology	ANO 106	Economic and Political Anthropology	2018	<ul style="list-style-type: none"> a. Able to learn meaning and scope of economic anthropology b. To understand the division of labor by gender and age, exchange of goods and gifts, and to understand the market economy. c. Able to know the historical background of Political Organization besides types and trends of Political Organization including types like i.e. Band, Tribe, Chiefdoms and State d. To know the local institutions: panchayats (traditional and statutory)

7.	M.Sc. Anthropology	ANO 107	Human Values and Professional Ethics -1	2018	
8.	M.Sc. Anthropology	ANO 201	Comparative Ethnography and Indian Anthropology	2018	<ul style="list-style-type: none"> a. To understand the major ethnological regions of the world b. To know the ethnic and linguistic classifications c. Able to understand the traditional Indian culture d. To know the contributions of Indian anthropologists
9.	M.Sc. Anthropology	ANO 202	Principals of Genetics	2018	<ul style="list-style-type: none"> a. understand about the scope of genetics and its historical development b. to learn the biology of cell and cell division c. Exposed to the patterns of the inheritance d. Know about blood groups and their anthropological perspective
10	M.Sc. Anthropology	ANO 203	Research Methods in Anthropology	2018	<ul style="list-style-type: none"> a. To understand the fieldwork traditions in Anthropology b. To understand the concept of research and its purpose c. highlight the conceptual structure of a research design d. understand the various statistical tools in the analysis and interpretation of the data
11	M.Sc. Anthropology	ANO 204P	Craniology and Craniometry	2018	
12	M.Sc. Anthropology	ANO205P	Doing Ethnography	2018	
13	M.Sc. Anthropology	ANO206	Prehistoric India	2018	a. learn the regional distribution of

					<p>lower, middle, and upper Paleolithic cultures</p> <p>b. To learn the Mesolithic culture and typo- technology</p> <p>c. Learn the regional distributions of Neolithic cultures</p> <p>d. understand the copper and iron age</p> <p>e. exposed to the distribution of megaliths</p>
14	M.Sc. Anthropology	ANO 207	Human Values and Professional Ethics -II	2018	
15	M.Sc. Anthropology	ANB 301	Human Evolution and Fossil Evidence	2018	<p>a. Understand the evolutionary trends of primates, prosimians to homosapiens</p> <p>b. To know the hominid evolution</p> <p>c. To know the Neanderthals distributions and extension</p> <p>d. Exposed to the homo sapiens distribution and feature of human species</p>
16	M.Sc. Anthropology	ANB 302	Human Genetics	2018	<p>a. understand the meaning and scope of human genetics</p> <p>b. know methods of studying human chromosomes and chromosomal abnormalities</p> <p>c. depict Inborn errors of metabolism with typical examples and human human ABO blood group system and its fundamentals</p> <p>d. know the concept of “one-gene-one-enzyme hypothesis” which explains</p>

					development of genetic diseases/disorders caused by defective genes controlling the functions of enzymes in metabolic pathways
17	M.Sc. Anthropology	ANB 303P	Human Osteology and Osteometry	2018	
18	M.Sc. Anthropology	ANB 304P	Dermatoglyphics	2018	
19	M.Sc. Anthropology	ANB 305	Anthropological Demography	2018	<ul style="list-style-type: none"> a. Know about the different population growth theories b. Learn the basic demographic variables c. Understand how the different factors regulates the population growth d. Understand the different demographic models e. Learn the genetic consequences of family planning
20	M.Sc. Anthropology	ANB 306	Biostatistics and Computer Applications	2018	<ul style="list-style-type: none"> a. To understand the concept of research and its purpose b. To enlighten the process of research and conceptual structure of a research design c. Understand the disease outcomes through measurement of descriptive, analysis of variance and regression models through computer applications d. Know the use of computers in the analysis data and power point presentation
21	M.Sc. Anthropology	ANB 307	Forensic Anthropology	2018	<ul style="list-style-type: none"> a. able to know about forensic anthropology, a specialized, applied

					<p>branch of physical/biological anthropology which deals with the crime investigation</p> <ul style="list-style-type: none"> b. understand how dermatoglyphic, somatoscopic characteristics and body fluids helpful in crime investigation c. know the use of skeletal remains in forensic investigations d. know the importance of modern methods in crime investigation
22	M.Sc. Anthropology	ANB 308	Palaeoanthropology	2018	<ul style="list-style-type: none"> a. understand the geological time scale and Pleistocene epoch b. know about tool making techniques and tool types c. gain knowledge about dating methods d. learn about Paleolithic, Mesolithic and Neolithic cultures in India
23	M.Sc. Anthropology	ANB 401	Biological Anthropology	2018	<ul style="list-style-type: none"> a. Understand the basic concept, meaning and scope of Biological Anthropology b. Know the biological variation in modern human populations c. Understand the human adaptability and impact of urbanization on humans d. Bio-cultural aspects of health and disease
24	M.Sc. Anthropology	ANB-402	Human Population Genetics	2018	Students will

					<ul style="list-style-type: none"> a. Explain the basic terms/concepts of human population genetics b. Appreciate the mechanisms of evolutionary forces in shaping biological diversity c. Understand the importance of Hardy – Weinberg Equilibrium especially the gene frequency changes with respect to Mutation, Genetic drift, Selection, Gene flow and to investigate them in empirical situations in human populations d. Know about breeding isolation and its implications in human population genetics. e. Understand various mating patterns (inbreeding and types of consanguineous marriages) and measure the inbreeding in families
25	M.Sc. Anthropology	ANB-403P	Advanced Biological Anthropology	2018	
26	M.Sc. Anthropology	ANB 404 P	Fieldwork, Dissertation & Viva-Voce	2018	
27	M.Sc. Anthropology	ANB -405	Human Growth, Physique and Nutrition	2018	<ul style="list-style-type: none"> a. Know about the Differentiate the term growth, maturation and development b. To learn the methods of studying growth and the factors affecting the growth c. To understand the Human Physique and its Relation of Function, Disease and Behavior.

					d. Know the socio-cultural aspects of nutrition and nutrients in health and diseases
28	M.Sc. Anthropology	ANB 406	Applied Biological Anthropology	2018	<ul style="list-style-type: none"> a. Know about various applications of anthropometry and kinanthropometry in various fields b. Understand about the importance of forensic anthropology in crime investigations c. Know the importance genetic counseling, genetic screening, Genetic engineering, treatment of genetic diseases and Gene therapy d. Learn about the human geno project
29	M.Sc. Anthropology	ANB 407	Medical Genetics	2018	<ul style="list-style-type: none"> a. Understand the overplanting areas of anthropology and genetics, anthropology and medicine (Disease) b. Understand the different methods of identification genetic diseases c. Know about epidemiology, socio cultural and ecological dimensions of genetic diseases control and treatment d. Learn the knowledge, attitude and currying practices of genetic diseases
30	M.Sc. Anthropology	ANB-408	Epidemiology	2018	<ul style="list-style-type: none"> a. Exposed to the basic concepts in epidemiology with examples of epidemiology in different areas of public health.

					<ul style="list-style-type: none"> b. Understand the global burden of health outcomes and diseases by assessing measures and interpret the prevalence, risk, rate, and odds within the context of epidemiology c. Know about Complications of obesity on health its prevention and control d. Understand the complex web of biological, behavioral, cultural and environmental factors towards the prevalence of communicable infections and chronic infections
31	M.Sc. Anthropology	ANB -409	Applied Anthropology	2018	<ul style="list-style-type: none"> a. Know about various applications of anthropometry and kinanthropometry in various fields b. Understand about the importance of anthropology in crime investigations c. Understand about the importance of biological anthropology in study of various diseases
32	M.Sc. Anthropology	ANS 301	Theories of Culture	2018	<ul style="list-style-type: none"> a. Understand the Conceptual Contributions of E. B. Tylor, B. Malinowski, A. L. Kroeber, L. White, Unilineal Evolution (L. H. Morgan and E. B. Tylor); Multilineal Evolution (J. Steward); Universal Evolution (L. White) b. To know the British School; German-Austrian School; American – Distribution School of culture c. Know the Patterns of Culture (R.

					<p>Bendict); Basic Personality, Model Personality (Kardiner, Linton, Cora Dubois); Selfhood (Murphy); Symbolic (G. Obeyesekere)</p> <p>d. understand the historical approaches of culture</p>
33	M.Sc. Anthropology	ANS 302	Social Anthropology of Complex Societies	2018	<p>a. Learn the meaning and approach of great and little traditions</p> <p>b. learn about the peasant societies and contemporary peasant societies</p> <p>c. know the culture of poverty, institution and complex societies</p> <p>d. understand problems of urbanization and social changes</p>
34	M.Sc. Anthropology	ANS 303P	Participatory of Research methods in Development Process	2018	
35	M.Sc. Anthropology	ANS 304P	Non-Governmental Organizations and Extension studies	2018	
36	M.Sc. Anthropology	ANS 305	Ecological Anthropology	2018	<p>a. Understand the environment and ecosystem in understanding the cultural modifications</p> <p>b. Know about the cultural ecology, cognitive ecology, single unified ecology, and ethno ecology.</p> <p>c. Learn issues and prospects on development projects and displacement</p> <p>d. Understand Biodiversity for sustainable development Knowabout Ecological protest movements (Chipko and Narmada</p>

					Bachao Andolan (NBA));
37	M.Sc. Anthropology	ANS 306	Applied Anthropology- Indigenous Communities	2018	<ul style="list-style-type: none"> a. Know the Similarities and Differences between Applied and Action Anthropology, Indigenous communities and applied anthropology. Indigenous rights. b. Know the process of acculturation and assimilation, socialization c. Know about applications of Anthropology in the management of health, agriculture, education and biodiversity and poverty eradication d. Gain the knowledge on tribal welfare, tribal problems, forest and property rights, shifting cultivation and tribal movements
38	M.Sc. Anthropology	ANS 307	Anthropology of Religion Sacred complexes in India	2018	<ul style="list-style-type: none"> a. Know about meaning and relation with power and political leverages, ethnic identity and other aspects of culture in tradition and modern societies b. Know the different anthropological theories of religion c. Know the issues of right of food among by Hindus, five symbols of sikh identity, Aspects of sarora ritual and Shamansism, and Christianity in India d. To understand Contemporary issues of religious violence, secularism and fundamentalism

39	M.Sc. Anthropology	ANS 308	Anthropology and Career Promotion	2018	<ul style="list-style-type: none"> a. Understand the anthropology in competitive examinations b. Know about participatory research appraisal c. Exposed to the issues in tribes, tribal problems and cast populations d. Learn the books to be consulted, review of questions and scheme of valuation
40	M.Sc. Anthropology	ANS 401	Structural Anthropology	2018	<ul style="list-style-type: none"> a. Know the social structure and function of culture b. Understand about the ideal and real social structure and social organization c. Know the general notion of structuralism d. Learn the symbols and structure
41	M.Sc. Anthropology	ANS-402	Medical Anthropology	2018	<ul style="list-style-type: none"> a. Exposed to the basic concepts in epidemiology with examples of epidemiology in different areas of public health. b. Understand the etiology, control of infections and non-infections diseases c. Understand the ethno-medicine in the management of health and illness behavior d. Understand the modern medical systems and health care delivery services

42	M.Sc. Anthropology	ANS-403P	Computer Applications	2018	
43	M.Sc. Anthropology	ANS 404 P	Fieldwork, Dissertation & Viva-Voce	2018	
44	M.Sc. Anthropology	ANS -405	Developmental Anthropology	2018	<ul style="list-style-type: none"> a. Know about the Concept of Development and Sustainable Development b. Understand the steps in project preparation, goals, process of implementation and monitoring. c. Role of government, NGOs and peoples participation in development d. Know the watershed management and irrigation, resettlement,(Narmada) poverty Alleviation (Velugu); Primary Education (VECs
45	M.Sc. Anthropology	ANS 406	Culture and Management	2018	<ul style="list-style-type: none"> a. Know the concept of organizational culture. Its links with cultural anthropology Organizational ethnography. Anthropology of work b. Understand the Theories of organizational culture. Different anthropological traditions c. Know the How culture affect management Changes in management styles Future outlook. d. To understand the Ethno methodological approaches, Organizational symbolism. Integration, differentiation and fragmentation as three perspective approaches to organizational culture
46	M.Sc. Anthropology	ANS 407	Anthropology of Displaced	2018	<ul style="list-style-type: none"> a. Know the peoples perception towards

			Populations		<p>development and displacement</p> <p>b. Understand the role of government and non-government agencies in the process of displacement, resettlement and rehabilitation.</p> <p>c. Understand policy issues relating development and displacement in legal implications of displacement and rehabilitation</p> <p>d. Learn the Socio-Cultural effects of displacement, Socio disorganization, process of disintegration and reintegration</p>
47	M.Sc. Anthropology	ANS-408	Visual Anthropology	2018	<p>a. Know about the concept, scope and Historical Development of visual anthropology</p> <p>b. Know about the appraisal of ethnographic films in cultural context</p> <p>c. Knowledge about descriptive studying of Visual data produced by Cultures</p> <p>d. To understand the ethnographical films, still photos film shootings and commentary</p>
48	M.Sc. Anthropology	ANS -409	Environmental Anthropology	2018	<p>a. Know the meaning and scope eco-system of homeostases, ecological niche and ecosystem development</p> <p>b. Understand the various theoretical formulations</p> <p>c. Understand Biodiversity for Sustainable Development;</p>

					<p>Development Projects (Hydro-electric, Irrigation Projects and Industries) and Displacement.</p> <p>d. Exposed to the different ecological issues and environmentalism towards development</p>

29. Biochemistry

S.No.	Course Code	Name of the Course	Year of introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/ Skill development
1	BCH101	Biochemical and Biophysical methods	2018	<ol style="list-style-type: none"> 1. Understand the principle, Instrumentation of different types of Light microscopy, electron microscopy, and techniques of Centrifugation and its applications in various fields of research. 2. Learn about basic Radioactivity principles, measurement method and its biological applications. 3. Acquire knowledge about the basics and latest developments in the instrumentation techniques of Electrophoresis (IEF, 2D PAGE) and Chromatography and their applications in various research fields. 4. Demonstrate skill to explain about principle, Bioinstrumentation and applications of spectroscopy techniques
2	BCH 102	Molecular Physiology and community nutrition	2018	<ol style="list-style-type: none"> 1. Gain the knowledge about circulatory and excretory systems. 2. Know the importance of muscular and nervous system. 3. Health benefits and malnutrition of proteins and fats. 4. Know the importance of nutrition in maintenance of health and diseases.
3	BCH 103P	Practical related to Biochemical Preparations and Analysis	2018	<ol style="list-style-type: none"> 1. Learn safety and precautionary measures for working in a laboratory. 2. Develop skill and proficiency in preparation of laboratory reagents and Use of handling of glass wares, minor equipment for

				<p>conducting experiments</p> <p>3. Acquire practical training for qualitative and quantitative analysis of biological materials/molecules and their estimation using multiple methods.</p> <p>4. Gain the knowledge about isolation studies of biological samples.</p>
4	BCH 104P	Practical related to Analytical methods	2018	<p>1. Learn how to standardize various biomolecules.</p> <p>2. Separate biomolecules by paper chromatography and thin layer chromatography</p> <p>3. Demonstrate separation of protein by electrophoresis.</p> <p>4. Isolation and spectrophotometric characterization of plant pigments.</p>
5	BCH 105P	Human values and Professional ethics-I	2018	<p>1. Easily understand the Need and Importance of Professional Ethics- Goals- Ethical Values in various Professions.</p> <p>2. Analyse the basic moral concepts- right , ought, duty, obligation, justice, responsibility and freedom.</p> <p>3. Know about Purusharthas, Dharma, Artha, Kama, Moksha.</p> <p>4. Understand the Four Noble Truths- Arya astanga marga, Jainism- mahavratas and anuvratas</p> <p>5. Gain the knowledge about views on Manu and Yajnavalkya</p>
6	BCH 106	Cell and Biomolecules	2018	<p>1. Easily understand the difference between prokaryotic and eukaryotic cells, and the concept of cell division.</p> <p>2. Understand the classification, structure and biochemical reactions of amino acids and proteins.</p> <p>3. Describe the classification, structure and biochemical reactions of carbohydrates and lipids.</p> <p>4. Understand the concept of structural organization of nucleic acids</p>
7	BCH 201	Energy metabolism	2018	<p>1. Explain the broad outlines of intermediary metabolism and importance of carbohydrate metabolism in life.</p> <p>2. Describe the importance of Electron transport and ATP production mechanism.</p>

				<ol style="list-style-type: none"> 3. Gain in knowledge in Carbohydrate metabolism and their associated disorders. 4. Describe the details of lipid metabolism.
8	BCH 202	Metabolism of Nitrogen based molecules	2018	<ol style="list-style-type: none"> 1. Understand the anabolic and catabolic reactions of proteins and aminoacids. 2. Gain knowledge in the importance of aminoacids as biosynthetic precursors. 3. Know the biosynthesis and degradation of purine and pyrimidines and their associated disorders. 4. How toxic chemicals are metabolised by the body through detoxification and the mechanism of carcinogenicity.
9	BCH 203P	Practical related to Enzymology	2018	<ol style="list-style-type: none"> 1. Learn about estimation of various enzymes in biological sample. 2. Learn to perform assay of clinically important enzyme: serum acid and alkaline phosphatase, serum LDH. 3. Learn about the factors affecting enzyme activity and determination of K_m. 4. Demonstrate the Immobilization of enzymes.
10	BCH 204P	Practical related to Molecular Biology	2018	<ol style="list-style-type: none"> 1. Isolate nucleic acids from various sources. 2. Estimate the nucleic acids quantitatively. 3. Determine the melting temperature. 4. Determine the purity of DNA by UV method.
11	BCH 205	Human values and Professional ethics-II	2018	<ol style="list-style-type: none"> 1. Easily understand the Components, Structure and responsibilities of family and status of women in family and society. 2. To get an idea on Ethical issues in relation to health care professionals and patients and genetic engineering, Social justice in health care, Human cloning. 3. To know about Characteristics of ethical problems in management, ethical theories, causes of unethical behavior, ethical

				<p>abuses and work ethics.</p> <p>4. Understand the Ethical theory, Ecological crisis, Pest control, Pollution and waste, Climate change, Energy and population.</p> <p>5. Gain the knowledge about Organ trade, Human trafficking, Human rights violation and social disparities, Feminist ethics, Surrogacy/ pregnancy.</p>
12	BCH 206	Enzymology	2018	<p>1. Distinguish the fundamentals of enzyme properties, nomenclatures, characteristics and mechanisms.</p> <p>2. Describe the concepts of enzyme inhibition and mechanism of enzyme catalysis.</p> <p>3. Students will acquaint with mechanism of enzyme action and various coenzymes involved in the biochemical reactions taking place in living systems.</p> <p>4. Describe the concepts of co-operative behavior and allosteric regulation.</p>
13	BCH 301	Microbial Biochemistry and Genetics	2018	<p>1. Understand the basics of microbiology like nomenclature and classification of microorganisms, understand the various biological and non-biological method to control microorganisms</p> <p>2. The student will learn about different mode of nutrition in microorganisms and about viruses - Isolation, purification and characterization.</p> <p>3. Understand the basics of genetics and the gene arrangement in prokaryotes and eukaryotes.</p> <p>4. Gain knowledge in bacterial genetics includes the different types plasmids, recombination in bacteria, bacteriophages and bacterial defense mechanism(CRISPR) and Describe the various types of mutations and its effect.</p>
14	BCH 302	Molecular Biology	2018	<p>1. The students will learn about the Possible modes of replication, and roles of helicase, primase, gyrase, topoisomerase, DNA Polymerase,</p>

				<p>DNA ligase, and Regulation of replication.</p> <ol style="list-style-type: none"> 2. Learn about the mechanism and regulation of transcription in prokaryotes and eukaryotes. 3. Learn about genetic code and their evolution. 4. Gain knowledge in Different stages and components of protein synthesis.
15	BCH 303P	Practical related to Microbiology	2018	<ol style="list-style-type: none"> 1. Handle the microscope. 2. Learn Methods of sterilization and preparation of various culture media, Purification techniques. 3. Identification of isolated bacteria, and Growth curve of microorganism. 4. Learn Staining techniques for bacteria and yeast. 5. Gain knowledge in the Preparation of wine from Grapes. 6. Production and estimation of alcohols, citric acid, lactic acid etc.
16	BCH 304P	Practical related to Clinical Biochemical Analysis	2018	<ol style="list-style-type: none"> 1. Collect and maintain the biological samples for clinical assay. 2. Estimate the blood and serum enzymes for diagnosis of diseases. 3. Qualitatively analyse the abnormal constituents in urine. 4. Work with diagnostic kits
17	BCH 305 Generic Elective (Two papers out of three)	<ol style="list-style-type: none"> a) Molecular Endocrinology b) Clinical Biochemistry Cell and Developmental Biology	2018	<ol style="list-style-type: none"> 1. Know about the mechanism of action of different hormones secreted by hypothalamus, pituitary and pineal glands. 2. Familiar with Iodine, Calcium metabolisms and disorders related to thyroid and parathyroid glands. 3. Know about the mechanism of action of insulin, glucagon and many gastro intestinal hormones. 4. Acquire knowledge on Hormonal regulation of menstrual cycle and disorders associated with Gonadal hormones.
18	BCH 305 B	Clinical Biochemistry	2018	<ol style="list-style-type: none"> 1. Maintain clinical biochemistry laboratory, biological specimen collection for clinical assay and investigation of disorders associated with carbohydrates. 2. Learn and understand the Inborn errors of amino acid metabolism, Lipid metabolism and Renal function system.

		c)Experimental aspects related to analytical methods		<p>and its biological applications.</p> <ol style="list-style-type: none"> 3. Acquire knowledge about the basics and latest developments in the instrumentation techniques of Electrophoresis (IEF, 2D PAGE) and Chromatography and their applications in various research fields. 4. Demonstrate skill to explain about principle, Bioinstrumentation and applications of spectroscopy techniques
21	BCH 401	Genetic Engineering	2018	<ol style="list-style-type: none"> 1. Familiar with the tools and techniques for isolation and purification of genes, vector construction. 2. Understand the mechanisms of regulation of gene expression in different operons. 3. Know the techniques for transfer and expression of cloned gene and 4. Apply the knowledge of genetic engineering in biological research. 5. principle, Bioinstrumentation and applications of spectroscopy techniques.
22	BCH 402	Technical Writing, Biostatistics and Bioinformatics	2018	<ol style="list-style-type: none"> 1. Discuss the various steps involved in conducting research. 2. Learn to apply hypothesis testing via some of the statistical distributions. 3. Develop understanding about biological data and database search tools. 4. Acquire hands on training on various computational tools and techniques employed in biological sequence analysis
23	BCH 403P	Practical related to Immunology and Hematology	2018	<ol style="list-style-type: none"> 1. Collect the blood samples and handle the microscope. 2. Analyze the blood samples. 3. Expert in immunodiffusion and immunoelectrophoresis techniques
24	BCH 404P	Practical/Project work	2018	

	Elective to others (For other department students)			<p>distributions.</p> <p>3. Develop understanding about Biological data and database search tools.</p> <p>4. Acquire hands on training on various computational tools and techniques employed in Biological sequence analysis</p> <p>1Maintain clinical biochemistry laboratory, biological specimen collection for clinical assay and investigation of disorders associated with carbohydrates.</p> <p>2Learn and understand the Inborn errors of amino acid metabolism, Lipid metabolism and Renal function system.</p> <p>3Gain knowledge in clinical enzymology and Disorders of Gastrointestinal Tract.</p> <p>4.Investigate the serum enzymes in liver diseases</p>
27		b) Biochemistry of diseases	2018	<p>1. Determine the body composition and body weight by using various methods.</p> <p>2. To describe the importance of protein and fats.</p> <p>3. Gain knowledge on vitamins and minerals to maintain health.</p> <p>4. Aquire knowledge on nutritional importance in different ages in the life</p>

Immunotechnology

S.No.	Course Code	Name of the Course	Year of introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/ Skill development
1	Core 1	Biochemical and Biophysical methods	2018	<p>1.Understand the principle, Instrumentation of different types of Light microscopy, electron microscopy, and techniques of Centrifugation and its applications in various fields of research.</p> <p>2. Learn about basic Radioactivity principles, measurement method and its biological applications.</p> <p>3. Acquire knowledge about the basics and latest developments</p>

				<p>in the instrumentation techniques of Electrophoresis (IEF, 2D PAGE) and Chromatography and their applications in various research fields.</p> <p>4. Demonstrate skill to explain about principle, Bioinstrumentation and applications of spectroscopy techniques</p>
2	Core 2	Molecular Physiology and community nutrition	2018	<p>5. Gain the knowledge about circulatory and excretory systems.</p> <p>6. Know the importance of muscular and nervous system.</p> <p>7. Health benefits and malnutrition of proteins and fats.</p> <p>8. Know the importance of nutrition in maintenance of health and diseases</p>
3	Core 3P	Practical related to Biochemical Preparations and Analysis	2018	<p>1. Learn safety and precautionary measures for working in a laboratory.</p> <p>2. Develop skill and proficiency in preparation of laboratory reagents and Use of handling of glass wares, minor equipment for conducting experiments</p> <p>3. Acquire practical training for qualitative and quantitative analysis of biological materials/molecules and their estimation using multiple methods.</p> <p>4. Gain the knowledge about isolation studies of biological samples.</p>
4	Core 4P	Practical related to Analytical methods	2018	<p>1. Learn how to standardize various biomolecules.</p> <p>2. Separate biomolecules by paper chromatography and thin layer chromatography</p> <p>3. Demonstrate separation of protein by electrophoresis.</p> <p>4. 4. Isolation and spectrophotometric characterization of plant pigments</p>
5	Compulsory Foundation	Cell and Biomolecules	2018	<p>6. Easily understand the difference between prokaryotic and eukaryotic cells, and the concept of cell division.</p> <p>7. Understand the classification, structure and biochemical reactions of aminoacids and proteins.</p> <p>8. Describe the classification, structure and biochemical</p>

				<p>reactions of carbohydrates and lipids.</p> <p>9. Understand the concept of structural organization of nucleic acids.</p>
6	Elective foundation	Human values and Professional ethics-I	2018	<p>10. Easily understand the Need and Importance of Professional Ethics- Goals- Ethical Values in various Professions.</p> <p>11. Analyse the basic moral concepts- right , ought, duty, obligation, justice, responsibility and freedom.</p> <p>12. Know about Purusharthas, Dharma, Artha, Kama, Moksha.</p> <p>13. Understand the Four Noble Truths- Arya astanga marga, Jainism- mahavratas and anuvratas.</p> <p>14. Gain the knowledge about views on Manu and Yajnavalkya.</p>
7	Core 1	Energy metabolism	2018	<p>Explain the broad outlines of intermediary metabolism and importance of carbohydrate metabolism in life.</p> <p>2. Describe the importance of Electron transport and ATP production mechanism.</p> <p>3. Gain in knowledge in Carbohydrate metabolism and their associated disorders.</p> <p>4. Describe the details of lipid metabolism.</p>
8	Core 2	Metabolism of Nitrogen based molecules	2018	<p>1. Understand the anabolic and catabolic reactions of proteins and aminoacids.</p> <p>2. Gain knowledge in the importance of aminoacids as biosynthetic precursors.</p> <p>3. Know the biosynthesis and degradation of purine and pyrimidines and their associated disorders.</p> <p>4. How toxic chemicals are metabolised by the body through detoxification and the mechanism of carcinogenicity.</p>
9	Core 3	Practical related to	2018	<p>5. Learn about estimation of various enzymes in biological</p>

		Enzymology		<p>sample.</p> <p>6. Learn to perform assay of clinically important enzyme: serum acid and alkaline phosphatase, serum LDH.</p> <p>7. Learn about the factors affecting enzyme activity and determination of Km.</p> <p>8. Demonstrate the Immobilization of enzymes</p>
10	Core 4	Practical related to Molecular Biology	2018	<p>1. Isolate DNA from bacterial, plant and animal cells and RNA from yeast cells.</p> <p>2. Estimate concentrations of DNA and RNA by conventional methods and UV absorption methods.</p> <p>3. Determine the melting temperature(T_m) of DNA.</p> <p>4. Learn procedures for isolation of phage M₁₃ and single and double standard M₁₃DNA.</p>
11	Compulsory Foundation	Enzymology	2018	<p>1. Distinguish the fundamentals of enzyme properties, nomenclatures, characteristics and mechanisms.</p> <p>2. Describe the concepts of enzyme inhibition and mechanism of enzyme catalysis.</p> <p>3. Students will acquaint with mechanism of enzyme action and various coenzymes involved in the biochemical reactions taking place in living systems.</p> <p>4. Describe the concepts of co-operative behaviour and allosteric regulation</p>
12	Elective foundation	Human values and Professional ethics-II	2018	<p>6. Easily understand the Components, Structure and responsibilities of family and status of women in family and society.</p> <p>7. To get an idea on Ethical issues in relation to health care professionals and patients and genetic engineering, Social justice in health care, Human cloning.</p> <p>8. To know about Characteristics of ethical problems in management, ethical theories, causes of unethical behavior, ethical abuses and work ethics.</p> <p>9. Understand the Ethical theory, Ecological crisis, Pest control,</p>

				<p>Pollution and waste, Climate change, Energy and population.</p> <p>10. Gain the knowledge about Organ trade, Human trafficking, Human rights violation and social disparities, Feminist ethics, Surrogacy/ pregnancy</p>
13	Core 1	Microbial Biochemistry and Genetics	2018	<p>1. Understand the basics of microbiology like nomenclature and classification of microorganisms and different modes of nutrition in microorganisms.</p> <p>2. Learn and understand the various biological and non-biological methods to control microorganisms and Biology of subviral agents – Viroids, Prions, Satellite viruses.</p> <p>3. Understand the basics of genetics and the gene arrangement in prokaryotes and eukaryotes.</p> <p>4. Gain knowledge in bacterial genetics like different types plasmids, recombination in bacteria, bacteriophages and bacterial defense mechanism (CRISPR) and various types of mutations and their effects</p>
14	Core 2	Immunology	2018	<p>1. Gain knowledge on different types of antigens, antibodies and how different types of antibodies are produced.</p> <p>2. Out line, compare and contrast the key mechanism of innate and adaptive immunity</p> <p>3. Gain knowledge on undesirable immunological reactions and their complications in health management</p> <p>4. Apply knowledge in disease diagnosis through serological tests</p>
15	Core 3	Practical related to Microbiology	2018	<p>1. Handle the microscope.</p> <p>2. Learn Methods of sterilization and preparation of various culture media, Purification techniques.</p> <p>3. Identification of isolated bacteria, and Growth curve of microorganism.</p> <p>4. Learn staining techniques for bacteria and yeast.</p> <p>5. Gain knowledge in the Preparation of wine from Grapes.</p> <p>6. Production and estimation of alcohols, citric acid, lactic acid etc</p>

16	Core 4	Practical related to Immunology	2018	<ol style="list-style-type: none"> 1. Perform RBC, WBC count and differential count. 2. Do all haematological tests that will be done in clinical labs. 3. Have an idea on Rocket immunoelectrophoresis, Cross over Immunoelectrophoresis etc. 4. Do Heme agglutination tests for identification of different antigens
17	Generic Elective (Two papers out of three)	a) Molecular Biology	2018	<ol style="list-style-type: none"> 1. The students will learn about the Possible modes of replication, and roles of helicase, primase, gyrase, topoisomerase, DNA Polymerase, DNA ligase, and Regulation of replication. 2. Learn about the mechanism and regulation of transcription in prokaryotes and eukaryotes. 3. Learn about genetic code and their evolution. 4. Gain knowledge in Different stages and components of protein synthesis
		b)Molecular Endocrinology		<ol style="list-style-type: none"> 1. Know about the mechanism of action of different hormones secreted by hypothalamus, pituitary and pineal glands. 2. Familiar with Iodine, Calcium metabolisms and disorders related to thyroid and parathyroid glands. 3. Know about the mechanism of action of insulin, glucagon and many gastro intestinal hormones. 4. Acquire knowledge on Hormonal regulation of menstrual cycle and disorders associated with Gonadal hormones.
		c)Cell and Developmental Biology		<ol style="list-style-type: none"> 1. Acquire knowledge on all cell organelles in prokaryotes and eukaryotes, cell signaling, cell communication, cell adhesion, Apoptosis, Senescence, integrins . 2. Gain the proficient knowledge about basic concepts of Developmental Biology, zygote formation, blastula formation, gastrulation and many events in early development. 3. Understand Organogenesis, limb development and regeneration in vertebrates, and post embryonic development in animals and Plant tissue culture, Protoplast fusion and

				<p>Production of transgenic plants.</p> <p>4. Gain knowledge about Miscelle, and liposomes, Membrane fluidity, Active transport, Ionophores Gap junctions, Endocytosis and Exocytosis.</p>
18	Open Elective to others (For other department students)	a) Basics of Immunology	2018	<p>1. Gain knowledge on essential features of different types of antigens, antibodies.</p> <p>2. Out line, compare and contrast the key mechanism of innate and adaptive immunity.</p> <p>3. Gain knowledge on undesirable immunological reactions and their complications in health management and transplantation.</p> <p>4. Apply knowledge in disease diagnosis through serological tests.</p>
		b) Immunotechniques		<p>1. To purify and analyse the antigens and antibodies.</p> <p>2. To apply different Hybridization techniques and ELISA, RIA.</p> <p>3. To detect various diseases by application of antiisera.</p> <p>4. To engineer antibodies and catalytic antibodies and produce drugs to allergies</p>
19	Core 1	Microbial Biochemistry and Genetics	2018	<p>1. Familiar with the tools and techniques for isolation and purification of genes, vector construction.</p> <p>2. Understand the mechanisms of regulation of gene expression in different operons.</p> <p>3. Know the techniques for transfer and expression of cloned gene and</p> <p>4. Apply the knowledge of genetic engineering in biological research</p>
20	Core 2	Immunology	2018	<p>1. Discuss the various steps involved in conducting research.</p> <p>2. Learn to apply hypothesis testing via some of the statistical distributions.</p>

				<ul style="list-style-type: none"> 3. Develop understanding about Biological data and database search tools. 4. Acquire hands on training on various computational tools and techniques employed in Biological sequence analysis
21	Core 3	Practical related to Microbiology	2018	<ul style="list-style-type: none"> 1. Use diagnostic kits to test different types of auto immune diseases. 2. Prepare Rabbit for performance of immunological studies. 3. Perform Single Radial Immunodiffusion. 4. Have an idea on Rocket immunoelectrophoresis, Cross over Immunoelectrophoresis etc. 5. Do Heme agglutination tests for identification of different antigens
22	Core 4	Practical related to Immunology	2018	<ul style="list-style-type: none"> 1. Understand the microbial techniques for isolation, cultivation and maintenance of pure cultures 2. Learn structure, function of gene and its transfer methods 3. Develop understanding on cause, spread and control of diseases caused by different microorganisms 4. Get knowledge on collection of data, thesis writing.
23	Generic Elective (Two papers out of three)	a) Molecular Biology	2018	<ul style="list-style-type: none"> 1. The students will learn about the Possible modes of replication, and roles of helicase, primase, gyrase, topoisomerase, DNA Polymerase, DNA ligase, and Regulation of replication. 2. Learn about the mechanism and regulation of transcription in prokaryotes and eukaryotes. 3. Learn about genetic code and their evolution. 4. Gain knowledge in Different stages and components of protein synthesis
		b) Molecular Biology	2018	<ul style="list-style-type: none"> 1. Know about the mechanism of action of different hormones secreted by hypothalamus, pituitary and pineal glands. 2. Familiar with Iodine, Calcium metabolisms and disorders related to thyroid and parathyroid glands. 3. Know about the mechanism of action of insulin, glucagon and many gastro intestinal hormones.

				4. Acquire knowledge on Hormonal regulation of menstrual cycle and disorders associated with Gonadal hormones
		c) Cell and Developmental Biology	2018	<p>1. Acquire knowledge on all cell organelles in prokaryotes and eukaryotes, cell signaling, cell communication, cell adhesion, Apoptosis, Senescence, integrins .</p> <p>2. Gain the proficient knowledge about basic concepts of Developmental Biology, zygote formation, blastula formation, gastrulation and many events in early development.</p> <p>3. Understand Organogenesis, limb development and regeneration in vertebrates, and post embryonic development in animals and Plant tissue culture, Protoplast fusion and Production of transgenic plants.</p> <p>4. Gain knowledge about Miscelle, and liposomes, Membrane fluidity, Active transport, Ionophores Gap junctions, Endocytosis and Exocytosis</p>
24	Open Elective to others (For other department students)	c) Basics of Immunology Immunotechniques	2018	<p>1. Gain knowledge on essential features of different types of antigens, antibodies.</p> <p>2. Out line, compare and contrast the key mechanism of innate and adaptive immunity.</p> <p>3. Gain knowledge on undesirable immunological reactions and their complications in health management and transplantation.</p> <p>4. Apply knowledge in disease diagnosis through serological tests.</p>
25	Open Elective (b)	<i>Immunotechniques and their Applications</i>	2018	<p>1. To purify and analyse the antigens and antibodies.</p> <p>2. To apply different Hybridization techniques and ELISA, RIA.</p> <p>3. To detect various diseases by application of antiisera.</p> <p>4. To engineer antibodies and catalytic antibodies and produce drugs to allergies.</p>

26	Core 1	<i>Genetic Engineering</i>	2018	<ol style="list-style-type: none"> 1. Familiar with the tools and techniques for isolation and purification of genes, vector construction. 2. Understand the mechanisms of regulation of gene expression in different operons. 3. Know the techniques for transfer and expression of cloned gene and 4. Apply the knowledge of genetic engineering in biological research
27	Core 2	<i>Technical Writing, Biostatistics and Bioinformatics</i>	2018	<ol style="list-style-type: none"> 1. Discuss the various steps involved in conducting research. 2. Learn to apply hypothesis testing via some of the statistical distributions. 3. Develop understanding about Biological data and database search tools. 4. Acquire hands on training on various computational tools and techniques employed in Biological sequence analysis.
28	Core 3 P	<i>Practical related to Clinical Immunology, Biostatistics and Bioinformatics</i>	2018	<ol style="list-style-type: none"> 1. Use diagnostic kits to test different types of auto immune diseases. 2. Prepare Rabbit for performance of immunological studies. 3. Perform Single Radial Immunodiffusion. 4. Have an idea on Rocket immunoelectrophoresis, Cross over Immunoelectrophoresis etc. 5. Do Heme agglutination tests for identification of different antigens
29	Core 4	<i>Project Work</i>	2018	<ol style="list-style-type: none"> 1. Understand the microbial techniques for isolation, cultivation and maintenance of pure cultures 2. Learn structure, function of gene and its transfer methods 3. Develop understanding on cause, spread and control of diseases caused by different microorganisms

				4. Get knowledge on collection of data, thesis writing
30	Generic Elective (a)	<i>Clinical Immunology</i>	2018	1. Understand different types of immunity and components of the Immune System. 2. Gain knowledge on auto immune diseases, Animal models used to study them and the treatment for them. 3. Familiar with Clinical manifestation of graft rejection, general immunosuppressive therapy and immune tolerance to allografts. 4. Acquire the knowledge on oncogenes, Psychoimmunology and neuroimmunomodulation
31	Generic Elective (b)	<i>Applied And Molecular Immunology</i>	2018	1. Develop skill in production of monoclonal antibodies. 2. How better enzyme immobilization enhances its activity and their industrial and clinical applications. 3. Familiar with different types of vaccines and how they help in prevention of diseases. 4. Acquire the knowledge on IPR and procedures for patent filing
32	General Elective (C)	<i>Immunopharmacology</i>	2018	1. Understand about drug receptors, pharmacodynamics, pharmacokinetics, drug biotransformation. 2. Acquire knowledge on Immunomodulation therapy, malignancy therapy. 3. Gain knowledge on Prostaglandins, thromboxanes, leukotrienes and inhibitors of these molecules formation. 4. Familiar with Nitric oxide and its immunological effects.
33	Open Elective a	<i>Research Methodology</i>	2018	1. Discuss the various steps involved in conducting research. 2. Acquire hands on training on various computational tools and techniques. 3. Learn to apply hypothesis testing via some of the statistical distributions. 4. To acquire knowledge on research proposals and motivate students towards research
34	Open Elective	<i>Immunological Diseases and</i>	2018	1. Maintain the Clinical Immunology lab with all required

	(b)	<i>Therapeutics</i>		standards. 2. Out line, compare and contrast the key mechanism of innate and adaptive immunity. 3. Gain knowledge on different types of immunodeficiencies, their treatment and about autoimmune disorders. 4. Familiar with Clinical manifestation in graft acceptance or rejection and how immunosuppressive therapy is useful. And about cancer immunotherapy.
--	-----	---------------------	--	--

30. Botany

S. No.	Course Code	Title of the Course	Years of Introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/Skill development
	BOT-101	Algae, Bryophytes, Pteridophytes and Gymnosperms	2018	1. The student able to distinguish different species of lower plant groups. 2. Cultivation methods of Algae for industrial production of Single Cell Proteins, Agar Agar ,carragin and Neutraceuticals.Discuss the importance of morphological structure, classification, reproduction and economic importance of Algae.
	BOT-102	Taxonomy of Angiosperms	2018	1) Plant identification skills 2) Herbaria preparation and documentation.
	BOT-103	Microbiology	2018	1. Isolation and identification of Pathogenic and Non-Pathogenic micro-organisms. 2. Methods of cultivation of economically/industrially important microorganisms. 3. Plant disease identification and control methods.
	BOT-104	Human Values and Professional Ethics - I	2018	1. The student will be enriched with several aspects pertaining to Human values and performing of Professional Ethics in day today life. 2. Introduction of several Nature of values to be performed by

				<p>Humans to lead a good and Peaceful life by extending and imparting good behavior, character and conduct towards people of the society.</p> <p>3. Introducing different concepts of Bhagavad Gita and its applications in uplifting of Religious values in the present society.</p>
	BOT-105P	Practical-I Algae, Bryophytes, Pteridophytes and Gymnosperms & Taxonomy of Angiosperms	2018	<p>1) Identification of different Algal forms</p> <p>2) Morphological description and use of Floral Keys for plant identification.</p>
	BOT-106P	Practical-II Microbiology & Plant Development and Reproduction	2018	<p>2. Isolation, culture and staining methods for identification of micro-organisms.</p> <p>3. Diagnosis of Plant deceases based on symptoms and control methods.</p> <p>3. Histology of vegetative and reproductive structures and isolation</p>
	BOT-201	Plant Ecology	2018	<p>1) Concepts of Ecology Students, relation between biotic and abiotic factors in an ecosystem.</p> <p>2) Interaction between biotic communities and ecological energetics</p> <p>3) Environmental pollution, Global warming and Environmental protection strategies and green energy production</p>
	BOT-202	Plant Biochemistry and Metabolism	2018	<p>1) Biosynthesis of plant primary metabolites and chemistry.</p> <p>2) Plant physiological processes water relation, plant nutrition and energy metabolism,</p> <p>3) Metabolic changes in response to biotic and abiotic stress</p>
	BOT-203	Plant Development and Reproduction	2018	<p>1. Wood formation and types</p> <p>2. Reproductive structures. Mode of Reproduction</p>
	BOT-204	Human Values and Professional Ethics - II	2018	<p>1. The student will be enriched with several aspects pertaining to Human values and performing of Professional Ethics in day today life.</p>

				<ol style="list-style-type: none"> 2. Introduction of several Nature of values to be performed by Humans to lead a good and Peaceful life by extending and imparting good behavior, character and conduct towards people of the society. 3. Introducing different concepts of Bhagavad Gita and its applications in uplifting of Religious values in the present society.
	BOT-205P	Practical-I Plant Biochemistry and Metabolism & Phytobiodiversity and Conservation	2018	<ol style="list-style-type: none"> 1. Plant metabolite analysis and metabolic enzyme activity 2. Methods for Phytodiversity analysis.
	BOT-206P	Practical-II Plant Ecology & Cell Biology, Genetics and Evolution	2018	<ol style="list-style-type: none"> 1) Plant communities 2) Methods for analysis of environmental pollutants 3) Designs of waste water treatment plants. 4) Assessment of effect of Global warming on Plant systems 5) Study of chromosomal morphology and behavior in Mitosis and Meiosis 6) Practical Problem solving on genetic concepts
	BOT-301	Molecular Biology And Techniques	2018	<ol style="list-style-type: none"> 1. Nucleic acids properties and mechanism of DNA replication and damage repair, and Chromatin organization and Cell Cycle regulation 2. Gene expression, processing of Transcripts and Proteins, and mechanisms of regulation of gene expression in Prokaryotes and Eukaryotes. 3. Principles of Microscopy, Nucleic acid and protein separation and identification techniques and methods
	BOT-302	Biodiversity and Conservation	2018	<ol style="list-style-type: none"> 1. Knowledge on Phytodiversity, biodiversity centres and types of Biodiversity. 2. Phytodiversity analysis using Remote sensing 3. Causes for the loss of phytodiversity and conservation strategies
	BOT-303 IE	Biosystematics	2018	<ol style="list-style-type: none"> 1. Biosystematic Categories,

				2. Omega Taxonomy 3. Taximetrics and Concept of Species
	BOT-304IE	Molecular Plant Pathology	2018	1. Symptoms based Diagnosis of Plant Diseases 2. Methods of Plant Disease Management and pest control
	BOT-307 IE	Plants and Human Welfare	2018	1. Food Yielding Plants as a source of food, fiber and timber. 2. Plants used in curing human diseases and other ailments in traditional medical systems and Veterinary diseases 3. Spices and condiments, Non timber forest products. 4. Preparation and application of Bio fertilizers, Bio pesticides, Bio insecticides, mushroom cultivation and plant based preservatives
	BOT-308 IE	Organic Farming and Mushroom Cultivation	2018	1. Different types of compost preparation and their Nutritive value. 2. Biofertilizers and organic preparations, their marketing and farm management. 3. Vermicompost Technology 4. Identification of types of edible and poisonous mushrooms. 5. Method of cultivation of mushrooms and diseases management
	BOT-309 IE	Gardening and Nursery Techniques	2018	1. Nurseries development and Management and Garden designing for different plant groups 2. <i>In vivo</i> and <i>in vitro</i> plant propagation methods 3. Plant nutrition and protection 4. Types of gardens and nurseries
	Practical-I	Molecular Biology And Techniques ; Biodiversity and Conservation	2018	1.. Study of Chromosomal Behavior during Mitosis. 2. Isolation of DNA, RNA and proteins, Quantitative estimation 3. Assignments on DNA structure, Replication and Gene expression 4. Methods for Phytodiversity analysis. 5. Plant diversity conservation methods
	Practical-II	Biosystematics / Molecular Plant	2018	Biosystematics 1. Isolation of Pathogenic Fungi and Bacteria.

		Pathology		<ol style="list-style-type: none"> 2. Estimation of Rhizosphere, Phyllosphere, Spermosphere microorganisms by Serial dilution methods. 3. Screening of Botanical Pesticides (plant extracts) against Fungal Pathogens 4. Preparation of Plant Pathology Herbarium <p>Molecular Plant Pathology</p> <ol style="list-style-type: none"> 1. Isolation of Pathogenic Fungi and Bacteria. 2. Estimation of Rhizosphere, Phyllosphere, Spermosphere microorganisms by Serial dilution methods. 3. Screening of Botanical Pesticides (plant extracts) against Fungal Pathogens 4. Preparation of Plant Pathology Herbarium
	BOT-401	Molecular Genetics & Genomics and Proteomics	2018	<ol style="list-style-type: none"> 1. Genetic basis of inheritance of genes and their mapping in eukaryotes and microbes 2. Molecular marker techniques and construction of genetic and physical maps. 3. Whole genome sequencing strategies, and structural and functional annotation. 4. Principles and methods of Transcriptome and Proteome analysis. 5. Mechanisms of evolution of genomes, New genes and proteins and construction of Phylogenetic trees. 6. Structural organization of plant genomes, Arabidopsis and rice genomes and applications of genome projects.
	BOT-402	Plant Biotechnology	2018	<ol style="list-style-type: none"> 1. Techniques of Plant Tissue Culture and Applications. 2. Process of r-DNA technology 3. Production of genetically modified crops and Achievements
	BOT-403 IE	Molecular Plant Physiology	2018	<ol style="list-style-type: none"> 1. 1.Signal transduction pathways and Senescence 2. 2.Molecular mechanism of Photosynthesis

				3. Synthesis and application of Nanomaterials. 4. Molecular Physiology of Stress and Flowering
	BOT-404 IE	Horticulture and Agricultural Biology	2018	1. Propagation methods for horticultural crops 2. Soil science and fertility management for horticultural crops. 3. Seed production technology of horticultural crops.
	BOT-405 IE	Ethnobotany and Phytomedicine	2018	1. Ethnobotanical knowledge 2. Medicinal plant Cultivation, Multiplication, Collection, Processing and Marketing 3. Sources of Plant Medicines, Formulations, Diagnostic features and their Biological activity.
	Practical – I	Molecular Genetics & Genomics and Proteomics; Plant Biotechnology	2018	1) Isolation of genomic DNA and RNA and Quantification by Spectrophotometry. 2) Preparation of DNA denaturation curve 3) Restriction digestion of DNA, Agarose Gel Electrophoresis 4) PCR amplification of DNA. and RAPD analysis. 5) Precipitation of proteins ,Estimation of protein. 6) Determination of Isoelectric Point of proteins 7) Separation of proteins by SDS-PAGE and size determination 8) Problems related to genomics, proteomics and molecular evolution 9) Establishment of callus, organ and cell cultures
	Practical - II	Molecular Plant Physiology / Horticulture and Agricultural Biology / Ethnobotany and Phytomedicine	2018	BOT-403 IE : Molecular Plant Physiology 1. Extraction and Estimation of Chlorophyll pigments. 2. Assay of enzyme activity 3. Estimation of Carbohydrate, proteins and separation 4. Seed viability and germination 5. Metabolite accumulation under stress BOT-404 IE: Horticulture and Agriculture Biology 1. Isolation, Characterization and Identification of Rhizobium 2. Outdoor cultivation of Blue green Algae

				<p>3. Vermicompost production</p> <p>4. Multiplication of VAM and Preparation Biofertilizers;</p> <p>5. Establishment of nursery, different containers, soil transplantation techniques.</p> <p>6. Plant propagation – layering, cutting, grafting.</p> <p>7.. Layout and Designing of gardens and Lawns.</p> <p>BOT-405 IE: Ethnobotany and Phytomedicine</p> <p>1. Recording medicinal practices and herbal formulations of tribal medicine by interviews and field study and preparation of report.</p> <p>2. Development of medicinal plant nurseries in botanical garden.</p> <p>3. Practical Methods of Cultivation, Propagation, Conservation and Protection of important Medicinal plants to develop familiarity.</p> <p>4. Micro-propagation of Medicinal plants and Production of Callus from different Explants for Specific Biologically active Ingredients.</p> <p>5. Practical demonstration of collection, processing and storage of Plant Medicines.</p> <p>6. Demonstration of drug Formulation and Herbal cosmetics.</p> <p>7. Organoleptic examination and physical and chemical properties.</p>

31. Biotechnology

	PROGRAMME	COURSE CODE	COURSE TITLE	Years of Introduction	Activities/Content with direct bearing on Employability/ Entrepreneurship/ Skill development
1	M.Sc. Biotechnology	BTH 101	Structure and Functions of Biomolecules	2018	<ol style="list-style-type: none"> 1. Understand the classification of carbohydrates and their biochemical functions. 2. Correlate the reactions of amino acids that are basis for identification tests and biochemical pathways. 3. Know the structure of different classes of lipids and their roles in biological systems. 4. Comprehend the structure and functions of nucleic acids
		BTH 102	Advanced Tools and Techniques	2018	<ol style="list-style-type: none"> 1. Learn about various techniques for isolation and concentration of macromolecules. They will also understand the principles and applications of different Microscopes 2. Understand the techniques of chromatography, centrifugation and electrophoresis 3. Achieve a basic understanding of characterization of biomolecules by different Spectroscopic techniques 4. They learn safety measures in handling radioisotopes and familiarize with the various radioisotope tracer techniques and their role in biology.
		BTH 103P	Practicals related to Biochemical Preparations and Analysis & Analytical Methods	2018	<ol style="list-style-type: none"> 1. Acquire the skill to perform experiments related to Biochemical preparations and advanced tools and techniques
		BTH 104P	Practicals related to	2018	<ol style="list-style-type: none"> 1. Obtain the skill to perform experiments

			Microbiology and Immunology		related to Microbiology and Cell Biology
		BTH 105	Microbiology and Immunology	2018	5. Acquire the knowledge on classification and structure of different microorganisms 6. Understand the microbial techniques for isolation, cultivation and maintenance of pure cultures 3. Out line, compare and contrast the key mechanism of innate and adaptive immunity 4. Apply knowledge in disease diagnosis through serological tests
		BTH 106	Human values and Professional ethics-I	2018	1. Learn the importance of Human values and Professional ethics
		BTH 201	Enzymes and Intermediary Metabolism	2018	1. Gain knowledge on different enzymes and their significance 2. Correlate how the living organisms exchange energy and matter with the surroundings for their survival, and store free energy in the form of energy-rich compounds 3. Recognize how the catabolic breakdown of the substances is associated with release of free energy; whereas, free energy is utilized during synthesis of biomolecules i.e., anabolic pathways 4. Apply the knowledge of metabolic pathways to biotechnological and biochemical research.
		BTH 202	Molecular Biology	2018	1. Understand the biochemical composition and genome organization in living cells 2. Learn about the mechanism of tissue specific transcription and role of RNA polymerases 3. Appreciate the correlation of genetic code with protein synthesis in prokaryotic and eukaryotic

					cells. 4. Gain insights of mechanism of gene expression and regulations
		BTH-203P	Practicals related to Enzymology & Molecular Biology	2018	Learn the skill to perform experiments related to Enzymology and Molecular Biology
		BTH-204P	Practicals related to Biostatistics and Bioinformatics	2018	Learn the skill to perform experiments related to Immunology and analyze data using various biostatistical methods.
		BTH 205	Research Methodology, Biostatistics and Bioinformatics	2018	<ol style="list-style-type: none"> 4. Discuss the various steps involved in conducting research 5. Learn to apply hypothesis testing via some of the statistical distributions 5. Develop understanding about Biological data and database search tools 7. Acquire hands on training on various computational tools and techniques employed in Biological sequence analysis
		BTH 206	Human values and Professional ethics-II	2018	Learn the importance of Human values and Professional ethics
		BTH 301	Genetic Engineering	2018	<ol style="list-style-type: none"> 1. Familiar with the tools and techniques for isolation and purification of genes 2. Acquire knowledge on vectors for construction of genomic libraries and cDNA libraries 3. Understand the mechanism of cDNA synthesis 4. Know the techniques for transfer and expression of cloned gene and applications of genetic engineering in biological research.
		BTH-302	Cell and Tissue culture	2018	Gain the knowledge regarding plant and animal cell cultures. Get the skill to perform

					micropropagation.
		BTH 303P	Practicals related to Genetic Engineering, Cell and Tissue culture & Food and Industrial Biotechnology	2018	Learn the skill to perform the techniques for transfer and expression of cloned gene and applications of genetic engineering in biological research
		BTH 304 a.	Bioprocess Engineering and Technology	2018	<ol style="list-style-type: none"> 1. Handle the axenic cultures of industrially important microbes and appreciate the relevance of microorganisms from industrial context. 2. Gain an overview on design, operations and types of fermentation systems 3. Calculate yield and production rates in a biological production process, and also interpret data 4. Apply knowledge on separation and purification of end products of fermentation
		BTH 304 b.	Legal, Ethical and Implications of Biotechnology	2018	<ol style="list-style-type: none"> 1. Develop awareness on types IPR and patenting process 2. Understand legal and ethical controversies in biotechnological innovations 3. Apply knowledge in providing safety of food, water and environment 4. Gain overview of GM crops and microbes and their impact on environment
		BTH 304 c.	Food and Industrial Biotechnology	2018	<ol style="list-style-type: none"> 1. Acquire knowledge on food preservation, processing and control measures for food poisoning 2. Establish indoor and outdoor cultivation units for algal cultivation 3. Learn effective management of solid waste for

					energy production. 4. Appreciate the industrial role of microorganisms in production of biomolecules
		BTH 305 a	Plant Tissue Culture	2018	<ol style="list-style-type: none"> 1. Learn important milestones in the plant tissue culture and understand the concepts and principles of Plant tissue culture. 2. Learn different pathways of plant regeneration under in vitro conditions – organogenesis, somatic embryogenesis, synthetic seeds and applications. 3. Understand techniques of establishing cell suspension culture, techniques of virus elimination by meristem and shoot tip culture. 4. Acquire skill of propagation of elite medicinal and economically important plants and establish micropropagation unit for commercialization.
		BTH 305 b	Bioethics	2018	<ol style="list-style-type: none"> 1. Acquire the knowledge on IPR and procedures for patent filing 2. Understand the Legal and Ethical aspects of gene therapy - cloning - Manipulation of human genome -Technology transfer. 3. Learn role of Government, Industries and society in promoting, accepting and regulating the rDNA research 4. Develop understanding on Environmental and Health aspects of Biotechnology
		BTH 305 c	Bioinformatics	2018	<ol style="list-style-type: none"> 1. Develop understanding about Biological data and database search tools 2. Acquire hands on training on various computational tools and techniques employed

					<p>in Biological sequence analysis</p> <p>3. Learn about pathway and enzyme databases, Sequence submission tools</p> <p>4. Develop understanding on protein folding and its significance</p>
		BTH 401	Environmental Biotechnology	2018	<p>1. Learn the relation between biotic and abiotic factors in different ecosystem models and predict how changes in free energy availability affect ecosystems.</p> <p>2. Appreciate the role of microorganisms in biodegradation and pollution detection</p> <p>3. Develop skill on large scale production and applications of bio pesticides and bio fertilizers fin agriculture</p> <p>4. Apply knowledge on solid waste management and reclamation of waste water</p>
		BTH 402	Plant Biotechnology	2018	<p>1. Develop skill in production of transgenic plants resistant to biotic and abiotic stress</p> <p>2. Apply knowledge for industrial production of plant metabolites</p> <p>3. Cultivate the micro and macro algae of commercial importance on large scale</p> <p>4. Identify different plant pathogens and apply biological control methods</p>
		BTH 403	Project work	2018	<p>1. Select the appropriate research design and develop appropriate research hypothesis for a research project and acquire hands on training on various tools and techniques employed in executing the project.</p>
		BTH 404 a	Pharmaceutical Biotechnology	2018	<p>1. Gain knowledge on preparation and formulations of different drugs</p>

					<ul style="list-style-type: none"> 2. Develop skill on commercial production of pharmaceutical products for human welfare 3. Learn the techniques of drug validation and vaccine production 4. Understand the bioethical principle, values, concepts and social and judicial implications of pharmaceutical biotechnology
		BTH 404b	Animal Biotechnology	2018	<p>Understand the organization of reproductive organs and advances in contraception research</p> <ul style="list-style-type: none"> 2. Learn the techniques of In Vitro Fertilization and artificial insemination 3. Develop skill in molecular techniques for production of transgenic animals 4. Apply knowledge on molecular farming for production of vaccines and hormones
		BTH 404c	Applications of Biotechnology	2018	<ul style="list-style-type: none"> 1.Acquire the knowledge on applications of plant, animal and environmental biotechnology 2.Develop skill on organic farming and preparation of bio pesticides and bio fertilizers 3.Establish and maintain cell lines for vaccine production 4.Apply knowledge on waste management and recycling for environmental protection
		BTH 404d	Practicals Related to Environmental Biotechnology & Plant	2018	<ul style="list-style-type: none"> 1.Learn the techniques related to Environmental and Plant biotechnology
		BTH 405a	Tools in Biotechnology	2018	<ul style="list-style-type: none"> 1. Acquire the knowledge on analysis of DNA replication to map site specific points of replication 2. Learn to apply DNA microarrays to detect

					replication origins 3. Understand the functions of helicase and polymerase in DNA replication 4. Acquire knowledge on sophisticated programmed of genome replication
		BTH 405b	Immunology	2018	1. Out line, compare and contrast the key mechanism of innate and adaptive immunity 2. Apply knowledge in disease diagnosis through serological tests 3. Develop skill in production of monoclonal antibodies 4. Gain knowledge on undesirable immunological reactions and their complications in health management
		BTH 405c	Applications of Biotechnology	2018	1. Acquire the knowledge on applications of plant, animal and environmental biotechnology 2. Develop skill on organic farming and preparation of bio pesticides and bio fertilizers 3. Able to establish and maintain cell lines for vaccine production 4. Apply knowledge on waste management and recycling for environmental protection

32. Chemistry

Analytical Chemistry

S.No.	Course Code	Title of the Course	Years of Introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/Skill development
-------	-------------	---------------------	-----------------------	--

1.	CHE-101	Inorganic Chemistry I	2018	<ol style="list-style-type: none"> 1. To understand the key features of coordination compounds, Crystal Field Theory, magnetic properties and bonding in transition metal complexes. 2. To learn about the polymorphic forms of Carbon, Sulphur and Phosphorus, synthesis and properties of sulphur-nitrogen compounds, boranes, carbides, silicates and to know Wades rules. 3. To explain the reactivity of complexes in terms of Valence bond and Crystal Field theories, Taube's classification, Trans effect and Electron Transfer Reactions 4. To gain knowledge on synthesis and structures of different metal carbonyls, synergistic effect and 18 electron rule.
2.	CHE-102	Organic Chemistry I	2018	<ol style="list-style-type: none"> 1. To detect stereochemical structures of the molecules, stereoselective and stereo controlled reactions 2. To ascertain the stereochemistry of the products with the effect of neighbouring group participation and to familiarize the various types of aromatic substitution reactions, their mechanism and the effect of substituents. 3. To know the concept of isotope effects, potential energy diagrams and transition states in different intermediates

				4. To familiarize with stereospecific synthesis of naturally occurring terpenoids and degradation products of terpenoids
3.	CHE-103	Physical Chemistry- I	2018	<ol style="list-style-type: none"> 1. To know the concepts such as Operator algebra, Eigen values and Eigen functions, Degeneracy, Schrodinger wave equation and the postulates of Quantum Mechanics 2. To learn about theories of reaction rates, Lindemann, Lindemann-Hinshel wood, and RRKM theories. 3. To know about Thermodynamic concepts and entropy change in reversible process and irreversible process, Gibbs- Duhem equation, calculation of thermodynamic properties. 4. To study the Thermodynamic and Kinetic Derivation of Nernst Equation and the derivation of Debye-Huckle Equation and its Verification
4.	CHE-104	Inorganic Practical- I	2018	<ol style="list-style-type: none"> 1. To demonstrate mastery of basic semi-micro qualitative analysis of simple salts and interprets analytical data and will make scientific claims that are supported by the observations 2. To familiarize with techniques of titration and calculation of errors

5.	CHE-105	Organic Practical-I	2018	<ol style="list-style-type: none"> 1. .To familiarize the systematic procedures of analysis of organic components, conformational tests for various functional groups 2. To understand the mechanisms and familiarize with methodologies to prepare biologically important molecules.
6.	CHE-106	Physical Practical I	2018	<ol style="list-style-type: none"> 1. To study the determination of critical solution temperature, eutectic composition, distribution coefficient, adsorption of different 2. To calibrate the statistical data
7.	CHE-107	General Chemistry-I	2018	<ol style="list-style-type: none"> 1. To know about mean and median values, standard deviation and coefficient of variation. 2. To acquire knowledge on principle and instrumentation of AAS and difference between flame AAS and furnace AAS.
8.	CHE-108	Human Values and Professional Ethics – I	2018	<ol style="list-style-type: none"> 1. To know about the needs and importance of professional ethics. 2. To analyze nature of Values, basic Moral Concepts character and Conduct. 3. To gain knowledge on individual and society ethical values, ahimsa, satya and brahmacharya 4. To understand values of Bhagavd Gita, various religions, religious tolerance, Gandhian ethics

9.	CHE - 201	Inorganic Chemistry II	2018	<ol style="list-style-type: none"> 1. To familiarize with the general methods of complex preparations and properties, nature of bonding and structural features of metal complexes 2. To know about Russel-Saunders coupling, splitting of energy levels in octahedral field and differentiate between Orgel diagrams and Tanabe-Sugano diagrams 3. To understand about the laws of Hunds, Curie and Weiss, magnetism and magnetic susceptibility determination by Gouy's and Farady methods 4. To gain knowledge on Induced reactions, Free radical reactions, Thermal decomposition reactions, Chain reaction
10.	CHE-202	Organic Chemistry II	2018	<ol style="list-style-type: none"> 1. To familiarize the mechanisms of E₁, E₂ and E_{1CB} reactions, stereoselectivity and synpyrolytic eliminations and use of isotopes, chemical trapping and crossover experiments. 2. To learn the rearrangements involving electron deficient carbon, nitrogen and oxygen atoms and electron rich carbon atom and familiarize with the limitations and applications of reactions. 3. To learn the synthesis of three and four membered heterocycles, mechanism of ring opening reactions and the effect of electron donating and withdrawing substituents in selectivity of ring opening reactions. 4. To understand the structural elucidation and

				synthesis of alkaloids using specific reagents.
11.	CHE -203	Physical chemistry II	2018	<ol style="list-style-type: none"> 1. To know about Pauli Exclusion principle and Slater determinant, atomic orbitals, Simple molecular orbitals and Huckel theory of conjugated systems 2. To learn Gibbs adsorption isotherm, BET equation and correlate limitations, critical micellar concentration (CMC) and factors affecting the CMC of surfactants. 3. To identify Relation between order of a finite group and its sub-group, conjugacy, Symmetry point group (MLS, MHS and MSS) and orthogonality theorem. 4. To acquire knowledge on DC-Polarography, AC-Polarography, Controlled Potential Electrolysis, to derive equation for Tafel plots, half-wave potentials for reversible system
12.	CHE 204	Inorganic Chemistry	2018	<ol style="list-style-type: none"> 1. To separate and determine the two component mixtures. 2. To acquire knowledge in the preparation of metal complexes
13.	CHE 106	Core practical II: Organic Chemistry	2018	<ol style="list-style-type: none"> 1. To familiarize with binary mixture separation and to gain hands-on-experience in purification of the 2. To get knowledge about the chemical behavior of different components and mechanisms

14.	CHE 206	Core practical II: Physical Chemistry	2018	<ol style="list-style-type: none"> 1. To study the determination of cell constant and verification of Onsager equation, strength of strong 2. To get knowledge on the applications of conductometry, potentiometry, coulometry and pH metry.
15.	CHE 207	General Chemistry II	2018	<ol style="list-style-type: none"> 1. To acquire knowledge on ion selective electrodes, solid membrane electrodes and glass electrodes 2. To learn general principles and classifications of chromatographic separations and applications of TLC, GLC
16.	CHE 208	Human Values and professional ethics-II	2018	<ol style="list-style-type: none"> 1. To understand the concepts of human values, responsibilities of family values and status of women in family and society 2. To acquire knowledge on different medical ethics the views of charaka and sushruta on moral responsibilities of medical practitioners 3. To gain knowledge on social ethics and understand the characteristics of ethical problems in management. 4. To familiarize environmental ethics, ethical theory and ecological crisis
17.	CHE-AC-301	Inorganic Spectroscopy and Thermal Methods of Analysis	2018	<ol style="list-style-type: none"> 1. To know about TG and DTA and applications of different scanning calorimetry.

				<ol style="list-style-type: none"> 2. To gain knowledge on Doppler shift and chemical shift, basic principles and applications of NQR spectroscopy 3. To learn zero field splitting and Kramer's degeneracy, relaxation processes, instrumentation and applications of ESR. 4. To know about photoelectric effect and Koopmans theorem and impart the applications of X-ray and UV photoelectron spectroscopy
18.	CHE AC 303 & 304	Core-Practical: Classical Methods of Analysis	2018	<ol style="list-style-type: none"> 1. To know the basic principles of instrumental methods of analysis 2. To gain knowledge on chemistry of alloys 3. To Understand the complexity, theory and working principle of colourimetry 4. To familiarize with laws of colorimetric titrations
19.	CHE-AC-305A	Organic Chemistry III	2018	<ol style="list-style-type: none"> 1. To familiarize with the specific functions of the reagents particularly diazomethane, N-bromosuccinimide, Ziegler Natta catalyst, 1,3-dithianes and Merrifield resin in the synthesis of a variety of complex molecules 2. To gain knowledge in the synthesis of different organometallic reagents and also stereo and regio specificity and selectivity of reactions with organometallic reagents 3. To understand diastereoselectivity, stereoselectivity and substrate controlled auxillary controlled reactions 4. To acquire knowledge about the reagents

				which causes oxidation in various compounds and also the reagents that causes selective and complete reductions to synthesize various compounds.
20.	CHE-AC-305B	Physical Chemistry III	2018	<ol style="list-style-type: none"> 1. To know the determination of Character Co-ordinate of C_{2v} point group based on 3N Coordinates and to learn the Mutual exclusion Principle. 2. To learn the Bragg conditions-Miller Indices-Laue method, Bragg method, Debye Scherrer method of X-ray structural analysis of crystals 3. To study the rigid rotator model, stark effect, vibration-rotation spectroscopy, PQR branches, selection rules and Vibrational- rotational Raman spectroscopy 4. To study the concepts on heat of dissolution, regular solution theory, Hildebrand solubility parameter, concept of Flory-Huggins theory of polymer solutions
21.	CHE AC 306	Spectral Techniques	2018	<ol style="list-style-type: none"> 1. To know the basic principles of spectroscopy. 2. To familiarize with the analysis of various functional groups by using different spectroscopic techniques. 3. To Understand the applications of AAS. 4. To gain knowledge about Mass spectral fragmentation of organic compounds and common functional groups

22.	CHE AC 306	Chromatographic Techniques	2018	<ol style="list-style-type: none"> 1. To know the stationary and mobile phases in chromatographic techniques. 2. To familiarize applications of different chromatographic methods. 3. To Understand the principle of chromatographic techniques 4. To gain knowledge on the normal phase and reverse phase.
23.	CHE-AC-401	Quality Control and General Principles	2018	<ol style="list-style-type: none"> 1. To diagnose problems in the quality improvement process and Explain each total quality implementation phase 2. To know about theoretical basis for the use of organic reagents in inorganic analysis. 3. To understand different types of kinetic methods and their evaluation and to determine the kinetics of enzyme 4. To understand the oxidation reactions with Ce (IV) sulphate solutions and applications of complexometric titrations
24.	CHE-AC 402	: Instrumental Methods of Analysis	2018	<ol style="list-style-type: none"> 1. To understand the working principles, instrumentation and applications of ICP-AES and ICP-MS, energy dispersive X-ray fluorescence (EDXRF), Wavelength dispersive X-ray fluorescence (WDXRF). 2. To understand the basic principles, procedure and components of the High-Performance Liquid Chromatography (HPLC), Gel Permeation Chromatography (GPC): Capillary Electrophoresis (CE), Supercritical Fluid Chromatography (SFC).

				<ol style="list-style-type: none"> 3. To get knowledge on instrumentation and applications of GCMS in drug analysis and environmental samples analysis 4. To improve the knowledge about coulometric techniques and their analysis of cations (As (III), Fe (II)) and anions (I^- and S^{2-}) by using I_2 liberations and Ce^{4+} liberation in solutions
25.	CHE AC 403	Core practical I: Analytical Chemistry- Practical	2018	<ol style="list-style-type: none"> 1. Understand the common laboratory techniques including separation techniques 2. Polarography, atomic absorption spectroscopy in both emission and absorption mode. 3. Gain knowledge on implementation of gas chromatography and HPLC for separation of mixtures 4. Familiarize with interpretation of data to structures by NMR.
26.	CHE AC 404	Project Work	2018	<ol style="list-style-type: none"> 1. Perform experiments, collection and evaluation of data 2. Interpretation of results while adhering to scientific principles of responsible and ethical behaviour 3. Analysing and compiling the data and results in a chronological order in the form of dissertation. 4. Preparation of dissertation

27.	CHE-AC-405	Applied and Environmental Aspects	2018	<ol style="list-style-type: none"> 1. Have an idea about preparation of sampling, decomposition, separation and preconcentration of metal ions etc. 2. Gain experience on agrochemicals and fertilizers and their analysis 3. Have an idea on the analysis of fuels, alloys and explosives 4. Experience with environmental pollution monitoring techniques
28.	CHE-AC-406	Bioinorganic, Bioorganic, Biophysical Chemistry	2018	<ol style="list-style-type: none"> 1. Gain knowledge on metallo proteins in electron transfer processes. 2. Know the applications of trace metal ions and metal ions as chelating agents in medicine. 3. Achieve and develop highly stereoselective synthesis of organic compounds and drugs by adopting environmentally 4. Understand thermodynamics of biopolymer reactions and to correlate free energy and biopolymer parameters
29.	CHE AC 406A	Drug Chemistry	2018	<ol style="list-style-type: none"> 1. Know about natural products 2. Know Interpretation of cardiovascular drugs 3. Know the Analyzing about prostaglandins. 4. Know the Definition, Classification, Nomenclature, Structure and Synthesis of anti-inflammatory drugs.
30.	CHE AC 406 B	Electroanalytical Techniques	2018	<ol style="list-style-type: none"> 1. Know how to interpret potentiometry and conductometry 2. Know the Interpretation of results while adhering to DC Polarography 3. Know the Analysing and compiling the data and results in polarography . 4. Familiarize Types of ion sensitive electrodes

M.Sc., Environmental Chemistry

S. No.	Course Code	Title of the Course	Years of Introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/Skill development
1.	CHE-101	Inorganic Chemistry- I	2018	<ol style="list-style-type: none">1. To understand the key features of coordination compounds, Crystal Field Theory, magnetic properties and bonding in transition metal complexes.2. To learn about the polymorphic forms of Carbon, Sulphur and Phosphorus, synthesis and properties of sulphur-nitrogen compounds, boranes, carbides, silicates and to know Wades rules.3. To explain the reactivity of complexes in terms of Valence bond and Crystal Field theories, Taube's classification, Trans effect and Electron Transfer Reactions4. To gain knowledge on synthesis and structures of different metal carbonyls, synergistic effect and 18 electron rule.
	CHE-102	Organic Chemistry I	2018	<ol style="list-style-type: none">1. To detect stereochemical structures of the molecules, stereoselective and stereocontrolled reactions2. To ascertain the stereochemistry of the products with the effect of neighbouring group participation and to familiarize the various types of aromatic substitution reactions, their mechanism and the effect of substituents3. To know the concept of isotope effects, potential energy diagrams and transition states in different intermediates4. To familiarize with stereospecific synthesis of

				naturally occurring terpenoids and degradation products of terpenoids
	CHE-103	Physical Chemistry- I	2018	<ol style="list-style-type: none"> 1. To know the concepts such as Operator algebra, Eigen values and Eigen functions, Degeneracy, Schrodinger wave equation and the postulates of Quantum Mechanics. 2. To learn about theories of reaction rates, Lindemann, Lindemann-Hinshel wood, and RRKM theories 3. To know about Thermodynamic concepts and entropy change in reversible process and irreversible process, Gibbs- Duhem equation, calculation of thermodynamic properties 4. To study the Thermodynamic and Kinetic Derivation of Nernst Equation and the derivation of Debye-Huckle Equation and its Verification
	CHE-104	Inorganic Practical- I	2018	<ol style="list-style-type: none"> 1. To demonstrate mastery of basic semi-micro qualitative analysis of simple salts and interprets analytical data and will make scientific claims that are supported by the observations. 2. To familiarize with techniques of titration and calculation of errors
	CHE-105	Organic Practical-I	2018	<ol style="list-style-type: none"> 1. To familiarize the systematic procedures of analysis of organic components, conformational tests for various functional groups. 2. To understand the mechanisms and familiarize with methodologies to prepare biologically important molecules
		Physical Practical I	2018	<ol style="list-style-type: none"> 1. To study the determination of critical solution

	CHE-106			temperature, eutectic composition, distribution coefficient, adsorption of different 2. To calibrate the statistical data
	CHE-107	General Chemistry-I	2018	1. To know about mean and median values, standard deviation and coefficient of variation 2. To acquire knowledge on principle and instrumentation of AAS and difference between flame AAS and furnace AAS
	CHE-108	Human Values and Professional Ethics – I	2018	1. To know about the needs and importance of professional ethics. 2. To analyze nature of Values, basic Moral Concepts character and Conduct 3. To understand values of Bhagavd Gita, various religions, religious tolerance, Gandhian ethics
	CHE-201	Inorganic Chemistry- II	2018	1. To familiarize with the general methods of complex preparations and properties, nature of bonding and structural features of metal complexes 2. To know about Russel-Saunders coupling, splitting of energy levels in octahedral field and differentiate between Orgel diagrams and Tanabe-Sugano diagrams 3. To understand about the laws of Hunds, Curie and Weiss, magnetism and magnetic susceptibility determination by Gouy's and Farady methods 4. To gain knowledge on Induced reactions, Free radical reactions, Thermal decomposition reactions, Chain reactions
	CHE-202	Organic Chemistry -II	2018	1. To familiarize the mechanisms of E_1 , E_2 and E_{1CB} reactions, stereoselectivity and synpyrolytic eliminations and use of isotopes, chemical trapping and crossover experiments

				<ol style="list-style-type: none"> 2. To learn the rearrangements involving electron deficient carbon, nitrogen and oxygen atoms and electron rich carbon atom and familiarize with the limitations and applications of reactions 3. To learn the synthesis of three and four membered heterocycles, mechanism of ring opening reactions and the effect of electron donating and withdrawing substituents in selectivity of ring opening reactions. 4. To understand the structural elucidation and synthesis of alkaloids using specific reagents.
	CHE-203	Physical Chemistry- II	2018	<ol style="list-style-type: none"> 1. To know about Pauli Exclusion principle and Slater determinant, atomic orbitals, Simple molecular orbitals and Huckel theory of conjugated systems 2. To learn Gibbs adsorption isotherm, BET equation and correlate limitations, critical micellar concentration (CMC) and factors affecting the CMC of surfactants 3. To identify Relation between order of a finite group and its sub-group, conjugacy, Symmetry point group (MLS, MHS and MSS) and orthogonality theorem 4. To acquire knowledge on DC-Polarography, AC-Polarography, Controlled Potential Electrolysis, to derive equation for Tafel plots, half-wave potentials for reversible system
	CHE-204	Inorganic Practical- II	2018	<ol style="list-style-type: none"> 1. To separate and determine the two component mixtures 2. To acquire knowledge in the preparation of metal complexes

	CHE-205	Organic Practical-II	2018	<ol style="list-style-type: none"> 1. To familiarize with binary mixture separation and to gain hands-on-experience in purification of the 2. To get knowledge about the chemical behavior of different components and mechanisms.
	CHE-206	Physical Practical -II	2018	<ol style="list-style-type: none"> 1. To study the determination of cell constant and verification of Onsagar equation, strength of strong 2. To get knowledge on the applications of conductometry, potentiometry, coulometry and pH metry.

To understand the basic principles, procedure and components of the High-Performance Liquid Chromatography (HPLC), Gel Permeation Chromatography (GPC): Capillary Electrophoresis (CE), Supercritical Fluid Chromatography (SFC). 3. To get knowledge on instrumentation and applications of GCMS in drug analysis and environmental samples analysis. 4. To improve the knowledge about coulometric techniques and their analysis of cations (As (III), Fe (II)) and anions (I- and S²⁻) by using I₂ liberations and Ce⁴⁺ liberation in solutions
	CHE-IC-403	Instrumental Methods of Analysis-II	2018	<ol style="list-style-type: none"> 1. To understand the common laboratory techniques including separation techniques. 2. Polarography, atomic absorption spectroscopy in both emission and absorption mode. 3. To gain knowledge on implementation of gas chromatography and HPLC for separation of mixtures. 4. To Familiarize with interpretation of data to structures by NMR.

	CHE-IC-404	Project work	2018	<ol style="list-style-type: none"> 1. Ability to perform experiments, collection and evaluation of data 2. Interpretation of results while adhering to scientific principles of responsible and ethical behaviour. 3. Analysing and compiling the data and results in a chronological order in the form of dissertation 4. Preparation of dissertation.
	CHE-405	(a) Solid state and Photo Chemistry (b) Bioinorganic, Bioorganic & Biophysical (c) Chemistry of Nanomaterials & Functional materials	2018	<p>405 A</p> <ol style="list-style-type: none"> 1. To understand the working principles, instrumentation and applications of ICP-AES and ICP-MS, energy dispersive X-fluorescence (EDXRF), Wavelength dispersive X-ray fluorescence (WDXRF). 2. To understand the basic principles, procedure and components of the High-Performance Liquid Chromatography (HPLC), Gel Permeation Chromatography (GPC): Capillary Electrophoresis (CE), Supercritical Fluid Chromatography (SFC). 3. To get knowledge on instrumentation and applications of GCMS in drug analysis and environmental samples analysis 4. To improve the knowledge about coulometric techniques and their analysis of cations (As (III), Fe (II)) and anions (Γ^- and S^{2-}) by using I^2 liberations and Ce^{4+} liberation in solutions. <p>405 B</p> <ol style="list-style-type: none"> 1. Gain knowledge on metallo proteins in electron

				<p>transfer processes.</p> <ol style="list-style-type: none"> 2. Know the applications of trace metal ions and metal ions as chelating agents in medicine. 3. Achieve and develop highly stereoselective synthesis of organic compounds and drugs by adopting environmentally. 4. Understand thermodynamics of biopolymer reactions and to correlate free energy and biopolymer parameters
	CHE-406	<p>(a) Drug Chemistry or (b) Electroanalytical Techniques</p>	2018	<p>406 A</p> <ol style="list-style-type: none"> 1. Know about natural products. 2. Know Interpretation of cardiovascular drugs. 3. Know the Analyzing about prostaglandins. 4. Know the Definition, Classification, Nomenclature, Structure and Synthesis of anti-inflammatory drugs. <p>406 B</p> <ol style="list-style-type: none"> 1. Ability to interpret potentiometry and conductometry 2. Interpretation of results while adhering to DC Polarography. 3. Analysing and compiling the data and results in polarography. 4. Familiarize Types of ion sensitive electrodes

M.Sc., Organic Chemistry

S. No.	Course Code	Title of the Course	Years of Introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/Skill development
	CHE-101	Inorganic Chemistry- I	2018	<ol style="list-style-type: none"> 1. To understand the key features of coordination compounds, Crystal Field Theory, magnetic properties and bonding in transition metal complexes.

				<ol style="list-style-type: none"> 2. To learn about the polymorphic forms of Carbon, Sulphur and Phosphorus, synthesis and properties of sulphur-nitrogen compounds, boranes, carbides, silicates and to know Wades rules. 3. To explain the reactivity of complexes in terms of Valence bond and Crystal Field theories, Taube's classification, Trans effect and Electron Transfer Reactions 4. To gain knowledge on synthesis and structures of different metal carbonyls, synergistic effect and 18 electron rule
	CHE-102	Organic Chemistry I	2018	<ol style="list-style-type: none"> 1. To detect stereochemical structures of the molecules, stereoselective and stereocontrolled reactions. 2. To ascertain the stereochemistry of the products with the effect of neighbouring group participation and to familiarize the various types of aromatic substitution reactions, their mechanism and the effect of substituents 3. To know the concept of isotope effects, potential energy diagrams and transition states in different intermediates 4. To familiarize with stereospecific synthesis of naturally occurring terpenoids and degradation products of terpenoids
	CHE-103	Physical Chemistry- I	2018	<ol style="list-style-type: none"> 1. To know the concepts such as Operator algebra, Eigen values and Eigen functions, Degeneracy, Schrodinger wave equation and the postulates of Quantum Mechanics 2. To learn about theories of reaction rates, Lindemann, Lindemann-Hinshel wood, and RRKM theories. 3. To know about Thermodynamic concepts and entropy change in reversible process and irreversible process,

				Gibbs- Duhem equation, calculation of thermodynamic properties. 4. To study the Thermodynamic and Kinetic Derivation of Nernst Equation and the derivation of Debye-Huckle Equation and its Verification
	CHE-104	Inorganic Practical- I	2018	<ol style="list-style-type: none"> 1. To demonstrate mastery of basic semi-micro qualitative analysis of simple salts and interprets analytical data and will make scientific claims that are supported by the observations 2. To familiarize with techniques of titration and calculation of errors
	CHE-105	Organic Practical-I	2018	<ol style="list-style-type: none"> 1. To familiarize the systematic procedures of analysis of organic components, conformational tests for various functional groups 2. To understand the mechanisms and familiarize with methodologies to prepare biologically important molecules
	CHE-106	Physical Practical I	2018	<ol style="list-style-type: none"> 1. To study the determination of critical solution temperature, eutectic composition, distribution coefficient, adsorption of different 2. To calibrate the statistical data
	CHE-107	General Chemistry-I	2018	<ol style="list-style-type: none"> 1. To know about mean and median values, standard deviation and coefficient of variation. 2. To acquire knowledge on principle and instrumentation of AAS and difference between flame AAS and furnace AAS.
	CHE-108	Human Values and Professional Ethics – I	2018	<ol style="list-style-type: none"> 1. To know about the needs and importance of professional ethics. 2. To analyze nature of Values, basic Moral Concepts

				character and Conduct 3. To gain knowledge on individual and society ethical values, ahimsa, satya and brahmacharya. 4. To understand values of Bhagavd Gita, various religions, religious tolerance, Gandhian ethics
--	--	--	--	---

	CHE-201	Inorganic Chemistry- II	2018	1. To familiarize with the general methods of complex preparations and properties, nature of bonding and structural features of metal complexes 2. To know about Russel-Saunders coupling, splitting of energy levels in octahedral field and differentiate between Orgel diagrams and Tanabe-Sugano diagrams 3. To understand about the laws of Hunds, Curie and Weiss, magnetism and magnetic susceptibility determination by Gouy's and Farady methods 4. To gain knowledge on Induced reactions, Free radical reactions, Thermal decomposition reactions, Chain reactions
	CHE-202	Organic Chemistry -II	2018	1. To familiarize the mechanisms of E_1 , E_2 and E_{1CB} reactions, stereoselectivity and synpyrolytic eliminations and use of isotopes, chemical trapping and crossover experiments 2. To learn the rearrangements involving electron deficient carbon, nitrogen and oxygen atoms and electron rich carbon atom and familiarize with the limitations and applications of reactions 3. To learn the synthesis of three and four membered heterocycles, mechanism of ring opening reactions and the

				<p>effect of electron donating and withdrawing substituents in selectivity of ring opening reactions.</p> <p>4. To understand the structural elucidation and synthesis of alkaloids using specific reagents.</p>
	CHE-203	Physical Chemistry- II	2018	<p>5. To know about Pauli Exclusion principle and Slater determinant, atomic orbitals, Simple molecular orbitals and Huckel theory of conjugated systems</p> <p>6. To learn Gibbs adsorption isotherm, BET equation and correlate limitations, critical micellar concentration (CMC) and factors affecting the CMC of surfactants</p> <p>7. To identify Relation between order of a finite group and its sub-group, conjugacy, Symmetry point group (MLS, MHS and MSS) and orthogonality theorem</p> <p>8. To acquire knowledge on DC-Polarography, AC-Polarography, Controlled Potential Electrolysis, to derive equation for Tafel plots, half-wave potentials for reversible system</p>
	CHE-204	Inorganic Practical- II	2018	<p>3. To separate and determine the two component mixtures</p> <p>4. To acquire knowledge in the preparation of metal complexes</p>
	CHE-205	Organic Practical-II	2018	<p>3. To familiarize with binary mixture separation and to gain hands-on-experience in purification of the</p> <p>4. To get knowledge about the chemical behavior of different components and mechanisms.</p>
	CHE-206	Physical Practical -II	2018	<p>3. To study the determination of cell constant and verification of Onsager equation, strength of strong</p> <p>4. To get knowledge on the applications of conductometry, potentiometry, coulometry and pH metry.</p>
	CHE-207	General Chemistry-II	2018	<p>3. To acquire knowledge on ion selective electrodes, solid membrane electrodes and glass electrodes and</p>

				4. To learn general principles and classifications of chromatographic separations and applications of TLC, GLC
	CHE-208	Human Values and Professional Ethics – II	2018	5. To understand the concepts of human values, responsibilities of family values and status of women in family and society. 6. To acquire knowledge on different medical ethics the views of charaka and sushruta on moral responsibilities of medical practitioners 7. To gain knowledge on social ethics and understand the characteristics of ethical problems in management. 8. To familiarize environmental ethics, ethical theory and ecological crisis
	CHE-OC-301	Organic Chemistry III	2018	1. To familiarize with the specific functions of the reagents particularly diazomethane, N-bromosuccinimide, Ziegler Natta catalyst, 1,3-dithianes and Merrifield resin in the synthesis of a variety of complex molecules 2. To gain knowledge in the synthesis of different organometallic reagents and also stereo and regio specificity and selectivity of reactions with organometallic reagents 3. To understand diastereoselectivity, stereoselectivity and substrate controlled auxillary controlled reactions 4. To acquire knowledge about the reagents which causes oxidation in various compounds and also the reagents that causes selective and complete reductions to synthesize various compounds
	CHE-OC-302	Organic Spectroscopy and Applications	2018	1. To get experience to calculate λ max values for dienes, enones, polyenes, aromatic and heteroaromatic compounds 2. To familiarize with the absorption bands of the molecules with specific functional groups 3. To interpret the data to different types of protons and carbons present in a molecule so as to ascertain the structure of the molecule based on the data provided 4. To acquire knowledge about specific fragmentation rules of

				different molecules which are unique
	CHE OC 303 & 304	Core practical I: Organic Estimations - Practical	2018	<ol style="list-style-type: none"> 1. To gain knowledge about the estimation/percent purity of different organic molecules. 2. To get hands-on-experience with the synthesis and determination of concentrations and purity 3. To acquire knowledge in handling of toxic chemicals in multi step preparation of biologically important 4. To gain experience in the proposal of synthetic routes to functionalized derivatives
	CHE-OC- 305 A	Inorganic Spectroscopy and Thermal Methods of Analysis	2018	<ol style="list-style-type: none"> 1. To know the basic principles of instrumental methods of analysis. 2. To gain knowledge on chemistry of alloys. 3. To Understand the complexity, theory and working principle of colourimetry 4. To familiarize with laws of colorimetric titrations.
	CHE-OC- 305 B	Physical Chemistry III	2018	<ol style="list-style-type: none"> 1. To know the determination of Character Co-ordinate of C_{2v} point group based on 3N Coordinates and to learn the Mutual exclusion Principle. 2. To learn the Bragg conditions-Miller Indices- Laue method, Bragg method, Debye Scherrer method of X-ray structural analysis of crystals. 3. To study the rigid rotator model, stark effect, vibration-rotation spectroscopy, PQR branches, selection rules and Vibrational- rotational Raman spectroscopy. 4. To study the concepts on heat of dissolution, regular solution theory, Hildebrand solubility parameter, concept of Flory-Huggins theory of polymer solutions
	CHE OC 306 (A)	Spectral Techniques	2018	<ol style="list-style-type: none"> 1. To know the basic principles of spectroscopy 2. To familiarize with the analysis of various functional groups by using different spectroscopic techniques. 3. To Understand the applications of AAS. 4. To gain knowledge about Mass spectral fragmentation of

				organic compounds and common functional groups
	CHE OC 306 (B)	Chromatographic Techniques	2018	<ol style="list-style-type: none"> 1. To know the stationary and mobile phases in chromatographic techniques 2. To familiarize applications of different chromatographic methods 3. To Understand the principle of chromatographic techniques. 4. To gain knowledge on the normal phase and reverse phase.
	CHE-OC-401	Organic synthesis I	2018	<ol style="list-style-type: none"> 1. Familiarize with the unique reactivity of Boron, Phosphorus, Sulfur and Silicon reagents 2. Learn about photolytic reactions of carbonyl compounds, conjugated carbonyl derivatives, olefins, conjugated dienes CO₃:To gain knowledge in the determination of allowed or forbidden of chemical reactions viz., cycloaddition and 3. Learn the methods of preparation, properties, and industrial applications of various addition and condensation 4. Familiarize with the unique reactivity of Boron, Phosphorus, Sulfur and Silicon reagents
	CHE-OC 402	Organic Synthesis II	2018	<ol style="list-style-type: none"> 1. Familiarize with functionalization and interconversion of functional groups and the concept of organic synthesis by retrosynthetic approach 2. Gain knowledge in the formulation of synthetic routes for naturally occurring drugs. 3. Understand quinoline, acridine and guanidine group of alkaloids as antimalarials and to familiarize with the role of functioning of broad spectrum antibiotics. 4. Acquire knowledge about the classification, properties, structure & conformation and biological functions of peptides/proteins
	CHE OC 403	Core practical I: Spectral Identification of Organic Compounds	2018	<ol style="list-style-type: none"> 1. Calculate λ max values. 2. Ascertain functional groups.

				<ol style="list-style-type: none"> Interpret the spectral data to the structure and stereochemistry of the molecules. Analyse the fragmentation pattern of the molecules.
	CHE OC 404	Practical II: Project Work	2018	<ol style="list-style-type: none"> Identify the problem, to collect the literature and understanding parameters to design the problem. Perform experiments to synthesize the molecules with desired stereochemistry adopting modern techniques Collect and interpretation of the data to the structures Presentation of the data in the form of dissertation
	CHE-OC-405A	Heterocycles and Natural Products	2018	<ol style="list-style-type: none"> Familiarize with the synthetic routes of five membered heterocycles with two heteroatoms and to justify the site of Acquire knowledge on the synthetic methodologies of benzofused and six membered heterocycles and the effect of Familiarize with the structural elucidation and synthesis of naturally occurring steroids and hormones Know about isolation, structural determination and synthesis of flavonoids and isoflavonoids
	CHE-OC-405B	Bioinorganic, Bioorganic, Biophysical Chemistry	2018	<ol style="list-style-type: none"> Gain knowledge on metallo proteins in electron transfer processes. Know the applications of trace metal ions and metal ions as chelating agents in medicine. Achieve and develop highly stereoselective synthesis of organic compounds and drugs by adopting environmentally. Understand thermodynamics of biopolymer reactions and to correlate free energy and biopolymer parameters
	CHE OC 406A	Drug Chemistry	2018	<ol style="list-style-type: none"> Know about natural products Know Interpretation of cardiovascular drugs. Know the Analyzing about prostaglandins Know the Definition, Classification, Nomenclature,

				Structure and Synthesis of anti-inflammatory drugs.
	CHE 406B OC	Electroanalytical Techniques	2018	<ol style="list-style-type: none"> 1. Ability to interpret potentiometry and conductometry 2. Interpretation of results while adhering to DC Polarography. 3. Analysing and compiling the data and results in polarography. 4. Familiarize Types of ion sensitive electrodes

33. Environmental Sciences

S. No.	Course Code	Title of the Course	Years of Introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/Skill development
1	ENV-101	Ecology and Environment	2018	<ul style="list-style-type: none"> • Provide solutions to environmental problems using appropriate tools and techniques. • Develop both a quantitative and qualitative understanding of interactions between organisms and their consequences. • Gain the knowledge of functions of organisms and ecosystem.
2	ENV -102	Environmental Chemistry	2018	<ul style="list-style-type: none"> • Demonstrate knowledge of chemical and biochemical principles of fundamental environmental processes in air, water and soil.

				<ul style="list-style-type: none"> • Apply basic chemical concepts to analyze chemical processes involved in different environmental problems. • By knowing pollution levels in the environment best possible fresh environment can be created in different methods like afforestation, natural parks and sanctuaries etc., for human concern.
3	ENV-103P	Practical – I	2018	<ul style="list-style-type: none"> • Imparting practical knowledge about estimation of pH, Total Dissolved Solids, Hardness and Dissolved Oxygen, Chlorides and Sulphates in water samples.
4	ENV-104P	Practical-II	2018	<ul style="list-style-type: none"> • Understanding of various alkalinities present in the water sample by volumetric titration linked with theory. • By knowing water pollution potable water can be drawn out and wastewater can be treated. • By knowing various fertility of the soil can be known which is advantage to farmers for agriculture.
5	ENV-105	Environmental Toxicology and Public Health	2018	<ul style="list-style-type: none"> • To understand the role of toxicants in environment, methods used to quantify toxicity, regulations that govern toxic substances and assessment of risks posed by exposure to toxicants. • Inform, educate, and empower people about the potential hazards of toxic substances to environmental and human health. • By knowing the adverse health problems on human beings, safety, preventing measures

				can be implemented endemic and pandemic diseased can be controlled.
6.	ENV-106	Human Values and Professional Ethics-I	2018	<ul style="list-style-type: none"> • Describe the human values, understand the commitment and responsibility. • They gain the ability to bring harmony to the society. • By studying human values reformation of man and reformation of policy shall be done and harmony of environment and society also can be achieved.
8.	EN-201	Energy and Environment	2018	<ul style="list-style-type: none"> • Explain the key challenges and technologies in energy use, utilization of energy resources, energy conversion and environmental consequences. • They explain basic competence regarding environmental impacts arising from different energy carriers and technical solutions. • Enrichment of ecosystem will be achieved.
8.	ENV-202	Environmental Pollution	2018	<ul style="list-style-type: none"> • Analyze sources of pollution, exposure pathways, fate and evaluate consequences of human exposure to pollution and its impacts to environmental quality. • Distinguish the effect of pollutants on human health, economy and wild environments. • Pollution free environment for human life will be achieved.
9.	ENV-203P	Practical-I	2018	<ul style="list-style-type: none"> • Describe the amount of pesticide/insecticide in water/vegetable samples.

				<ul style="list-style-type: none"> • To find concentration levels of toxicant by use of instrumental techniques • To estimate physicochemical assessments in different water samples
10.	ENV-204P	Practical-II	2018	<ul style="list-style-type: none"> • Identify the concentration of biochemical by using instrumental methods. • To find an amount of LC50 of various metals in organism. • To estimate the growth rate of fauna at various habitat condensations.
11	ENV-205	Instrumental Techniques and Applications	2018	<ul style="list-style-type: none"> • Integrate a fundamental understanding of the underlining physics principles as they relate to specific instrumentation used for atomic, molecular, and mass spectrometry, magnetic resonance spectrometry and chromatography. • Environmental potentiality will be achieved. This is indirect benefits to the society. • To understand the analysis and level of concentration of different metals through instrumental techniques.
12	ENV-206	Human Values and Professional Ethics-II	2018	<ul style="list-style-type: none"> • Understand the core values that shape the ethical behaviour. • An ability to apply their broad education towards the understanding of the impact of engineering solutions in a global and societal context. • Making the students to full man, understanding the ethical values.

13	ENV -301	Waste Treatment and Management	2018	<ul style="list-style-type: none"> • Describe the components of solid waste management and the laws governing it. • Discuss the solid waste collection systems, route optimization techniques and processing of solid wastes. • Biodegradation of waste through natural and artificial methods will be achieved.
14	ENV -302	Environmental Assessment, Audit and Economics	2018	<ul style="list-style-type: none"> • Explain the concepts about the Environmental Impact Assessment (EIA) and describe the environment laws, aims and the necessity of EIA. • Critically examine assumptions inherent in impact assessment, examine a range of environmental impact assessments and identify and explore impact assessment fields and approaches. • Understand the sustainable development and controlling environmental pollution.
15	ENV -303	Practical-I	2018	<ul style="list-style-type: none"> • Understand the degradation of natural resources by constructions of various projects. • Understand requirement of oxygen for growth of organisms to break down organic matter in wastewaters. • Describe the low cost wastewater treatment practices in water demand areas.
16	ENV-304	Practical-II	2018	<ul style="list-style-type: none"> • It helps to explain the relationships between variables of the real-world applications. • Develop the programming techniques and the problem solving skills through programming.

18	ENV-305A	Ecotourism and Eco-restoration	2018	<ul style="list-style-type: none"> • Describe the challenging in Eco-Tourism and wildlife tourism. • Understand values of wildlife and minimizing impact on natural ecosystem due to tourism. • It is joyful to public and society; Government economy also will be generated. • Understand the mitigation approaches, their choices and alternatives.
18	ENV-305B	Biodiversity Conservation and Management	2018	<ul style="list-style-type: none"> • Systematically understand biodiversity and its vital role in ecosystem function. • Understand the value of biodiversity and current threats to biodiversity. • Describe Environment of nature
19	ENV-305C	Statistics, Computer Applications and Modeling	2018	<ul style="list-style-type: none"> • Analyze data using standard statistical techniques. • Utilize the Internet Web resources and evaluate on-line e-business system. • Environmental analysis, forecasting of the environment can be achieved.
20	ENV-306A	Natural Resources Conservation	2018	<ul style="list-style-type: none"> • Apply theories and methods with interdisciplinary approach towards natural resource management. • Critically examine the gap in the resource availability, use and conservation. • In conservation of the environment, employment can be generated.
21	ENV-306B	Global Environmental Issues	2018	<ul style="list-style-type: none"> • Predicting the consequences of human actions on the web of life, global economy and quality of human life.

				<ul style="list-style-type: none"> • Developing critical thinking for shaping strategies (scientific, social, economic and legal) for environmental protection and conservation of biodiversity, social equity and sustainable development. • International issues will be understood.
22	ENV-401	Water Resources and Watershed Management	2018	<ul style="list-style-type: none"> • Understand water's importance as a precious resource. • Provide a basic understanding of the impact of water and water-related issues in a global, economic, environmental and societal context. • Describe the management of water resources through construction of watersheds for future generations.
23	ENV-402	Remote Sensing and GIS	2018	<ul style="list-style-type: none"> • Building a foundation for understanding Remote Sensing and Geographic Information System (RS-GIS) as a powerful tool for geospatial analysis. • Appreciate the application of RS-GIS techniques to the matrices of environment and Resource management. • Future predictions of the environment will be known about weather, cyclones and research etc.,
24	ENV-403	Practical-I	2018	<ul style="list-style-type: none"> • Analyze the multi elements in various wastewater samples. • Understand the rain water harvesting practices. • Identify the water bodies and evaluate

				effective sensors and advance technique to extract and mapping the features for various applications.
25	ENV-404	Project Work and Comprehensive Viva-Voce	2018	<ul style="list-style-type: none"> • Understand project characteristics and various stages of a project. • Estimate and cost the human and physical resources required and make plans to obtain the necessary resources. • It helps to develop in contextualization of knowledge; critical thinking and can lead to new innovation ideas.
26	ENV-405 A	Disaster Mitigation and Management	2018	<ul style="list-style-type: none"> • Develop foundations for hazard, risk and vulnerability assessment. • To assess review and control the risk.
28	ENV-405 B	Environmental Laws, Policies and Legislation	2018	<ul style="list-style-type: none"> • Understanding judicial response to environmental issues in India. • Acquire the ability to evaluate the role of law and policy in conservation and management of natural resources and prevention of pollution.
28	ENV-405 C	Environmental Education	2018	<ul style="list-style-type: none"> • Demonstrate an integrative approach to environmental issues with a focus on sustainability. • Communicate complex environmental information to both technical and non-technical audiences. • Students will be enriched about the nature.
29	ENV-406 A	Forest Resources and Management	2018	<ul style="list-style-type: none"> • Demonstrate knowledge of forest vegetation modeling and the ability to forecast its development over time using models of forest

				<p>growth.</p> <ul style="list-style-type: none"> • Integrate knowledge of basic biology, physical sciences, forest and wildlife ecology, and social sciences into the stewardship of forest resources. • Through forest management national economy will be improved.
30	ENV-406 B	Environmental Management and Sustainable Development	2018	<ul style="list-style-type: none"> • Ability to analyze environmental management in relation to the major principles of sustainable development. • The ability to work effectively to create environmental management analysis outputs of professional quality, both independently and within team environments.

34. Fishery Sciences & Aquaculture

S. No.	Course Code	Title of the Course	Years of Introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/Skill development
1	AQC 101	Concepts of Aquatic Ecology	2018	<p>i. Understanding the General Characteristics, Principles of classification, Aquatic EcologyCommunities.</p> <p>ii. To understand the various Physical and chemical characteristics of water.</p>
2	AQC 102	Systematics And External Anatomy	2018	i. Understand the concepts of finfish and

		of Cultivable Organisms		<p>shellfish systematics and anatomy.</p> <p>ii..</p> <p>iii. Gained knowledge on the factors influencing the pattern of Evolution including Mutations, Natural Selection and Genetic drift.</p> <p>iv. Understood the concepts of Micro, Macro evolution speciation categories, Protein evolution etc. to fortify the existing knowledge on Evolutionary patterns.</p>
3	AQC 103 A	Fish Nutrition and Water Quality Management	2018	<p>i. Understanding the General Characteristics, Principles of classification, general biology of Invertebrate Communities.</p> <p>ii. To understand the various biological functions, the evolutions of life from most primitive to most advanced form with respect to their habit and habitat.</p> <p>iii. Understanding the comparative aspects of different organs systems among chordate Phyla.</p> <p>iv. The students may apply this knowledge in taxonomy related research and job opportunities.</p> <p>v. Explain the ideas about Mendelian, non-Mendelian inheritance, genetic disorder, gene mutations and sex determination.</p> <p>vi. To understand PTC, Colorblindness test, how to solve genetic problems, pedigree analysis.</p>
4	AQC: 103 B	Environmental Monitoring and Bio deterioration	2018	<p>i. Students would gain expertise to develop understanding of biological processes at chemical; biochemical and molecular level to perform wide range of analytical techniques to explore biological activities.</p> <p>ii. The student will learn and understand about the Biosynthesis of Purines and Pyrimidine</p>

				<p>Nucleotides, degradation of Nucleotides, salvage pathways, biosynthesis and biodegradation of Amino acids, inborn errors of metabolism.</p> <p>iii. Students would be trained in various tools and techniques used to gain insight into biological processes.</p> <p>iv. Understood that the four propositions underlying Darwin's theory of evolution through natural selection are:</p> <p>(1) more individuals are produced than can survive;</p> <p>(2) There is therefore, a struggle for existence</p> <p>(3) Individuals within a species show variation</p> <p>(4) Offspring tend to inherit their parental characters.</p>
5	AQC- 104A	Coastal Aquaculture	2018	<p>i.The students will learn about chemical bonding patterns, chemical structures and classification of carbohydrates and their structural and metabolic role in cellular system i.e. different pathways associated with carbohydrate metabolism.</p> <p>ii. Students would gain expertise to develop understanding of biological processes at chemical; biochemical and molecular level to perform wide range of analytical techniques to explore biological activities.</p> <p>iii. The student will learn and understand about the Biosynthesis of Purines and Pyrimidine Nucleotides, degradation of Nucleotides, salvage pathways, biosynthesis and biodegradation of Amino acids, inborn errors of metabolism.</p>
6.	AQC 104 B	: Ornamental Fish Culture	2018	<p>i. The student will be enriched with several</p>

				<p>aspects pertaining to Human values and performing of Professional Ethics in day today life.</p> <p>ii. Introduction of several Nature of values to be performed by Humans to lead a good and Peaceful life by extending and imparting good behavior, character and conduct towards people of the society.</p> <p>iii. Introducing different concepts of Bhagavad Gita and its applications in uplifting of Religious values in the present society.</p>
			2018	
7.	Practical-1 AQC 105	Identification and Morphology of Cultivable Organisms	2018	<p>i. Students will understand the structures, positions and functions of plasma membrane and all cellular organelles in details. They will acquire knowledge about chromosomes and cell divisions, both mitosis and meiosis. They will also know about cell signaling and cancers. They will know how to measure and stain different cell types.</p> <p>ii. Students would gain expertise in the ultra-structural information of animal cell besides the detailed views of the cell interior revealing the various events and actions of cell at the molecular level.</p> <p>iii. The study will help the students to understand the new discoveries about the structure and internal functioning of the cell due to technological improvements.</p> <p>iv. The student will learn and understand the</p>

				<p>rationale behind various assays used in immune diagnosis of diseases and will be able to transfer knowledge of immunology in clinical perspective.</p> <p>v. The course will aid in understanding the principles of Graft rejection, Auto immunity and Antibody based therapy.</p>
8.	Practical-2 AQC106	Fish Nutrition	2018	<p>i. The study of Molecular Biology stands as a tribute to human curiosity for seeking to discover, and to human creative intelligence for devising the complex instruments and elaborate techniques by which these discoveries can be made.</p> <p>ii. Students world gain expertise in understanding the complex molecular mechanisms occurring in cell and the applications of molecular technologies for betterment of life.</p> <p>iii. Understand and our apply the Principles and techniques of Molecular Biology which prepares students for further education employment in teaching, basic research or the health Professions.</p>
9.	AQC 107	Human Values and Professional Ethics – I	2018	<p>i. Students will acquire knowledge about replication, transcription, translation, post transcriptional and post translational modifications, gene regulation, DNA repair mechanisms and various molecular tools and techniques like PCR, southern and western blotting, recombinant DNA technology etc. they</p>

				<p>will also know the various tools and techniques related to bacterial microbiology.</p> <p>i. Students will understand the structures, positions and functions of plasma membrane and all cellular organelles in details. They will acquire knowledge about chromosomes and cell divisions, both mitosis and meiosis. They will also know about cell signaling and cancers. They will know how to measure and stain different cell types.</p>
10.	AQC 201	Principles of Aquaculture	2018	<p>i. The students will be able to explore an original query in Animal Physiology. The students will appreciate evolutionary changes and environmental adaptations in different taxa of Invertebrates and Vertebrates.</p> <p>ii. Understanding of how different groups of animals have different Physiological adaptations appropriate to carry out the required function to the fullest.</p> <p>iii. Learn the fundamental principles of immune response including molecular, biochemical and cellular basis of immune homeostasis.</p> <p>iv. The course will aid in understanding various aspects of immunological response and how it's triggered and regulated.</p>
11	AQC 202	Physiology of Cultivable Organisms	2018	<p>i. In depth understanding of Anatomical features of Integumentary, Circulatory, Reproductive, Respiratory, Receptor, Nervous systems among Chordate groups.</p> <p>ii. The students will be able to explore an</p>

				<p>original query in Animal Physiology. The students will appreciate evolutionary changes and environmental adaptations in different taxa of Invertebrates and Vertebrates.</p> <p>iii. An appropriate understanding of functioning of each system of different groups of animals with their comparison will be acquainted.</p> <p>iii. Understanding of the basic concepts of Physiological regulation, from cellular to organ to organismal.</p> <p>iv. Understanding of how different groups of animals have different Physiological adaptations appropriate to carry out the required function to the fillet.</p>
12	AQC 203A	Fresh Water Aquaculture	2018	<p>i. Student will know the values of ethics in various fields including medical, social and business ethics.</p> <p>ii. The student will be enriched with several aspects pertaining to Human values and performing of Professional Ethics in day today life.</p> <p>iii. Introduction of several Natural values to be performed by Humans to lead a good and Peaceful life.</p>
13	AQC 203B	Capture fisheries	2018	<p>i. Students would gain expertise in explaining how a variety of interacting processes generate an organism's heterogenous shapes, size and structural features that arise on the trajectory</p>

				<p>from embryo to adult or more generally throughout a life cycle.</p> <p>ii. Gains knowledge about gametogenesis, cleavage mechanisms, gastrulation and role of hormones in metamorphosis and regeneration.</p> <p>iii. After learning the development of life from cell to multicellularity complex and coordinated systems in organisms the students can apply this knowledge for research, and education, to solve the problems related to development in animals through research.</p>
14	AQC 204 A	Fishery Economics, Extension and Environmental Management	2018	<p>i. Students will be able to apply the scientific method and quantitative techniques to describe, monitor and understand environmental systems.</p> <p>ii. Students will be able to use interdisciplinary approaches such as ecology, economics, ethics and policy to devise solutions to environmental problems.</p> <p>iii. Students will be able to be proficient in ecological field methods such as wildlife survey, biodiversity assessment, mathematical modeling and monitoring of ecological systems.</p> <p>iv. Students will be able to use technology, such as geographical information systems and computer programming, to assist in problem solving.</p>
15	AQC 204 B	Limnology	2018	<p>i. Developmental Biology displays a rich array of material and conceptual practices that can be analyzed to better understand the scientific</p>

				<p>reasoning exhibited in experimental life sciences. Based on learning contents of embryology, students can have a systematic and organized learning about the knowledge and concepts of growth and development.</p> <p>ii. To understand the fundamental processes that underpins the fertilization of an egg cell and its step-by-step transformation into the fascinating complexity of a whole organism.</p> <p>iii. Students would be expertise techniques used for imaging, isolation, purification and characterization of various biological substances.</p> <p>iv. Students would gain basic knowledge of the underlying principles and practical strategy of the analytical and preparative techniques that are fundamental to study and understanding of life processes.</p>
16	Practical-1 AQC205	Soil and Water Characteristics	2018	<p>i. The student will get idea about the ecological process in its surrounding and at National and Global level and the use of student knowledge on Ecology, Behaviour can be applied to Education, Research and Extension programmes in his further career.</p> <p>ii. Students will be understanding the various features and aspects of population ecology, community ecology and ecosystem ecology. They might have the knowledge about environmental biology in details. They will acquire knowledge about various tools and techniques of field ecology.</p>

				iii. Students learn about enzymes. Their classification and nomenclature iv. Students learn about specificity of enzymes v. Students learn about measurement of enzymatic activity vi. Students learn about isolation, purification of enzymes and intercellular distribution enzymes.
17	Practical-2 AQC206	Physiology of Fin Fish and Shell Fish	2018	i. Students would be expertise techniques used for imaging, isolation, purification and characterization of various biological substances. ii. Identify and describe the different equipment and tools used in a biology laboratory. iii. Correctly operate different laboratory instruments. iv. Correctly operate different types of microscopes. v. Prepare tissue for section cutting and correctly operate a microtome.
18	AQC 206	Human Values and Professional Ethics – II (Audit course)	2018	i. Students gain knowledge about regulation of enzyme activity with respective mechanisms ii. To understand about mechanism of enzymes in clinical diagnosis and their applications iii. Students gain knowledge about immobilization of enzymes, applications of immobilized enzymes.
19	AQC 301	Microbiology and Fish Pathology	2018	i. Familiar with various Applications of Bioinformatics by exploring the fundamentals of computer applications in Biology. ii. Describe different methods of data handling

				<p>using computer.</p> <p>iii. Perform basic operations of gene sequence retrieval and compare them using different software.</p> <p>iv. Perform basic operations of protein structure retrieval and comparison using different software.</p> <p>v. The student will learn about the Computer basics like Operating systems, Programming, Data Access, Internet and Nucleic acid Sequence and Protein Data Banks.</p> <p>vi. The student will learn the basics of handling of data, measures of Central tendency like Mean, Median and Mode, Measures of dispersion like Mean deviation and Standard deviation and Co-efficient of Variation.</p> <p>v. The course will aid in learning Test of significance like Null hypothesis and Alternative hypothesis, t-test, F-test, Chi-square test, Correlation and Regression analysis.</p>
20	AQC 302	Fish Immunology	2018	<p>i. Creating the self-employment opportunities to rural students through Animal husbandry, Aquaculture, Vermiculture and Sericulture.</p> <p>ii. To understand the significance of Economically important animals including cultivable Fishes, Prawns and their culture practices.</p> <p>iii. Identification of Animal pathogenic diseases in Fisheries, Sericulture, Apiculture,</p>

				Aquaculture and their management strategies.
21	AQC: 303A	Cell Biology and Genetics	2018	<p>i. To understand the different pathogens causing disease in man.</p> <p>ii. Describe the different parasites causing disease and disability in man and animals.</p> <p>iii. Ability to elaborate about the life cycle and biology of disease carrying vectors; suggest preventive and control measures for the said diseases.</p> <p>iv. An understanding of the relationship between changes in physiology of host and</p> <p>v. The students after completion of the course based on the Expertise he/she may join as Parasitological Scientist.</p>
22	AQC 303 B	Bioinformatics In Aquaculture	2018	<p>i. Be able to access and analyse different case studies/examples of EIA in practice for evaluation/assessment</p> <p>ii. Explain the importance of environmental audits and other management tools in business for social benefit by improving environmental performance</p> <p>iii. Calculate the carbon footprint of any organization and identify suitable mitigation strategies for carbon reduction solutions.</p>
23	Practical's AQC 304	Microbiology and Fish Diseases	2018	<p>i. Understanding Electrophysiological techniques and Molecular mechanisms associated with action potentials</p> <p>ii. Students learnt and gain knowledge on</p>

				<p>structure and function of different types of Synapses</p> <p>iii. Gained information on different types of Neurotransmitters i.e. Amino acids and Peptides.</p>
24	Skill oriented course AQC 305	Fish Nutrition Technology	2018	<p>i. The awareness about toxic agents, their effects and knowledge about mode of transformation of toxicants will help in creating skilled personnel in the field of environment protection and research.</p> <p>ii. Understanding of the physiological and genotoxic effects of drugs and environmental toxins.</p> <p>iii. To understand various types of insecticides and understand their mode of action to kill/control the insects. Also, the students will learn about novel categories of insecticides that may be compatible with other control strategies.</p> <p>iv. The students will learn handling of the pesticides in crop protection and understand the therapy and antidotes at the time of poisoning.</p>
25	Open Elective (For other	a)AQC 306A: Fish Processing Technology	2018	<p>i. Learnt about structure, function and organization of Neurons in the Central nervous</p>

	department students)	b) AQC306B: Pollution and Toxicology		<p>system</p> <p>ii. Understanding Electrophysiological techniques and Molecular mechanisms associated with action potentials.</p> <p>iii. Identify microbiological techniques, the defining characteristics of the major groups of microorganisms and apply to study microbial phylogeny.</p> <p>iv. Apply the scientific method by stating a question; researching the topic; determining appropriate tests; performing tests; collecting, analyzing, and presenting data and effective communicate with both specialist and non-specialist audiences/community.</p>
26	AQC 401	Aquaculture Biotechnology	2018	<p>i. Skill development in environmental and occupational Toxicology.</p> <p>ii. It provides opportunities for student's research projects, internships in assessing the effects of toxic pollutants on the environment and in the food chain.</p> <p>iii. Identification of different routes of exposure of environmental toxins.</p> <p>iv. The students will learn handling of the pesticides in crop protection and understand the therapy and antidotes at the time of poisoning.</p> <p>v. To understand the overview of Animal Behavior and prominence of social organization in insects and primates.</p> <p>vi. Gained lot of information on different types of Learning phenomenon and their mechanisms.</p>

				vii. To understand how to conserve the wild animals
27	AQC402	Essentials Of Biochemistry	2018	<p>i. Understanding of in vitro culturing of organisms and production of transgenic animals.</p> <p>ii. Understanding of cloning of mammals, large scale culture and production from recombinant microorganisms and cloning vectors.</p> <p>iii. This insight allows students to take into consideration about ethical issues involved in production of transgenic animals and BT products.</p> <p>iv. Use in gene transfer technology, genetic manipulations and in a variety of Industrial processes and prominence of IVF, Artificial insemination and embryo transfer techniques.</p> <p>v. Identify microbiological techniques, the defining characteristics of the major groups of microorganisms and apply to study microbial phylogeny</p> <p>vi. Classify the nutritional types of microorganisms and measure microbial growth</p> <p>vii. Evaluate how microorganisms interact with the environment in beneficial or detrimental ways</p> <p>viii. Assess impact of plant- microbe interaction on agriculture in both beneficial and detrimental ways. Identify industrially important microbes.</p>
28	AQC403A	Computer Applications, Information Technology And Biostatistics In Aquaculture	2018	<p>i. Understand the overview of Animal Behavior and prominence of social organization in insects and primates</p> <p>ii. Gained lot of information on different types</p>

	AQC403B	Aquaculture Engineering		<p>of Learning phenomenon and their mechanisms.</p> <p>iii. To understand the how to conserve wild animals and management strategies.</p> <p>iv. To gain the knowledge about wild animals and animal products importance.</p>
29	Practical's AQC 404	Biotechnology And Biochemical Estimations	2018	<p>i. Understand the pathways associated with Biosynthesis and secretion of Endocrine hormones and their role in the control of metabolism.</p> <p>ii. Through understanding of several endocrines including Peptide hormones, Steroid hormones, Pituitary hormones, Sex hormones, Thyroid hormones etc. in the control of metabolic pathways.</p> <p>iii. Understanding the influence of hormones on Growth, Development and Reproduction and their regulatory pattern.</p>
30	Multidisciplinary course/ project work AQC405	Project Work / Fieldwork	2018	<p>i. This course exposes students to the applications of genetic engineering in biological research.</p> <p>ii. Students will be able to perform basic genetic engineering experiments at the end of course.</p> <p>iii. Students will acquire knowledge of advances in biotechnology- healthcare, agriculture and environment cleanup via recombinant DNA technology.</p>
31	Open Elective (For other department students)	General Principles and Practices of Aquaculture	2018	<p>i. Understand the evolution of protein structural motifs and domains and associate this with function;</p>

	AQC 406(A)			<p>ii. Use on-line structural databases and tools to predict the properties, structure and function of proteins.</p> <p>iii. Understand and explain enzyme mechanisms in a structural context.</p> <p>iv. Describe mechanisms of protein folding and the roles of natively unstructured proteins in biology.</p> <p>v. Understand how cross-talk between proteins and post-translational protein modifications (e.g. phosphorylation, ubiquitination) facilitate information processing in cells.</p>
32	AQC 406 (B)	Fish Breeding and Hatchery Management	2018	<p>i. To understand the basic concepts of Infectious diseases and the role of immunity to control infections</p> <p>ii. Provides knowledge on the physiological mechanisms leading to diseased conditions.</p> <p>iii. Students gains knowledge on the pathogenesis and transmission of infectious diseases.</p> <p>iv. This insight allows the students to learn the treatment methods to control the growth and control of microbes.</p>

35. Geography

S. No.	Course Code	Title of the Course	Years of Introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/Skill development
1	GEG-101	Geomorphology	2018	<ul style="list-style-type: none"> To understand the concept of place and how it is connected to people's sense of belonging to the physical environment, landscape and culture. To understand the fundamental concepts of spatial interaction and

				<p>diffusion, which explain how human activities are influenced by the concept of distance.</p> <ul style="list-style-type: none"> • To exposed to the nature of physical systemssuch as geomorphologic processes and natural hazards. • To read and interpret information on different types of physical features maps. • To learn how human, physical and environmental components of the world interact.
2	GEG-102	Economic Resource Studies	2018	<ul style="list-style-type: none"> • To acquire knowledge about the concepts of resources, classification, models of natural resource processes, their use and misuse, conservation and management of resources for sustainable development • To Provide a comprehensive introduction to basic concepts and key theoretical approaches in economic geography • To Introduce economic geography as a dynamic, diverse and contested body of knowledge • To enable you to apply this knowledge to key social and economic issues in the context of economic globalization
3	GEG-103P	Maps Scales and Map Projections	2018	<ul style="list-style-type: none"> • To apprise the students about the art and science of map making and representation. • To explain the usage of different types of projections • To focus on the importance of scale and projection in the process of representing the earth's surface
4	GEG-104P	Terrain Mapping Techniques	2018	<ul style="list-style-type: none"> • To apprise the students about the Terrain mapping techniques • To project the representation of the land forms by using contour lines • To explain the methods of slope analysis • To develop the knowledge on the thematic maps • To Understand the data representation through the diagrammatic form and logographs

5	GEG-105	Advanced Cartography	2018	<ul style="list-style-type: none"> • To apprise the student to various aspects of cartography. • To introduce the basic concepts and key theoretical approaches in Advanced Cartography. <p>To describe the art and science of mapmaking and map analysis</p>
6.	GEG-106	Human Values and Professional Ethics-I	2018	<p>i. The student will be enriched with several aspects pertaining to Human values and performing of Professional Ethics in day today life.</p> <p>ii. Introduction of several Nature of values to be performed by Humans to lead a good and Peaceful life by extending and imparting good behavior, character and conduct towards people of the society.</p> <p>iii. Introducing different concepts of Bhagavad Gita and its applications in uplifting of Religious values in the present society</p>
7.	GEG-201	Climatology and Oceanography	2018	<ul style="list-style-type: none"> • To introduce to the student the fundamentals of atmospheric phenomena, global climate systems and climate change. • The atmosphere and climate are a critical part of the earth system, and climatic variability and change are central to the issue of current and future global environmental change. • To grasp the techniques for modeling the climate, covering both theoretical and technical aspects. • To understand the dynamics of the atmosphere and the overall climatological system. • To be able to analyse and interpret climatic data and classification of climate
8.	GEG-202	Principles of Remote Sensing	2018	<ul style="list-style-type: none"> <input type="checkbox"/> To focus on history and evolution of Remote sensing. <input type="checkbox"/> To explain the principle involved in remote sensing i.e. the Electromagnetic spectrum, reflection, refraction, diffusion, absorption and interaction with the earth's atmosphere. <input type="checkbox"/> To give the technical knowledge of satellite system. <input type="checkbox"/> To provide knowledge on the platforms and instruments used for remote sensing. <input type="checkbox"/> To give light on Aerial Remote sensing and satellite Remote sensing. <p>To explain about the specification of sensors</p>

9.	GEG-203P	Interpretation of topographical and Weather Maps	2018	<ul style="list-style-type: none"> • To provide understanding and interpretation Skills of different Topographical maps. • To improve the knowledge on Indian weather maps and Interpretation skills.
10.	GEG-204P	Techniques of Mapping and Map Analysis	2018	<ul style="list-style-type: none"> • To apprise the students about the Terrain mapping techniques • To project the representation of the land forms by using contour lines • To explain the methods of slope analysis • To develop the knowledge on the thematic maps
11	GEG-205	Geographical Thought	2018	<ul style="list-style-type: none"> • To acquaint the students with the Geographical philosophy and the Methodology and historical development of geography as a professional field. • The idea is to address the spirit and purpose of the changing geographies and to what we as geographers contribute towards knowledge production. • To developing critical thinking and analytical approaches and Students will acquire an understanding of and appreciation for the contributions of the eminent geographers to the subject.
12	GEG-206	Human Values and Professional Ethics-II	2018	<p>Student will know the values of ethics in various fields including medical, social and business ethics.</p> <p>ii. The student will be enriched with several aspects pertaining to Human values and performing of Professional Ethics in day today life.</p> <p>iii. Introduction of several Natural values to be performed by Humans to lead a good and Peaceful life.</p>
13	GEG-301	Urban Studies	2018	<ul style="list-style-type: none"> • To deal with the concept of urban settlements and evolution of urban population and to provide concept of Urban studies.

				<ul style="list-style-type: none"> • To explain the cause and effect of growth in urban population. • To explain the theories involved in classification of towns and relationship between towns and cities and their population. • To understand patterns of World urbanization with reference to India
14	GEG-302	Geographical Information System (G.I.S)	2018	<ul style="list-style-type: none"> • To understand the evolution of GIS. • To focus on collection, analyzing, interpretation and presenting the data related to Earth. • To explain the types of data collection with respect to time and terrain and Database management and retrieving the data from different sources. • To provide the theoretical knowledge on the Modeling surfaces and integration of Remote sensing with GIS. • To provide knowledge on GIS applications in different sectors.
15	GEG-303P	Geographical Information System (G.I.S)	2018	<ul style="list-style-type: none"> • To acquaint knowledge about especially Geographic Information System (GIS) softwares. • To develop the skill of geo-referencing and creation of different data files. • To improve the practical knowledge on attributed data and linkage. • To develop the skill on analysis methods of GIS.
16	GEG-304P	Statistical Techniques	2018	To analyze and represent the geographical data
17	GEG-305A	Agricultural Studies	2018	<ul style="list-style-type: none"> • To focus on evolution of Agriculture through at the different ages and approaches. • To understand the concepts and importance of determinants in different cropping patterns. <p>To understand agricultural allocation theories also the problem and prospect of Indian Agriculture</p>
18	GEG-305B	Regional	2018	<input type="checkbox"/> To develop the understanding about physical features of Indian Geography.

		Geography of India with special reference to Andhra Pradesh		<input type="checkbox"/> To familiarize the students with physiography, Drainage, Climate, soil and natural vegetation of India.
19	GEG-305C	Disaster Management Studies	2018	<input type="checkbox"/> To develop the skill of understanding about natural calamities and disaster and to realize the consequences as well as preparedness. <input type="checkbox"/> To create awareness on human and natural disasters <input type="checkbox"/> To understand classification of disasters and its impacts
20	GEG-306A	Regional Geography of Andhra Pradesh	2018	<ul style="list-style-type: none"> To acquaint the students with re-organization of Andhra Pradesh and its new physical, climate and drainage aspects.. To obtain the knowledge of demographic, irrigation and major crops. To understand Andhra Pradesh mineral and industrial aspects with transportation. To improve knowledge on the transportation and communication aspects of Andhra Pradesh
21	GEG-306B	Geographical information System (GIS) and Global Positioning System (GPS) applications	2018	<ul style="list-style-type: none"> To develop the skill of understanding GPS and Survey. To create awareness on post processing of GPS data and collection of data from GPS survey. To develop skill of report writing by using GPS data and software and hardware To acquaint knowledge about especially Geographic Information System (GIS) soft wares. To develop the skill of geo-referencing and creation of different data files. To improve the practical knowledge on attributed data and linkage. To develop the skill on analysis methods of GIS.

22	GEG-401	Regional Planning	2018	<ul style="list-style-type: none"> <input type="checkbox"/> To apprise the concept of Region and its planning. <input type="checkbox"/> To explain the types of regions and regional hierarchy. <input type="checkbox"/> To explain the types of regional planning and planning process. <input type="checkbox"/> To the people participation in planning process and role of Panchayat Raj system <input type="checkbox"/> To explain the resource based and physiographic based regional planning.
23	GEG-402	Advanced Remote Sensing	2018	<ul style="list-style-type: none"> • To give broad knowledge on photogrammetry, Principle, process, platforms and techniques and Aerial photographs. • To provide knowledge on software and hardware required for digital image processing, image enhancement and restoration techniques. • To understand the application of remote Sensing and Photogrammetry in various fields of study.
24	GEG-403P	Research Techniques	2018	<ul style="list-style-type: none"> • To provide an understanding for the student on statistical concepts to include measurements of location and dispersion, and correlation analysis. • To calculate and apply measures of location and measures of dispersion--grouped and ungrouped data cases. <p>To sensitize the different Research and agricultural techniques</p>
25	GEG-404P	Remote Sensing Applications	2018	<ul style="list-style-type: none"> <input type="checkbox"/> To explain practical knowledge on Remote sensing applications... <input type="checkbox"/> To help to understand Visual and digital interpretation of satellite Images. <input type="checkbox"/> To illustrate interpretation of Aerial photos. <p>To acquaint knowledge on allocation of RS in different fields and sectors</p>
26	GEG-405A	Water and Soil Resource Management	2018	<ul style="list-style-type: none"> • To apprise the student to various water resources related aspects and hydrological cycle. • To focus on groundwater and soils specifications. <p>To develop skill of water and soil management and to study on some case studies</p>
27	GEG-405B	Environmental	2018	<ul style="list-style-type: none"> • To create the environmental aptitude among students. • To familiarize the students with concepts, issues, approaches about physical

		Studies		land <ul style="list-style-type: none"> Toacquaintedwithcontemporaryenvironmentalproblemsandchallenges. To provide knowledge on Ecosystem, Biomes, food chain and hydrological cycle
28	GEG-405C	Geography for Research Extension and industry	2018	<input type="checkbox"/> To explain the historical evolution, of research in Geographical studies. <input type="checkbox"/> To help to understand about ethics, methods and factors in geographical research. <input type="checkbox"/> To provide the knowledge about forms of research and design. <input type="checkbox"/> To illustrate research methods and data collection. To acquaint research analysis and report writing
29	GEG-406A	Regional Geography of India	2018	<ul style="list-style-type: none"> To conceptualize the regional approaches and to examine regional differentiation in the study of Indian Geography. To expose to historical, economic, cultural, social and physical characteristics of India. To provide an introduction to the regions of the India in terms of both their uniqueness and similarities
30	GEG-406B	Remote sensing Principles and Applications	2018	<input type="checkbox"/> To explain practical knowledge on Remote sensing applications... <input type="checkbox"/> To help to understand Visual and digital interpretation of satellite Images. <input type="checkbox"/> To illustrate interpretation of Aerial photos.

36. Geology

S. No .	Course Code	Title of the Course	Years of Introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/Skill development
1	GEO-101	Geomorphology and Paleontology	2018	1) Able to explain conceptual approaches in geomorphology. 2) Able to describe land forms and land forming processes in different climate zones and tectonic regimes. 3) Able to explain different theories and models for landscape evolution. 4) Obtain knowledge in recognizing and minimizing the mass wasting. 5) Able to apply geomorphological concepts in economically important projects.

				<p>6) Palaeontology is the study of prehistoric species, mostly ones that are extinct. It focuses primarily on fossil data, using a variety of physical, chemical and biological.</p> <p>7) Paleontology has essentially three basic goals: (1) to describe the world's past biodiversity; (2) to outline the history of life on earth; and (3) to develop new ideas about evolution and ecology.</p>
2	GEO-102	Crystallography & Mineralogy	2018	<p>1) Students will be able to describe crystal structures, crystal symmetry and twinning</p> <p>2) Students will learn the use of X-ray crystallography to determine the arrangement Atoms in a crystal.</p> <p>3) Students will be able to identify the mineralogical composition of geological materials by studying some of the optical properties and techniques in order to reveal their origin and evolution.</p> <p>4) Students will get thorough knowledge about the physical chemical and optical Characteristics of minerals could lead to the discovery of new uses for Earth's mineral resources.</p>
3	GEO-103P	Crystallography & Mineralogy	2018	<p>1. The student understands the importance of minerals to society and to the study of the Earth.</p> <p>2. Can explain how the properties of chemical elements and their bonds regulate the structure and composition of minerals.</p> <p>3. Demonstrate how the crystal structure of minerals affects the external morphology and physical properties of a mineral (e.g. crystal symmetry, crystal habit).</p> <p>4. Identify various minerals using Physical properties.</p> <p>5. Identify various crystal forms shown by minerals belonging to different crystal system.</p>
4	GEO-104P	Geomorphology & Paleontology	2018	<p>1) The practical application of geomorphological science now forms river restoration and environmental protection.</p> <p>2) the extensive experience gained through field work, analysis and input to the design process to provide thorough understanding of geomorphology in the river environment and describe</p>

				<p>3) Paleontology is highly relevant to the modern and future world. We can learn how climate change has effected past organisms as well as how organisms have changed the physical world. We can also better understand the principles of extinction, evolutionary change, and biodiversity.</p> <p>4) Paleontological resources, or fossils, are any evidence of past life preserved in geologic context. They are a tangible connection to life, landscapes, and climates of the past. They show us how life, landscapes, and climate have changed over time and how living things responded to those changes.</p> <p>5) Paleontology lies between biology and geology since it focuses on the record of past life, but its main source of evidence is fossils in rocks.</p> <p>6) paleontology, also spelled paleontology, scientific study of life of the geologic past that involves the analysis of plant and animal fossils, including those of microscopic size, preserved in rocks.</p> <p>7) Body fossils and trace fossils are the principal types of evidence about ancient life, and geochemical evidence has helped to decipher the evolution of life.</p>
5	GEO-105	Stratigraphy & Paleontology	2018	<p>1) Students would have acquired comprehensive knowledge on principles of Stratigraphy, correlation methods classification of Stratigraphy units, tectonic framework of India and Geological timescale.</p> <p>2) Ability to give an account of various stratigraphic units and give stratigraphic column distribution in India, fossil content and economic importance of given geological formation.</p> <p>3) Apply standard stratigraphic codes while preparing geological reports</p> <p>4) Describe morphology, classification, evolutionary trends of Invertebrate fossils with geological and geographic distribution and paleoecological and paleo-environmental relevance.</p> <p>5) Ability to identify, classify and describe the morphology of the invertebrate fossils and plant fossils.</p> <p>6) Application of fossils in establishing the age of the rockunit, correlation with other area, and Use of fossil in finding mineral deposits.</p> <p>7) Ability to apply micropalaeotological techniques in hydrocarbon exploration.</p>
6.	GEO-106	Human Values & Professional	2018	<p>1) After completion of this course the students will be able to know the importance of Ethics and Human Values in various professions.</p>

		Ethics-I		2) Students also will get in depth knowledge and understanding of moral values and ethical code of the Indian Society. Especially embedded in various scriptures.
7.	GEO-201	Structural Geology and Geotectonics	2018	<p>1) Able to demonstrate a basic understanding of stress, strain, rheology of earth's lithosphere and comprehend how to describe and classify brittle and ductile structures.</p> <p>2) Able to describe, identify and analyze the folds, faults and joints and their effects on outcrop pattern.</p> <p>3) Measure, plot and interpret structural field data and can relate these to geological Maps and knows how to read geological maps and geological cross-section.</p> <p>4) Obtain knowledge of shear zone characteristics and textures which are usually highly, Mineralized zones.</p>
8.	GEO-202	Remote Sensing and GIS	2018	<p>1) Develop knowledge in basics of Remote Sensing interpretation keys and applications.</p> <p>2) Formulate the relationship between EMR and satellite Remote Sensing.</p> <p>3) Application for Remote Sensing for important economic deposits.</p> <p>4) Operate GIS data model and demonstrate GIS techniques for various applications.</p> <p>5) Apply RS and GIS techniques to analyze the various geological materials.</p>
9.	GEO-203P	Structural Geology & Sedimentology	2018	<p>1) The interpretation of geological maps and determination of strike and dip, Borehole problems and apparent dip, plunge and pitch of linear structures</p> <p>2) Structural geology concepts and tools to understand rocks deformation in hot environments</p> <p>3) Structural geology with interpretations and simple geomechanical problems and solutions</p> <p>4) Structural geology issues related to new instruments in measuring structural data from rocks, paleomagnetic studies in tectonics field studies in structural geology interdisciplinary aspects of structural geology.</p> <p>5) Sedimentology encompasses the study of modern sediments such as sand, silt,</p>

				<p>and clay, and the processes that result in their formation (erosion and weathering), transport, deposition and diagenesis.</p> <p>6) Sedimentology, the study of sedimentary rocks and the processes by which they are formed, includes and is related to a large number of phenomena.</p> <p>7) Sedimentology includes the five fundamental processes defined by the term sedimentation --weathering, erosion, transportation, deposition and diagenesis.</p>
10.	GEO-204P	Remote Sensing and GIS	2018	<p>1. Understand the concepts of Photogrametry and compute the heights of objects</p> <p>2. Understand the principles of aerial and satellite remote sensing, Able to comprehend the energy interactions with earth surface features, spectral properties of water bodies.</p> <p>3. Understand the basic concept of GIS and its applications, know different types of data representation in GIS.</p> <p>4. Understand and Develop models for GIS spatial Analysis and will be able to know what the questions that GIS can answer are.</p> <p>5. Apply knowledge of GIS software and able to work with GIS software in various application fields.</p> <p>6. Illustrate spatial and non spatial data features in GIS and understand the map projections and coordinates systems.</p> <p>7. Apply knowledge of GIS and understand the integration of Remote Sensing and GIS.</p>
11	GEO-205	Sedimentology	2018	<p>1) Able to identify different sedimentary rocks in both hand specimens and thin section and derive information on the depositional conditions and environments.</p> <p>2) Able to study the sequence of sedimentary rock strata and describe the tectonic framework of sedimentation to understand the earth's history including palaeoclimatology and history of life</p>
12	GEO-206	Human Values & Professional Ethics-II	2018	<p>1) After completion of this course the students will be able to follow and practice good behaviour with human values and moral support to their elderly family members.</p> <p>2) They also aware and get knowledge about medical ethics how the doctors will behave with patients, what type of ethics should be followed by business people. They also get in through knowledge about the protection of</p>

				environment social ethics like family ethics, the role of print and electronic media in prevention and protection of Human rights in Indian society.
13	GEO-301	Igneous Petrology	2018	<ol style="list-style-type: none"> 1) Acquire knowledge on the evolution of magma by different processes takes place from origin to emplacement with respect to different tectonic settings. 2) Explain Igneous processes, formation, structures, classification and significance of texture in explaining rock history. 3) Obtain knowledge on the crystallizing phase equilibrium of multi component magma system. 4) Identify different Igneous rocks both in handspecimens and thin sections in terms of their petrogenesis by studying the petrographic characteristics.
14	GEO-302	Metamorphic Petrology	2018	<ol style="list-style-type: none"> 1) This course has links directly with industry and share the knowledge about a wide range of ore deposits. 2) Offers a detailed study of origin of economic mineral deposits its identification properties and distribution in India. 3) Comprehensive knowledge in reflection light optic and ore textures.
15	GEO-303P	Petrology	2018	<ol style="list-style-type: none"> 1) Describe the types and relative abundances of phases in a rock based on observations from hand specimens and thin sections 2) Interpret the geologic history of igneous rocks based on mineral assemblage and textures using both hand sample and microscope techniques 3) Use metamorphic mineral assemblages and textures to constrain deformation history and P-T conditions 4) Use geochemical data (partition coefficients, REE plots, etc) to constrain petrogenetic processes 5) Integrate their research findings with those of peers in developing a consensus model that (a) explains mineral occurrences and interplay (micro- and macroscopic) in field samples, and (b) holds up to public scrutiny (as a consensus model and as individual components) at a departmental mini-poster symposium 6) Design and implement a field sampling campaign

				<p>7) Use a portable X-Ray Fluorescence Spectrometer to collect elemental analyses</p> <p>8) Use MS Excel to organize, plot, and evaluate the petrogenesis of CRB using elemental data</p>
16	GEO-304P	Geochemistry	2018	<p>1) Geochemistry can play a key role in helping to protect the safety of drinking water by identifying the sources, concentration and forms of potentially harmful elements such as arsenic mercury and fluoride in natural water.</p> <p>2) Geochemistry and health establishes and explains links between the natural or disturbed chemical composition of the earth's surface and the health of plants animals and people.</p>
17	GEO-305	Geochemistry and Thermodynamics	2018	<p>1) Understand the behavior of elements in a geochemical context and relate this knowledge to how elements redistribute within the Earth.</p> <p>2) Learn to interpret and explain interactions between Earth reservoirs.</p> <p>3) Understand and interpret the major processes that form and modify the Earth's crust and mantle.</p> <p>4) Use isotopes to trace geological processes and age date specific events.</p>
18	GEO-306	Computer Applications and Geostatistics	2018	<p>1) Comprehend the database related to field geological data</p> <p>2) Prepare and Interpret graphical and pictorial data</p> <p>3) Exposure to some selected software's related to geology</p>
19	GEO-307	Dimensional Stones and Building Materials	2018	<p>1) Explain the distribution of dimensional stones and occurrence of construction materials</p> <p>2) Classify dimensional stones and construction materials</p> <p>3) Assess the suitability of various dimensional stones and construction materials</p>
20	GEO-308	Gemology	2018	<p>1) The course is focused on a comprehensive learning in gemology</p> <p>2) Understands the formation, classification and properties to final the grading and evaluation.</p> <p>3) Knowledge in order to identify original gemstones and stimulants</p> <p>4) Acquire skills which will be useful to them in gem industry</p>

21	GEO-309	Surveying and Field Geology	2018	<p>1) Understand the use of different surveying instruments, field equipment, aerial photographs and their use.</p> <p>2) Compute the area and earthwork for different works by using surveying instruments</p> <p>3) Analyze surveying techniques, tools, survey data and geological reports</p> <p>4) Prepare contour maps, geological maps and reports</p> <p>5) Solve survey issues using proper survey and interpretation.</p> <p>6) Use appropriate modern tools in surveying and mapping</p>
22	GEO-401	Economic Geology	2018	<p>1) Its chief objective is to guide the exploration for mineral resources and help determine which deposits are economically worthwhile to mine. Specialists in economic geology often assist in the extraction of the mineral commodities as well.</p> <p>2) <i>Economic geology</i> is concerned with earth materials that can be used for economic and/or industrial purposes. These materials include precious and base...</p> <p>3) Scientific <u>discipline</u> concerned with the distribution of mineral deposits, the economic considerations involved in their recovery, and an <u>assessment</u> of the reserves available.</p> <p>4) Economic geology deals with metal ores, fossil fuels (<i>e.g.</i>, <u>petroleum</u>, <u>natural gas</u>, and coal), and other materials of commercial value, such as salt, gypsum, and building stone. It applies the principles and methods of various other fields of the geologic sciences, most notably <u>geophysics</u>, <u>structural geology</u>, and <u>Stratigraphy</u>. Its chief objective is to guide the exploration for mineral resources and help determine which deposits are economically worthwhile to mine. Specialists in economic geology often assist in the extraction of the mineral commodities as well.</p>
23	GEO-402	Mineral Exploration, Mining & Engineering Geology	2018	<p>1) This course linked to industry and acquires knowledge on techniques to locate ore bodies, methods for mineral exploration and geologic aspects of drilling.</p> <p>2) Acquire knowledge on geophysical methods for Ore reserve estimation.</p> <p>3) Acquire knowledge on Ore beneficiation processes and techniques.</p> <p>4) Confirm mining rules and regulations</p>

				<p>5) Able to determine the suitable mining methods</p> <p>6) Analyse different ores and ore beneficiation processes.</p> <p>7) Understand the different engineering properties of rock types and role of geologists in selecting the sites for different major engineering projects.</p>
24	GEO-403P	Economic Geology	2018	<p>1) This course has links directly with industry and share the knowledge about a wide range of ore deposits.</p> <p>2) Offers a detailed study of origin of economic mineral deposits its identification properties and distribution in India.</p> <p>3) Comprehensive knowledge in reflection light optic and ore textures.</p> <p>4) Acquire practical knowledge on microchemical techniques for identification ores and estimation of ore reserves.</p>
25	GEO-404P	Project Work	2018	<p>1) The geological formation of Kurnool district Devanakonda area are mainly Gulchervu quartzites, closepet granites intrusive dolerite dykes.</p> <p>2) The soils in the study area are mainly Red soils with patches of black cotton type and some patches of sandy and loamy type of soils are also found.</p> <p>3) Topographically the Q.L area is a hillock gently slopes towards the west direction. It is low lying plain land with an average altitude of 426m to 453m above the M.S.L.</p> <p>4) Watershed, a naturally entity in itself combines forest management, land use management and water management.</p>
26	GEO-405	Hydrogeology	2018	<p>1) Apply the knowledge of geological formations and the hydrological properties of rocks</p> <p>2) Analyze the suitability of water for domestic, irrigation and industrial purposesConduct geological and geophysical investigations and give recommendations for drilling of borewells.</p> <p>3) Explain causes of pollution of groundwater give remedial measures to the</p>

				<p>society.</p> <p>4) Use modern methods and appropriate techniques to carrying out geophysical studies and artificial recharge methods</p> <p>5) Students will get critical knowledge on evaluation of geological condition at the major engineering project sites.</p>
27	GEO-406	Environmental Geology & Natural Hazards	2018	<p>1) Explain different aspects of environment and local, regional and global environmental problems.</p> <p>2) Classify and explain the environmental pollution and disaster control technologies</p> <p>3) Prepare, interpret and implement environment projects</p> <p>4) Identify the natural and environmental disasters, its causes and apply preventive measures.</p> <p>5) Adopt the laws and regulations towards hazard management</p> <p>6) Able to prepare controls of mitigating toward natural disasters.</p>
28	GEO-407	Water Shed Management	2018	<p>1) Explain the importance of watershed management</p> <p>2) Classify and explain the different water harvesting techniques</p> <p>3) Use modern tools for land erosion control</p> <p>4) Develop or improve the people's participatory approach for sustainable development and management of watersheds.</p>
29	GEO-408	Medical Geology	2018	<p>1) Explain about relationship of human Health and Geological Processes.</p> <p>2) Able to understand the importance of the Water quality standards and impact of micronutrient deficiencies in soils and crops on human health</p> <p>3) Analyse the interaction of abundance of elements and geological effects.</p>
30	GEO-409	Fuel Geology	2018	<p>1) The course offers a detailed study about natural fuels like coal and petroleum their formation and distribution especially in sedimentary basins.</p> <p>2) Students shall benefit to have basic ideas about formations, nomenclature in constitution of coal working detail of distribution of coals and coal industry in India, Sufficient idea of formation and entrapment of oil and gas.</p> <p>3) Get elaborate knowledge about occurrence of atomic minerals in nature, methods of prospecting, atomic fuels and environment.</p>

37. Home Science

Food Science Nutrition & Dietetics

S. No .	Course Code	Title of the Course	Years of Introduction	Activities/Content with direct bearing on Employability/Entrepreneurship /Skill development
1	FSND 101	Food Chemistry and Analysis	2018	<ul style="list-style-type: none">I. Acquire knowledge on chemical composition physical, chemical, and functional properties of Water, carbohydrate, Protein and Fats.II. Understand the principles and working applications of different analytical techniques associated with food.III. Perform skills in qualitative and quantitative estimation of nutrients in different foods.IV. This course gives an hands on experience which will help student to become food analyst at local, regional, national and global levels.
2	FSND 102	Food Science and Experimental	2018	<ul style="list-style-type: none">I. Acquire knowledge on Plant and Animal foods composition, and processing techniques on nutritive quality of foods.II. Understand the principles of cookery of different foods and methods of evaluation.III. This course is prerequisite for skill development in Food Product development.IV. Standardization and experimentation on different foods leading to physical, chemical and sensory changes can be understood leading to become food research analyst in industries at local, regional, national levels.

3	FSND 103	Clinical Nutrition and Dietetics-I Foods	2018	<ul style="list-style-type: none"> I. Understand the concepts of nutrition and its relation to health. II. Describe the role and responsibilities of Dietitian in Hospital. III. Apply Knowledge related to Therapeutic modification of diets and Plan and prepare diet for different diseases conditions. IV. This will help the students to get placements in hospitals and also start their own diet and nutrition clinics.
5	FSND 107	Essential of Food and Community Nutrition	2018	<ul style="list-style-type: none"> I. Understand about nutrients in food, their functions and consequences of deficiency. II. Apply skills for planning diets for nutritional disorders like PEM, Iron, Vitamin A and Iodine. III. Develop the knowledge of techniques to assess the nutritional status of different age groups. IV. Acquire knowledge on government programs to prevent nutritional disorders according to regional and national needs.
6	FSND 104	Food Chemistry and Analysis Practical	2018	<ul style="list-style-type: none"> I. Develop skills in quantitative and qualitative analysis of food.
7	FSND 105	Food Science and Experimental Foods Practical	2018	<ul style="list-style-type: none"> I. Apply skills in standardization of foods using different processing techniques. II. Acquire skills in processing, preparation and evaluation of bakery products.
8	FSND 106	Clinical Nutrition and Dietetics-I Practical	2018	<ul style="list-style-type: none"> I. Acquire hands on experience in Therapeutic modifications of diet for different diseases by planning, preparing and evaluating. II. Acquire community assessment skills in terms of anthropometry, dietary, clinical and biochemical for various disorders and planning programs for important days. III. Apply Computational skills in the Nutritional allowances during life span.
9	FSND 107	Human Values	2018	<ul style="list-style-type: none"> I. Define the term 'ethics' , 'good and bad values', crime and punishment and

		and Professional Ethics-I		<p>religioustolerance.</p> <p>II. Understand the importance of good character, conduct and values embedded in various religions.</p> <p>III. Apply knowledge of professional ethics and correlate the concepts in addressing the ethical issues outside the class room .</p> <p>IV. Demonstrate knowledge of ethical values in non-class room activities, internships and field work and resolve the moral issues. .</p>
10	FSND 201	Nutritional Bio chemistry	2018	<p>I. Understand the metabolism of nutrients such as carbohydrates, proteins, lipids, minerals and vitamins in human physiology.</p> <p>II. Acquire knowledge on factors affecting digestion, absorption of nutrients.</p> <p>III. Create awareness on enzymes and its role in nutrient metabolism.</p> <p>IV. Gain knowledge on role of vitamins and minerals as coenzymes in metabolism.</p>
11	FSND 202	Food Microbiology and Safety	2018	<p>I. Acquire knowledge about important genera of microorganisms associated with food.</p> <p>II. Acquaint with food contaminants and their sources.</p> <p>III. Understand the various factors associated with growth, food spoilage and food-borne diseases of different microorganisms.</p> <p>IV. Gain knowledge on the characteristics of food borne diseases, infections and intoxications and their identification.</p>
12	FSND 203	Clinical Nutrition and Dietetics-II	2018	<p>I. Understand the concepts of dietary principles for various diseases.</p> <p>II. Comprehend knowledge in Dietary modifications for the management of diseases.</p> <p>III. Application of principals in preparation and service of diets to the patients.</p> <p>IV. Able to assess the case studies and construct the diet charts.</p>
13	FSND 204	Nutritional Bio chemistry Practical	2018	<p>I. Develop skill and hands on experience in analysis of biochemical parameters in blood and serum.</p>
14	FSND 205	Food Microbiology and Safety Practical	2018	<p>I. Demonstrate and develop skills in the use of standard methods and procedures for the microbiological analysis of food</p>

15	FSND 206	Clinical Nutrition and Dietetics-II Practical	2018	<ul style="list-style-type: none"> I. Application of principals in preparation and service of diets to the patients. II. Able to assess the case studies and construct the diet charts.
16	FSND 207	Research Methodology	2018	<ul style="list-style-type: none"> I. Understand the concept of doing research about terms like ‘variables’, ‘hypotheses, and ‘research II. Gain knowledge on different types of research like experimental, survey, applied, action research etc., and differentiate advantages and disadvantages each type of research. III. Critically gain knowledge to select a sample by using different sampling methods like probability and non-probability sampling. IV. Develop a research proposal in the appropriate scientific style. V. Critically apply knowledge of application of statistics in data analysis. VI. Apply skills in using computer applications for data analysis
17	FSND 208	Human Values and Professional Ethics-II	2018	
18	FSND 301	Food Processing and Preservation Technology	2018	<ul style="list-style-type: none"> I. Understand the principles and scope of food processing and preservation. II. Get an overview on various techniques/methods in food processing and preservation. III. Acquire knowledge of emerging technologies and their applications in food processing and preservation. IV. Acquaint knowledge on advanced food preservation technologies.
19	FSND 302	Advances in Human Nutrition	2018	<ul style="list-style-type: none"> I. Appraise the advance concepts of nutrition of Brain, Immunity and Sports. II. Understand the concepts of dietary management in endemic nutrition problems. III. Create knowledge on the dietary management during emergencies. IV. Understand the process and relation of immunity and nutrition
20	FSND 303	Rural work experience	2018	This programme develops competency in the areas of technological, managerial and communication skills among the students. To develop communications skills in

				students using extension training methods through planning, preparing of Teaching Learning materials and providing education in the areas of Nutrition, Child development and transfer of technology.
21	FSND 304	Internship	2018	INTERNSHIP as dietitian in hospitals give practitioner skills for entry-level dietitians who are able to assume leadership roles to improve and maintain the nutritional care of diverse individuals, families and communities within national and global populations.
22	FSND 305-A	Nutrition Research techniques	2018	<ol style="list-style-type: none"> I. Understand the methods of nutritional status assessment. II. Knowledge on assessment techniques of protein quality in diets III. Comprehensive knowledge on research techniques using animal models. IV. Gain knowledge in nutrition research techniques using Human models.
23	FSND 305-B	Geriatric Nutrition	2018	<ol style="list-style-type: none"> I. Understand the physiological changes and theories of ageing. II. Knowledge on importance and consequences of diet in elderly. III. Awareness on degenerative diseases, life style genesis and its management through diet. IV. Describe the government programs and policies for elderly.
24	FSND 305-C	Nutrition in Emergencies And Disaster Management	2018	<ol style="list-style-type: none"> I. Understand and assess the emergency situations related to food and Nutrition in natural and manmade disasters. II. Acquire knowledge on nutrition surveillance and treatment in emergencies. III. Gain Knowledge on planning nutrition relief and rehabilitation in emergencies. IV. Develop skills in Nutritional epidemiological studies.
25	FSND306-A	Fundamentals of Food, Nutrition and Health	2018	<ol style="list-style-type: none"> I. Gain knowledge on foods, food groups, balanced diet for different age groups. II. Understand the importance of macro and micronutrients in daily diet. III. Comprehend knowledge on deficiency symptoms of different nutrients. IV. Develop skills and hands on experience to assess nutritional problems in community.
26	FSND306-B	Nutritional Assessment	2018	<ol style="list-style-type: none"> I. Learn the determinants of Nutritional Surveillance. II. Understand the direct and indirect methods of nutritional assessment. III. Knowledge on dietary assessment at individual and house hold level.

				IV. Identify the clinical symptoms and biochemical tests for different nutritional problems.
27	FSND 401	Food Safety Standards and Quality Control	2018	I. Understand the current food safety standards rules and regulations. II. Gain knowledge on desirable and undesirable constituents and contaminants in foods. III. Critical analysis on subjective and objective methods of quality of food. IV. Develop skills for quality analysis and assurance of food.
28	FSND 402	Food Product Development and Marketing	2018	I. Illustrate the new product categories in food market and their characteristics. II. Elucidate the process of new food product development in food industry. III. Exemplify various specialty food products and their applications. IV. Acquire the skill to design and development of new food product and analyze the quality of the product.
29	FSND 403	Nutrition for Health and Fitness	2018	I. Define the concepts of Health, Nutrition, physical activity, physical fitness and methods of evaluation. II. Understand the Energy metabolism pathways during physical activity. III. Describe the role of macronutrients in physical performance, weight management and obesity. IV. Explains the nutritional needs in different sports and the role of national agencies.
30	FSND 404	Food Safety Standards and Product Development Practical's	2018	I. Develop skills for quality analysis and assurance of food. II. Acquire the skill to design and development of new food product and analyze the quality of the product.
31	FSND 405 A	Institutional Food Service Management	2018	I. Understand the different types and management of food services. II. Illustrate the infra structure plans, menus and equipment in food service establishments. III. Know the food safety measures in food service establishments. IV. Knowledge on finance and personnel management.
32	FSND 405 C	Technology of Packaging(T+P)	2018	I. Provide knowledge on packaging and packaging materials II. An overview of the scientific and technical aspects of food packaging. III. Enable the students to understand the regulations of packaging and packaging material testing.

				IV. Apply skills of new innovations in food packaging to improve product stability and/or to extend the product shelf-life.
33	FSND 406-A	Child Growth and Development	2018	I. Know the terms growth, development and stages of development across life span II. Understand the characteristics of children at different stages of childhood III. Explain the different developments like physical, cognitive , language and social development during childhood. IV. Apply knowledge to understand normal development and developmental delays during childhood.
34	FSND 406-B	Disaster Management	2018	I. Know about natural disasters: manmade disasters; chemical hazards; National and International strategies to mitigate disaster management. II. To understand natural disasters (like floods, drought, cyclone, earthquakes, global warming etc); Nuclear disasters; Biological disasters III. Explain the efforts made by the NGOs, Community based organizations and local administration in disaster management. IV. Discriminate disaster responses of Armed forces and Police.

Human Development and Child Welfare

S. No.	Course Code	Title of the Course	Years of Introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/Skill development
1.	HDCW-101	Advanced Study of Child Development	2018	Students acquire the knowledge of holistic development of individuals from conception to adolescent period. The students can disseminate the knowledge to teachers and parents regarding normal and delayed development among children. The students can apply skills when they serve as teachers at local level or as extension officers in national schemes like ICDS.
2.	HDCW-102	Community Nutrition	2018	Students acquire knowledge about food groups, RDA and steps in planning a diet. The skills learnt in planning and calculation of nutritive values help when they work in local

				hospitals or in National programs like Zero budget natural forming , ICDS etc.
3.	HDCW-103	Trends in Early Childhood Education	2018	Students apply knowledge about appropriate approaches to teach pre- school children. They apply skills in the field of early childhood education, when they are placed as pre - school teachers at local level and as pre- school trainers at national level in Government organizations like ICDS or NGOs like Azim Premji foundation, PRATHAM, Bachpan etc.
4.	HDCW-104	Practical-I Developmental Assessment Practical	2018	Students acquire skills on apply skills of observation of recording of all round development among infant and children below 5 years. They learnt how to assess cognitive ,physical, social &emotional development of children from late childhood to adolescent period, and life skills among adolescents.. The students can apply skills when they as teachers at local level or as extension officers in national schemes like ICDS.
5.	HDCW-105	Practical-II Community Nutrition Practical	2018	Students apply skills related to food groups, RDA and steps in planning a diet. The skills learnt in planning and calculation of nutritive values help when they work in local hospitals or in National programs like Zero budget natural forming , ICDS etc.
6.	HDCW-106	Practical-III Early Childhood Education Practical	2018	Students apply skills in the field of early childhood education, when they are placed as pre-school teachers at local level and as pre- school trainers at national level in Government organizations like ICDS or NGOs like Azim Premji foundation, PRATHAM, Bachpan etc.
7.	HDCW-107	Family Dynamics	2018	Students get knowledge related to issues in family and society and understand laws related to marriage and family . Students utilize this knowledge when they work in national organizations like social welfare board ,and family counseling centers and in non-government organizations catering to the family welfare at local level like PASS ,RASS etc..
8.	HDCW-108	Human Values and Professional Ethics-I	2018	Students understand the importance of good character , conduct and values embedded in various religions . Demonstrate knowledge of ethical values in non-class room activities, internships and field work.
9.	HDCW-201	Quality Standards in ECE Centers	2018	Students get knowledge about planning activities for pre-school children .They understand different ways of teaching stories ,rhymes etc using different audio-visual aids.apply skills in planning a day's activities for pre -school children , prepare Teaching Learning Material (TLM) and participate as student teacher in SVU Laboratory nursery school. The practical experience helps in establishing preschools, as entrepreneurs also to serve in Non Government institutions like Azim Premji Foundation, PRATHAM at national level and in Government sectors as extension officer at National level programs that are providing

				pre- school education
10.	HDCW -202	Child Study Techniques	2018	Students are capable to use standardized techniques for assessment of IQ and personality of children. The knowledge and skills will be helpful when they work as school counselors in local schools and colleges and as counsellors in mental health institutions like VIMHANS ,Vijayawada and Child Guidance Clinics at local Government hospitals like SVRR hospital.
11.	HDCW -203	Children with Developmental Challenges	2018	Students gain knowledge about the causes for various impairments and principles of assessment of children with disabilities and gifted children. The practical skills of management of special children were to be treated when they are placed as special educators in local schools ,colleges and at national Government organizations like NIMH,NIHH at national level and non government organizations at local level like Nava Jeevan center for Visually Challenged ,RASS,PASS etc.
12.	HDCW-204	Practical-I Participation in ECE Center Practical	2018	Students will be able to apply skills in planning a day's activities for pre -school children , prepare Teaching Learning Material (TLM) and participate as student teacher in SVU Laboratory nursery school. The practical experience helps in establishing preschools, as entrepreneurs also to serve in Non Government institutions like Azim Premji Foundation, PRATHAM at national level and in Government sectors as extension officer at National level programs that are providing pre- school education
13.	HDCW-205	Practical-II Child Study Techniques Practical	2018	Students apply skillsfor assessment of IQ and personality of children. The knowledge and skills will be helpful when they work as school counselors in local schools and colleges and as counsellors in mental health institutions like VIMHANS ,Vijayawada and Child Guidance Clinics at local Government hospitals like SVRR hospital
14.	HDCW-206	Practical-III Children with Developmental Challenges Practical	2018	Students are capable to use standardized techniques for assessment of IQ and personality of children. The knowledge and skills will be helpful when they work as school counselors in local schools and colleges and as counsellors in mental health institutions like VIMHANS ,Vijayawada and Child Guidance Clinics at local Government hospitals like SVRR hospital.
15.	HDCW-207	Research Methodology	2018	Student gain knowledge about types of research ,different methods of sampling and preparation of schedules/questionnaires. The students get skills in preparation of a research proposal. The knowledge helps the students to write articles for journals at national and international levels.

16.	HDCW -208	Human Values of Professional Ethics - II	2018	Understand the importance of value education and ethics in medical ,business ,environmental and social fields. The students apply the knowledge while joining in any profession and will contribute to society as socially responsible citizens.
17.	HDCW -301	Parent Education	2018	The students gain knowledge about different child rearing practices and parenting styles adopted by parents. Gain skills in planning education materials for parents ,conduct parent education programs in schools and community, when they work as a teachers at local schools. It helps to disseminate the knowledge related to impact of parenting styles on child behavior to parents , teachers and significant others in the community.
18.	HDCW-302	Theories and Approaches to Child Guidance	2018	The students describe different theories related to child development and understand the reasons for maladaptive behavior. Apply the knowledge of theories to understand the behavior of individuals and also in counselling , when they join as counselors at local schools and mental health institutions at regional level like VIMHANS ,Vijayawada , at national level like NIMH ,Hyderabad and at local level Child Guidance clinics run by Government hospitals like SVRR hospital.
20.	HDCW-303	Practical -I Rural Work Experience	2018	Students develop an understanding of rural life situations and problems related to nutrition and child development relevant to real field situations through practical training. They gain knowledge and skills to impart education related to health and nutrition to the rural audience. This experience will helpful when they join rural development programs run by government like Health and Nutrition Natural Farming Fellow in Natural Farming Project.
21.	HDCW-304	Practical-II Internship	2018	Students get hands-on experience in real life work settings relevant to the human development like SODHANA, Vijayanagaram, Christian Counselling Centre ,Vellore ,Sudheesha Counselling Centre, Hyderabad, VIMHANS, Vijayawada.
22.	HDCW-305	Generic Elective* a)) Infant Development and Stimulation b Development of Learning Material and Children's	2018	(a)Students gain knowledge of stimulation activities for physical ,language ,cognitive and social development of infants. The knowledge and skills will help to plan stimulation activities for infants ,when they establish crèche as entrepreneurs or serve in Day care centers. (b) Students understand the importance and principles of teaching materials for young children. They gain skills in planning and development of material for al round development of children. The students can prepare teaching, learning materials when they join as teachers in pre - schools at local levels and as resource persons at national

		Literature c) Planning For Project Management		organizations like “Ajimpremji” Foundation. (c) Students gain knowledge in identification of problem for a research project, apply skills in selection of tools ,data collection and report writing .The knowledge helps the students to write articles for national and international levels and also to take up small projects.
24.	HDCW -401	Guidance and Counselling in Human Development	2018	The students gain the knowledge of different approaches to counselling. This will apply counselling skills to practice counselling process. The knowledge helps the students towards employment as counsellors in mental health institutions like VIMHANS ,Vijayawada and local non government organizations like RASS ,PASS ,VIMHANS ,Vijayawada etc.
25.	HDCW -402	Advanced Human Development	2018	Students understand the characteristics and problems of early, middle and late adulthood persons. This knowledge helps when they get employment in Day care (or) foster care centers for elderly citizens (or) employment in Govt and ,local old age homes run by non govt organizations like RASS and PASS etc.
26.	HDCW -403	Rehabilitation and Management of Children with Special Needs	2018	Students understand the importance of Rehabilitation of children with developmental challenges through multi disciplinary approach. Gets practical knowledge about functioning of Govt and voluntary organizations that are managing children with developmental challenges .This helps students when they join as special educators at govt organizations like NIMH, Hyderabad and non govt organizations like RASS,PASS.
27.	HDCW-404	Practical Guidance and Counseling Practical	2018	The students gain the knowledge of different approaches to counselling. This will apply counselling skills to practice counselling process. The knowledge helps the students towards employment as counsellors in mental health institutions like VIMHANS , Vijayawada and local non government organizations like RASS ,PASS ,VIMHANS , Vijayawada etc.
28.	HDCW-405	Generic Elective* (a) Child and Human Rights or (b) Organization and Management of Child Welfare of	2018	(a) Students gain knowledge about human rights ,child rights and women rights. They can explains issues faced by women and children in difficult circumstances . The knowledge helps to understand the rights and problems of women and children when they work in Government organizations like Child Protection Officers. b).Students gain knowledge about the organizations striving for child welfare at national and international level. The knowledge helps when students join as supervisors in national schemes like ICDS and at regional level organization like RASS and PASS etc.

		Institutions (c) Behavior problems and disorders among children		(c)The students recognize the systems of common behavior problem and disorders among children. They apply skill in management of problems and disorders through behavior modification techniques .These skills help the students when they work at local NGO like RASS, PASS and regional level like VIMHANS Vijayawada.
29.	HDCW-406	Open Elective* (For other departments) a) Child Welfare Programs or (b) Disaster management	2018	a). Students gain knowledge about the organizations striving for child welfare at national and international level. The knowledge helps when students join as supervisors in national schemes like ICDS and at regional level organization like RASS and PASS etc. b).Students gain in-depth knowledge about natural disasters; manmade disasters; chemical hazards : disaster management. This helps to understand efforts made by the NGOs, Community based organizations and local administration in disaster management and also to help Government in times of disasters

Extension Management and Communication Technology

S. No.	Course Code	Title of the Course	Years of Introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/Skill development
1	EMCT-101	Extension Education in Community Development	2018	The students can gain understanding on the Extension Management community development and panchayat raj system to study the community by using PRA and various approaches of extension education. The students will get jobs as extension officers, and various placements in community development projects, as well as rural

				co-operative sector.
2	EMCT-102	Community Nutrition	2018	The students know about nutrients in food and know about the nutritional deficiencies and the community level problems and policies and programmes of Nutrition.
3	EMCT-103	Communication and Media Preparation	2018	The concept of Communication –Recent trends in Instructional technology: Extension literature and the role of different factors influencing and effecting communication process- Dyad setting small group and mass communication. This course will help the students to improve their communication skills.
4	EMCT-104	Extension Education in Community Development Practical	2018	The students will acquire skill to study the community by using PRA techniques and develop the skill of critical analysis on various approaches of extension education.
5	EMCT-105	Community Nutrition Practical	2018	Students gain practical knowledge on the role of nutrients in different stages of human life and methods of nutritional assessment and community level problems and policies.
6.	EMCT-106	Communication and Media Preparation Practical	2018	Students analyze the role of different factors influencing and effecting communication process, preparation and use of different teaching aids in teaching different groups of people and in different learning situations.
7.	EMCT-107	Dynamics of Rural Society	2018	The students will gain knowledge on social structure; characteristics of rural people; rural social problems - social institutions, learn the factors affecting social change and gain insight about the welfare policies and programmes for rural society.
8.	EMCT-108	Human Values and Professional Ethics-1	2018	Students will apply knowledge of professional ethics and correlate the concepts in addressing the ethical issues outside the class room.

9.	EMCT-201	Entrepreneurial Development and Empowerment of Women	2018	Students acquire knowledge on Entrepreneurship, about the strategies for empowering women; rights of women and develop the entrepreneurship skills and learn about the institutional support of entrepreneurship. This course will help the students to become good entrepreneurs and also to start their own business enterprise.
10.	EMCT-202	Educational Technology	2018	The students gain knowledge on concept of teaching learning process; forms and levels of teaching and learning; curriculum design, development knowledge on genesis and trends in modern education. This will help the students to develop the curriculum and to choose their career in the teaching field.
11	EMCT-203	Community organization and Leadership	2018	Students will know about community organization, process of Community organization, rural institutions, leadership, analyze different patterns of leadership; techniques of identification of leaders; steps to organize youth clubs; Role of Panchayat in developing rural women.
12	EMCT-204	Entrepreneurial Development and Empowerment of Women Practical	2018	Students will realize the role of entrepreneurship in economic development. Develop the skill of writing the business proposal and starting of business enterprise.
13	EMCT-205	Educational Technology Practical	2018	Students will develop the skill on developing a course curriculum; Preparation of lesson plans of selected topics and use of different instructional materials.
14	EMCT-206	Community Organization and Leadership Practical	2018	Students will develop the skill on different patterns of leadership, techniques of identification of leaders, and appraise the ongoing programmes in the locality.
15	EMCT-207	Research Methodology	2018	Students get knowledge on 'variables', 'hypothesis', research 'and recognize the purpose of doing a research, sampling methods and develop a research proposal in the appropriate scientific style.

16	EMCT-208	Human values and Professional Ethics-II	2018	Students gain knowledge on 'value education' 'self-introspection' and 'self-esteem develop well balanced personality, socially responsible persons of the society.
17	EMCT-301	Rural Development Administration	2018	Students gain insight about administration in Extension and rural development: coordination and supervision in rural development administration, the purpose and principles of administration; human relation in extension administration the recent ongoing rural development programmes etc. This course will help the students to get jobs as rural development officers, and get jobs in National NGOs like PRADHAN, CARE, SEWA etc
18	EMCT-302	Training and Development	2018	Students will learn the concept of training, goals of training; learning and types of learning, factors affecting learning among adult, current trends in training methodologies; training strategies and designs and acquire skills in developing; selection and use of different training methods- case study; role play; and brain storming; etc. This course will help the students to get jobs as Trainee- motivators, Trainers, consultants etc.
19	EMCT-303	Rural Work Experience	2018	Students will develop an understanding of rural life situations prevailing in villages with special reference to Home science among the student will know about socioeconomic conditions of people and their problems and several agencies and institutions involved in rural development.
20	EMCT-304	Internship	2018	students will gain first-hand exposure of working with NGOs. This will provide a practice-oriented and 'Hands-on' working experience in the NGOs / Government organizations and to enhance the students learning experience.
21	EMCT-305	(a)Managerial Skills for Extension Professionals	2018	Students will know about the conceptualization of management process and its major functions, managerial skill1; nature and importance for extension professionals. To understand the concept; scope and relevance of media in society; functions and future prospects of media systems

		<p>(b) Communication Technologies in Extension</p> <p>c) Sustainable Livelihood Systems</p>		<p>To understand the concept; scope and Communication technologies, relevance of media in society; functions and future prospects of media systems etc</p> <p>Students will know about the livelihoods of rural/urban people; resources – land, soil; climate; water and forests; processes and relationships among agro-climatic and natural resources, understand the production systems- farming and non-farming activities; their linkage with the livelihoods of rural people, food security; livelihood security, indicators of environmental sustainability.</p>
22	EMCT-306	<p>(a) Fundamentals of Food. Nutrition and Health</p> <p>(or)</p> <p>(b) Nutritional Assessment</p>	2018	<p>Students gain knowledge on foods, food groups, balanced diet for different age groups, understand the importance of macro and micronutrients in daily diet.</p> <p>Students will learn the determinants of nutritional surveillance; understand the direct and indirect methods of nutritional assessment. Gain knowledge on dietary assessment at individual and house hold level. Identify the clinical symptoms and biochemical tests for different nutritional problems.</p>
23	EMCT-401	Principles of Guidance and Counseling	2018	Develop knowledge about the concept; purpose; functions and role of guidance; types of services in a guidance programme , counseling and counseling theories, group guidance and counseling; concept; characteristics; Individual v/s group techniques. This course will help the students to get jobs as counselors and in Government and Non-government organizations, as counselors, consultant research co-coordinators etc
24	EMCT-402	Extension Programme Planning	2018	Students will get knowledge about Programme planning in Extension; Programme Implementation; Programme Evaluation, Documentation, Programme Planning; the

		and Evaluation		Preparation of plan of work ; Purpose, types and tools of Evaluation; Programme planning and implementation, documentation in Programme implementation. This course will help the students to get jobs as rural development officers, and get jobs in National NGOs like PRADHAN, CARE, SEWA etc
25	EMCT-403	Thesis/ Community Health Management	2018	Students gain knowledge about the concept of community health and global health; Primary Health Care – definitions; principles; components; comprehensive health care; levels of prevention, major health problems in India, management information systems in health, health needs of special groups – women, infants; and children; health of adolescents; geriatric health needs and problems.
26	EMCT-404	Principles of Guidance and Programme Planning Practical	2018	Assess the guidance programmes and counseling process in school and out of school settings and analyze use of standard test of study habits and attitudes (SSHA) for analyzing the study habits and attitudes.
27	EMCT-405	(a)Extension Management (b) Science & Technology for Rural Women	2018	Students will know about administration and management; process of management and organizational climate, understand the qualities and functions of extension personnel; Problems and issues of extension management in India. Analyze the management skills of extension personnel. Students will learn about the Science and Technology for rural development; Energy saving devices-application of solar energy; bio-gas etc., application of Science and Technology in Home science, safe water supply methods suitable for rural areas; health- hygiene and environmental sanitation. ,agencies involved in research and application of Science and Technology.

		(c) Environmental Management		Students will get the knowledge about the life and the environment; physical -chemical factors in the environment; changes in the environment; eco-system-earth, methods of waste management; women and environment government and non-governmental agencies in promoting better health, factors affecting changes in ecosystem and environment
28	EMCT-406	(a) Child Welfare Programmes or (b) Disaster Management	2018	<p>Students will learn concepts of ‘child’ and ‘child welfare’, enlist children in need of care and difficult circumstances, understand the role of government, child welfare programmes developmental and rehabilitative manner to the disadvantaged people in the society, monitoring and evaluation</p> <p>Students will get an insight about natural disasters: manmade disasters; chemical hazards; National and International strategies to mitigate disaster management., global warming etc)efforts made by the NGOs, & Community based organizations and local administration in disaster management.</p>

Food Technology

S. No.	Course Code	Title of the Course	Years of Introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/Skill development
1	FT-101	Food Chemistry and Analysis	2018	<ul style="list-style-type: none"> - Students will acquire knowledge about physical, chemical, and functional properties of foods. - Learn the fundamental principles and working applications of different analytical techniques associated with food. - Students will be able to explore and perform skills in qualitative and quantitative estimation of nutrients in different foods.
2	FT-102	Food Science and Experimental Foods	2018	<ul style="list-style-type: none"> - Students will acquire knowledge on structure, composition and functional properties of plant and Animal foods. - Understand the principles of cookery of different foods and methods of

				<p>evaluation.</p> <ul style="list-style-type: none"> - Students will be able to apply the scientific method and quantitative techniques in standardisation of foods using different processing techniques.
3	FT-103	Cereal Grains, Legumes and Oilseed Technology	2018	<ul style="list-style-type: none"> - Students will gain knowledge on the structure and composition of cereal grains, pulses and oil seeds. - Understanding of the basic concepts of Post harvest technology, mechanism of equipments and processing of cereals, pulses and oilseeds - Know about various processing, milling process and evaluate Traditional and commercially processed foods with cereals, pulses and oilseeds
4	Practical-I	Food Chemistry and Analysis	2018	<ul style="list-style-type: none"> - The students will know about principles and working applications of different analytical techniques associated with food. - Perform skills in qualitative and quantitative estimation of nutrients in different foods.
5	Practical-II	Food Science and Experimental Foods	2018	<ul style="list-style-type: none"> - Comprehensive knowledge on techniques of analysing, evaluating and application of foods in different processing techniques in foods.
6.	Practical-III	Cereal Grains, Legumes and Oilseed Technology	2018	<ul style="list-style-type: none"> - The students will be able to explore knowledge on various processing techniques of cereals, legumes and oilseeds. - Students acquire knowledge in various food applications and product preparations.
7.	FT-104	Essentials of Food and Community Nutrition	2018	<ul style="list-style-type: none"> - Students gain knowledge about nutrients in food and their functions. - Understand the nutritional problems of the community and consequences of deficiency of taking nutrients. - Apply skills for planning diets and techniques to assess the nutritional status of different age groups
8.	FT-105	Human Values and Professional Ethics - I	2018	<ul style="list-style-type: none"> - The student will be enriched with several aspects pertaining to Human values and performing of Professional Ethics in day today life. - Values to be performed by Humans to lead a good and Peaceful life by extending and imparting good behavior, character and conduct towards people of the society. - Introducing different concepts of Bhagavad Gita and its applications in uplifting of values in the present society.

9.	FT-201	Technology of Horticulture produce	2018	<ul style="list-style-type: none"> - Attain an overview on the classification composition and post-harvest handling technologies of fruits and vegetables to reduce postharvest losses and their value addition. - Impart the knowledge of processing, preservation and manufacture of fruits and vegetable based food products of fruits and vegetables. - Expertise in development of various Fruits & vegetables based products and assess the quality of fruit and vegetables and their products.
10.	FT-202	Food Microbiology and Safety	2018	<ul style="list-style-type: none"> - Obtain knowledge about important genera of microorganisms associated with food and food spoilages. - Understand the various factors associated with growth, food spoilage and food-borne diseases of different microorganisms. - Demonstrate the use of standard methods and procedures for the microbiological analysis of food
11	FT-203	Dairy Technology	2018	<ul style="list-style-type: none"> - Impart the knowledge of milk grading , composition and technologies of processing of milk and milk products. - Provide in-depth knowledge in various unit operations and developments in dairy processing. - Demonstrate the manufacturing of various dairy products and exemplify the quality of dairy products.
12	Practical-I	Technology of Horticulture produce	2018	<ul style="list-style-type: none"> - Student will know about various fruit and vegetable processing techniques and attain practical knowledge in production and preparation of products
13	Practical-II	Food Microbiology and Safety	2018	<ul style="list-style-type: none"> - Acquire knowledge on laboratory techniques to identify microorganisms in food. - Demonstrate the various microbial estimations in foods by applying standard techniques.
14	Practical-III	Dairy Technology	2018	<ul style="list-style-type: none"> - Students acquire knowledge of grading, composition, quality evaluation and processing techniques of milk and milk products.
15	FT-204	Research Methodology	2018	<ul style="list-style-type: none"> - Awareness about terms like ‘variables’, ‘hypothesis’, research ‘and recognize the purpose of doing research. - Understand different types of research like experimental, survey, applied, action research etc., and differentiate advantages and disadvantages each type of research.

				<ul style="list-style-type: none"> - Critically apply knowledge to select a sample by using different sampling methods like probability and non-probability sampling and development of research proposal.
16	FT-205	Human Values and Professional Ethics – II	2018	<ul style="list-style-type: none"> - Student will know the values of ethics in various fields including medical, social and business ethics. - The student will be enriched with several aspects pertaining to Human values and performing of Professional Ethics in day today life. - Introduction of several Natural values to be performed by Humans to lead a good and Peaceful life.
17	FT-301	Food processing and Preservation Technology	2018	<ul style="list-style-type: none"> - Students able to understand the scope, principles and different methods of processing and preservation techniques. - Acquire knowledge of emerging technologies and their applications in food processing and preservation. - Understand the applications and limitations of food processing and preservation technology.
18	FT-302	Live Stock and Sea Food technology	2018	<ul style="list-style-type: none"> - Acquire knowledge of the structure, composition, nutritional quality of various, livestock and seafood. - Gain insight knowledge of slaughtering, carcass processing, processing methods used for processing meat poultry and fish. - Prepare various value-added products of egg, meat, poultry and sea foods.
19	Practical-I	Food Processing and Preservation Technology	2018	<ul style="list-style-type: none"> - Student acquires knowledge of emerging technologies and their applications in various processing techniques and products of various foods by processing and preservation methods.
20	Practical-II	In plant training	2018	<ul style="list-style-type: none"> - Provide hands on experience with regard to different areas in food industries. - Acquaint and gain knowledge related to production, unit operations, quality control and marketing aspects of food industry. - Emphasize the prominence of food plant sanitation, food safety, standards, laws and regulation in food industry.
21	FT -303(a)	a)Unit operations in Food Industry.	2018	<ul style="list-style-type: none"> - Important preliminary operations in food processing industries and understand the principle of Unit operation in food industry. - Impart knowledge on Safety, sanitation and Effluent Treatment in food industry.

				<ul style="list-style-type: none"> - Know the different pre and post processing operations as storage and packaging foods etc.
22	FT -303(b)	b) Spices, Condiments and Plantation Crops	2018	<ul style="list-style-type: none"> - Students acquire knowledge, identification and post-harvest technologies of various spices, condiments and plantation crops. - Illustrate various value added products of spices, condiments and plantation crops. - Perceive Standards, specifications, packaging and Quality control measures of spices, condiments and plantation crops.
23	FT -303(c)	c) Nutrition in Emergencies and Disaster	2018	<ul style="list-style-type: none"> - Explain concepts on Epidemiology and its application in planning programs during emergencies and emergency situations in natural and manmade disasters. - Gain knowledge on nutrition surveillance and treatment in emergencies. - Knowledge on planning nutrition relief and rehabilitation in emergencies.
24	FT -304(a)	(a) Fundamentals of Food, Nutrition and Health	2018	<ul style="list-style-type: none"> - Gain knowledge on foods, food groups, balanced diet and importance of macro and micronutrients for different age groups in daily diet. - Comprehend knowledge on deficiency symptoms of different nutrients. - Apply skills to assess on nutritional problems in community.
25	FT -304(b)	b) Nutritional Assessment	2018	<ul style="list-style-type: none"> - Understand the nutritional problems of the community and consequences of deficiency of taking nutrients. - Apply skills for planning diets and techniques to assess the nutritional status of different age groups.
26	FT-401	Food Safety Standards and Quality Control	2018	<ul style="list-style-type: none"> - Gain knowledge in current rules and regulations of food safety standards and quality assurance. - Understand the insight quality evaluation of different foods by standard methods. - Develop skills for quality analysis and assurance of food quality.
27	FT-402	Food Product Development and Marketing	2018	<ul style="list-style-type: none"> - Elucidate the process of new food product development process to generate ideas, develop concept to test market and in food industry. - Acquire the skill to design and development of new food product and analyse the quality of the product. - Student able to design, demonstrate the skills in food process, organoleptic evaluation and nutritional label of food products as a team work.

28	FT-403	Nutrition for Health and Fitness/Project Work	2018	<ul style="list-style-type: none"> - Understand the concepts of Health, Nutrition, physical activity, physical fitness and methods of evaluation. - Describe the role of nutrients in physical performance, weight management, obesity and Energy metabolism pathways during physical activity. - Gain knowledge on concepts of physical activity, physical fitness and the importance of nutrients in Sports.
29	Practical-I	Food Safety standards and Product Development	2018	<ul style="list-style-type: none"> - Gain knowledge on subjective and objective evaluation methods of foods with safety and standards. - Exemplify various speciality food products and their applications, acquire the skill to design and development of new food product and analyse the quality of the product.
30	FT-404(a)	(a) Institutional food service management	2018	<ul style="list-style-type: none"> - Gain knowledge on principles of safe food preparation and cooking methods and service management
31	FT-404(b)	(b)Basic Food Engineering	2018	<ul style="list-style-type: none"> - Student understands the basic Principles, overview of processing techniques and methods of food. - Able to describe the types and properties of agro processing equipments like pasteurizer, spray drier and sealing equipments. - Enumerate processing equipments and maintenance of processing equipments
32	FT-404(c)	(c)Food Packaging	2018	<ul style="list-style-type: none"> - Enable the students to understand the regulations of packaging and packaging material testing. - Knowledge of the new innovations in food packaging to improve product stability and/or to extend the product shelf-life. - Able to utilize some of the new innovations in food packaging to improve product stability and/or to extend the product shelf-life.
33	FT- 405(a)	(a) Child Welfare Programmes	2018	<ul style="list-style-type: none"> - Understand the different developments like physical, cognitive, language and social development during childhood. - Apply knowledge to understand normal development and developmental delays during childhood.

34	FT- 405(b)	(b)Disaster Management	2018	<ul style="list-style-type: none"> - Understand natural disasters (like floods, drought, cyclone, earthquakes, global warming etc); Nuclear disasters; Biological disasters;. - Illustrate the efforts made by the NGOs, Community based organizations and local administration in disaster management.

37. Mathematics

S.No	Course Code	Name of the Course	Year of introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/ Skill development	Link to the relevant Document
1.	MA 101	Algebra	2018	1. Identify the concept of action and conjugation. 2. Analyze the maximal, prime, nilpotent and Nil ideals. 3. Understand U.F.D. and Polynomial Rings.	
2.	MA 102	Real Analysis	2018	1. Understand the concepts of Riemann Stieltjes integration and Differentiation. 2. Understand Uniform Convergence and continuity. 3. Learn comparison tests at a and infinity.	
3.	MA 103	Ordinary Differential Equations	2018	Course outcomes: From this course students will be able to 1. Learn boundary value problems, Eigen values and Eigen functions 2. Solve the second order linear questions.	
4.	MA 104	Complex Analysis	2018	1. Decide when and where a given function is analytic . 2. Understand the Mobius Transformation. 3. Describe basic properties of complex integration and having the ability to compute such integrals. 4. Understand Power series and expansion of analytic	

5.	MA 105	Computer Oriented Numerical Methods	2018	<ol style="list-style-type: none"> 1. Apply numerical methods to obtain approximate solutions to mathematical problems. 2. Derive numerical methods for various mathematical operations and tasks, such as interpolation, differentiation, integration, the solution of linear and non linear equations, and the solution of differential equations. 3. Solve any numerical problem by using programming. <p>Develop interest in Numerical analysis to use finite precision computer arithmetic</p>	
6.	MA 106	Human Values and Professional Ethics-I	2018	<ol style="list-style-type: none"> 1. Develop Morals, Values and Ethics, Integrity, Work Ethic, Service Learning, Civic virtue, Respect for others, Living Peacefully, Caring, Sharing, Honesty, Courage, Cooperation, Commitment, Empathy, Self Confidence character, Spirituality, Case study. 2. Understand human values . 3. Develop character, affection and love towards other human beings. 4. Know the value of Four Noble Truths of Buddhism 	
7.	MA 201	Galois Theory	2018	<ol style="list-style-type: none"> 1. Apply the knowledge on polynomials solvable by radicals, Extension field. 2. Understand the normal and separable extensions. 3. Study the roots of polynomials specially quintic polynomials which is the cause to develop Galois theory. <p>Solve the problems on cyclotomic polynomials</p>	

8.	MA 202	Partial Differential Equations	2018	<p>1. solve Pfaffian differential equations and find orthogonal trajectories of a curve.</p> <p>1. Analyze the origin of first order PDEs and Integral surfaces passing through a given curve</p> <p>2. Identify linear and nonlinear PDE and solve nonlinear PDE by Charpit's method.</p> <p>3. Apply various methods to solve Partial Differential Equations of the Second order.</p> <p>4. Obtain equipotential surfaces using Laplace's</p>	
9.	MA 203	Topology	2018	<p>1. Understand to construct topological spaces from metric spaces and using general properties of neighborhoods, open sets, closed sets, basic and sub-basis.</p> <p>2. Understand Topological Spaces, definition & examples.</p> <p>3. Know the concepts connectedness, compactness, and Hausdorff property and their general characteristics.</p> <p>4. Understand the Countability axioms, the separation axioms and normal spaces. And also the classical theorems such as the Uryshon lemma, the Tietze extension theorem.</p>	

10.	MA 204	Advanced Complex Analysis	2018	<ol style="list-style-type: none"> 1. To learn Laurent Series-Singular Points. 2. Explain the basic properties of complex integration and compute such integrals. 3. Learn topics of contemporary Advanced complex analysis in particular spaces of holomorphic functions, entire functions, harmonic functions and conformal mapping functions. 4. Understand the Infinite product and Partial Fraction Expansions. 	
11.	MA 205	Measure and Integration	2018	<ol style="list-style-type: none"> 1. Compute Lebesgue measures. 2. Compute Lebesgue integrals of bounded functions over a set of finite measure 3. Solving the Differentiation and Integration of Monotone functions. 4. Understand the L^p Spaces, the MinKowski and Holder inequalities, Convergence and completeness 	
12.	MA 206	Human Values and Professional Ethics-II	2018	<ol style="list-style-type: none"> 1. Understand the fundamental responsibilities and respect towards women 2. Know the value of education. 3. Question the illegal practices in the medical and business fields. 4. Understand the value of ecological balance and act in such a way which saves it. 5. Analyze the impact of media. 	

13.	MA 301	Commutative Algebra	2018	<p>To understand the ideals, Modules and operations on them.</p> <p>2.To learn the structures of composition series with ACC and DCC</p> <p>2. To study the theoretical properties of Noetherian rings</p>	
14.	MA 302	Functional Analysis	2018	<ol style="list-style-type: none"> 1) Work with different distance metrics and normed spaces,understand continuous linear transformations and the Hahn-Banach Theorem. 2) Comprehend the Open mapping theorem and Closed graph theorem. 3) Construct orthonormal sets and conjugate spaces. 4) Understand the relevance of self-adjoint operators, normal, unitary operators and projections. 	
15.	MA 303	Classical Mechanics	2018	<ol style="list-style-type: none"> 1) Understand D' Alembert's Principle and simple applications of the Lagrangian Formulation. 2) Derive the Lagrange's Equation from Hamilton's Principle. 3) Study the concept of the Equations of Motion and the Equivalent One-Dimensional Problems. 4) Distinguish the concept of the Hamilton Equations of Motion and the Principle of Least Action. 	

16.	MA 304	A) Differential Geometry B) Cryptography C) Linear Algebra D) Discrete Mathematics	2018	<ol style="list-style-type: none"> 1. Define space curves , curvature and torsion of a curve. 2. Parameterize surfaces and isometric correspondence. 3. Understand geodesic curves and conformal mapping. 4. calculate and analyse curvature of surfaces in different settings. <ol style="list-style-type: none"> 1) Understand various Cryptographic Techniques. 2) Apply various public key cryptography techniques. 3) Understand the various Security Applications. 4) Implement system level security applications. 5) Be familiar with secure random bit generator and linear feedback shift register sequences. 6) Know classical ciphers such as Vigenere Cipher and Hill Cipher. 7) Know of RSA, attacks on RSA, Diffie-Hellman key exchange and ElGamal, public key crptosystem. <p>Solve the system of linear equations</p> <ol style="list-style-type: none"> 2. Understand the concept of vector space, basis, dimension and linear Transformation 3. Explain the direct sum decompositions 4. Understand the Bilinear forms. <ol style="list-style-type: none"> 1. Use standard Normal Forms-Disjunctive-Conjunctive Principal Disjunctive 2. Discuss Inference Theory of the Predicate Calculus 	
-----	--------	---	------	--	--

17.	MA 305	A) Business Mathematics B) Basic Mathematics for social sciences	2018	<ol style="list-style-type: none"> 1. Apply the knowledge in mathematics (algebra, matrices, calculus) in solving business problems. 2. Analyse and demonstrate mathematical skills required in mathematically intensive areas in Economics and business. 3. Explain the concepts and use equations, formulae and mathematical expressions and relationships in a variety of contexts 4. Understand The Binary Octal , Octal, Decimal and Hexadecimal Systems. 5. Understand the concepts of vector spaces with bases, algebra of Transformations and orthogonal components. 6. Understand the concepts of Limit, continuity & differentiation of functions. 7. Apply Integrals to find areas, length & volume of regions. 8. Apply the numerical Techniques to solve differential equations & Algebraic equations. 	
18.	MA 401	Number Theory	2018	<p>.</p> <ol style="list-style-type: none"> 1. Understand the concepts of vector spaces with bases, algebra of Transformations and orthogonal components. 2. Understand the concepts of Limit, continuity & differentiation of functions. 3. Apply Integrals to find areas, length & volume of regions. 4. Apply the numerical Techniques to solve differential equations & Algebraic equations. 	

19.	MA 402	Banach Algebra	2018	<ol style="list-style-type: none"> 1. Understand different types of Banach Algebras with examples. 2. Know the essence of Gelfand mapping 3. Understand the Application of Commutative C*- algebras. 4. Derive the applications of Banach Algebra in analysis, Fourier series, Boolean Algebras and other significant areas of mathematics. 	
20.	MA 403	Graph Theory	2018	<p>Able to define basic concepts of graphs</p> <ol style="list-style-type: none"> 2. Utilize the Algorithms to find the shortest path, Optimal tree from a given graph. 3. construct reliable communication network. 4. Understand the concepts of practical problems like Chinese postman problem and 	
21.	MA 404	A) Mathematical Statistics B) Approximation Theory C) Algebraic Coding Theory D) Operations Research	2018	<p>To learn the fundamental concepts of statistics and techniques required for data analysis.</p> <ol style="list-style-type: none"> 2. Apply the knowledge of Binomial, Poisson, Gamma, chi-square, normal distribution in solving various problems,. 2. To explain stochastic convergence 	

22.	MA 405	A) Theoretical Computer science B) Biomechanics	2018	1) Know the Basic concepts of Metric spaces And Normed Linear space. 2) Knows existence and uniqueness theorems for the best approximations in various Banach spaces. 3) Knows Bernstein's lethargy theorem and its practical and theoretical implications. 4) Be able to use and analyze the basic methods for polynomial approximations.	
-----	--------	--	------	---	--

APPLIED MATHEMATICS:

S.No	Course Code	Name of the Course	Year of introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/ Skill development	Link to the relevant Document
23.	AMA101	METHODS OF APPLIED MATHEMATICS	2018	1. Expand a function in a Fourier series and able to know under what conditions such an expansion is valid. 2. Aware of the connection between integral transforms (Fourier and Laplace) and be able to use the latter to solve mathematical problems relevant to the physical sciences. 3. Understand the applications of Sylow theorems. 4. Describe Unique Factorization and Euclidean Domains.	
24.	AMA 102	Real Analysis	2018	5. Understand the concepts of Riemann Stieltjes integration and Differentiation. 6. Understand Uniform Convergence and continuity. 7. Learn comparison tests at a and infinity.	

25.	AMA 103	Ordinary Differential Equations	2018	<p>Course outcomes: From this course students will be able to</p> <ol style="list-style-type: none"> 5. Learn boundary value problems, Eigen values and Eigen functions 6. Solve the second order linear questions. 	
26.	AMA 104	Complex Analysis	2018	<ol style="list-style-type: none"> 5. Decide when and where a given function is analytic . 6. Understand the Mobius Transformation. 7. Describe basic properties of complex integration and having the ability to compute such integrals. 8. Understand Power series and expansion of analytic 	
27.	AMA 105	Computer Oriented Numerical Methods	2018	<ol style="list-style-type: none"> 4. Apply numerical methods to obtain approximate solutions to mathematical problems. 5. Derive numerical methods for various mathematical operations and tasks, such as interpolation, differentiation, integration, the solution of linear and non linear equations, and the solution of differential equations. 6. -----	---------	--	------	--	--

38. Microbiology

Course Code	Title of the Course	Years of Introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/Skill development
MB-102	Enzymology & Microbial Physiology & Metabolism	2017	Be able to know about the nutrition and microbial growth. Be able to know about photosynthesis and carbon. Be able to know in depth details about aerobic and anaerobic respiration. Be able to know in depth about various pathways in protein and nucleotide metabolisms
MB-105	Introductory Microbiology	2018	Demonstrate theory and practical skills in microscopy and their handling techniques and staining procedures Understand the basic microbial structure and function and study the comparative characteristics of prokaryotes and eukaryotes and also Understand the structural similarities and differences among various physiological groups of bacteria/archaea Know various Culture media and their applications and also understand various physical and chemical means of sterilization Know General bacteriology and microbial techniques for isolation of pure cultures of bacteria, fungi and algae
MB-106	Human Values and Professional Ethics – I	2018	Nature of Values- Good and Bad, Ends and Means, Actual and potential Values, Objective and Subjective Values, Analysis of basic moral concepts- right, ought, duty, obligation, justice, responsibility and freedom. Good behavior and respect for elders, Character and Conduct.
MB-202	Medical Microbiology	2018	Be able to explain about various infections. Be able to understand the diagnostic methods. Be able to explain the symptoms of bacterial infections. Be able to explain the symptoms of viral, fungal and parasitic diseases.
MB-204P	Practical – II Medical Microbiology	2018	Able performs various immune precipitations tests. Be able to perform various types of ELISA methods. Be able to gain practical knowledge about immunoglobulin's and there separation. Be able to perform widal, VDRL and types.

			Be able to perform various staining procedures. Be able to identify blood cell types.
MB-205	Basics of Virology	2018	Explaining the biological and physical properties of viruses. Describing the differences between viruses vs. virion. Summarizing the different methods of viral study. Explaining tissue and cell culture. Discussing cloning genes and genomes, DNA sequencing and PCR. Listing analysis of components SDS treatment & electrophoresis for nucleic acids. Classifying plants viruses as: single stranded RNA (SS RNA), double stranded RNA (DS RNA); single stranded DNA (SS DNA) and double stranded DNA (DS DNA). Demonstrating knowledge about the genetic composition of plant viruses. Demonstrating knowledge of different viruses shape (rods, polyhedral and bullets). Describing the structure, replication and diseases caused by viruses in the families, Picornaviridae, Togaviridae, Flaviviridae, Caliciviridae, Astroviridae, Coronaviridae, and Arteriviridae. Explaining the structure, replication and diseases caused by viruses in the families, Rhabdoviridae, Paramyxoviridae, Filoviridae, Orthomyxoviridae, and Bunyaviridae
MB-206	Human Values and Professional Ethics –II	2018	Medical ethics- Views of Charaka, Sushruta and Hippocrates on moral responsibility of medical practitioners. Code of ethics for medical and health care professionals. Euthanasia, Ethical obligation to animals, Ethical issues in relation to health care professionals and patients. Business ethics- Ethical standards of business-Immoral and illegal practices and their solutions. Characteristics of ethical problems in management, ethical theories, causes of unethical behavior, ethical abuses and work ethics.
MB 302	Recombinant DNA technology & Bioinformatics	2018	This course teaches RDNA technology techniques and their application in the field of genetic engineering. They learn about plasmids, vectors and gain knowledge on the construction of cDNA libraries. Student of this course have knowledge on gene manipulation, gene expression, etc which prepares them for further studies in the area of genetic engineering
MB 305	b) food microbiology	2018	Through this course, they also learn about microbiology of milk, fermented dairy products, industrially important microorganisms and process of industrial production of alcohol, beer, wine, SEP and mushrooms.
MB-306	b) Industrial food Microbiology	2018	Students in this course will learn about microbes in food, spoilage of food and preservation techniques of food. Through this course, they also learn about microbiology of milk, fermented dairy products, industrially important microorganisms and process of industrial production of alcohol, beer, wine, SEP and mushrooms. At the end of the course, the student will be able to use the preservation techniques for food and use this experience to be employed as quality control experts
MB 405b	Bioprocess engineering	2018	After completing this course, the student will be able to define a bacterium, a fungus, a virus and archaea, give examples of structurally different microbes, and list microbes by their energy metabolism and carbon sources. The student will be able to evaluate the cultivation, enrichment and growth prevention methods for microbes. The student will be able to explain the roles of microbes in elemental cycles on Earth and, the waste decontamination methods based on microbial activities. He/she will be able to judge how microbes and enzymes could be applied in industry.
MB-406a	Fermentation technology	2018	The course aims to provide fundamental insights to exploit microbes for manufacturing of products which have huge industrial significance. The course blends science and engineering with various biochemical processes to obtain products such as food, chemicals, vaccines, medicine. At the end of the course, the student will have a better appreciation for the role of microbes in industry using technology methodology and interpret the research Able to design procedures, record research
MB-406b	Pharmaceutical Microbiology	2018	This course prepares the students in appreciating the its benefits and applications in biotechnological, pharmaceutical, medical field.

39.

40.

41.

42. INDUSTRIAL MICROBIOLOGY:

Course Code	Title of the Course	Years of Introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/Skill development
IMB-102	Enzymology & Microbial Physiology & Metabolism	2018	Be able to know about the nutrition and microbial growth. Be able to know about photosynthesis and carbon. Be able to know in depth details about aerobic and anaerobic respiration. Be able to know in depth about various pathways in protein and nucleotide metabolisms
IMB-105	Introductory Microbiology	2018	Demonstrate theory and practical skills in microscopy and their handling techniques and staining procedures Understand the basic microbial structure and function and study the comparative characteristics of prokaryotes and eukaryotes and also Understand the structural similarities and differences among various physiological groups of bacteria/archaea Know various Culture media and their applications and also understand various physical and chemical means of sterilization Know General bacteriology and microbial techniques for isolation of pure cultures of bacteria, fungi and algae
IMB-106	Human Values and Professional Ethics – I	2018	Nature of Values- Good and Bad, Ends and Means, Actual and potential Values, Objective and Subjective Values, Analysis of basic moral concepts- right, ought, duty, obligation, justice, responsibility and freedom. Good behavior and respect for elders, Character and Conduct.
IMB-202	Medical Microbiology	2018	Be able to explain about various infections. Be able to understand the diagnostic methods. Be able to explain the symptoms of bacterial infections. Be able to explain the symptoms of viral, fungal and parasitic diseases.
IMB-204P	Practical – II Medical Microbiology	2018	Able performs various immune precipitations tests. Be able to perform various types of ELISA methods. Be able to gain practical knowledge about immunoglobulin's and there separation. Be able to perform widal, VDRL and types. Be able to perform various staining procedures. Be able to identify blood cell types.
IMB-205	Basics of Virology	2018	Explaining the biological and physical properties of viruses. Describing the differences between viruses vs. virion. Summarizing the different methods of viral study. Explaining tissue and cell culture. Discussing cloning genes and genomes, DNA sequencing and PCR. Listing analysis of components SDS treatment & electrophoresis for nucleic acids. Classifying plants viruses as: single stranded RNA (SS RNA), double stranded RNA (DS RNA); single stranded DNA (SS DNA) and double stranded DNA (DS DNA). Demonstrating knowledge about the genetic composition of plant viruses. Demonstrating knowledge of different viruses shape (rods, polyhedral and bullets). Describing the structure, replication and diseases caused by viruses in the families, Picornaviridae, Togaviridae, Flaviviridae, Caliciviridae, Astroviridae, Coronaviridae, and Arteriviridae. Explaining the structure, replication and diseases caused by viruses in the families, Rhabdoviridae, Paramyxoviridae, Filoviridae, Orthomyxoviridae, and Bunyaviridae
IMB-206	Human Values and Professional Ethics –II	2018	Medical ethics- Views of Charaka, Sushruta and Hippocrates on moral responsibility of medical practitioners. Code of ethics for medical and health care professionals. Euthanasia, Ethical obligation to animals, Ethical issues in relation to health care professionals and patients. Business ethics- Ethical standards of business-Immoral and illegal practices and their solutions. Characteristics of ethical problems in management, ethical theories, causes of unethical behavior, ethical abuses and work ethics.
IMB 305	b) Bioprocess	2018	Give elaborate knowledge on Health care products.

	Engineering and Technology		Provide in depth knowledge about microbial antibodies and recombinant products. Provide detailed knowledge about organic acids and enzymes. Gives in depth knowledge on oxidative transformation.
IMB-306	a) Industrial Biotechnology	2018	Be able to gain knowledge on strain improvement. Be able understand the whole broth processing. Gain knowledge on production of industrial products
	b)Immuno Technology and Human Health	2018	Immunology and Human Health is designed to advance your understanding of the Immune system and to apply this knowledge to basic immunological research of human diseases. The immune system is composed of numerous cells and molecules that act in concert to maintain health, to overcome infection, prevent tumour growth and repair damaged tissues. The study of the immune system provides us with a fascinating insight into the relationship between animals, and the organisms that infect them (bacteria, viruses, protozoans and fungi). This subject provides a greater understanding of the complexity of the immune system and its responses to stresses such as infection. It demonstrates how modulation, or activation, of the immune system can either help overcome infection or may lead to autoimmune disease. Understanding the immune system gives us the potential to develop therapies to control events such as infection or autoimmune conditions. This subject helps students expand their understanding of current concepts in immunology and the potential application of applied immunology in medicine, research and industry.
IMB-404	Field Trip/ Industrial Tour Report / Dissertation	2018	Able to design procedures, record research methodology and interpret the research Able to design procedures, record research methodology and interpret the research
IMB-405	a) Biostatistics & Bioinformatics	2018	Be able to gain knowledge on basic concepts in statistics. Be able to design the experimental and statistical basics of biological assays. Be able to give familiarize with microbial genomes Be able to acquaint themselves with metagenomics Be able to learn basics of protein identification method Be able to gain knowledge on drug discovery
IMB-406	a) Microbes in Human Welfare	2018	Microbes are the major components of biological system on this earth. They are present everywhere, even at sites where no other life could possibly exist. Many microbes are useful to human beings. We use microbes and microbial derived products almost every day like curd and other fermented foods like idli, dosa, bread, etc. Microbes are also used in most of the industries. Alcohol, antibiotics, vinegar, etc are important microbial products. Microbes are very helpful in sewage treatment, biogas production and preparation of biofertilizers as well. So it's clear from this chapter that microbes play a very important role in welfare of human society.
	b) Medical and Diagnostic Microbiology	2018	Describe the aetiologies, epidemiology and basic mechanisms of pathogenesis of infectious diseases. Describe the basic principles of diagnosis, antimicrobial treatment, prevention and control of infectious diseases in the hospital and community. Describe the host immune system and explain the host response to infection Understand and interpret basic laboratory tests for the diagnosis of infectious diseases. Apply the principles of molecular and immunological techniques for the diagnosis of infectious diseases. Analyze and solve case studies involving bacterial and fungal agents

--	--	--	--

40. Physics

S.No	Course Code	Name of the Course	Year of introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/ Skill development	Link to the relevant Document
	PHY 101	Classical Mechanics and Theory of Relativity	2018	1. Formulate the Lagrangian and Hamiltonian mechanics concepts, solve the related problems 2. Learn the concepts of Poisson brackets, Hamilton-Jacobi equations and action angle variables. 3. Understand the Kepler's laws, Rutherford scattering, Euler's equations and solve the related problems 4. Learn the theory of relativity and its applications.	
	PHY 102	Atomic and Molecular Physics	2018	1. Understand the various basic concepts of atomic and molecular physics and know the analysis of different molecular spectra and then get the structural details. 2. Learn the concepts and importance of Zeeman effect, Stark effect and Paschen back effect 3. Understand the importance of rotational, vibrational and electronic spectra 4. Learn the various applications of atomic and molecular spectroscopy in different fields.	

	PHY 103	Solid State Physics	2018	<ol style="list-style-type: none"> 1. Understand different bonds in solids, importance of lattice vibrations, their models and elastic properties 2. Explain electronic properties of solids in classical, quantum and the nearly free electron model. 3. Able to classify materials as metals, insulators and semiconductors and sketch the band diagram for each 4. Learn Hall effect and Heyness-Schockley experiment and their uses, properties, theories and applications of superconductors. 	
	PHY 104	Analog and Digital Electronics	2018	<ol style="list-style-type: none"> 1. Understand the design and working of BJT/FET/ MOSFETs based electronic circuits 2. Observe the effect of negative feedback on amplifier parameters, types of negative feedback topologies. Perceive the effect of positive feedback on working of Op-Amps based Oscillators. 3. Learn and understand the basics of digital electronics, Boolean algebra, and be able to design the simple logic circuits and test/verify the functionality of the logic circuits. 4. Develop the skill to build, and troubleshoot analog and digital electronic circuits. 	
	PHY 105	General Physics lab. - I	2018	<ol style="list-style-type: none"> 1. Determining the value of Planck's constant and Seebeck coefficient of a thermocouple, and also measurement and behavior analysis of semiconductor, laser, thermistor and white light dispersion. 2. Structural determination using X-ray diffraction method. 3. Learn the applications of lasers 4. Able to develop skills related to the said experiments in Physics. 	
	PHY 106	Electronics lab. - I	2018	<ol style="list-style-type: none"> 1. Identify relevant information to supplement the Analog Electronic Circuits. 2. Set up testing strategies and select proper instruments to evaluate the performance characteristics of the electronic circuit. 3. Able to learn the applications of operational amplifiers 4. Choose testing and experimental procedures on different types of electronic circuits and analyze their operation at different operating conditions. 	

	PHY 201	Statistical Mechanics	2018	1. Learn different ensembles and partition functions and their applications to thermal properties of solids 2. Understand the concept of partition functions and its applications 3. Understand the concepts of Maxwell-Boltzmann, Bose-Einstein and Fermi-Dirac distributions. 4. Disseminate the applications of Maxwell's distribution of velocities and various applications of systems behaving as ideal Bose gas or Fermi gas.	
	PHY 202	Electromagnetic Theory, Lasers and Modern Optics	2018	1. Understand the laws related to electrostatics and magnetostatics 2. Learn about light propagation in various materials and understand properties of lasers and applications 3. Know holographic concept, use of Fourier transforms in optics 4. Learn the basics and construction of optical fibre and optical fibre applications	
	PHY 203	Mathematical Physics	2018	1. Understand and apply the mathematical skills to solve quantitative problems in physics. 2. Apply Laplace and Fourier transforms in solving different problems of mechanics, electronics etc. 3. Solve different physical problems using numerical techniques 4. Understand complex variables and applications	
	PHY 204	Nuclear Physics and Analytical Techniques	2018	1. know the concepts of nuclear reactions and their usefulness in nuclear reactors. 2. Learn the classification of elementary particles and its properties 3. apply the various analytical techniques in getting structural details of unknown compounds 4. understand the various advanced spectroscopic techniques and microscopic techniques	

	PHY 205	General Physics lab. - II	2018	<ol style="list-style-type: none"> 1. Using lasers ins slit width calculation and refractive index measurement, 2. Understand phenomenon of interference through Young's modulus experiment 3. Intensity variation of light, photo transistor working, absorption and decay of nuclear adiation 4. Analyse the results and able to design the instruments 	
	PHY 206	Electronics lab. - II	2018	<ol style="list-style-type: none"> 1. Identify relevant information to supplement the Analog Electronic Circuits. 2. Choose testing and experimental procedures on different types of electronic circuits and analyze their operation at different operating conditions. 3. Under the architecture and working of 8085 microprocessor 4. Practice different types of wiring and instruments connections keeping in mind technical, Economical, safety issues. 	
	PHY 301	Quantum Mechanics – I	2018	<ol style="list-style-type: none"> 1. Solve problems in quantum mechanics using Schrodinger's equation and Dirac representation. 2. Grasp the concepts of different pictures and familiar with the applications 3. Know how the approximation methods applied to atomic, nuclear and solid-state physics. 4. Understand scattering theory, formulate and solve scattering equation- solve problems using this theory 	
	PHY 302	Physics of semiconductor devices	2018	<ol style="list-style-type: none"> 1. Classify different diodes and its importance in different applications 2. Gain theoretical knowledge on devices formation and able to fabricate devices 	

	PHY 303	Specialization: A) Applied Spectroscopy-I B) Condensed Matter Physics-I C) Electronics-embedded systems	2018	1.Understand the molecular structure and importance of various molecular transition 2.know the rotational, vibrational and Raman spectroscopy of molecules and their various applications 3.Understand the concepts and instrumentation in different spectroscopic techniques 4.Learn about fluorescence and phosphorescence spectroscopy and their applications. 1. Learn the classification of growth techniques and its importance, able to analyze the defects and its importance in properties of solids, gain knowledge on defects importance in growth of crystals 2. Explain various magnetic phenomena and describe the different types of magnetic ordering based on the exchange interaction, and magnons and their importance 3.Understand different dielectric properties, differentiate between ferroelectric, anti-ferroelectric, piezoelectric and pyroelectric materials. 4.Learn excitons, photoconductivity, types of luminescence, decay mechanisms 1. Acquire knowledge about PIC microcontrollers embedded processors and their applications. 2. Develop programs for data transfer, arithmetic, logical and I/O port operations. 3. Develop program for PIC microcontroller timers, serial port and Interrupts using “C”. 4. Interface LCD, keyboard, ADC, DAC, sensors, relays, DC and stepper motor with PIC microcontroller.	
--	---------	---	------	---	--

	PHY 304	Elective: A) Photonics- I B) Solar Energy-Thermal Aspects C) Vacuum and Thin Film Technology	2018	1. Understand the fundamental properties of lasers and laser systems 2. Know about the different optoelectronic devices and their behaviour 3. Aware of wide variety of applications of opto-electronic components. 4. Learn different modulations of light 1. Understand the fundamentals of solar energy, particularly the thermal energy component. 2. Acquire knowledge on solar radiation measurement techniques and procedures. 3. Demonstrate skills related collector performance analysis through hands on experience 4. Learn the working of different solar thermal energy systems 1. Learn production of vacuum and working of various pumps and gauges, design of vacuum system and detection of leak in system. 2. Basic concepts in preparing thin films, outline the conditions for deposition of amorphous, crystalline and epitaxial films. 3. Understand the thin film growth mechanism 4. Understand the working of thickness measurements instruments	
--	---------	--	------	---	--

	PHY 305	Specialization-Lab.	2018	<ol style="list-style-type: none"> 1. Gain experience with some statistics to analyse data in laboratory. 2. Handle the spectrophotometers and could analyse the data. 3. Understand Zeeman effect practically 1. Identify the compounds based on qualitative analysis 1. Minority charge carrier current in calculation of band gap 2. Analysis of magnetic materials in terms of coercivity and saturation magnetization, 3. Creep importance in materials characteristics analysis 4. Transition temperature determination by finding dielectric constant, calculation of dispersion frequency of mono and diatomic lattices through electrical analog 1. Define the arithmetical and logical assembly language for microcontroller PIC 16F877A 2. Know the downloading procedure on hardware into flash ROM of PIC 16F877A 3. Show the testing data on a defined port wish board. 4. Competent to evaluate the data transfer response of PIC 16F877A. 	
--	---------	---------------------	------	---	--

	PHY 306	Elective - Lab	2018	<ol style="list-style-type: none"> 1. Demonstrate both the theory and experiments related to propagation and modulation of light 2. Learn the optical fibre working 3. Design the Hologram 4. Propose and design new experiments based on the verification of theory with available optical components 1. Demonstrate the skills related to measurement of direct, diffuse and global solar radiation. 2. Understand the working of a solar cell and its efficiency measurement 3. Verify the influence of different parameters on the solar cell efficiency 4. Design a solar module for a specific output current and voltage ratings. 1. Understand the working of rotary and diffusion pumps 2. Band gap determination of semiconductor thinfilm 3. Working of solar cell 4. Demonstrate the skill acquired in connection with thin film and device characterization 	
	PHY 401	Quantum Mechanics - II	2018	<ol style="list-style-type: none"> 1. Learn distinguishability and indistinguishability of identical particles, construct symmetric and anti symmetric wave functions , students able to solve real problems 2. Grasp the concepts of spin and angular moment as well as their quantization and addition rules. Demonstrate angular momentum operators associated with spherical and symmetrical systems, able to obtain Clebsch –Gordon coefficients and learn its importance in atomic physics 3. Understand the principles of relativistic quantum mechanics and importance of Klein Gordon equation in solving real problems and know the concept of spin arising naturally from the Dirac equation 4. Learn different fields and its importance and gain knowledge about second quantization 	

	PHY 402	Advances in Physics	2018	<ol style="list-style-type: none"> 1. Understand the synthesis of nanomaterials, their application and impact on the environment. 2. Know the details of preparation and characterization of nanomaterials, micro and nanoscale devices. 3. Learn the basics of remote sensing, different payloads, sensors, satellite platforms. 4. Get the concept of image processing & interpretation and digital data transmission and storage. 	
	PHY 403	Specialization: A) Applied Spectroscopy-II B) Condensed Matter Physics-II C) Electronics-Wireless Communications	2018	<ol style="list-style-type: none"> 1. Have the knowledge on crystal field theory and the effect of weak crystal field on S, P, D and F terms. 2. Understand the importance of rare earth doped materials and able to evaluate various laser parameters. 3. Know the instrumentation techniques used in various spectrophotometers and uses of various detectors. 4. Acquire the knowledge on two photon spectroscopy. 1. Learn the relation between stress and strain and gain knowledge on elastic constants and velocity of elastic waves in different directions 2. Gain understanding on classical theory of specific heat and quantum theory of specific heat, able to understand Gruneisen parameter and lattice thermal conductivity 3. Know theories of different bands, Fermi construction and experimental determination of Fermi surface 4. Classify, know properties and applications of amorphous semiconductors, liquid crystals and polymers. 1. Understand and visualize the digital and optical modulation techniques. 2. Demonstrate the theoretical concepts in the laboratory. 3. Understand the importance of different communications 4. Fetch details in handling the fabrication, concepts of instrumentation and circuit design. 	

	PHY 404	Elective: A) Photonics - II B) Solar Energy- Photovoltaic Aspects C) Properties and Applications of Thin Films	2018	1. Understand the fundamental concepts of solar cells, manufacturing processes and limitations. 2. Acquire knowledge on cell efficiency study techniques and procedures for fault analysis. 3. Demonstrate skills related cell performance and fault analysis through hands on experience 4. Comprehend the applications of solar photovoltaic energy in day-to-day applications 1. Understand the fundamental concepts of solar cells, manufacturing processes and limitations. 2. Acquire knowledge on cell efficiency study techniques and procedures for fault analysis. 3. Demonstrate skills related cell performance and fault analysis through hands on experience 4. Comprehend the applications of solar photovoltaic energy in day-to-day applications 1. Measure and analyze the chemical composition and microstructure of thin films. 2. Understand the electrical transport mechanism and optical behavior of thin films. 3. Able to understand the optical properties of thinfilms 4. Learn the various general and technical applications of thin films in day to day life	
--	---------	--	------	--	--

	PHY 405	Specialization-Lab. – II / Project Work	2018	1. Use standardized material to determine an unknown concentration. 2. Handle the spectrophotometers and could analyse the data. 3. Learn the applications of ESR 4. Acquire basic knowledge in the field of research. 1. Magnetic susceptibility determination, liquid crystal phases with temperature, 2. Working of temperature sensor, heat capacity calculation 3. Resistance variation and measurement in semiconductor with temperature 4. Able to analyze the materials and its behavior 1. Understand and visualize the digital and optical modulation techniques. 2. Demonstrate the theoretical concepts in the laboratory. 3. Gain hands on experience and will be able to envisage the concepts more clearly. 4. Know the fabrication process, concepts of instrumentation and circuit design.	
	PHY 406	Elective – Lab. - II / Project Work	2018	1. Get the experience on literature collection 2. Get the experience on selection of a problem independently related to recent work 3. Able to plan and execute the problem 4. Develop skills related to presentation of data, analysis discussion of the results and draw conclusions.	

41. Psychology

S. No.	Course Code	Title of the Course	Years of Introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/Skill development
1	PSY 101	General Psychology-I	2018	<ul style="list-style-type: none"> To understand the concepts and scope of psychology To comprehend the biological basis of behavior To study the perception and learning theories
2	PSY 102	Social Psychology	2018	<ul style="list-style-type: none"> To understand the concepts of social psychology To comprehend the social perception and cognition.

				<ul style="list-style-type: none"> • To study the socialization and attitudes
3	PSY 103	Psychopathology-I	2018	<ul style="list-style-type: none"> • To understand the abnormal behavior and historical and current trends • To comprehend the models of abnormal behaviour and approaches to therapies
4.	PSY 104	Psychological Measurements-I	2018	<ul style="list-style-type: none"> • To understand the psychological measurements • To comprehend the development of psychological tests and principles of test construction.
5	PSY 105P	Practical-I&II	2018	<ul style="list-style-type: none"> • To understand the knowledge about psychological assessment • To analyze the observed and the collected data to prove the theoretical
6.	PSY-106	Human Values and Professional Ethics-I	2018	
7.	PSY 201	General Psychology-II	2018	<ul style="list-style-type: none"> • To understand fundamentals of motivation and emotion • To understand basic concepts of memory and forgetting • To comprehend the thinking, intelligence and personality of individuals
8.	PSY 202	Applied Social Psychology	2018	<ul style="list-style-type: none"> • To understand the Social Influence, Social Exchange Process in social behaviour. • To comprehend the Prejudice and Discrimination and group and individuals.
9.	PSY 203	Psychopathology-II	2018	<ul style="list-style-type: none"> • To understand anxiety and mood disorders and somatic disorders. • To study Psychosis and Cognitive Disorders across life span
10.	PSY 204a	Psychological Measurements & Statistics	2018	<ul style="list-style-type: none"> • To understand the psychological measurements • To comprehend the development of psychological tests and principles of test construction.
	PSY 204b	Research Methodology	2018	<ul style="list-style-type: none"> • To get knowledge of psychological tests and their use

				<p>in diagnosis.</p> <ul style="list-style-type: none"> • To make students able to diagnose patients with the help of projective tests. • To get understanding of different diagnostic systems. • Learn how to take case history of patients. • To be able to make differential diagnosis.
	PSY 204c	Computer Applications in Psychological Research	2018	<ul style="list-style-type: none"> • To understand the basic components of computer and working in Ms Office, power point and internet services. • To comprehend the application of computer knowledge through creating emails, scientific journals and data scoring
11	PSY 205P	Practical - I & II	2018	<ul style="list-style-type: none"> • To understand the knowledge about psychological assessment • To analyze the observed and the collected data to prove the theoretical
12	PSY 206	Human values and Professional Ethics-II	2018	
13	PSY 301	Lifespan Developmental Psychology - Infancy to Adolescence	2018	<ul style="list-style-type: none"> • To understand the scope of life span development of infancy and babyhood • To comprehend the Early and Late Childhood and Adolescence.
14.	PSY 302	Personality	2018	<ul style="list-style-type: none"> • To introduce nature of personality. • To help determinants and development. To understand the Assessment of personality
15	PSY 303	Counseling Psychology-I	2018	<ul style="list-style-type: none"> • To understand the meaning of counseling and ethics in counseling • To comprehend the process of counseling and techniques
16	PSY 304a	School Psychology	2018	<ul style="list-style-type: none"> • To introduce nature of school psychology • To help children with emotional, social, and academic issues.

				<ul style="list-style-type: none"> To collaborate with parents, teachers, and students to promote a healthy learning environment.
	PSY 304b	Organizational Behaviour and HRM	2018	<ul style="list-style-type: none"> To understand organization and the Individual differences To comprehend the motivation and leadership To study the decision making and organizational effectiveness.
	PSY 304c	Health Psychology	2018	<ul style="list-style-type: none"> To understand the need of Health psychology and various models related to health and illness. To comprehend the health behaviour enhancement and management
	PSY 304d	Psychology of Disability	2018	<ul style="list-style-type: none"> To understand historical development – Models of disabilities in the past and present scenario To comprehend Learning and behavioral disability, Needs and concerns of disabled in all groups
17	PSY 305P	Practical - I & II	2018	<ul style="list-style-type: none"> To understand the knowledge about psychological assessment To analyze the observed and the collected data to prove the theoretical
18	PSY 306	Personality Development (OE)	2018	<ul style="list-style-type: none"> To study thebiological, psychological and socio cultural determinants &Soft Skills To help determinants and development. To understand the Assessment of personality
19	PSY 401	Lifespan Developmental Psychology – Adulthood and Later Maturity	2018	<ul style="list-style-type: none"> To understand the scope of life span development of Adulthood and Later Maturity. To comprehend the Adulthood and Later Maturity.
20	PSY 402	Theories of Personality	2018	<ul style="list-style-type: none"> To introduce nature of personality. To help determinants and development. To understand the Assessment of personality
21	PSY 403	Counseling Psychology - II	2018	<ul style="list-style-type: none"> To understand the meaning of counseling and ethics in counseling To comprehend the process of counseling and

				techniques
22	PSY 404a	Psychology of Aging – Applied Aspects	2018	<ul style="list-style-type: none"> To study and understand the aging from maturity to old age. A form of discrimination against older adults based on their age. To notice gerontology and issues
	PSY 404b	Consumer Behaviour and Marketing	2018	<ul style="list-style-type: none"> To understand concept of consumer behaviour and market research To comprehend the economic, social and psychological theory of buying motives. To study the effect of advertising, sales promotion, branding and packaging
	PSY 404c	Rehabilitation Psychology	2018	<ul style="list-style-type: none"> To understand historical development – Models of disabilities in the past and present scenario To comprehend Learning and behavioral disability, Needs and concerns of disabled in all groups
23	PSY 405P	Practical I & II	2018	<ul style="list-style-type: none"> To understand the knowledge about psychological assessment To analyze the observed and the collected data to prove the theoretical
24	PSY 406	Life Skills (OE)	2018	<ul style="list-style-type: none"> To learn the concept of life skills and its importance in relation to personality development of an individual. To become aware of the components of life skills and the method of imparting knowledge of life skills.

COUNSELLING PSYCHOLOGY:

S.No	Course Code	Name of the Course	Year of introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/ Skill development	Link to the relevant Document

1.	PSY 101	General Psychology-I	2018	<ol style="list-style-type: none"> 1. Understood the concepts and scope of psychology 2. Comprehended the biological basis of behavior 3. Studied the perception and sensation 4. Understood the concepts and learning theories 	
2.	PSY 102	Social Psychology	2018	<ol style="list-style-type: none"> 1. Understood the concepts of social psychology 2. Comprehended the social perception and cognition. 3. Studied the Socialization 4. Understood the meaning and theories attitudes 	
3.	PSY 103	Psychopathology-I	2018	<ol style="list-style-type: none"> 1. Understood the meaning abnormal behavior and historical and current trends 2. Comprehended the models of abnormal behaviour and approaches to therapies 3. Learned about classification and assessment of abnormal behaviour 4. Able to evaluate different approaches to therapies for abnormal behaviour 	
4.	PSY 104	Psychological Measurements-I	2018	<ol style="list-style-type: none"> 1. Understood the assessment and psychological measurements 2. Comprehended the development of psychological tests and principles of test construction. 3. Learned the Principles of Test Construction 4. Understood the test Development and test Standardization Procedures 	
5.	PSY 201	General Psychology-II	2018	<ol style="list-style-type: none"> 1. The students understood the fundamentals of motivation and emotion 2. They understood the basic concepts of memory and forgetting 3. Comprehended the thinking and intelligence 	

6.	PSY 202	Applied Social Psychology	2018	<ol style="list-style-type: none"> 1. Students understood about Social Influence 2. Acquainted with social exchange process in social behaviour. 3. Comprehended the prejudice and discrimination 4. To understand what is psychological groups and individuals. 	
7.	PSY 203	Psychopathology-II	2018	<ol style="list-style-type: none"> a. Understood anxiety and mood disorders b. Acquainted with somatic disorders. c. Studied Psychosis and Cognitive Disorders d. Understood Psychological Disorders Across the Life Span 	

8.	PSY 204	a. Psychological Measurements & Statistics b. Research Methodology c. Computer Applications in Psychological Research	2018	<ol style="list-style-type: none"> 1. The students acquainted with intelligence and achievement tests 2. The students learned the measurement of personality tests 3. They are clear in understanding the Statistics for Psychological Measurement 4. They have knowledge on Distribution of Scores on Variables <ol style="list-style-type: none"> 1. Understood basic research and applied research including experimental research. <ol style="list-style-type: none"> 1. The students comprehended the problem & hypothesis 2. Gained knowledge on Sampling & Data Collection 3. Understood the application of research designs 1. Understood the basic components of computer 2. Acquainted with Ms Office, power point and internet services. 3. Comprehended the application of computer knowledge through creating emails, scientific journals and data scoring 4. Able to understand Statistical Packages and its application 	
9.	CPSY 301	Counselling Process	2018	<ol style="list-style-type: none"> 1. Understood the counseling as helping profession 2. To acquire the relation with other helping professions 3. To know the legal and ethical issues 4. Developed the importance of verbal and non 	

10	CPSY 302	Counselling Skills	2018	<ol style="list-style-type: none"> 1. Understood the micro-skills of counseling through a series of practices. 2. Got an idea about who to understand the people and interpret their feelings with positive appreciation 3. To provide a space where participants can grow, in the sense of allowing an encounter with them first and based on this encounter to achieve a better understanding of how they impact on other people. 4. The ability to examine and assess the clients with scientific manner. 	
11	CPSY 303	Therapeutic Approaches in Counselling –I	2018	<ol style="list-style-type: none"> 1. Understood the various Therapeutic Approaches of counseling. 2. Understood the techniques relevant to therapies. 3. To acquires the basic procedures. 4. Learned how to touch in the insight of the client 	
12	CPSY 304A	a. Foundations of Personality	2018	<ol style="list-style-type: none"> 1. Understood nature of personality. 2. Realized the determinants of personality 3. Found that the development of Personality. 4. Understood the Assessment of personality 	
13	CPSY 304B	b. Lifespan Developmental Psychology – Infancy to Adolescence	2018	<ol style="list-style-type: none"> 1. Exposed the students to the basics of human development 2. Helped the student understand the stages of development 3. Understood the biological, social and emotional development 4. Able to evaluated the behavior of the individual at various stages. 	

14	CPSY 304C	c. Psychology of Disability	2018	<ol style="list-style-type: none"> 1. Understood the historical development and models of disabilities 2. Acquire the knowledge of assessment of disability. 3. Expertised on handling the disabled Behavior 4. Collected the knowledge about various service organizations 	
15	CPSY 305	Practical I & II	2018	<ol style="list-style-type: none"> 1. Studied biological, psychological determinants 2. The students aware of socio cultural determinants & Soft Skills 3. The students acquainted with soft skills 4. They learned more on Soft skills 	
16	CPSY 401	Applications of Counselling in Special Areas	2018	<ol style="list-style-type: none"> 1. Understood how to handle the client with various problems and hailing into different age groups. 2. Learned how to handle the clients with specific problems 3. To attained what is career, personal, vocational and other applied areas of counseling 4. Gained how to organize Counseling programs to handle special concerns in Different social settings. 	
17	CPSY 402	Therapeutic Approaches in Counselling –II	2018	<ol style="list-style-type: none"> 1. Understood the therapeutic approaches of counseling 2. Improve the major skills in therapeutic techniques 3. Gained specific methods involved in therapy 4. Adopted the different psycho therapeutic models of counseling. 	

18	CPSY 403	Family Counselling	2018	<ol style="list-style-type: none"> 1. Understand the need and importance of family counseling. 2. Improved how to handle the family issues 3. To maximized use of tools in counseling 4. Learned the specific skills to handle family issues. 	
19	CPSY 404A	a. Theories of Personality	2018	<ol style="list-style-type: none"> 1. Understood the Psychoanalytic Approach 2. Learned on behavioural approaches to personality. 3. The students comprehended the Humanistic approach 4. The students acquainted with the eastern theories of personality 	
20	CPSY 404B	b. Lifespan Developmental Psychology – Adulthood and Later Maturity	2018	<ol style="list-style-type: none"> 1. Understood about adult hood 2. Aware of infancy late adult hood problems 3. Identified the early and late old age issues. 4. Acquired the developmental tasks at all ages. 	
21	CPSY 404C	c. Rehabilitation Psychology	2018	<ol style="list-style-type: none"> 1. The students understood historical development – Models of disabilities in the past and present scenario 2. The students comprehended Assessment of Disability, Psychological Aspects 3. The students are aware of Behavioral Management 4. They acquainted with Organizational services 	
22	CPSY 405	Practical I & II	2018	<ol style="list-style-type: none"> 1. Learned the concept of life skills and its importance in relation to personality development of an individual. 2. They became aware of the components of life skills and the method of imparting knowledge of life skills. 3. The students have learned more on Life Skills in Specific 4. They acquainted with Self management skills 	

43. Statistics

S.No	Course Code	Name of the Course	Year of introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/ Skill development	Link to the relevant Document
1	ST - 101	Linear Algebra	2018	<ol style="list-style-type: none"> 1. Students understood for estimation of elementary transformations in matrix and their solutions. 2. Students learnt about characteristic roots and vectors with numerical examples. They also know theoretical proofs of theorems. 3. Discriminate between diagonalizable and non-diagonalizable matrices; orthogonally diagonalizable symmetric matrices and quadratic forms 4. Combine methods of matrix algebra to compose the change-of-basis matrix with respect to two bases of a vector space, identify linear transformations of finite dimensional vector spaces and compose their matrices in specific bases 	
	ST - 102	Probability Theory	2018	<ol style="list-style-type: none"> 1. Students must have knowledge about random variables, expectations, sets and their properties and inequalities where ever necessary. 2. Students also know the weak law, strong law and central limit theorem and their importance. 3. Students get the knowledge of the Central limit theorem and their real life uses. <p>Students can get the knowledge of the inequalities of probability and their uses.</p>	

	ST - 103	Distribution Theory	2018	<ol style="list-style-type: none"> 1. Students know about different continuous and discrete distributions and their properties. 2. They have awareness about central and non-central sampling distributions and order Statistics. Idea about simple, partial and multiple correlation coefficients. 3. Students get the knowledge of the statistical Tests and their real life uses and applications. 4. Students get the knowledge of Regression and Correlations and their real-life applications 	
	ST - 104	Practical-I (75 Practical + 25 Record)	2018	<ol style="list-style-type: none"> 1. Numerical problems related to, Linear Algebra and Sampling Techniques are solved by executing programs of computers. 2. Linear algebra concepts when working with data preparation, such as one hot encoding and dimensionality reduction. 3. Applying linear algebra problems in real life situations. <p>Perform sampling methods analysis using R-software.</p>	
	ST - 105	Statistical Computing	2018	<ol style="list-style-type: none"> 1. Students get the basic Programming Skills of C and C++. 2. Students learnt how the Data entre in the Excel with Headings. 3. Students get the knowledge of creating data ase using the MS-Access. <p>Students get the knowledge how to create the reports using MS-EXCEL and MS ACCESS.</p>	

	ST - 106	Human Values and Professional Ethics-I	2018	<ol style="list-style-type: none"> 1. Students get the knowledge of the Ethical values. 2. Students get the idea about the Value education. 3. Students learn how to behave in Society. 4. Students get the knowledge of the Bhagavat Geetha and Can apply in their life's. 	
	ST - 201	Statistical Inference	2018	<ol style="list-style-type: none"> 1. Students know about point estimation, non-parametric models, Game theory, theorems and Proofs where ever necessary. 2. They can understand the concept of random sample from a distribution, sampling distribution of statistic, standard error of important estimates such as mean and proportions. 3. Students may gain the knowledge of testing of hypotheses (both large sample test and small sample test). <p>They can also calculate the problems related to point estimation and interval estimation.</p>	
	ST - 202	Multivariate Analysis	2018	<ol style="list-style-type: none"> 1. Students learnt about importance of multivariate variables and their distributions 2. T^2, D^2, MANOVA models are understood and know it's importance. 3. Implement dimension reduction techniques using software on real life problems. <p>Classification analysis methods explained according to their classification algorithm.</p>	

	ST-203 A & B & C	<p>(a) Linear Models and Applied Regression Analysis</p> <p>(b) Stochastic Processes</p> <p>(c) Mathematical Analysis</p>	2018	<p>A. Linear Models and Applied Regression Analysis</p> <ol style="list-style-type: none"> 1. Students learnt about different linear and non-linear regression models and their appropriate computational procedures. 2. They know R^2, adjusted R^2 and C_p criteria for model selection. 3. They will get the knowledge of building and fitting linear regression models with software. <p>They also learn about the theory underlying point estimation, hypothesis and confidence intervals for linear regression models.</p> <p>(b) Stochastic Processes</p> <ol style="list-style-type: none"> 1. Students understood stochastic processes, Markov chains, Poisson process, Renewal theory, Branching process, etc. 2. Explain Random walk, Gambler ruins problem and apply Poisson process in real life situations. 3. Understand the consequences of the Intermediate value theorem for continuous function. 4. Know the chain rule and use it to find derivatives of composite functions and obtain expression for higher order derivatives of a function using the rule of differentiation. Solve integrals and evaluation of multiple integrals with numerical problems. <p>(c) Mathematical Analysis</p> <ol style="list-style-type: none"> 1. Students get the knowledge of real no.'s and set theory and their theories. 2. Students easily earn the knowledge of the sequencing theory. 3. Students get the knowledge if the integrations and their applications in the real life. 	
--	------------------	---	------	---	--

	ST - 204	Practical-II (75 Practical + 15 Viva- voce + 10 Record)	2018	<ol style="list-style-type: none"> 1. Students know about the solving of Numerical problems related to Multivariate data. 2. Students can learn how the Statistical tests uses in their real life's by doing the tests on the Real times Data. 3. They can also use the statistical tools and techniques for analyzing the statistical data. <p>Students can solve the agriculture related problems using the Regression Methods.</p>	
	ST - 205	Sampling Techniques	2018	<ol style="list-style-type: none"> 1. Students learnt different sampling techniques of with replacement/ without replacement and Different sampling models. 2. Students studied non-Sampling errors and different remedies. 3. Implement Cluster sampling, Ratio and Regression estimation in real life problems 4. Apply unequal probability sampling designs viz. PPSWR, PPSWOR including Lahiri's method and Murthy's 	
	ST - 206	Human Values and Professional Ethics-II	2018	<ol style="list-style-type: none"> 1. Students get the Knowledge of Status of Women in the family and society. 2. Students get the idea of the Medical Rights and Their responsibilities in the medical practitioners. 3. Students get the idea about the environmental Ethics. 4. Students Get the knowledge of Human Rights. 	

	ST - 301	Econometric Methods	2018	<ol style="list-style-type: none"> 1. Students learnt heteroscedasticity, multicollinearity and autocorrelation and their estimation procedures. 2. Students understood about different lag models and simultaneous linear equations model with their estimation methods. 3. Explain core concepts and techniques in econometrics, with a special focus on the classical linear regression model. 4. Understand the assumptions upon which different econometric methods are based and their implications. 	
	ST - 302	Design and Analysis of Experiments	2018	<ol style="list-style-type: none"> 1. Students learnt ANOVA, ANCOVA technique for one way and two-way classifications. Multiple comparisons tests using Tukey's, Duncans, Sheffe's and Dunnet's tests. 2. Students understood about Latin squares and their construction, missing plot technique etc. 3. Students explained about Incomplete Block Designs and their analysis, etc. 4. Understand the basic terms used in design of experiments by using appropriate experimental methods 	
	ST -303	Operations Research-I	2018	<ol style="list-style-type: none"> 1. Students understood about Dual primal, Revised simplex methods. 2. Students learnt non-linear programming, integer programming, CPM, PERT, different models of games. 3. Students can think the real-life problems in the way of Linear Programming Problems and try to solve the problems in Mathematical Way. 4. Students can take a decision in real life by Using the Game Theory Techniques. 	

	ST -304	Practical-III (75 Practical + 25 Record)	2018	<p>tudents can understand the Statical Methos in Economical Views.</p> <p>tudents solved the Numerical problems related to operations research.</p> <p>tudents Understand the Life Tables in Demography.</p> <p>tudents can understand how the statistics use in biological aspects.</p> <p>.</p>	
	ST-305A	(a)Bio-Statistics	2018	<ol style="list-style-type: none"> 1. Students learnt about biological assay, their distribution and theorems, dose response relationships, basic concepts of biological assay, estimation methods of gene frequencies, etc. 2. Describe single and multi-species population growth models. 3. Apply the concept of deterministic and stochastic models on simple and general epidemics. 4. Understand linearization of dynamical systems with various dimensions. 	
	ST - 306	(a) Statistics for Biological and Earth Sciences	2018	<p>a) Statistics for Biological and Earth Sciences</p> <ol style="list-style-type: none"> 1. Students learnt about Graphs, measures of averages, measures of dispersion etc. 2. Students understood about Basic probability and important distributions with workout examples. 3. Students used t, F, χ^2, ANOVA and ANCOVA and non-parametric tests with examples. 4. Students used Advanced statistics tools with working illustrations. 	

	ST - 401	Time Series Analysis and Forecasting Methods	2018	<ol style="list-style-type: none"> 1. Students understood Time series analysis with some important growth models and their fitting 2. Students forecasting using regression, non-linear regression techniques, single, double, triple and adoptive exponential smoothing models. 3. Students obtained knowledge on AR, MA, ARMA, ARIMA, models fitting, diagnostic checking, etc. 4. Check and validate models with its residual analysis and diagnostic checking. 	
	ST - 402	Demography and Official Statistics	2018	<ol style="list-style-type: none"> 1. Students know the growth rates, life tables, GRR, NRR and growth models. 2. Students understood about gene frequencies, genotypes, phenotypes etc. 3. Students learnt about population census methods, organizations in India and their functions. 4. Useful to students as a means of analyzing and predicting social, cultural, and economic trends related to population. 	

	ST - 403	Operations Research-II	2018	<ol style="list-style-type: none"> 1. To perform Dynamic programming and their applications and computation procedure with illustration. 2. To discuss different Queuing models steady state solutions with examples. 3. To explain Inventory models with and without shortages, S-spicy, EOQ estimation with simple examples. <p>To understand Replacement problems such as block and age replacement problems, individual and group replacement policies with examples.</p>	
	ST - 404	Practical-IV (75 Practical + 15 Viva-voce + 10 Record)	2018	<ol style="list-style-type: none"> 1. Students can understand the Statical Methos in Economical Views. 2. Students solved the Numerical problems related to operations research. 3. Students Understand the Life Tables in Demography. 4. Students can understand how the statistics use in biological aspects. 	

	ST-405 A	(a) Statistical Process and Quality Control	2018	<ol style="list-style-type: none"> 1. Students understood the basic concepts of control charts for variables and their indices. 2. Students performed different control charts like Shewart's moving average, multivariate etc. with their applications. 3. Students used different sequential sampling plans and six sigma tool etc. in solving the problems. 4. Students have awareness about Total Quality Management. 	
	ST-405 B	Statistics for research, industry and Communitydevelopment	2018	<ol style="list-style-type: none"> 1. Students have done Simulation models, response surface models, demand analysis, social survey and their related measures. 2. Students can understand the basic of research blooms taxonomy of learning levels. 3. Find the topic from current research in statistics education. 4. Students can apply the tools in design, research and developments. 	

	ST-405 C	Advanced Econometric Models	2018	<ol style="list-style-type: none"> 1. Students understood GLM, SURE, nested and non-nested statistical models. 2. Students learnt about specification error, adding, switching models. 3. Students performed probit, logit models and their estimation. <p>Students can understand the qualitative and limited dependent variable models.</p>	
	ST - 406 A	Business Analytics	2018	<ol style="list-style-type: none"> 1. Students learnt Graphs, measures of averages, measures of dispersion etc. 2. Students studied basic probability and important distributions with workout examples. 3. Students used t, F, χ^2, ANOVA and ANCOVA and non-parametric tests and discussed with examples. 4. Students performed advanced statistics tools for solving the problems. 	

	ST-406 B	(b) Survival Analysis	2018	<ol style="list-style-type: none"> 1. Students learnt about survival functions, their estimating methods, Distributions and their comparison for survival distributions. 2. Understand the elements of reliability, hazard function and its applications. 3. Understand the concept of censoring, life distributions and ageing classes. 4. Estimate nonparametric survival function of the data.

43. Virology

S. No.	Course Code	Title of the Course	Years of Introduction	Activities/Content with direct bearing on Employability/Entrepreneurship /Skill development
1	VR-101	General Microbiology	2018	<ul style="list-style-type: none"> - To learn about fundamentals aspects of microbiology including origin, evolution of microorganisms, different groups of microorganisms and their importance, microscopy principles and applications, morphology, and structure of bacteria, - To learn about Microbiological media, isolation, cultivation and enumeration methods of microorganisms, microbial growth characteristics, maintenance, and preservation of microbial cultures. - To develop knowledge on microbial taxonomy, transport of nutrients in microbes, control strategies of microorganism, - To develop knowledge on general characteristics, structure and reproduction of fungi, algae, and protozoan parasites.
2	VR-102	General Virology	2018	<ul style="list-style-type: none"> - Learn the discovery, nature, origin and evolution of viruses and the physical, biochemical, and biological properties of viruses, criteria used for nomenclature

				<p>and classification of bacteria, plant and animal viruses.</p> <ul style="list-style-type: none"> - Describe the methods used for isolation, cultivation, and purification of viruses and criteria of purity. - Define biological, physical, biochemical, and serological methods used for quantitation of viruses, major characteristics of important plant and animal virus families and biology and applications of major RNA and DNA viruses of insects. - Understand the biology of major bacteriophages, algal and fungal viruses, subviral agents and importance of viruses in human welfare with suitable examples.
3	VR-103	General Microbiology and Virology	2018	<ul style="list-style-type: none"> - Define laboratory safety measures that need to be followed in Virology and Microbiology laboratories and know the concepts and protocols of using different sterilization methods and preparation of media. - Acquire the practical skills to use various methods for cultivation, staining and characterization of different microorganisms and to check their stability under various conditions. - Learn to isolate bacteriophages from different sources and cultivate viruses in embryonated eggs and plants. - Demonstrate the mechanical, aphid and graft transmission of plant viruses and methods used to check the stability of viruses and determine the effect of virus infection on plants through chlorophyll estimation.
4	VR-104	Biological Chemistry and Analytical Techniques	2018	<ul style="list-style-type: none"> - : Learn to calculate normality, molarity, molecular weight and percentage of chemical substances and qualitative and quantitative estimation of proteins, carbohydrates, lipids, and nucleic acids.

				<ul style="list-style-type: none"> - Know how to isolate and check the activity of enzymes from various sources. - Learn to use ultrafiltration, chromatography, and electrophoresis techniques for isolation and characterization of biomolecules. - Acquire the skills to use spectroscopic and centrifugal methods for isolation and characterization of biomolecules apply this practical oriented knowledge in Cell Biology and Immunology to foster employability in private industries, higher education in premier institutes.
5	VR-105	Biological Chemistry and Analytical Techniques	2018	<ul style="list-style-type: none"> - Acquire knowledge on major elements and biomolecules of life and their chemical composition, bonding and primary characteristics, classification, structure, functions of carbohydrates, nucleic acids, amino acids, peptides, proteins and lipids and mechanism of protein synthesis and degradation. - Understand the types, properties, biological functions of enzymes, nucleic acids, hormones, growth regulators, vitamins, porphyrins and other pigments and nucleic acid metabolism. - Describe the approaches involved in characterization and concentration of biomolecules and discuss the principles and applications of various techniques applied for characterization of biomolecules in biological research such as chromatography, centrifugation, electrophoresis, - Learn about electrochemical techniques, basic principles and applications of flow cytometry, radioisotopes, spectroscopy, amino acid, and nucleotide sequencers
6	VR-106	Human values and Professional ethics - I	2018	<ul style="list-style-type: none"> - To enable the students to imbibe and internalize the moral values and ethical principles - 2. To learn ethics moral and social values and ethical behavior in the personal and Professional lives. - 3.To learn the rights and responsibilities and to appreciate the rights of others and to create awareness on religious values and other good acts and facts of life. - 4.To acquire knowledge about the important facts of Bhagavad Gita, values hidden in religions, religious tolerance and aware of crime, and punishment

				theories
8	VR-201	Microbial Genetics and Molecular Biology	2018	<ul style="list-style-type: none"> - To gain understanding of prokaryotic and eukaryotic genome organization, modern concept of genes, plasmids, mobile genetic elements - To learn gene transfer and mapping mechanisms in bacteria, genetics of viruses and requirements and mechanism of DNA replication. - To attain knowledge about the mechanism of DNA damage and repair, concept of mutations and their importance, processes involved in transcription, - To attain knowledge about the mechanism of translation, regulation of gene expression and gene silencing mechanisms.
9	VR-202	Recombinant DNA Technology	2018	<ul style="list-style-type: none"> - To learn basic and advanced tools and techniques, approaches and strategies used in gene manipulation in prokaryotic and eukaryotic systems. - 2. To learn the major techniques and applications of gene manipulation such as DNA sequencing, nucleic acid hybridization - 3. To understand the strategies used for gene expression in heterologous hosts, proteomics, genomics. - 4. To generate knowledge on genetically modified plants and animals and applications/implications of genetic engineering in agriculture, medicine, industry, and biology.
10	VR-203	Microbial Genetics and Molecular Biology & Recombinant DNA Technology	2018	<ul style="list-style-type: none"> - Learn the safety practices and precautions to be followed in setting up Cell and Molecular Biology laboratory with ribonuclease free environment. - Isolate and estimate DNA and RNA from microbial, plant and animal tissues and demonstrate curing of plasmids, replica plating techniques, conjugation in bacteria, Ames test, induction of mutations in bacteria by physical/chemical agents, isolation of microbial mutants by gradient plate method. - Acquire practical skills to isolate plasmids from bacteria, restriction enzyme digestion of recombinant plasmid DNA, recovery of DNA from gels, transformation of bacteria and demonstrate the preparation of southern and dot blots for hybridization.

				<ul style="list-style-type: none"> - Solve the problems related to Molecular Genetics/Biology and Recombinant DNA Technology and compete for the competitive exams such as UGC-CSIR-NET, GATE, APSET and other scientific examinations.
11	VR-204	Cell biology and Immunology	2018	<ul style="list-style-type: none"> - Acquire the practical skills in conducting various experiments related to Cell Biology such as isolation of cells, preparation of cell cultures. - Learn isolation of mitochondria, study of chromosomes, identification of stages of mitosis in onion root tips. - Identify of primary and secondary lymphoid organs in virtual animal model and illustrate basic immunology techniques such as counting of RBC and WBC, estimation of hemoglobin, identification of the blood groups and Rh. - Demonstrate antigen-antibody interactions by conducting <i>in vitro</i> serological tests such as immunodiffusion and immune-electrophoresis, DAC-ELISA, Dot-ELISA and western blotting and apply this practical oriented knowledge in Cell Biology and Immunology to foster employability in private industries, higher education in premier institutes.
12	VR-205	Cell biology and Immunology	2018	<ol style="list-style-type: none"> 1.To understand the structure and contents of prokaryotic and eukaryotic cells, general principles and pathways of cell communication and cell signaling. 2. To describe the concepts and methodologies of plant and animal tissue and organ cultures, cell counting and introduction to stem cell cultures. 3..To learn about the historical perspectives of immunology, innate and adaptive immunity mechanisms, various components of immune system, antigens, antibodies, <i>in vitro</i> and <i>in vivo</i> antigen and antibody interactions and 4.To understand the mechanism of humoral and cell mediated immune responses, immune effector mechanisms, MHCs, hypersensitivity reactions, autoimmune and immunodeficiency disorders, transplantation and transfusion immunology and concepts and applications of conventional and modern vaccines.

13	VR-206	Human values and Professional ethics - II	2018	<ul style="list-style-type: none"> - Understand the definition of value education, concept of human and family values, components, structure, and responsibilities of family system and acquire reflective thinking, rational skepticism. - Describe the moral responsibilities and ethical issues of medical and health care professionals, avoid unethical things, learn ethical issues raised in genetic engineering and new biological technologies. - Learn to practice ethical standards in business by understanding ethical theories and maintain work ethics to build trust between businessman and consumer and avoid unethical behavior and ethical abuse and develop scientific temper, digital literacy. - Learn to practice environmental ethics by taking responsibility to protect environment and ecosystem and understand the importance of maintenance of social ethics and ethics of media.
14	VR-301	Plant Virology	2018	<ul style="list-style-type: none"> - Understand the induction of plant virus diseases, virus-host interactions and movement strategies. - Learn the vector and non-vector modes of plant virus transmission, virus-vector relationships and molecular mechanisms involved in virus vector interactions and the approaches used for identification and characterization of the viruses and virus strains. - Acquire the knowledge on plant virus spread and survival in nature and approaches used to detect plant viruses and diseases. - Describe the approaches used for the control and management of plant viruses and vectors and strategies used for acquiring plant virus resistance.
15	VR-302	Plant Viruses and Diseases	2018	<ul style="list-style-type: none"> - To understand the distribution, incidence and impact, symptoms, causal virus characteristics, diagnosis, disease cycle and management of the virus diseases of cereals and millets, oil seed crops - To understand the distribution, incidence and impact, symptoms, causal virus characteristics, diagnosis, disease cycle and management of the virus diseases

				<p>of vegetable, and tuber crops.</p> <ul style="list-style-type: none"> - To acquire knowledge on the distribution, incidence and impact, symptoms, causal virus characteristics, diagnosis, disease cycle and management of the virus diseases of food legumes, fruit crops - To acquire knowledge on the distribution, incidence and impact, symptoms, causal virus characteristics, diagnosis, disease cycle and management of the virus diseases of cash, spice and beverage crops and flowering and foliage ornamentals.
16	VR-303	Plant Virology or Plant Viruses and Diseases	2018	<ul style="list-style-type: none"> - Identify major virus diseases of local economically important crop plants and weeds through theory exercises, local field surveys, agricultural research station visits. - Determine and compare the effect of virus on cell size, chloroplast number, total carbohydrates, proteins, and lipids with healthy counterparts. - :Detect unknown viruses through ELISA and PCR (theory exercise and practical) and demonstrate plant virus transmission by seed and vegetative propagules and generation of virus free plants through apical meristem tip culture. - Identify local plant virus vectors, determine virus disease incidence, and progress curves through local field visits. -
17	VR-304	a) Molecular Virology (OR) b) Biostatistics and Bioinformatics	2018	<ul style="list-style-type: none"> - Acquire the skills to use the techniques involving purification of viruses such as maintenance of virus cultures on propagation hosts, clarification using organic solvents and low speed centrifugation, precipitation using sodium chloride or ammonium sulphate or polyethylene glycol or differential centrifugation, preparation of step and linear density gradients, further purification of viruses using sucrose density gradient centrifugation and final pelleting by ultrafiltration or ultracentrifugation and to check the quality and quantity of viruses using spectroscopy or transmission electron microscopy. - Isolate virus coat proteins and determine its quantity and molecular weight through spectroscopy and SDS-PAGE, respectively.

				<ul style="list-style-type: none"> - Isolate virus nucleic acids (dsRNA, RNA and DNA), estimate their quantity by spectroscopy, determine their size and molecular weight through agarose gel electrophoresis. Determine the stability of virus by studying effect of physical and chemical agents on virus inactivation.
18	VR-305	(a) Molecular Virology (OR) (b) Biostatistics and Bioinformatics	2018	<ul style="list-style-type: none"> - To understand molecular architecture of viruses and molecular mode of inactivating agents on viruses - To learn about types of viral genomes and steps involved in virus replication and replication strategies of DNA viruses. - 3. To understand basic concepts of statistics, construction of histogram, normal distribution, mean, median and standard deviation, comparison of means and variances, examples of proportion and count data - 4. To learn about analysis of variance, correlation and regression and statistical parameters for biological assays.
19	VR-306	(a) Biology of Viruses and their Management (OR) (b) Biology of Virus Vectors and their Management	2018	<ul style="list-style-type: none"> - To understand the basics of general entomology, collection, preservation, maintenance and transportation of virus vectors and vector-borne viruses of animals and humans - To learn about the biology and ecology of mosquitoes, blood sucking mites and prevention and control methods of animal and human virus vectors in urban and rural settings. - To describe the methods of collection, culturing and identification of plant virus vectors, virus vector transmission mechanisms, - To learn about the soil-borne vectors, epidemiology of vector-borne viruses, management of plant virus vectors and concepts of vector resistant crops
20	VR-401	Animal and Human Virology	2018	<ul style="list-style-type: none"> - To acquire knowledge on virus-host interactions, host innate and adaptive immune response to viruses, molecular mechanisms of viral pathogenesis, - To acquire knowledge on transmission of viruses, mechanism of virus, persistence, infection and spread in the body. - To learn the epidemiological concepts and methods of virus diseases, measures of disease occurrence, disease determinants, ecology, epidemiology - To learn the surveillance of virus diseases, strategies of virus maintenance in

				communities, basic concepts, types and patterns of disease survey, prevention, and control methods of viruses.
21	VR-402	Animal and Human Virus Diseases	2018	<ul style="list-style-type: none"> - Learn the safety practices and To describe the etiology, transmission, clinical manifestations, diagnosis, prevention and control of important (+) sense ssRNA viruses infecting animals and humans. - To describe the etiology, transmission, clinical manifestations, diagnosis, prevention and control of important (-) sense ssRNA viruses infecting animals and humans - To understand the etiology, transmission, clinical manifestations, diagnosis, prevention, and control of important DNA viruses infecting animals and human - To learn about the prion diseases, biology, prevention, and management of major viruses of silkworm, poultry, fish and prawn, emerging and reemerging virus diseases. -
22	VR-403	Animal and Human Virology & Animal and human virus diseases	2018	<ul style="list-style-type: none"> - Understand the biosafety, biosecurity, and ethical guidelines to be followed in the Molecular Virology laboratory. - Learn the technologies related to preparation of media for cell/tissue cultures, preparation of cell cultures/embryonated eggs for virus cultivation and isolation and quantitation of viruses using differential centrifugation and symptomatology/spectroscopy, respectively. - Develop skills to test the plant and human viruses using serological and molecular tests and kit-based methods. - Acquire knowledge on virus-based nanotechnology protocols, virus epidemiology by doing extension activities and visiting field, poultry, agriculture research station and aqua forms.
23	VR-404	Project work related to Virology	2018	<ul style="list-style-type: none"> - Acquire the skills to prepare the cell cultures and embryonated eggs for cultivation of plant, animal and human viruses and to isolate and quantitate

		(OR) (a) Applied Virology (OR)		<p>viruses.</p> <ul style="list-style-type: none"> - Learn the methods to detect plant and animal viruses and able to analyze various types of results obtained from serological and molecular viral diagnostic methods. - Apply the skills acquired to prepare NPV as biopesticides and virus-based nanoparticles and their isolation using analytical methods. - Participate in extension activities and field, poultry, agriculture research station and aqua form visits. -
		(b)Tumor Biology and Viruses	2018	<ul style="list-style-type: none"> - Acquire skills to detect carcinogens and mutagens using standard tests such as Ames test. - Distinguish transformed and normal cell lines and determine the anticancer property of biologically active compounds. - Design and execute PCR and other point of care methods using commercial kits for detection of tumor viruses (HCV, HIV, HPV). - Perform cultivation of poultry tumor viruses in cell cultures and acquiring the knowledge on histopathology of animal tumor viruses. -
24	VR-405	(a) Applied Virology (OR)	2018	<ul style="list-style-type: none"> - Understand the basic concepts, types, requirements and methodologies of plant/animal cell and tissue cultures used for cultivation of plant and animal viruses. - Learn the production of recombinant DNA technology-based antibodies and vaccines to viruses and the concepts and methods of production of virus resistant/tolerant crops and virus-based biopesticides. - Acquire knowledge about common virus infections caused to human beings through vector and non-vector borne modes and basic principles of biosafety, biosecurity, and ethical/regulatory issues in Virology and basics in Intellectual Property Rights (IPR).

				<ul style="list-style-type: none"> - Understand the utilization of viruses as viral genes/sequences as unique genetic resources, novel enzymes, gene expression activators and silencers, gene delivery systems, epitope display platforms and model systems in understanding the replication of nucleic acids and regulation of gene expression strategies and cancer biology, phage display and therapy technologies and viruses as biological weapons.
		b)Tumor Biology and Viruses	2018	<ul style="list-style-type: none"> - Acquire knowledge about the basic aspects of tumors, distinguish normal and transformed cells and describe the role of oncogenes and tumor suppressor genes in causing cancers. - Understand the role and mechanism of carcinogens in inducing carcinogenesis and molecular viral mechanisms of transformation and tumorigenesis. - Describe the role of oncogenes, tumor suppressor genes, viral oncogenes, types, and mechanism of RNA viruses in inducing tumors. - List the DNA viruses causing tumors and learn their tissue transformation mechanisms, role of tumor suppressor genes in tumor suppression, immune mechanisms against tumors, immunotherapy, and physical and chemical therapeutic interventions against tumors
25	VR-406	(a) Clinical Virology (OR)	2018	<ul style="list-style-type: none"> - Acquire basic understanding of virus properties, virus replication and learn methods of virus isolation and characterization of viruses using serological and molecular techniques. - Learn to collect, preserve the virus samples, and detect the viruses using biological, serological, and molecular methods, laboratory biosafety and quality control practices. - Understand the principles of epidemiology, disease occurrence patterns, disease surveillance and control strategies, concept, and methods of modern vaccines to

				<p>viruses.</p> <ul style="list-style-type: none"> - Learn about the approaches used for prevention and control of clinically important infectious caused by human viruses, unconventional slow viruses, and prions.
		(b) Emerging Infectious Viral Diseases		<ul style="list-style-type: none"> - Understand the evolution, biology, epidemiology, and emergence of infectious virus diseases, biology of emerging infectious diseases, zoonotic infections - Learn about the biology, clinical symptoms, epidemiology, diagnosis, and control of viruses causing AIDS and SARS and host defense mechanisms against infectious virus diseases. - Describe the biology, clinical symptoms, epidemiology, diagnosis, and control of vector borne emerging infectious viral diseases. - Acquire knowledge on impact of social and environmental change on emergence of viruses, vector control and antiviral therapies, vaccines, public health measures and bioterrorism.

44. Zoology

S. No.	Course Code	Title of the Course	Years of Introduction	Activities/Content with direct bearing on Employability/ Entrepreneurship/ Skill development
1	ZOO-101	Invertebrata & Chordata	2018	<p>i. Understanding the General Characteristics, Principles of classification, general biology of Invertebrate Communities.</p> <p>ii. To understand the various biological functions, the evolutions of life from most primitive to most advanced form with respective to their habit and habitat.</p>

				<p>iii. In depth understanding of Anatomical features of Integumentary, Circulatory, Reproductive, Respiratory, Receptor, Nervous systems among Chordate groups.</p>
2	ZOO-102	Genetics & Evolution	2018	<p>i. Students will appreciate the concept of epigenetics as a key mechanism of regulation of gene expression steering development and cell fate that can ultimately be affected in disease condition</p> <p>ii. Explain the ideas about Mendelian, non-Mendelian inheritance, genetic disorder, gene mutations and sex determination.</p> <p>iii. Gained knowledge on the factors influencing the pattern of Evolution including Mutations, Natural Selection and Genetic drift.</p> <p>iv. Understood the concepts of Micro, Macro evolution speciation categories, Protein evolution etc. to fortify the existing knowledge on Evolutionary patterns.</p>
3	ZOO-103P	Practical-I Invertebrata & Chordata and Genetics	2018	<p>i. Understanding the General Characteristics, Principles of classification, general biology of Invertebrate Communities.</p> <p>ii. To understand the various biological functions, the evolutions of life from most primitive to most advanced form with respective to their habit and habitat.</p> <p>iii. Understanding the comparative aspects of different organs systems among chordate Phyla.</p> <p>iv. The students may apply this knowledge in taxonomy related research and job opportunities.</p>

				<p>v. Explain the ideas about Mendelian, non-Mendelian inheritance, genetic disorder, gene mutations and sex determination.</p> <p>vi. To understand PTC, Colorblindness test, how to solve genetic problems, pedigree analysis.</p>
4	ZOO-104P	Practical-II Metabolic Regulation & Cell Function and Evolution	2018	<p>i. Students would gain expertise to develop understanding of biological processes at chemical; biochemical and molecular level to perform wide range of analytical techniques to explore biological activities.</p> <p>ii. The student will learn and understand about the Biosynthesis of Purines and Pyrimidine Nucleotides, degradation of Nucleotides, salvage pathways, biosynthesis and biodegradation of Amino acids, inborn errors of metabolism.</p> <p>iii. Students would be trained in various tools and techniques used to gain insight into biological processes.</p> <p>iv. Understood that the four propositions underlying Darwin's theory of evolution through natural selection are:</p> <p>(1) more individuals are produced than can survive;</p> <p>(2) There is therefore, a struggle for existence</p> <p>(3) Individuals within a species show variation</p> <p>(4) Offspring tend to inherit their parental characters.</p>
5	ZOO-105	Metabolic Regulation & Cell Function	2018	<p>i. The students will learn about chemical bonding patterns, chemical structures and classification of carbohydrates and their structural and metabolic role in cellular system i.e. different pathways associated with carbohydrate metabolism.</p>

				<p>ii. Students would gain expertise to develop understanding of biological processes at chemical; biochemical and molecular level to perform wide range of analytical techniques to explore biological activities.</p> <p>iii. The student will learn and understand about the Biosynthesis of Purines and Pyrimidine Nucleotides, degradation of Nucleotides, salvage pathways, biosynthesis and biodegradation of Amino acids, inborn errors of metabolism.</p>
6.	ZOO-106	Human Values and Professional Ethics-I	2018	<p>i. The student will be enriched with several aspects pertaining to Human values and performing of Professional Ethics in day today life.</p> <p>ii. Introduction of several Nature of values to be performed by Humans to lead a good and Peaceful life by extending and imparting good behavior, character and conduct towards people of the society.</p> <p>iii. Introducing different concepts of Bhagavad Gita and its applications in uplifting of Religious values in the present society.</p>
			2018	
7.	ZOO-201	Cell Biology & Immunology	2018	<p>i. Students will understand the structures, positions and functions of plasma membrane and all cellular organelles in details. They will acquire knowledge about chromosomes and cell divisions, both mitosis and meiosis. They will also know about cell signaling and cancers. They will know how to measure and stain different cell</p>

				<p>types.</p> <p>ii. Students would gain expertise in the ultra-structural information of animal cell besides the detailed views of the cell interior revealing the various events and actions of cell at the molecular level.</p> <p>iii. The study will help the students to understand the new discoveries about the structure and internal functioning of the cell due to technological improvements.</p> <p>iv. The student will learn and understand the rationale behind various assays used in immune diagnosis of diseases and will be able to transfer knowledge of immunology in clinical perspective.</p> <p>v. The course will aid in understanding the principles of Graft rejection, Auto immunity and Antibody based therapy.</p>
8.	ZOO-202	Molecular Biology	2018	<p>i. The study of Molecular Biology stands as a tribute to human curiosity for seeking to discover, and to human creative intelligence for devising the complex instruments and elaborate techniques by which these discoveries can be made.</p> <p>ii. Students would gain expertise in understanding the complex molecular mechanisms occurring in cell and the applications of molecular technologies for betterment of life.</p> <p>iii. Understand and our apply the Principles and techniques of Molecular Biology which prepares</p>

				students for further education employment in teaching, basic research or the health Professions.
9.	ZOO-203P	Practical-I Molecular Biology and Cell Biology	2018	<p>i. Students will acquire knowledge about replication, transcription, translation, post transcriptional and post translational modifications, gene regulation, DNA repair mechanisms and various molecular tools and techniques like PCR, southern and western blotting, recombinant DNA technology etc. they will also know the various tools and techniques related to bacterial microbiology.</p> <p>i. Students will understand the structures, positions and functions of plasma membrane and all cellular organelles in details. They will acquire knowledge about chromosomes and cell divisions, both mitosis and meiosis. They will also know about cell signaling and cancers. They will know how to measure and stain different cell types.</p>
10.	ZOO-204P	Practical-II Comparative Animal Physiology and Immunology	2018	<p>i. The students will be able to explore an original query in Animal Physiology. The students will appreciate evolutionary changes and environmental adaptations in different taxa of Invertebrates and Vertebrates.</p> <p>ii. Understanding of how different groups of animals have different Physiological adaptations appropriate to carry out the required function to the fullest.</p> <p>iii. Learn the fundamental principles of immune response including molecular, biochemical and cellular basis of immune homeostasis.</p> <p>iv. The course will aid in understanding various</p>

				aspects of immunological response and how it's triggered and regulated.
11	ZOO-205	Comparative Animal Physiology	2018	<p>i. The students will be able to explore an original query in Animal Physiology. The students will appreciate evolutionary changes and environmental adaptations in different taxa of Invertebrates and Vertebrates.</p> <p>ii. An appropriate understanding of functioning of each system of different groups of animals with their comparison will be acquainted.</p> <p>iii. Understanding of the basic concepts of Physiological regulation, from cellular to organ to organismal.</p> <p>iv. Understanding of how different groups of animals have different Physiological adaptations appropriate to carry out the required function to the fillet.</p>
12	ZOO-206	Human Values and Professional Ethics-II	2018	<p>i. Student will know the values of ethics in various fields including medical, social and business ethics.</p> <p>ii. The student will be enriched with several aspects pertaining to Human values and performing of Professional Ethics in day today life.</p> <p>iii. Introduction of several Natural values to be performed by Humans to lead a good and Peaceful life.</p>
			2018	

13	ZOO-301	Developmental Biology	2018	<p>i. Students would gain expertise in explaining how a variety of interacting processes generate an organism's heterogeneous shapes, size and structural features that arise on the trajectory from embryo to adult or more generally throughout a life cycle.</p> <p>ii. Gains knowledge about gametogenesis, cleavage mechanisms, gastrulation and role of hormones in metamorphosis and regeneration.</p> <p>iii. After learning the development of life from cell to multicellularity complex and coordinated systems in organisms the students can apply this knowledge for research, and education, to solve the problems related to development in animals through research.</p>
14	ZOO-302	Environmental Biology	2018	<p>i. Students will be able to apply the scientific method and quantitative techniques to describe, monitor and understand environmental systems.</p> <p>ii. Students will be able to use interdisciplinary approaches such as ecology, economics, ethics and policy to devise solutions to environmental problems.</p> <p>iii. Students will be able to be proficient in ecological field methods such as wildlife survey, biodiversity assessment, mathematical modeling and monitoring of ecological systems.</p> <p>iv. Students will be able to use technology, such as geographical information systems and computer programming, to assist in problem</p>

				solving.
15	ZOO-303P	Developmental Biology and Tools & Techniques	2018	<p>i. Developmental Biology displays a rich array of material and conceptual practices that can be analyzed to better understand the scientific reasoning exhibited in experimental life sciences. Based on learning contents of embryology, students can have a systematic and organized learning about the knowledge and concepts of growth and development.</p> <p>ii. To understand the fundamental processes that underpins the fertilization of an egg cell and its step-by-step transformation into the fascinating complexity of a whole organism.</p> <p>iii. Students would be expertise techniques used for imaging, isolation, purification and characterization of various biological substances.</p> <p>iv. Students would gain basic knowledge of the underlying principles and practical strategy of the analytical and preparative techniques that are fundamental to study and understanding of life processes.</p>
16	ZOO-304P	Environmental Biology and Enzymology	2018	<p>i. The student will get idea about the ecological process in its surrounding and at National and Global level and the use of student knowledge on Ecology, Behaviour can be applied to Education, Research and Extension programmes in his further career.</p> <p>ii. Students will be understanding the various features and aspects of population ecology, community ecology and ecosystem ecology.</p>

				<p>They might have the knowledge about environmental biology in details. They will acquire knowledge about various tools and techniques of field ecology.</p> <p>iii. Students learn about enzymes. Their classification and nomenclature</p> <p>iv. Students learn about specificity of enzymes</p> <p>v. Students learn about measurement of enzymatic activity</p> <p>vi. Students learn about isolation, purification of enzymes and intercellular distribution enzymes.</p>
17	ZOO-305A	Tools & Techniques	2018	<p>i. Students would be expertise techniques used for imaging, isolation, purification and characterization of various biological substances.</p> <p>ii. Identify and describe the different equipment and tools used in a biology laboratory.</p> <p>iii. Correctly operate different laboratory instruments.</p> <p>iv. Correctly operate different types of microscopes.</p> <p>v. Prepare tissue for section cutting and correctly operate a microtome.</p>
18	ZOO-305B	Enzymology	2018	<p>i. Students gain knowledge about regulation of enzyme activity with respective mechanisms</p> <p>ii. To understand about mechanism of enzymes in clinical diagnosis and their applications</p> <p>iii. Students gain knowledge about immobilization of enzymes, applications of immobilized enzymes.</p>

19	ZOO-305C	Bioinformatics & Biostatistics	2018	<p>i. Familiar with various Applications of Bioinformatics by exploring the fundamentals of computer applications in Biology.</p> <p>ii. Describe different methods of data handling using computer.</p> <p>iii. Perform basic operations of gene sequence retrieval and compare them using different software.</p> <p>iv. Perform basic operations of protein structure retrieval and comparison using different software.</p> <p>v. The student will learn about the Computer basics like Operating systems, Programming, Data Access, Internet and Nucleic acid Sequence and Protein Data Banks.</p> <p>vi. The student will learn the basics of handling of data, measures of Central tendency like Mean, Median and Mode, Measures of dispersion like Mean deviation and Standard deviation and Co-efficient of Variation.</p> <p>v. The course will aid in learning Test of significance like Null hypothesis and Alternative hypothesis, t-test, F-test, Chi-square test, Correlation and Regression analysis.</p>
20	ZOO-306A	Economic Zoology	2018	<p>i. Creating the self-employment opportunities to rural students through Animal husbandry, Aquaculture, Vermiculture and Sericulture.</p> <p>ii. To understand the significance of Economically important animals including cultivable Fishes, Prawns and their culture</p>

				practices. iii. Identification of Animal pathogenic diseases in Fisheries, Sericulture, Apiculture, Aquaculture and their management strategies.
21	ZOO-306B	Genetic Engineering	2018	i. This course exposes students to the applications of genetic engineering in biological research. ii. Students will be able to perform basic genetic engineering experiments at the end of course. iii. Students will acquire knowledge of advances in biotechnology- healthcare, agriculture and environment cleanup via recombinant DNA technology.
	ZOO-306C	Human Health and Infectious diseases	2018	i. To understand the basic concepts of Infectious diseases and the role of immunity to control infections ii. Provides knowledge on the physiological mechanisms leading to diseased conditions. iii. Students gains knowledge on the pathogenesis and transmission of infectious diseases. iv. This insight allows the students to learn the treatment methods to control the growth and control of microbes.
22	ZOO-401	Neurobiology	2018	i. Understanding Electrophysiological techniques and Molecular mechanisms associated with action potentials ii. Students leant and gain knowledge on structure and function of different types of Synapses iii. Gained information on different types of Neurotransmitters i.e. Amino acids and Peptides.
23	ZOO-402	Toxicology	2018	i. The awareness about toxic agents, their effects

				<p>and knowledge about mode of transformation of toxicants will help in creating skilled personnel in the field of environment protection and research.</p> <p>ii. Understanding of the physiological and genotoxic effects of drugs and environmental toxins.</p> <p>iii. To understand various types of insecticides and understand their mode of action to kill/control the insects. Also, the students will learn about novel categories of insecticides that may be compatible with other control strategies.</p> <p>iv. The students will learn handling of the pesticides in crop protection and understand the therapy and antidotes at the time of poisoning.</p>
24	ZOO-403P	Neurobiology and Animal Biotechnology & Microbiology	2018	<p>i. Learnt about structure, function and organization of Neurons in the Central nervous system</p> <p>ii. Understanding Electrophysiological techniques and Molecular mechanisms associated with action potentials.</p> <p>iii. Identify microbiological techniques, the defining characteristics of the major groups of microorganisms and apply to study microbial phylogeny.</p> <p>iv. Apply the scientific method by stating a question; researching the topic; determining appropriate tests; performing tests; collecting, analyzing, and presenting data and effectively communicate with both specialist and non-specialist audiences/community.</p>

25	ZOO-404P	Toxicology and Animal Behavior & Wild life	2018	<ul style="list-style-type: none"> i. Skill development in environmental and occupational Toxicology. ii. It provides opportunities for student's research projects, internships in assessing the effects of toxic pollutants on the environment and in the food chain. iii. Identification of different routes of exposure of environmental toxins. iv. The students will learn handling of the pesticides in crop protection and understand the therapy and antidotes at the time of poisoning. v. To understand the overview of Animal Behavior and prominence of social organization in insects and primates. vi. Gained lot of information on different types of Learning phenomenon and their mechanisms. vii. To understand how to conserve the wild animals
26	ZOO-405A	Animal Biotechnology & Microbiology	2018	<ul style="list-style-type: none"> i. Understanding of in vitro culturing of organisms and production of transgenic animals. ii. Understanding of cloning of mammals, large scale culture and production from recombinant microorganisms and cloning vectors. iii. This insight allows students to take into consideration about ethical issues involved in production of transgenic animals and BT products. iv. Use in gene transfer technology, genetic manipulations and in a variety of Industrial processes and prominence of IVF, Artificial

				<p>insemination and embryo transfer techniques.</p> <p>v. Identify microbiological techniques, the defining characteristics of the major groups of microorganisms and apply to study microbial phylogeny</p> <p>vi. Classify the nutritional types of microorganisms and measure microbial growth</p> <p>vii. Evaluate how microorganisms interact with the environment in beneficial or detrimental ways</p> <p>viii. Assess impact of plant- microbe interaction on agriculture in both beneficial and detrimental ways. Identify industrially important microbes.</p>
27	ZOO-405B	Animal Behavior & Wild life	2018	<p>i. Understand the overview of Animal Behavior and prominence of social organization in insects and primates</p> <p>ii. Gained lot of information on different types of Learning phenomenon and their mechanisms.</p> <p>iii. To understand the how to conserve wild animals and management strategies.</p> <p>iv. To gain the knowledge about wild animals and animal products importance.</p>
28	ZOO-405C	Endocrinology	2018	<p>i. Understand the pathways associated with Biosynthesis and secretion of Endocrine hormones and their role in the control of metabolism.</p> <p>ii. Through understanding of several endocrines including Peptide hormones, Steroid hormones, Pituitary hormones, Sex hormones, Thyroid hormones etc. in the control of metabolic pathways.</p> <p>iii. Understanding the influence of hormones on Growth, Development and Reproduction and</p>

				their regulatory pattern.
29	ZOO-406A	Environmental Impact Assessment & Green Auditing	2018	<p>i. Be able to access and analyse different case studies/examples of EIA in practice for evaluation/assessment</p> <p>ii. Explain the importance of environmental audits and other management tools in business for social benefit by improving environmental performance</p> <p>iii. Calculate the carbon footprint of any organization and identify suitable mitigation strategies for carbon reduction solutions.</p>
30	ZOO-406B	Structural Biology	2018	<p>i. Understand the evolution of protein structural motifs and domains and associate this with function;</p> <p>ii. Use on-line structural databases and tools to predict the properties, structure and function of proteins.</p> <p>iii. Understand and explain enzyme mechanisms in a structural context.</p> <p>iv. Describe mechanisms of protein folding and the roles of natively unstructured proteins in biology.</p> <p>v. Understand how cross-talk between proteins and post-translational protein modifications (e.g. phosphorylation, ubiquitination) facilitate information processing in cells.</p>
31	ZOO-406C	Pathobiology	2018	<p>i. To understand the different pathogens causing disease in man.</p> <p>ii. Describe the different parasites causing disease and disability in man and animals.</p> <p>iii. Ability to elaborate about the life cycle and</p>

				<p>biology of disease carrying vectors; suggest preventive and control measures for the said diseases.</p> <p>iv. An understanding of the relationship between changes in physiology of host and</p> <p>v. The students after completion of the course based on the Expertise he/she may join as Parasitological Scientist.</p>

Animal Biotechnology

S. No.	Course Code	Title of the Course	Years of Introduction	Activities/Content with direct bearing on Employability/ Entrepreneurship/ Skill Development
1	ABT- Core-101	Metabolic Regulation & Cell Function (MRCF)	2018	<ul style="list-style-type: none"> Knowledge on chemicals bonds, thermodynamics principles and metabolisms of Glycolysis, TCA Cycle and their biomedical importance will be gained. Metabolic discords of urea cycle and importance of proteins structure and functions can be understood. Biosynthesis of purine and pyrimidine nucleotide and Clinical disorders of purine and pyrimidine metabolism can be learnt To become proficient in Biomedical importance of lipids and over view metabolism of carbohydrate, protein and lipids

2	ABT- Core-102	Tools & Techniques (TT)	2018	<ul style="list-style-type: none"> • Skills will be acquired on chromatography, centrifugation, electrophoresis and blotting techniques • To get knowledge on cell and tissue culture, cell types, culture media and overview of stem cell biology • To acquire skill on electrganetic spectrum, type of detectors, electrophysiological methods and brain activity recording techniques • Microscopic techniques, different fixation and staining techniques, tissue processing for microtomy, cryotechiques will be learnt
3	ABT-Core-P-103	Metabolic Regulation & Cell Function	2018	<ul style="list-style-type: none"> • Practical knowledge will be gained on biochemical assays like estimation of proteins, structural proteins, soluble proteins, free amino acids, total carbohydrates and total cholesterol. • To gain knowledge in handling equipments like cooling centrifuge, autoclave, laminar air flow etc., and, maintenance of animal cell culture laboratory. <p>To learn microbial media preparation for their culture and identification</p>
4	ABT-Core-P-104	Tools & Techniques	2018	<ul style="list-style-type: none"> • Isolation of DNA from chick liver • Agarose gel electrophoresis • Estimation of DNA and RNA by diphenyl anime method and orcinal method • Paper chromatography

				<ul style="list-style-type: none"> • Plating procedures • Gram staining • Anti microbial susceptibilities test
5	ABT-CF-105	Microbiology and Diseases	2018	<ul style="list-style-type: none"> • Microorganisms classification and structure of prokaryotic and eukaryotic microorganism can be understood • To get knowledge on Nutritional requirements to microorganisms, growth of microorganism, control of microorganism and microbes of biotechnological importance • To become proficient in chemical nature of gene, plasmids incompatibility, horizontal transfer of genome among the microbial community and Benzer's classical studied on II locus • To learn diseases caused by microorganism
6	ABT -EF-106	Human Values & Professional Ethics (HVPE)-I	2018	<ul style="list-style-type: none"> • Knowledge will be gained on nature of ethics its relation to religion. Politics, Business • To understand nature of values Good and Bad, end and means, analysis of basic moral concepts, good behavior and respect for elders, character and conduct • Proficient on hagavad Githa • Crime and theories of punishment will be learnt
7	ABT- Core-201	Molecular Biology (MB)	2018	<ul style="list-style-type: none"> • To gain knowledge on DNA structure, genome of Nuclear and mitochondrial and maternal Inheritance • To understand replication in prokaryotes, Enzymology of DNA replication, Discontinuous replication and Bidirectional replication • Synthesis of RNA, Types of RNA, Genetic

				code and Ribosome structure will be understood Knowledge will be gained regulation I and II and Operon concepts
8	ABT- Core-202	Animal Cell culture & Stem Cell Biology (ACC-SCB)	2018	<ul style="list-style-type: none"> • To understand animal cell culture, biology of stemcells and embryonic stem cell • To learn propagation of embryonic stem cells, nuclear transfer technology, animal cloning and stem cell differentiation • To gain knowledge on stem cell plasticity, stem cell assay and protocols, stem cell separations and stem cell therapies <p>To learn stem cells and tissue engineering, human embryonic stem cells and society, intellectual property results</p>
9	ABT-Core-P-203	Molecular Biology & Immunology	2018	<ul style="list-style-type: none"> • Effect of UV radiation on bacterial growth • SDS PAGE • Electrophoresis • Blood grouping • Blood smear preparation • RBC count • Radial Immuno Diffusion • Neubauer chaber
10	ABT-Core-P-204	Animal Cell culture & Stem Cell Biology & Cell Biology	2018	<ul style="list-style-type: none"> • Laboratory safety rules and regulations • Animal handling and care • Preparation of cell culture media • Staining of animal cells • Preparation of cell lines

				<ul style="list-style-type: none"> • Culture of virus in chick embryo
11	ABT- CF-205	Cell Biology & Immunology (CB&IM)	2018	<ul style="list-style-type: none"> • Able to learn organization of prokaryotic and eukaryotic cell, Nucleus structure, Eukaryotic chromosome and polytene and lamp brush chromosomes • To learn mechanism of cell division, regulation of eukaryotic cell cycle, chromosomal abnormalities and tumor biology • To understand types of immunity, types of cell involved in immune response, structure and function of antibody and complementarily cascade • To gain knowledge on Antigen presentation, hypersensitivity reactions, immune tolerance and immunopathology
12	ABT- EF-206	Human Values & Professional Ethics (HVPE)-II	2018	<ul style="list-style-type: none"> • To gain knowledge on value education • To learn medical ethics • To become proficient on business ethics • To understand environmental ethics and social ethics
13	ABT- Core-301	Enzymology (ENZ)	2018	<ul style="list-style-type: none"> • To understand enzyme specificity, enzyme catalysis and isolation and purification of enzymes • To gain knowledge on theories of enzymes kinetics, enzyme kinetics and its importance, effect of reactant concentrations and effect of temperature of pH and enzyme concentration reaction rate • To become proficient on clinical aspects of enzymology, immobilized enzymes, isoenzymes and enzyme engineering

14	ABT- Core-302	Animal Reproduction, Breeding & Transgenic Technology (ARBTT)	2018	<ul style="list-style-type: none"> • To become proficient on structure and function of male and female reproductive system; reproductive cycles and contraception in male and females • To gain skill on sex determination, selection for qualitative inherited characters, parental determination and verification and progeny testing • To understand artificial insemination techniques, in vitro fertilization, embryo transfer technology, microinjection and macroinjection • To learn transgenic technology development, generation of chimeric, transgenic and knockout mice
15	ABT-Core-P-303	Enzymology & Genetic Engineering	2018	<ul style="list-style-type: none"> • To determine the effect of substrate concentration, enzyme concentration and temperature on enzyme activity • Measures of central tendency • regression and correlation analysis • T-test
16	ABT-Core-P-304	Animal Reproduction, Breeding & Transgenic Technology & Environmental Biotechnology	2018	<ul style="list-style-type: none"> • To estimate the sperm motility, sperm count , sperm membrane integrity test and pH of semen. • Determination sperm viability • Retrieval of gene and protein sequence from gene and protein bank, redelivery
17	GE-305A	Cancer Biology	2018	<ul style="list-style-type: none"> • To gain knowledge on cancer types and tumor development • To learn oncogenes, mechanisms of onogene activation and chromosomal translocation

				<ul style="list-style-type: none"> • To understand cell cycle regulation and cancer, DNA Damage and repair • To learn tumor immunology, Vaccine development, tumor cell evasion of immune defenses
18	GE-305B	Environmental Biotechnology (EBT)	2018	<ul style="list-style-type: none"> • To gain knowledge on waste and pollutants, hazards from wastes and pollutants and hazards from chemicals in wastes • Waste treatment, treatment of liquid wastes, treatment of solid waste and contributions of biotechnology to waste treatment will be understood • To become proficient in aerobic waste water treatment and measurement of pollution levels • To learn anaerobic treatment of waste water, biodegradation of xenobiotics compounds, hazards from xenobiotics and bioremediation
19	GE-305C	Biostatistics & Bioinformatics	2018	<ul style="list-style-type: none"> • To understand prediction of protein structure and protein sequence database, prediction of gene structure, submission of sequence to database, phylogenetic analysis • To learn biostatistics, measures of location and dispersion, curve fitting and correlation and regression • To understand probability distribution, tests of significance, student t-test and F-test, chi square test and their application
20	OE-306A	Animal Biotechnology & Industrial Applications	2018	<ul style="list-style-type: none"> • To gain knowledge on preservation animals engineered bacteria/yeast/ cell lines, metabolic engineering, fermentative production and

				<p>glycolytic pathway</p> <ul style="list-style-type: none"> • To understand monoclonal antibodies production and genetically engineered products • To know the DBT guidelines, Global scenario of transgenic micro organisms and ethical issues related to biotechnology products
21	OE-306B	Genetic Engineering (GE)	2018	<ul style="list-style-type: none"> • Use of enzymes in DNA and RNA synthesis, restriction enzymes and ligation and modification o DNA • To learn vectors for constructions of genomic libraries, expression vectors, promoters and vectors used for cloning • To gain knowledge on DNA fragments, cDNA synthesis, PCR • To become proficient on ligation between cohesive and blunt end DNA fragments, introduction of cloned genes into host and expression of cloned genes
22	ABT- Core- 401	Medical Biotechnology (MBT)	2018	<ul style="list-style-type: none"> • To understand disease diagnosis, use of monoclonal antibodies in detection of genetic disease • To learn Disease treatment, interferons, growth factor, and antisense nucleotide as therapeutic agent • To gain knowledge on gene therapy, types of gene therapy, augmentation therapy and targeted transfer • To become proficient on forensic medicine, preparation of DNA sample. Approaches for DNA analysis and applications of forensic medicine

23	ABT-Core- 402	Fermentation Technology and Downstreaming Process (FTDSP)	2018	<ul style="list-style-type: none"> To understand cell distribution methods, separation techniques, purification by chromatographic techniques and isolation and screening and maintenance of industrially importance microbes To learn bioreactor design, fermentation economics, upstream processing, membrane based separations <p>To gain knowledge on importance of downstream processing economics of downstream processing</p>
24	ABT-Core-P-403& 404	Project and Viva- Voce	2018	<ul style="list-style-type: none"> Students must perform project work which includes experiments related to Toxicology, Animal Tissue culture, Fermentation technology or any work related to biology. <p>After completion of project work students have to prepare dissertation by their own and submit to the committee members.</p> <ul style="list-style-type: none"> Evaluation of dissertation will be conducted by committee members through Viva-Voce
25	GE-405A	Biosafety, Bio Ethics & Intellectual Property rights	2018	<ul style="list-style-type: none"> To understand socio-economic and legal impact of biotechnology, use of genetically modified organisms, moral and ethical issues in biotechnology and safety issues with GMO To learn intellectual property right, evaluation of patenting, application of GATT and IPR and WTO Act and global and Indian

				biodiversity <ul style="list-style-type: none"> To gain knowledge on Indian Patent Act 1970, role of country patent office, U.S. Patent trademark office and U.S. Patent system Vs Indian Patent system To gain knowledge on Ethics and genetic engineering, patent of genes, human cloning, stem cell, regulatory requirements for drugs and biologics, GLP and GMP
26	GE-405B	Drug design and Development	2018	<ul style="list-style-type: none"> To learn drug design, analog approach of drug designing To understand SAR Vs QSAR, Partition coefficient, Hammett's substituent constant and Taft's steric constant, Free Wilson mode, 3D-QSAR approach like COMFA and COMIA To gain knowledge on pharmacological screening and assays, pharmacological screening models for therapeutic areas, cell based assay, biochemical assay, radiological binding assay, small molecule manufacturing To learn Drug Laws, FDA, OECD, ICH, Schedule Y, drug registration, Regulations of human pharmaceuticals and biological products, and clinical trial design
27	GE-405C	Animal Cell Culture Techniques	2018	<ul style="list-style-type: none"> To understand Animal cell culture, culture medium, characteristics of cell in culture, measurement of viability and cytotoxicity, cell types and apoptosis

				<ul style="list-style-type: none"> • To gain knowledge in scaling up of animal cell culture, cell transformation, tissue engineering, transgenic animals, animal cloning • To become proficient in improvement of biomass, pharming products, plasminogen activator and ethical issues related to biotechnology products
28	OE-406A	Advanced Genomics and Proteomics	2018	<ul style="list-style-type: none"> • To learn structure of Prokaryotic and Eukaryotic genomes, Isolation and purification of genomic DNA, Construction of Physical maps and Whole genome sequence alignment • To understand genome annotation, methods for gene identification, functional genomics, transcript profiling • To learn protein structure, sample preparation and separation 2D-analysis, Multidimensional liquid chromatography, protein-protein interactions analysis <p>To gain knowledge on DNA /protein sequence homologies, Gene duplication and</p>
29	OE-406B	Bio resource Technology (Apiculture, Sericulture , Aquaculture, Vermiculture)	2018	<ul style="list-style-type: none"> • To understand Types of honey bees, life history of honey bees, management of apiculture and by products of honey bees and economic importance disease and their control • To become proficient on fresh water fin fish culture, shell fish (prawn and Pearls) culture • To understand historical background of vermicompost, methods of vermiculture and

				problems involved in vermicompost
--	--	--	--	-----------------------------------

44. Business Management

S.No	Course Code	Name of the Course	Year of introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/ Skill development	Link to the relevant Document
1	MBA 101	Management And Organisational Behaviour	2018	Examine the Management concepts and functions. Apply the concepts of planning, decision making. Apply the concepts of delegation of authority, decentralisation and departmentation in real life situations. Analyse the controlling principles and practices, Ethics and corporate social responsibility. Evaluate the basic concepts of organizational conflicts and climate.	
2	MBA 102	Managerial Communications	2018	Apply the basic concepts of communication for business correspondence. Distinguish different forms of communication. Evaluate different types of communication. Adapt report writing skills of different types on need basis. Acquire presentation skills along with the interview techniques.	
3	MBA 103	Managerial Economics	2018	Describe the importance of managerial economics and its contribution to decision making in different types of business organizations by the managerial economist.	

				<p>Apply the basic principles of managerial economics.</p> <p>Apply demand analysis concept in the real life business situations.</p> <p>Discuss the meaning and usefulness of the production function and cost function in analysing the firm's production activity.</p>	
4	MBA 104	Accounting For Managers	2018	<p>Outline the basic knowledge of accounting, bookkeeping, accounting Principles, accounting cycle.</p> <p>Apply the concepts of journal, ledger and Trail balance.</p> <p>Identify the nature of expenditure and revenue for preparation of financial statements of business.</p> <p>Examine the role of accounting policies like depreciation.</p>	
5	MBA 105	Quantitative Analysis For Management Decisions	2018	<p>Recall the fundamentals in Mathematics and Statistics.</p> <p>Demonstrate the methods to solve derivatives, progressions and gaming.</p> <p>Choose decision making in a competitive situation.</p> <p>Solve transportation Problem with minimum cost of transport of commodities.</p>	
6	MBA 106	Information Technology For Managerial Applications	2018	<p>Identify various network topologies.</p> <p>Apply Various Mathematical & Statistical Operations Using MS office &MS-Excel.</p> <p>Create Effective basic power point Presentations</p>	
7	MBA 107	Business Statistics	2018	<p>About the information needs, sources of data and measures of central tendency .</p>	

				The concept of Scientific Research and the methods of conducting Scientific Enquiry. The Statistical Tools of Data Analysis.	
8	MBA 108	Human Values And Professional Ethics	2018	About ethics, values and morals. The concepts of value based education and its relevance. Learn about environmental and social ethics	
9	MBA 201	Marketing Management	2018	Outline the concepts of marketing. Create the segmentation, targeting and positioning in marketing. Analyse various phases of product life cycle. Evaluate various methods of pricing and identify the best pricing strategy. Evaluate marketing communication strategies.	
10	MBA 202	Financial Management	2018	Outline the basic concepts of Financial Management. Comprehend the various methods of Investment Analysis and apply various techniques of capital budgeting. Adapt the concepts of leverage, capital structure and its effect on the long term survival of the firm. Appraise various methods of computation of cost of capital.	
11	MBA 203	Human Resources Management	2018	Outline the functions and challenges of HRM. Apply different concepts of HR Planning, Recruitment, Selection, Training, Interviewing Techniques and Executive Development Programs. :Apply the uses of job analysis, job description, job specification, ergonomics in industry and the methods of job evaluation. Utilize the various methods of performance	

				appraisal.	
12	MBA 204	Production Management	2018	<p>Apply the basic concepts of production and operations management and identify types of manufacturing processes.</p> <p>Define and explain concept of production planning and control.</p> <p>Identify effective plant location and plant layout.</p> <p>Design strategies to improve productivity.</p>	
13	MBA 205	Business Research Methods	2018	<p>Adapt the fundamentals of Business research methodology.</p> <p>Identify research problem.</p> <p>Apply sample and census survey and measuring techniques.</p> <p>Design data collection techniques.</p> <p>Develop data processing procedures and apply tools.</p> <p>Draft thesis/report writing.</p>	
14	MBA 206	Management Information Systems	2018	<p>Understand various types of information systems.</p> <p>Analyse the various functional information systems</p>	
15	MBA 207	Operation Research	2018	<p>Understand various concepts and techniques of OR.</p> <p>Apply various OR techniques to improve the efficiency of the organisations.</p>	
16	MBA 208	Leadership Values	2018	<p>Identify the leadership qualities to run an organization successfully.</p> <p>Appraise the various concepts of value based leadership.</p>	
17	MBA 301	Business Environment	2018	<p>Outline the basic concepts of business environment and its components.</p> <p>Analyze the structure of Indian economy.</p>	

				Discuss the components of fiscal policy and balance of payments. Evaluate different trade related policies.	
19	MBA 302	Entrepreneurship	2018	Understand the concept of entrepreneurship. Analyse entrepreneurship development programs in India and contents for training for entrepreneurial competencies. Develop Creativity in entrepreneurship. Design the project reports & make project evaluation	
20	MBA 311	Consumer Behaviour	2018	Evaluate the consumer behaviour and business strategies. Apply the various consumer behaviour models. Build the psychological process and develop the effective strategy in terms of impact on consumer behaviour.	
21	MBA 312	Customer Relationship Management	2018	Develop the concepts of CRM and strategies in business. Appraise the customer profile and perception of customer behavior in relationship perspectives. Analyse strategies for customer acquisition, models of CRM.	
22	MBA 313	Marketing Research And Information Systems	2018	Understand basic concepts of research and methodology of conducting researches in marketing domain. <ul style="list-style-type: none"> Pursue the summer training/ project work and a winter project work and a professional career in Marketing Research domain. 	
23	MBA 314	Advertising And Sales Promotion Management	2018	Discuss the basic concepts of advertising for better understanding the challenges and opportunities in advertising . Analyse the relations of advertising with	

				<p>segmentation and budget decision .</p> <p>Design better advertising strategies for the company .</p> <p>Identify media options which are suitable for the company for better promotion .</p> <p>Develop an effective advertising campaign for the company .</p>	
24	MBA 315	Product And Brand Management	2018	<p>Discuss the importance of brand image in marketing .</p> <p>Formulate brand vision which communicates better the organisations' policy on Branding .</p> <p>Analyse brand promotion methods in brand communication .</p> <p>Analyse factors influencing brand extension decisions .</p> <p>Design brand marketing programmes and for better brand performance .</p>	
25	MBA 316	Digital Marketing	2018	<p>Get knowledge regarding basic concepts of Digital Marketing.</p> <p>Analyse and Choose different channels of digital marketing according to the changing requirements of the markets</p> <p>Construct different digital marketing plans on situational basis.</p> <p>Manage digital by conducting a marketing research and adapt the changes by creating new goals for further reputation.</p>	
26	MBA 321	Financial Services	2018	<p>Have awareness on insurance industry & its regulations.</p> <p>Create awareness on different financial services.</p>	
27	MBA 322	Investment Management	2018	<p>Analyse various investment alternatives for effective investment decision .</p> <p>Discuss the importance of security analysis in</p>	

				<p>investment decision process .</p> <p>Design bond management strategies to realise good return on bond investment .</p> <p>Apply different equity valuation methods for the valuation of securities .</p> <p>Construct optimal portfolio for higher return at lower risk .</p> <p>Analyse different schemes of mutual funds for better investment decision .</p>	
28	MBA 323	Business Taxation	2018	<p>Conclude the fundamentals of Taxation .</p> <p>Discuss taxation methods of companies and individuals .</p> <p>Analyse income sources from business through taxation .</p> <p>Evaluate Tax management strategies</p>	
29	MBA 402	Strategic Management	2018	<p>Develop vision, mission and objectives of the organization.</p> <p>Analyse industry and develop techniques of competitive analysis.</p> <p>Appraise strategic leadership styles and actions.</p> <p>Formulate effective strategies in business.</p> <p>Develop a frame work for the implementation strategies in business.</p> <p>Evaluate the strategy controls by measuring performance of organization.</p>	
30	MBA 403	Business Laws And Ethics	2018	<p>Analyze the Indian Contract Act.</p> <p>Evaluate Sales of Goods Act and the machinery for redressal of consumer grievances.</p> <p>Elaborate rights and duties of agent and principal, Principal's liability for the acts of agent and the procedure for termination of agency.</p>	

				Examine the rights and duties of partners, dissolution of partnership firm.	
--	--	--	--	---	--

46. Computer Science

Master of Computer Applications (MCA)

S. No.	Course Code	Title of the Course	Years of Introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/Skill development
1	MCA 101	Discrete Mathematical Structures	2018	<ol style="list-style-type: none"> 1. The students become familiar with the Sampling Distributions like with replacement and without replacement 2. The problems in OR, Computer science, Probability, statistics deals with functions of two or more variables. To optimize something means to maximize or minimize some aspects of it. 3. Student uses a variety of strategies to investigate mathematical models of situations involving Binomial, Poisson's and Normal distribution
2	MCA 102	Object Oriented Programming with Java	2018	<ol style="list-style-type: none"> 1. Solve and Implement solution for the problem using java basic elements like variables, control structures. 2. Handle Object Oriented Concepts effectively in the real time problems. 3. Understand the architecture and working procedure of platform independent language JAVA SDK.
3	MCA 103	Computer Organization	2018	<ol style="list-style-type: none"> 1. To gain knowledge about the Micro Processors. 2. To study the hierarchical memory system

				including cache memories and virtual memory.
4	MCA 104	Operating Systems	2018	<ol style="list-style-type: none"> 1. Learn evaluation of different types Operating System and their functionalities. 2. Learn Internal structure and the function procedure of Operating system in detail.
5	MCA 105	105A.Accounting and Financial management 105B.Accounting Essentials for Computer Applications	2018	<ol style="list-style-type: none"> 1. Use of Accounting information to managers with in the organization. 2. Informs the business decision & control the Management Functions.
6.	MCA 106 P	Software Lab I (based on 101 & 103)	2018	<ol style="list-style-type: none"> 1. The students become familiar with the Sampling Distributions like with replacement and without replacement 2. The problems in OR, Computer science, Probability, statistics deals with functions of two or more variables. To optimize something means to maximize or minimize some aspects of it. 3. Student uses a variety of strategies to investigate mathematical models of situations involving Binomial, Poisson's and Normal distribution. 4. To gain knowledge about the Micro Processors. 5. To study the hierarchical memory system including cache memories and virtual memory
7.	MCA 107 P	Object Oriented Programming Lab	2018	<ol style="list-style-type: none"> 1. Solve and Implement solution for the problem using java basic elements like variables, control structures. 2. Handle Object Oriented Concepts effectively in the real time problems.

				<ol style="list-style-type: none"> Understand the architecture and working procedure of platform independent language JAVA SDK.
8.	MCA 108P	Operating Systems Lab	2018	<ol style="list-style-type: none"> Learn evaluation of different types Operating System and their functionalities. Learn Internal structure and the function procedure of Operating system in detail.
9.	MCA 201	Computer Oriented Operations Research	2018	<ol style="list-style-type: none"> solve the problems using special solution algorithms and use CPM and PERT techniques, to plan, schedule, and control project activities. formulate and solve problems as networks and graphs and set up decision models and use some solution methods for nonlinear optimization problems. analyse the general nonlinear programming problems. formulate the nonlinear programming models.
10.	MCA 202	Data Structures using Java	2018	<ol style="list-style-type: none"> Develop a program a structured Programming Using JAVA. Develop a Memory Handling work & Sequential Data file handling. Maintain data using proper data organizing structures.
11	MCA 203	Data Communication and Computer Networks	2018	<ol style="list-style-type: none"> Understand the Network Terminologies and the components used to build networks. Understand Network Models (Topologies) to establish networked systems. Understand the internal architecture,

				working procedure of OSI Layer and Protocols.
12	MCA 204	Advanced Database Management Systems	2018	<ol style="list-style-type: none"> 1. Students will get an attempt to provide with the advanced information about ADBMS and their development. 2. This Subject also provides the conceptual background necessary to design and develop distributed database System for real life applications and also helps to learn Query optimization, centralized query optimization, Distributed query optimization algorithms. 3. How SQL Programs are implemented as a series of primitive operations and how DDBs are implemented and how applications are design for those DDB
13	MCA 205	205A. E-Commerce	2018	<ol style="list-style-type: none"> 1. Understand the basic concepts and technologies used in the field of management information systems. 2. Have the knowledge of the different types of management information systems. 3. Understand the processes of developing and implementing information systems and be aware of the ethical, social, and security issues of information systems;
14		205B. Cyber Security	2018	<ol style="list-style-type: none"> 1. Analyze and evaluate the cyber security needs of an organization and determine and analyze software vulnerabilities and security solutions to reduce the risk of exploitation. 2. Measure the performance and troubleshoot cyber security systems and implement cyber security solutions and

				<p>use of cyber security, information assurance, and cyber/computer forensics software/tools.</p> <p>3. Comprehend and execute risk management processes, risk treatment methods, and key risk and performance indicators, Design and develop a security architecture for an organization and design operational and strategic cyber security strategies and policies.</p>
15		205C. Neural Networks	2018	<p>1. Define what is Neural Network and model a Neuron and Express both Artificial Intelligence and Neural Network.</p> <p>2. Analyze ANN learning, Error correction learning, Memory-based learning, Hebbian learning, Competitive learning and Boltzmann learning.</p> <p>3. Implement Simple perception, Perception learning algorithm, Modified Perception learning algorithm, and Adaptive linear combiner, Continuous perception, learning in continuous perception.</p>
16	MCA 301	Software Engineering	2018	<p>1. Develop a system in a systematic way by using various Prescriptive Process models like Waterfall and SDLC.</p> <p>2. Develop Systems with low cost and High Performance. And Know about different types of software product types and their process and Plan a software engineering process life cycle , including the specification, design, implementation, and testing of software systems that meet</p>

				<p>specification, performance, maintenance and quality requirements.</p> <p>3. Analyze and translate a specification into a design, and then realize that design and students are able to use modern engineering tools necessary for software project management, time management and software reuse</p>
17	MCA 302	Computer Graphics	2018	<p>1. Understand the basics of computer graphics, different graphics systems and applications of computer graphics.</p> <p>2. Discuss various algorithms for scan conversion and filling of basic objects and their comparative analysis and Use of geometric transformations on graphics objects and their application in composite form.</p> <p>3. Extract scene with different clipping methods and its transformation to graphics display device, Explore projections and visible surface detection techniques for display of 3D scene on 2D screen and Render projected objects to naturalize the scene in 2D view and use of illumination models for this.</p>
18	MCA 303	Web Technologies	2018	<p>1. Explain the history of the internet and related internet concepts that are vital in understanding web development.</p> <p>2. Discuss the insights of internet programming and implement complete application over the web and students can Demonstrate the important HTML tags for designing static pages and separate</p>

				<p>design from content using Cascading Style sheet.</p> <p>3. Utilize the concepts of JavaScript and Java, Use web application development software tools i.e. Ajax, PHP and XML etc. and identify the environments currently available on the market to design web sites.</p>
19	MCA 304	304A.Data warehousing and Data mining	2018	<p>1. To identify the scope and essentiality of Data Warehousing and Mining and to analyze data, choose relevant models and algorithms for respective applications.</p> <p>2. To study spatial and web data mining.</p> <p>3. Students develop research interest towards advances in data mining.</p>
20		304B.Big Data Analytics	2018	<p>1. Understand the key issues in big data management and its associated applications in intelligent business and scientific computing.</p> <p>2. Acquire fundamental enabling techniques and scalable algorithms like Hadoop, Map Reduce and NO SQL in big data analytics.</p> <p>3. Students Interpret business models and scientific computing paradigms, and apply software tools for big data analytics and achieve adequate perspectives of big data analytics in various applications like recommender systems, social media applications</p>
21		304C System Programming	2018	<p>1. Adequate knowledge in system programs (assemblers, loaders, linkers, macro-processors, text editors, debuggers, interpreters, compilers, operating</p>

				<p>systems).</p> <ol style="list-style-type: none"> 2. Ability to use theoretical and applied information in these areas to design system software with realistic constraints. 3. Ability to conduct experiments, gather data, analyze and interpret results for investigating solutions to real life applications with assembly language programming and Unix shell programming.
22	MCA 305	305A. Cryptography and Network Security	2018	<ol style="list-style-type: none"> 1. Provide security of the data over the network and do research in the emerging areas of cryptography and network security. 2. Implement various networking protocols. 3. Protect any network from the threats in the world
23		305B.Artificial Intelligence	2018	<ol style="list-style-type: none"> 1. Demonstrate fundamental understanding of the history of artificial intelligence (AI) and its foundations and Apply basic principles of AI in solutions that require problem solving, inference, perception, knowledge representation, and learning. 2. Demonstrate awareness and a fundamental understanding of various applications of AI techniques in intelligent agents, expert systems, artificial neural networks and other machine learning models. 3. Demonstrate proficiency developing applications in an 'AI language', expert system shell, or data mining tool, Demonstrate proficiency in applying scientific

				method to models of machine learning and Demonstrate an ability to share in discussions of AI, its current scope and limitations, and societal implications.
24		305C.Mobile Application Development	2018	<ol style="list-style-type: none"> 1. Identify various concepts of mobile programming that make it unique from programming for other platforms, Critique mobile applications on their design pros and cons. 2. Utilize rapid prototyping techniques to design and develop sophisticated mobile interfaces, 3. Program mobile applications for the Android operating system that use basic and advanced phone features, and deploy applications to the Android marketplace for distribution.
25	MCA 401	401A.Cloud Computing	2018	<ol style="list-style-type: none"> 1. Explain the core concepts of the cloud computing paradigm: how and why this paradigm shift came about, the characteristics, advantages and challenges brought about by the various models and services in cloud computing. 2. Apply fundamental concepts in cloud infrastructures to understand the tradeoffs in power, efficiency and cost, and then study how to leverage and manage single and multiple datacenters to build and deploy cloud applications that are resilient, elastic and cost-efficient. 3. Discuss system, network and storage virtualization and outline their role in enabling the cloud computing system

				<p>model.</p> <p>4. Illustrate the fundamental concepts of cloud storage and demonstrate their use in storage systems such as Amazon S3 and HDFS.</p>
26		401B. Dot Net Technologies	2018	<p>1. To explore .NET technologies for designing and developing dynamic, interactive and responsive web applications.</p> <p>2. Provide a consistent, object-oriented programming environment whether object code is stored and executed locally, executed locally but webdistributed, or executed remotely.</p> <p>3. Make the developer experience consistent across widely varying types of apps, such as Windowsbased apps and Web-based apps.</p>
27		401C. Software Testing	2018	<p>1. List a range of different software testing techniques and statergies and be able to apply specific(automated) unit testing method to the projects.</p> <p>2. Distinguish characterstics of structural testing methods and demonstrate the integration testing which aims to uncover interaction and compatibility problems as early as possible.</p> <p>3. Discuss about the functional and system testing methods and demonstrate various issues for object oriented testing.</p>
28	MCA 402	402A. Essentials of Data Science	2018	<p>1. Having a clear understanding of the subject related concepts and contemporary issues.</p>

				<ol style="list-style-type: none"> 2. Having problem-solving ability- to assess social issues and engineering problems. 3. Having a clear understanding of professional and ethical responsibility. 4. Having cross-cultural competency exhibited by working as a member or in teams. And having a good working knowledge of communicating in English – communication with the engineering community and society
29		402B.Deep Learning	2018	<ol style="list-style-type: none"> 1. Understand the role of deep learning in machine learning applications and get familiar with the use of TensorFlow/Keras in deep learning applications. 2. Compare Various deep learning Algorithms used for Classification Segmentation and detection. 3. Apply various concepts related with Deep Learning to solve Problems. Analyse different deep learning models in Image related projects.
30		402C.Internet of Things	2018	<ol style="list-style-type: none"> 1. Able to understand the application areas of IOT. 2. Able to realize the revolution of Internet in Mobile Devices, Cloud & Sensor Networks. 3. Able to understand building blocks of Internet of Things and characteristics.
31	MCA 403	Major Project Work	2018	

M.Sc (CS) : Master of Computer Science

S. No.	Course Code	Title of the Course	Years of Introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/Skill development
1	MSCS -101C	Computer Organization	2018	<ol style="list-style-type: none"> 1. To gain knowledge about the Micro Processors. 2. To study the hierarchical memory system including cache memories and virtual memory.
2	MSCS -102C	Programming in Java & Data Structures	2018	<ol style="list-style-type: none"> 1. Develop a program a structured Programming Using JAVA. 2. Develop a Memory Handling work & Sequential Data file handling. 3. Maintain data using proper data organizing structures.
3	MSCS -103C	Operating Systems	2018	<ol style="list-style-type: none"> 1. Understand fundamental operating system abstractions such as processes, threads, files, semaphores, IPC abstractions, shared memory regions, etc.,. 2. Analyze important algorithms eg. Process scheduling and memory management algorithms. 3. Categorize the operating system's resource management techniques, dead lock management techniques, memory management techniques. 4. Demonstrate the ability to perform OS tasks in Red Hat Linux Enterprise.
4	MSCS – 104 GE – A	Mathematical Foundations For Computer Science	2018	<ol style="list-style-type: none"> 1. Ability to apply mathematical logic to solve problems. 2. Understand sets, relations, functions, and discrete structures. 3. Able to use logical notation to define and

				<p>reason about fundamental mathematical concepts such as sets, relations, and functions.</p> <ol style="list-style-type: none"> 4. Able to formulate problems and solve recurrence relations. 5. Able to model and solve real-world problems using graphs and trees.
5	MSCS – 104 GE - B	ComputerOriented Operational Research	2018	<ol style="list-style-type: none"> 1. Solve the problems using special solution algorithms and use CPM and PERT techniques, to plan, schedule, and control project activities. 2. Formulate and solve problems as networks and graphs and set up decision models and use some solution methods for nonlinear optimization problems. 3. Analyse the general nonlinear programming problems. 4. Formulate the nonlinear programming models.
6	MSCS - 05CF	Environmental Studies	2018	<ol style="list-style-type: none"> 1. Articulate the interconnected and interdisciplinary nature of environmental studies. 2. Demonstrate an integrative approach to environmental issues with a focus on sustainability. 3. Use critical thinking, problem-solving, and the methodological approaches of the social sciences, natural sciences, and humanities in environmental problem solving. 4. Communicate complex environmental information to both technical and non-technical audiences.

				<ol style="list-style-type: none"> Understand and evaluate the global scale of environmental problems and reflect critically on their roles, responsibilities, and identities as citizens, consumers and environmental actors in a complex, interconnected world.
7	MSCS - 106EF	1. A. PC HardwareBasics	2018	<ol style="list-style-type: none"> Identify the hardware components of a computer. Lists the hardware components such as processor, memory, disk, main board, etc. Explains the features of the hardware components of a computer. Explains the relationships between the components of a computer and how data are transferred among the components. identify the peripheral devices outside computer. Uses computer using input devices, such as keyboard and mouse. Transfers data outside the computer using output devices, such as screen and printer. Saves files to removable devices and loads files from removable devices. Connects to the Internet using network cards. identify the software's running on a computer. Identifies BIOS and changes settings in BIOS.
8	MSCS - 106EF	B. Statistical Methods	2018	<ol style="list-style-type: none"> Calculate and interpret the correlation between two variables. Calculate the simple linear regression equation for a set of data. Employee the principles of linear regression and correlation, including least square method, predicting a particular

				<p>value of Y for a given value of X and significance of the correlation coefficient.</p> <ol style="list-style-type: none"> 3. Know the association between the attributes. Know the construction of point and interval estimators. 4. Evaluate the properties of estimators. Demonstrate understanding of the theory of maximum likelihood estimation.
9	MSCS -201C	Advanced Data Base Management System	2018	<ol style="list-style-type: none"> 1. Explain and evaluate the fundamental theories for advanced database architectures and query operators. 2. Design and implement parallel database systems with evaluating different methods of storing, managing of parallel database. 3. Assess and apply database functions of distributed database. Evaluate different database designs and architecture. 4. Administer and analyze database with query optimization techniques and develop Web interface with database. 5. Understand advanced querying and decision support system.
10	MSCS -202C	Computer Networks	2018	<ol style="list-style-type: none"> 1. Describe the general principles of data communication. Describe how computer networks are organized with the concept of layered approach. 2. Describe how signals are used to transfer data between nodes. Implement a simple LAN with hubs, bridges and switches. 3. Describe how packets in the Internet are delivered. Analyze the contents in a given data link layer packet, based on the layer

				<p>concept.</p> <ol style="list-style-type: none"> Design logical sub-address blocks with a given address block. Decide routing entries given a simple example of network topology. Describe what classless addressing scheme and how routing protocols work.
11	MSCS -203C	Computer Graphics	2018	<ol style="list-style-type: none"> The course introduces the basic concepts of computer graphics. It provides the necessary theoretical background and demonstrates the application of computer science to graphics. The course further allows students to develop programming skills in computer graphics through programming assignments. Understands the core concepts and mathematical foundations of computer graphics knows fundamental computer graphics algorithms and data structures. Has an overview of different modeling approaches and methods and has detailed knowledge about basic shading and texture mapping techniques. Understands light interaction with 3D scenes.
12	MSCS- 204 GE – A	E- Commerce	2018	<ol style="list-style-type: none"> Understand the basic concepts and technologies used in the field of management information systems. Have the knowledge of the different types of management information systems. Understand the processes of developing and implementing information systems. Be aware of the ethical, social, and

				security issues of information systems;
13	MSCS- 204 GE B	Accounting And Financial Management	2018	<ol style="list-style-type: none"> 1. Use of Accounting information to managers within the organization. 2. Informs the business decision & control the Management Functions.
14	MSCS- 205CF	Human Rights And Value Education	2018	<ol style="list-style-type: none"> 1. understand the historical growth of the idea of human rights. 2. demonstrate an awareness of the international context of human rights. 3. demonstrate an awareness of the position of human rights in the UK prior to 1998. 4. understand the importance of the Human Rights Act 1998, analyse and evaluate concepts and ideas.
15	MSCS- 206 EF A	Principles Of Management	2018	<ol style="list-style-type: none"> 1. Understand the concepts related to Business. 2. Demonstrate the roles, skills and functions of management. 3. Analyze effective application of PPM knowledge to diagnose and solve organizational problems and develop optimal managerial decisions. 4. Understand the complexities associated with management of human resources in the organizations and integrate the learning in handling these complexities.
16	MSCS- 206 EF B	Internet Of Things	2018	<ol style="list-style-type: none"> 1. Able to understand the application areas of IOT. 2. Able to realize the revolution of Internet in Mobile Devices, Cloud & Sensor Networks. 3. Able to understand building blocks of Internet of Things and characteristics.

17	MSCS-301C	Data Warehousing and Data Mining	2018	<ol style="list-style-type: none"> 1. Understand the functionality of the various data mining and data warehousing component. 2. Appreciate the strengths and limitations of various data mining and data warehousing models. 3. Explain the analyzing techniques of various data. 4. Describe different methodologies used in data mining and data ware housing. 5. Compare different approaches of data ware housing and data mining with various technologies.
18	MSCS-302C	Web Technologies	2018	<ol style="list-style-type: none"> 1. Analyze a web page and identify its elements and attributes. 2. Create web pages using XHTML and Cascading Style Sheets. 3. Build dynamic web pages using JavaScript (Client side programming). Create XML documents and Schemas. 4. Build interactive web applications using AJAX.
19	MSCS-303C	Software Engineering	2018	<ol style="list-style-type: none"> 1. Develop a system in a systematic way by using various Prescriptive Process models like Waterfall and SDLC. 2. Develop Systems with low cost and High Performance. And Know about different types of software product types and their process and Plan a software engineering process life cycle , including the specification, design, implementation, and testing of software systems that meet specification, performance, maintenance

					and quality requirements. 3. Analyze and translate a specification into a design, and then realize that design and students are able to use modern engineering tools necessary for software project management, time management and software reuse
20	MSCS GE-A	-304-	Systems Programming	2018	1. Adequate knowledge in system programs (assemblers, loaders, linkers, macro-processors, text editors, debuggers, interpreters, compilers, operating systems). 2. Ability to use theoretical and applied information in these areas to design system software with realistic constraints. 3. Ability to conduct experiments, gather data, analyze and interpret results for investigating solutions to real life applications with assembly language programming and Unix shell programming. 4. Ability to devise, select, and use modern techniques and tools needed for the design and implementation of system programs.
21	MSCS GE-B	-304-	Computer Algorithms	2018	1. Apply design principles and concepts to algorithm design (c) 2. Have the mathematical foundation in analysis of algorithms (a, j) 3. Understand different algorithmic design strategies (j) 4. Analyze the efficiency of algorithms using time and space complexity theory

					(b)
22	MSCS GE-C	-304-	UID Using .NetTechnologies	2018	<ol style="list-style-type: none">1. Provide a consistent, object-oriented programming environment whether object code is stored and executed locally, executed locally but web distributed, or executed remotely.2. Build all communication on industry standards to ensure that code based on .NET Framework integrates with any other code.3. Building multi-tier enterprise applications.4. Client-side programming: HTTP, CGI, Cookies, JavaScript, HTML, XML.
23	MSCS GE-D	-304-	IT in Forensic Science	2018	<ol style="list-style-type: none">1. Approach analysis of evidence without bias.2. Develop a conceptual understanding of criminal justice system, rules of evidence, legal system.3. develop professional, ethical graduates whose competence in problem-solving, legal analysis and application, quantitative reasoning, investigation and scientific laboratory procedures can be applied to immediate employment or advanced study.
24	MSCS GE-E	-304-	Software Testing	2018	<ol style="list-style-type: none">1. Various test processes and continuous quality improvement, Types of errors and fault models.2. Methods of test generation from requirements.3. Behavior modeling using UML: Finite state machines (FSM), Test generation

				<p>from FSM models, Input space modeling using combinatorial designs.</p> <ol style="list-style-type: none"> 4. Combinatorial test generation, Test adequacy assessment using: control flow, data flow, and program mutations, The use of various test tools. 5. Application of software testing techniques in commercial environments.
25	MSCS -305 GE-A	Cloud Computing	2018	<ol style="list-style-type: none"> 1. Understand the concepts, characteristics, delivery models and benefits of cloud computing 2. Understand the key security and compliance challenges of cloud computing 3. Understand the key technical and organisational challenges 4. Understand the different characteristics of public, private and hybrid cloud deployment models.
26	MSCS -305 GE-B	Big Data Analytics	2018	<ol style="list-style-type: none"> 1. Understand Big Data and its analytics in the real world, Analyze the Big Data framework like Hadoop and NOSQL to efficiently store and process Big Data to generate analytics. 2. Design of Algorithms to solve Data Intensive Problems using Map Reduce Paradigm, Design and Implementation of Big Data Analytics using pig and spark to solve data intensive problems and to generate analytics. 3. Implement Big Data Activities using Hive.
27	MSCS -305	Artificial NeuralNetworks	2018	<ol style="list-style-type: none"> 1. Know the main provisions neuro

	GE-C			<p>mathematics, Know the main types of neural networks;</p> <ol style="list-style-type: none"> 2. Know and apply the methods of training neural networks; 3. Know the application of artificial neural networks; 4. To be able to formalize the problem, to solve it by using a neural network.
28	MSCS -305 GE-D	Cyber Security	2018	<ol style="list-style-type: none"> 1. Analyze and resolve security issues in networks and computer systems to secure an IT infrastructure. 2. Design, develop, test and evaluate secure software. 3. Develop policies and procedures to manage enterprise security risks. 4. Evaluate and communicate the human role in security systems with an emphasis on ethics, social engineering vulnerabilities and training. 5. Interpret and forensically investigate security incidents.
29	MSCS -305 GE-E	Mobile App Development	2018	<ol style="list-style-type: none"> 1. Describe those aspects of mobile programming that make it unique from programming for other platforms, 2. Critique mobile applications on their design pros and cons, 3. Utilize rapid prototyping techniques to design and develop sophisticated mobile interfaces, 4. Program mobile applications for the Android operating system that use basic and advanced phone features, and 5. Deploy applications to the Android

				marketplace for distribution.
--	--	--	--	-------------------------------

47. Commerce

M.Com (Regular)

S. No .	Course Code	Title of the Course	Years of Introduction	Activities/Content with direct bearing on Employability/Entrepreneurship /Skill development
1	101	Accounting Standards & Reporting	2018	i. Increase the knowledge of students on accounting principles and standards and To enable the students to do inventory valuation ii. Impart the ability to find out the cash flows and provide the skills to value goodwill iii. Create awareness about IFRS and segment reporting
2	102.	Financial Management	2018	i. Describe meaning, functions and objectives; role of financial manager. ii. Examine investment decision, capital budgeting, techniques of CB and methods of CB. iii. Investigate management of working capital, needs and concepts. iv. Asses financing decision, capital structure and capital theories. v. Design dividend decision and theories of dividend.
3	103.	Business Environment and Policy	2018	i. Examine business environment, concept, nature and scope; scanning, monitoring, changing dimensions of business environment. ii. Illustrates economic environment nature and scope and new economic policy. iii. Develop political, legal environment; reasons for state intervention and government business interface.

				<p>iv. Study the socio cultural environment nature, impact of social responsibility and business ethics.</p> <p>v. Interpret global environment; benefits and problems of MNCs and WTO.</p>
4	104.	Organisational Behaviour	2018	<p>i. Acquire knowledge on the conceptual frame work and emerging issues of OB and Study different theories of personality and motivation</p> <p>ii. Form a clear idea on group dynamics and inculcate the skills to become a leader and Learn about Organizational structures and clear understanding of management of Interpersonal conflicts.</p> <p>iii. Obtain knowledge on Organization dynamics as to organization culture, organizational change and know the significance of OB today.</p>
5	105a	Quantitative Techniques for Business Decisions	2018	<p>i. Appreciate the use of quantitative techniques, methods of business forecasting and quantitative techniques in business decisions.</p> <p>ii. Formulate F distribution and multiple co-relations co-efficient and study probability and non-probability distributions.</p> <p>iii. Formulate sampling theory, testing of hypothesis and type I and type II errors and Identify linear programming advantages and disadvantages; graphical and simplex method.</p>
7	201	Advanced cost Accounting	2018	<p>i. Obtain knowledge on the concept of cost accounting and know how it is different from financial and management accounting;</p> <p>ii. Understand the features and objectives of process costing and calculation of process losses and Inter-process profits.</p> <p>iii. Know the concept of equivalent production and accounting treatment for joint and by-products and acquire knowledge on budgetary control and preparation of various functional budgets.</p>

				iv. Perceive the significance of ABC in cost ascertainment and control.
8	202.	Financial Markets and Services	2018	i. To understand the framework of Indian financial system and money market and evaluate the metrics of primary market and secondary capital market. ii. Demonstrate the role of merchant bankers and to analyze the metrics involved in credit rating the financial instruments issued by companies in primary market. iii. Create plans and understand the metrics for getting finance from venture capital firms.
9	203.	Strategic Financial Management	2018	i. Describe strategic management concept, importance and purpose; strategic planning concept and characteristics, ii. Explain Strategic financial management success factors and constraints. iii. Illustrate corporate valuation approaches and guidelines; value based management. iv. Identify financial distress and restructuring; countering financial distress. v. Justify corporate sickness and financial engineering; fund raising and fund deployment strategies.
10	204.	Corporate Governance	2018	i. Obtain knowledge on CG Mechanism and emerging issues in CG and Know the genesis of CG in China USA and UK and also the code of the best practices. ii. Gain Knowledge on the historical backdrop of CG in India and the guild lines pronounced by various committees for effective practice in India. iii. Discern knowledge on the composition of Board of Directors and Audit Committees and know the role of internal Auditors in India. iv. Understand the CG standards and practices in India with focus on IT and futures of CG in India.
11	205a	Working Capital Management	2018	i. To impart basic knowledge on working capital concepts and source of WC and to provide the skills to estimate working capital ii. To enables the students familiarise with the cash management techniques and

				<p>comprehend the concept of receivables and its management.</p> <p>iii. To provide the skills of inventory management with different techniques.</p>
12	206a	e-Banking Operations	2018	<p>i. To understand the RBI's financial norms to be followed by commercial banks and to investigate into the roles of various commercial banks in India.</p> <p>ii. To analyze the mechanism of offline and online borrowing and lending of funds and familiarize with merits and demerits of e-banking applications.</p> <p>iii. Categorize the financial frauds in e-banking sector.</p>
13	301	Security Analysis and Portfolio Management	2018	<p>i. Find security analysis, basics of investment and objectives; fundamental analysis and technical analysis and outline valuation of securities, constant growth and multiple growth models.</p> <p>ii. Illustrate portfolio theory, CAPM, SML and APT models and investigate portfolio evaluation; Sharpe's, Treynor's and Jensen's performance index.</p> <p>iii. Synthesize portfolio revision, need and strategies.</p>
14	302.	Accounting for Managerial Decisions	2018	<p>i. Learn the concept of management accounting, cost analysis for pricing decision and different methods of pricing and understand different managerial decisions influencing short and long-term financing.</p> <p>ii. Study the concept of Responsibility Accounting and its uses and trends.</p> <p>iii. Know the essential parameters for evaluation of divisional performance and the emerging issues today</p> <p>iv. Obtain comprehensive knowledge on management reporting and reporting practices of Indian corporates.</p>

15	303a	Tally with GST Application	2018	<ul style="list-style-type: none"> i. To acquaint oneself with skills to prepare financial statements through Tally ERP. ii. To understand basics of GST system and to know steps involved in generating GSTR reports. iii. To know the metrics in calculation and generation of TDS and service tax reports and to acquire skills to create payroll receipts.
16	303c	Tax planning & Management	2018	<ul style="list-style-type: none"> i. To comprehend the basic knowledge about tax concepts and planning and To provide knowledge on sources of income under different heads ii. Acquire the knowledge on tax planning with regard to location iii. To provide the skills of tax planning regard to managerial decisions and create awareness about tax incentive of exports.
18	305a	Fundamentals of Accounting	2018	<ul style="list-style-type: none"> i. To provide basic knowledge on accounting and its preparation and enable the students to prepare final accounts ii. To help the students to acquire the skills of financial statement analysis iii. To provide the basic knowledge on cost accounting and develop the student ability to use the tools of management accounting.
19	401	Financial Derivatives	2018	<ul style="list-style-type: none"> i. Outline financial derivatives concepts, features and types; traders in financial derivatives markets and identify forwards and future contracts concepts, types, uses and functions. ii. Prioritise options in financial derivatives and option pricing models. iii. Compose swap market futures, types and interest rate; pricing swaps. iv. Synthesize stock index futures, options and trading of stock futures and options.
20	402.	Project Planning & Control	2018	<ul style="list-style-type: none"> i. Define a project and operations of corporate long range planning and phases of capital budgeting. ii. Distinguishes project ideas and technical analysis, project rating index and

				<p>methods of forecasting.</p> <p>iii. Illustrates financial analysis project planning, forms of project organization and performance evaluation of project.</p> <p>iv. Understand Social cost benefit analysis and methods of SCBA</p> <p>v. Contrast public projects context of Indian projects, approval procedure and guidelines for preparation of feasibility report.</p>
21	403a	Insurance Management	2018	<p>i. Perceive the concept of RM, Socio-economic relevance, regulatory framework and latest development in Insurance sector.</p> <p>ii. Acquire knowledge on various types of life insurance policies and the terminology relating to the concept of insurance.</p> <p>iii. Understand different types of non-life insurance with reference to marine and fire insurance and their progress and claim settlement thereon.</p> <p>iv. Seek awareness on miscellaneous insurance including health, personal accident crop insurance and practical problems in implementation and claim settlement.</p> <p>v. Understand different aspects of management of investments of funds by LIC and GIS, Legal restrictions on their investments. Also exhibit the global insurance scenario and future prospects of India insurance.</p>
23	405a	Security Market Operations	2018	<p>i. Learn the basic concepts of Indian securities market.</p> <p>ii. Explore the areas of secondary markets in special reference to SEBI guidelines and exemplify about listing of securities in BSE and NSE.</p> <p>iii. Investigate into Indian stock exchanges and Illustrate about stock market with special reference to BSE sensex and NSE indices.</p>

S. No .	Cou rse Cod e	Title of the Course	Years of Introductio n	Activities/Content with direct bearing on Employability/Entrepreneurship /Skill development
1	101	Accounting Standards & Reporting	2018	iv. Increase the knowledge of students on accounting principles and standards and To enable the students to do inventory valuation v. Impart the ability to find out the cash flows and provide the skills to value goodwill vi. Create awareness about IFRS and segment reporting
2	102.	Financial Management	2018	vi. Describe meaning, functions and objectives; role of financial manager. vii. Examine investment decision, capital budgeting, techniques of CB and methods of CB. viii. Investigate management of working capital, needs and concepts. ix. Assess financing decision, capital structure and capital theories. x. Design dividend decision and theories of dividend.
3	103.	Business Environment and Policy	2018	vi. Examine business environment, concept, nature and scope; scanning, monitoring, changing dimensions of business environment. vii. Illustrates economic environment nature and scope and new economic policy. viii. Develop political, legal environment; reasons for state intervention and government business interface. ix. Study the socio cultural environment nature, impact of social responsibility and business ethics. x. Interpret global environment; benefits and problems of MNCs and WTO.
4	104.	Organisational Behaviour	2018	iv. Acquire knowledge on the conceptual frame work and emerging issues of OB and Study different theories of personality and motivation v. Form a clear idea on group dynamics and inculcate the skills to become a

				<p>leader and Learn about Organizational structures and clear understanding of management of Interpersonal conflicts.</p> <p>vi. Obtain knowledge on Organization dynamics as to organization culture, organizational change and know the significance of OB today.</p>
5	105a	Quantitative Techniques for Business Decisions	2018	<p>iv. Appreciate the use of quantitative techniques, methods of business forecasting and quantitative techniques in business decisions.</p> <p>v. Formulate F distribution and multiple co-relations co-efficient and study probability and non-probability distributions.</p> <p>vi. Formulate sampling theory, testing of hypothesis and type I and type II errors and Identify linear programming advantages and disadvantages; graphical and simplex method.</p>
7	201	Advanced cost Accounting	2018	<p>v. Obtain knowledge on the concept of cost accounting and know how it is different from financial and management accounting;</p> <p>vi. Understand the features and objectives of process costing and calculation of process losses and Inter-process profits.</p> <p>vii. Know the concept of equivalent production and accounting treatment for joint and by-products and acquire knowledge on budgetary control and preparation of various functional budgets.</p> <p>viii. Perceive the significance of ABC in cost ascertainment and control.</p>
8	202.	Financial Markets and Services	2018	<p>iv. To understand the framework of Indian financial system and money market and evaluate the metrics of primary market and secondary capital market.</p> <p>v. Demonstrate the role of merchant bankers and to analyze the metrics involved in credit rating the financial instruments issued by companies in primary market.</p> <p>vi. Create plans and understand the metrics for getting finance from venture</p>

				capital firms.
9	203.	Strategic Financial Management	2018	vi. Describe strategic management concept, importance and purpose; strategic planning concept and characteristics, vii. Explain Strategic financial management success factors and constraints. viii. Illustrate corporate valuation approaches and guidelines; value based management. ix. Identify financial distress and restructuring; countering financial distress. x. Justify corporate sickness and financial engineering; fund raising and fund deployment strategies.
10	204.	Corporate Governance	2018	v. Obtain knowledge on CG Mechanism and emerging issues in CG and Know the genesis of CG in China USA and UK and also the code of the best practices. vi. Gain Knowledge on the historical backdrop of CG in India and the guild lines pronounced by various committees for effective practice in India. vii. Discern knowledge on the composition of Board of Directors and Audit Committees and know the role of internal Auditors in India. viii. Understand the CG standards and practices in India with focus on IT and futures of CG in India.
11	205a	Working Capital Management	2018	iv. To impart basic knowledge on working capital concepts and source of WCand to provide the skills to estimate working capital v. To enables the students familiarise with the cash management techniques and comprehend the concept of receivables and its management. vi. To provide the skills of inventory management with different techniques.
12	206a	e-Banking Operations	2018	iv. To understand the RBI's financial norms to be followed by commercial banks

				<p>and to investigate into the roles of various commercial banks in India.</p> <p>v. To analyze the mechanism of offline and online borrowing and lending of funds and familiarize with merits and demerits of e-banking applications.</p> <p>vi. Categorize the financial frauds in e-banking sector.</p>
13	301	Security Analysis and Portfolio Management	2018	<p>iv. Find security analysis, basics of investment and objectives; fundamental analysis and technical analysis and outline valuation of securities, constant growth and multiple growth models.</p> <p>v. Illustrate portfolio theory, CAPM, SML and APT models and investigate portfolio evaluation; Sharpe's, Treynor's and Jensen's performance index.</p> <p>vi. Synthesize portfolio revision, need and strategies.</p>
14	302.	Accounting for Managerial Decisions	2018	<p>v. Learn the concept of management accounting, cost analysis for pricing decision and different methods of pricing and understand different managerial decisions influencing short and long-term financing.</p> <p>vi. Study the concept of Responsibility Accounting and its uses and trends.</p> <p>vii. Know the essential parameters for evaluation of divisional performance and the emerging issues today</p> <p>viii. Obtain comprehensive knowledge on management reporting and reporting practices of Indian corporates.</p>
15	303a .	Tally with GST Application	2018	<p>iv. To acquaint oneself with skills to prepare financial statements through Tally ERP.</p> <p>v. To understand basics of GST system and to know steps involved in generating GSTR reports.</p>

				vi. To know the metrics in calculation and generation of TDS and service tax reports and to acquire skills to create payroll receipts.
16	303c	Tax planning & Management	2018	iv. To comprehend the basic knowledge about tax concepts and planning and To provide knowledge on sources of income under different heads v. Acquire the knowledge on tax planning with regard to location vi. To provide the skills of tax planning regard to managerial decisions and create awareness about tax incentive of exports.
18	305a	Fundamentals of Accounting	2018	iv. To provide basic knowledge on accounting and its preparation and enable the students to prepare final accounts v. To help the students to acquire the skills of financial statement analysis vi. To provide the basic knowledge on cost accounting and develop the student ability to use the tools of management accounting.
19	401	Financial Derivatives	2018	v. Outline financial derivatives concepts, features and types; traders in financial derivatives markets and identify forwards and future contracts concepts, types, uses and functions. vi. Prioritise options in financial derivatives and option pricing models. vii. Compose swap market futures, types and interest rate; pricing swaps. viii. Synthesize stock index futures, options and trading of stock futures and options.
20	402.	Project Planning & Control	2018	vi. Define a project and operations of corporate long range planning and phases of capital budgeting. vii. Distinguishes project ideas and technical analysis, project rating index and methods of forecasting. viii. Illustrates financial analysis project planning, forms of project organization and performance evaluation of project. ix. Understand Social cost benefit analysis and methods of SCBA

				x. Contrast public projects context of Indian projects, approval procedure and guidelines for preparation of feasibility report.
21	403a	Insurance Management	2018	vi. Perceive the concept of RM, Socio-economic relevance, regulatory framework and latest development in Insurance sector. vii. Acquire knowledge on various types of life insurance policies and the terminology relating to the concept of insurance. viii. Understand different types of non-life insurance with reference to marine and fire insurance and their progress and claim settlement thereon. ix. Seek awareness on miscellaneous insurance including health, personal accident crop insurance and practical problems in implementation and claim settlement. x. Understand different aspects of management of investments of funds by LIC and GIS, Legal restrictions on their investments. Also exhibit the global insurance scenario and future prospects of India insurance.
23	405a	Security Market Operations	2018	iv. Learn the basic concepts of Indian securities market. v. Explore the areas of secondary markets in special reference to SEBI guidelines and exemplify about listing of securities in BSE and NSE. vi. Investigate into Indian stock exchanges and Illustrate about stock market with special reference to BSE sensex and NSE indices.

M.Com (FM)

S. No	Course	Title of the Course	Years of Introductio	Activities/Content with direct bearing on Employability/Entrepreneurship /Skill development
-------	--------	---------------------	----------------------	---

. n	Cod e		n	
1	101	Accounting Standards & Reporting	2018	vii. Increase the knowledge of students on accounting principles and standards and To enable the students to do inventory valuation viii. Impart the ability to find out the cash flows and provide the skills to value goodwill ix. Create awareness about IFRS and segment reporting
2	102.	Financial Management	2018	xi. Describe meaning, functions and objectives; role of financial manager. xii. Examine investment decision, capital budgeting, techniques of CB and methods of CB. xiii. Investigate management of working capital, needs and concepts. xiv. Asses financing decision, capital structure and capital theories. xv. Design dividend decision and theories of dividend.
3	103.	Business Environment and Policy	2018	xi. Examine business environment, concept, nature and scope; scanning, monitoring, changing dimensions of business environment. xii. Illustrates economic environment nature and scope and new economic policy. xiii. Develop political, legal environment; reasons for state intervention and government business interface. xiv. Study the socio cultural environment nature, impact of social responsibility and business ethics. xv. Interpret global environment; benefits and problems of MNCs and WTO.
4	104.	Organisational Behaviour	2018	vii. Acquire knowledge on the conceptual frame work and emerging issues of OB and Study different theories of personality and motivation viii. Form a clear idea on group dynamics and inculcate the skills to become a leader and Learn about Organizational structures and clear understanding of management of Interpersonal conflicts. ix. Obtain knowledge on Organization dynamics as to organization culture, organizational change and know the significance of OB today.

5	105a	Quantitative Techniques for Business Decisions	2018	<p>vii. Appreciate the use of quantitative techniques, methods of business forecasting and quantitative techniques in business decisions.</p> <p>viii. Formulate F distribution and multiple co-relations co-efficient and study probability and non-probability distributions.</p> <p>ix. Formulate sampling theory, testing of hypothesis and type I and type II errors and Identify linear programming advantages and disadvantages; graphical and simplex method.</p>
7	201	Advanced cost Accounting	2018	<p>ix. Obtain knowledge on the concept of cost accounting and know how it is different from financial and management accounting;</p> <p>x. Understand the features and objectives of process costing and calculation of process losses and Inter-process profits.</p> <p>xi. Know the concept of equivalent production and accounting treatment for joint and by-products and acquire knowledge on budgetary control and preparation of various functional budgets.</p> <p>xii. Perceive the significance of ABC in cost ascertainment and control.</p>
8	202.	Financial Markets and Services	2018	<p>vii. To understand the framework of Indian financial system and money market and evaluate the metrics of primary market and secondary capital market.</p> <p>viii. Demonstrate the role of merchant bankers and to analyze the metrics involved in credit rating the financial instruments issued by companies in primary market.</p> <p>ix. Create plans and understand the metrics for getting finance from venture capital firms.</p>
9	203.	Strategic Financial Management	2018	<p>xi. Describe strategic management concept, importance and purpose; strategic planning concept and characteristics,</p> <p>xii. Explain Strategic financial management success factors and constraints.</p>

				<p>xiii. Illustrate corporate valuation approaches and guidelines; value based management.</p> <p>xiv. Identify financial distress and restructuring; countering financial distress.</p> <p>xv. Justify corporate sickness and financial engineering; fund raising and fund deployment strategies.</p>

Explore the areas of secondary markets in special reference to SEBI guidelines and exemplify about listing of securities in BSE and NSE.</p> <p>ix. Investigate into Indian stock exchanges and Illustrate about stock market with special reference to BSE sensx and NSE indices.</p>

48. B. Pharmacy

S.No.	Course Code	Title of the Course	Years of Introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/Skill development
1	BPH 101A	Mathematics (For Bi.P.C. Stream)	2018	<p>1. This program shall create an awareness about the mathematical problems, to develop an statistical evaluation.</p> <p>2. To adopt skills in identifying and solving problems.</p> <p>3. Know the theory and their application in</p>

				Pharmacy research 4. Solve the different types of problems by applying theory in drug discovery
2	BPH 101B	Biology (For M.P.C. Stream)	2018	
3	BPH 101C	Biology Practicals (For M.P.C. Stream)	2018	
4	BPH 102	English & Soft Skills	2018	<p>1.To equip students with Pre-presentations and to understand the structure of a good presentation and devise various techniques for delivering a successful presentation. To help students overcome stage fear and take questions.</p> <p>2.To enable the students to become global citizens.</p> <p>3.This course will prepare the young pharmacy student to interact effectively with doctors, nurses and other health workers.</p> <p>4.At the end of the course the students will get the soft skills set to work cohesively with the team as a team player and add value to the pharmaceutical business.</p>
5	BPH 103	Pharmaceutical. Inorganic Chemistry	2018	<p>1.To understand the history and concept of pharmacopoeia and its editions.</p> <p>2. Knowledge about the sources of impurities and methods to determine the impurities in inorganic</p>

				<p>pharmaceuticals.</p> <p>3. Identification of limit tests of different pharmaceutical inorganic compounds.</p> <p>4. To understand the method to prepare inorganic pharmaceuticals.</p> <p>5. To justify the medicinal importance of acidifiers, antacids, cathartics and antimicrobial agents as gastrointestinal agents.</p> <p>6. To discuss the handling and applications of radiopharmaceuticals.</p>
6.	BPH 104	Pharmaceutical Organic Chemistry-I	2018	<p>1. Guess and write the structure, systematic/ trivial name, and pharmaceutical uses (if any) associated with the specified organic compounds.</p> <p>2. Understand the general concept of isomerism and distinguish structural isomers.</p> <p>3. Infer the chemical nature of the compounds on the basis of qualitative chemical tests.</p> <p>4. Understand the significance of certain electronic effects with respect to the reactivity/ stability of organic compounds specified.</p> <p>5. Understand and gain insight into the organic reactions by analyzing their fair reaction mechanisms</p>
7.	BPH 105	Human Anatomy and Physiology	2018	<p>1. Know the fundamental knowledge on the structure and functions of the various systems of</p>

				<p>the human body.</p> <p>2.understanding all the homeostatic mechanisms of the body</p> <p>3.Understand the relationship of anatomy with various disciplines of pharmacy.</p> <p>4.Understand the dynamic constancy of the body, cell and its components, tissue and types of tissue, blood and its function and composition</p>
8.	BPH 106	Pharmaceutical Inorganic Chemistry Practicals	2018	<p>1. To recall the sources of limit tests, preparation and identification of compounds.</p> <p>2. To demonstrate the preparation of inorganic pharmaceuticals</p> <p>3. To apply knowledge to perform modified limit tests.</p> <p>4. To analyze various inorganic pharmaceutical compounds.</p> <p>5. To select suitable method for the preparation of inorganic pharmaceuticals.</p> <p>6. To assess quality of inorganic pharmaceuticals.</p>
9.	BPH 107	Pharmaceutical Organic Chemistry-I Practicals	2018	<p>1.Assess the identity in terms of the physico-chemical properties of the compounds of specified chemical classes</p>

				2. Get hands-on experience in basic techniques of organic synthesis
10.	BPH 108	Human Anatomy and Physiology Practicals	2018	<ol style="list-style-type: none"> 1. Differentiate the structures of the various systems of the human body. 2. Perform the experiments like blood cell count, hemoglobin content, bleeding and clotting time and various physiological Parameters theoretically and practically. 3. Identify the structural (microscopically and macroscopically) and functional details about different organ systems such as cardiovascular, lymphatic, digestive, muscular system
11	BPH 109	General & Dispensing Pharmacy	2018	Course enables the student to understand and appreciate the influence of pharmaceutical additives and various pharmaceutical dosage forms on the performance of the drug product
12	BPH 110	Pharmaceutical Organic Chemistry-II	2018	<ol style="list-style-type: none"> 1. Guess and write the structure, systematic/ trivial name, and pharmaceutical uses (if any) associated with the specified organic compounds. 2. Understand the general concept of isomerism and distinguish structural isomers. 3. Infer the chemical nature of the compounds on the basis of qualitative chemical tests. 4. Understand the significance of certain electronic effects with respect to the reactivity/ stability of organic compounds specified. 5. Understand and gain insight into the organic reactions by analyzing their fair reaction mechanisms
13	BPH 111	Computer applications	2018	1 know the various types of application of

				<p>computers in pharmacy profession</p> <p>2. know the various types of databases used in profession</p> <p>3. know the usage of softwares in pharmacy</p>
14	BPH 112	Pharmacognosy I	2018	<p>The main purpose of subject is to impart the students the knowledge of how the secondary metabolites are produced in the crude drugs, how to isolate and identify and produce them industrially. Also this subject involves the study of producing the plants and phytochemicals through plant tissue culture, drug interactions and basic principles of traditional system of medicine.</p>
15	BPH 113	Human Anatomy and Physiology and Pathophysiology	2018	<p>1. Identifies Name the signs, symptoms and complications of the diseases.</p> <p>2. Students Get thorough knowledge of the relevant aspects of pathology of various conditions with reference to its pharmacological applications, and understanding of basic pathophysiological mechanisms.</p> <p>3. To Study the aetiology and pathogenesis of the selected disease states</p> <p>4. The baseline knowledge required to practice</p>

				medicine safely, confidently, rationally and effectively.
16	BPH 114	General & Dispensing Pharmacy Practicals	2018	This is help to understand the basic information of formulation process and how to optimise quality control solid, semisolid and parenteral dosage forms
17	BPH 115	Pharmaceutical Organic Chemistry-II Practicals	2018	This subject is designed to impart fundamental knowledge on the structure, chemistry and therapeutic value of drugs. The subject emphasizes on structure activity relationships of drugs, importance of physicochemical properties and metabolism of drugs. The syllabus also emphasizes on chemical synthesis of important drugs under each class
18	BPH 116	Computer applications Practicals	2018	1. know the various types of application of computers in pharmacy profession 2. know the various types of databases used in profession 3. know the usage of softwares in pharmacy
19	BPH 117	Pharmacognosy I Practicals	2018	To know the modern extraction techniques, characterization and identification of the herbal drugs and phytoconstituents by use chromatographic technique
20	BPH 201	Physical pharmacy –I (Theory)	2018	1. The course deals with the various physical and physicochemical properties, and principles involved in dosage forms/formulations. 2. Theory and practical components of the subject help the student to get a better insight into various areas of formulation research and development, and stability studies of pharmaceutical dosage forms.

21	BPH 202	Pharmaceutical Engineering (Theory)	2018	<ol style="list-style-type: none"> 1. To know various unit operations involved in manufacturing of pharmaceuticals. 2. To understand the concepts of flow of fluids, size reduction and size separation. 3 To perform different mechanisms of heat transfer. 4 To compare and contrast different types of evaporation and distillation process. 5 To determine the factors influencing mixing, filtration and centrifugation. 6 To elaborate various preventive methods used for corrosion control in pharmaceutical industries.
22	BPH 203	Pharmaceutical organic chemistry III (Theory)	2018	<ul style="list-style-type: none"> • Guess and writethestructure according to the stereochemical specifications. • Fairly understand the aspects of heterocyclic chemistry in terms of naming and reactivity. • Assess and understand the pharmaceutical applications and importance of the specified named reactions.
23	BPH 204	Pharmaceutical Biochemistry (Theory)	2018	<ol style="list-style-type: none"> 1.Understand the principles of various fields of chemistry and biology (organic chemistry, analytical chemistry, biochemistry, genetics, metabolism, and molecular biology) 2.Develop as independent thinkers who are responsible for their own learning. Develop transferable quantitative skills.

24	BPH 205	Environmental studies (Theory)	2018	<p>This program shall create an awareness about environmental problems, develop an attitude towards of concern for the environment.</p> <p>2 To compare the natural, renewable and non-renewable resources and the problems associated with them.</p> <p>3 To motivate the learners to participate in environment protection and improvement.</p> <p>4 To analyze the concepts of eco system including structure and functions.</p> <p>5 To adopt skills in identifying and solving environmental problems.</p> <p>6 To develop an attitude of concern for the environment</p>
25	BPH 206	Physical pharmacy –I (Practical)	2018	<p>This course helps to compare and evaluate the solubility of various combination compound modify for better solubility approaches by use different level of methods</p>
26	BPH 207	Pharmaceutical Engineering (Practical)	2018	<p>To understand the basic principles involved in unit operations such as size reduction, size separation, distillation and drying.</p> <p>2. To demonstrate and explain about the construction, working and applications of pharmaceutical equipment's such as colloid</p>

				<p>mill, planetary mixer, fluidized bed dryer and freeze dryer.</p> <p>3. To experiment with the process variables of filtration, evaporation and infer the same.</p> <p>4. To determine radiation constant of brass, iron, unpainted and painted glass.</p> <p>5. To determine overall heat transfer coefficient by heat exchanger and calculate the efficiency of steam distillation.</p> <p>6. To estimate moisture content, loss on drying and construct drying curves for calcium carbonate and starch.</p>
27	BPH 208	Pharmaceutical organic chemistry III (Practical)	2018	<ol style="list-style-type: none"> 1. Guess and write the structure, systematic/trivial name, and pharmaceutical uses (if any) associated with the specified organic compounds. 2. Understand the general concept of isomerism and distinguish structural isomers. 3. Infer the chemical nature of the compounds on the basis of qualitative chemical tests. 4. Understand the significance of certain electronic effects with respect to the reactivity/ stability of organic compounds specified. 5. Understand and gain insight into the

				organic reactions by analyzing their fair reaction mechanisms
28	BPH 209	Pharmaceutical Biochemistry (Practical)	2018	<p>.1. Understand the principles of various fields of chemistry and biology (organic chemistry, analytical chemistry, biochemistry, genetics, metabolism, and molecular biology)</p> <p>2. Develop as independent thinkers who are responsible for their own learning.</p> <p>3. Develop transferable quantitative skills.</p>
29	BPH 210	Physical Pharmacy II (Theory)	2018	<p>1. The course deals with the various physical and physicochemical properties, and principles involved in dosage forms/formulations.</p> <p>2. Theory and practical components of the subject help the student to get a better insight into various areas of formulation research and development, and stability studies of pharmaceutical dosage forms</p>
30	BPH 211	Pharmaceutical Analysis I (Theory)	2018	<p>1) To understand selected instrumental analytical techniques (spectroscopic and chromatographic methods) and differentiate with volumetric analysis.</p> <p>To gain knowledge on interaction of EMR with matter and to build the analytical understanding at the level of atom, group and molecular structure of organic and inorganic compounds with different functional groups and their applications in pharmacy.</p> <p>3) To maximize knowledge on characterization and estimation of ions by spectroscopical techniques</p> <p>4) To simplify affinity of matter with stationary</p>

				phase and mobile phase, physical and chemical.
31	BPH 212	Pharmaceutical Technology I (Theory)	2018	<ol style="list-style-type: none"> 1. basic concepts in the field of drug delivery systems that is used in Pharmaceutical Technology. 2. uses pharmaceutical information sources medical 3. Lists in the form of liquid drug delivery systems. 4. Defines the concepts of dissolution, solubility and stability. 5. Design Solution formulations.
32	BPH 213	Pharmacognosy II (Theory)	2018	<p>This subject is intended to impart students about the fundamental knowledge of how the secondary metabolites are produced in the crude drugs, how to isolate and identify and produce them industrially, involved in the study of producing plants and phytochemicals through plant tissue culture, drug interactions and basic principles of traditional system of medicine.</p> <ol style="list-style-type: none"> 1. Significance of pharmacognostic parameters & study of crude drugs. 2. Understand the underlying reason of evolutionary significance of secondary metabolites production in plants & other organisms & deduce their significance as medicinal molecules. 3. How these primary metabolites are used comprehensively as a source to develop Pharmaceutical & industrial applications. <p>Study about the source, name, chemical structures, methods of extraction, qualitative & quantitative analysis of glycosides & tannin</p>

				compounds of plant origin.
--	--	--	--	----------------------------

33	BPH 214	Pharmacoinformatics & Basics in drug discovery (Theory)	2018	<ol style="list-style-type: none"> 1. Thorough Knowledge on Bioinformatics and its classification. 2. Importance of drug discovery, lead molecules in the preparation of drugs in pharmaceutical industries. 3. Good information about drug design, ligand – receptor mechanism and its applications. 4. How this subject is collaborate with other disciplinary subjects, Understanding Genomics & transcriptomics.
34	BPH 215	Pharmaceutical pharmacy II (Practical)	2018	This course helps to compare and evaluate the solubility of various combination compound modify for better solubility approaches by use different level of methods
35	BPH 216	Pharmaceutical Analysis I (Practical)	2018	<ol style="list-style-type: none"> 1. Discusses the effect of impurities on the quality of drugs and behavioural pattern of drugs 2. Aids in understanding the SOP and usage of software associated with various analytical instruments <p>Helps in gaining knowledge of interpretation of spectra and of chromatograms</p>
36	BPH 217	Pharmaceutical technology I (Practical)	2018	<ol style="list-style-type: none"> 1. Preparing the solutions 2. Preparing the emulsions 3. Preparing the syrups 4. Preparing the semisolid dosage forms
37	BPH 218	Pharmacognosy II (Practical)	2018	<ol style="list-style-type: none"> 1. Demonstrate chemical tests to identify

				unorganized crude drugs 2. Evaluate the quality and purity of crude drugs 3. Perform linear measurements for crude drug identification Develop quality control methods for standardisation of herbal drugs
38	BPH 301	Pharmaceutical Technology-II	2018	Course enables the student to understand and appreciate the influence of pharmaceutical manufacture of various pharmaceutical dosage forms on the performance of the drug product by use of specific technology
39	BPH 302	Medicinal chemistry - I	2018	1. Gain knowledge on physicochemical and biological aspects of various drug classes. 2. Judge the effect of structural modifications with respect to biological activity Develop awareness about the application of organic synthesis with respect to preparation of drugs
40	BPH 303	Pharmacology - I	2018	1. Gain knowledge on pharmacokinetic and pharmacodynamic aspects of drugs in general. 2. Develop understanding about physiological, pathological, and pharmacological concepts of nervous system.
41	BPH 304	Pharmaceutical microbiology	2018	1. To know the various types of sterile products with their formulation in large scale industries.

				2.To acquire knowledge on GMP standards sanitation, personal hygiene in sterile product manufacturing facilities.
41	BPH 305	Drug store and Industrial Management and Marketing	2018	1.This course helps to understand the students how to establish the drug store and functioning the proper channels and also procurement and dispensing of drugs procedure as per government norms. 2. Gain knowledge on functioning and management of pharma industry and know the regulating process in all aspects
42	BPH 306	Pharmaceutical Technology-II	2018	This course helps to Identify, formulate, research on pharmaceutical solid and parenteral dosage form and solve complex problems in quality control of product
43	BPH 307	Medicinal chemistry-I practicals	2018	This course helps to how to separation and identification compound given unknown mixture. It imparts take it knowledge on crude separation and identification technique
44	BPH 308	Pharmaceutical Microbiology practicals	2018	1.This course help to able to understand the different levels of microorganism growth at different conditions. 2.Gain knowledge of the various types of sterile products with their formulation in large scale industries and acquire knowledge on GMP standards sanitation, personal hygiene in sterile product manufacturing facilities
45	BPH 309	Medicinal chemistry-II (theory)	2018	1.Gain knowledge on physicochemical and biological aspects of various drug classes. 2.Judge the effect of structural modification with respect to biological activity 3.Develop awareness about the application of organic synthesis with respected preparation of drugs

46	BPH310	Pharmacology II– Theory	2018	<p>1. In continuation with the previous semester, this subject would have continued describing about the different drugs used for the treatment of diseases.</p> <p>2. Students understood the mechanism of drug action and its relevance in the treatment of different diseases.</p> <p>3. Have understood about the drugs used to treat respiratory disorders, metabolic disorders, coagulants and anti-coagulants.</p> <p>4. Recognise and explain the rationales behind the use of widely used, national organization approved treatment for the management and treatment of common diseases and conditions.</p> <p>5. Gained knowledge on the new targets of several disease conditions for the treatment</p>
47	BPH311	Pharmaceutical. Analysis II(Theory)	2018	<p>1.Gain knowledge on identification of functional groups of various drugsand other excipients.</p> <p>2.Judge the chemical interaction between the compound that effect on structural modification ions with respect to biological activity</p> <p>3.Develop awareness about the analytical equipment which are help to obtaina good quality control of pharmaceutical formulation as per pharmacopeia's</p>
48	BPH312A	Forensic Pharmacy– Theory	2018	<p>1.To recall the pharmaceutical legislations, ethics, right to information, medical termination of pregnancy and intellectual property rights.</p> <p>2.To relate the significance of Drugs and cosmetics act 1940 and its rules 1945 in relation to import and manufacture of drugs.</p> <p>3. To apply the knowledge on schedules pertaining to Drugs and cosmetics act 1940 and its rules 1945 and also administration of the act and rules.</p> <p>4. To understand the functions of pharmacy councils</p>

				<p>and implementation of education regulations in pharmacy.</p> <p>5. To appraise the importance of medicinal and toilet preparations act and narcotic drugs and psychotropic substances act and rules.</p> <p>6 To discuss the salient features of drugs and magic remedies act, prevention of cruelty to animals' act and drugs price control order.</p>
49	BPH312B	Clinical Trials– Theory	2018	<p>1.Know the regulatory requirements for conducting clinical trial</p> <p>2.To understand the various types of clinical trial designs</p> <p>3.To gain knowledge on basic concepts and establishment of pharmacovigilance</p> <p>4.To know the ADRreporting, methods and tools used in pharmacovigilance</p>
50	BPH312 C	Industrial.Pharmacy & Cosmetic Technology– Theory	2018	
51	BPH313	Medicinal Chemistry-II Practicals	2018	<p>This course helps to how to separation and identification compound given unknown mixture.</p> <p>It imparts take it knowledge on crude separation and identification technique</p>
52	BPH314	Pharmacology-II Practicals	2018	<p>1.Handling of different instruments used in Experimental Pharmacology.</p> <p>2.Know about the different routes of drug administration, blood withdrawal etc.,</p> <p>3.Evaluate the different activities on animals.</p> <p>4.Demonstration of different simulation methods.</p> <p>5.They would have finally learnt to apply the knowledge of drugs practically using simulated pharmacological experiments.</p>

53	BPH315	Pharmaceutical. Analysis II Practicals	2018	<p>1. Handling of different analytical instruments.</p> <p>2. Know about the different spectroscopy and chromatography techniques that helps to attain desired quality control of all pharmaceutical aspects as per the standard pharmacopoeias</p> <p>5. Finally learnt to apply the knowledge to make good stability of pharmaceutical product by using of pharmaceutical analytical technical method.</p>
54	BPH 401	Medicinal Chemistry-III	2018	<ol style="list-style-type: none"> 1. To develop an understanding of the physico-chemical properties of drugs. 2. To understand how current drugs were developed by using pharmacophore modelling and docking technique. 3. To acquire knowledge in the chemotherapy for cancer and microbial diseases and different anti-viral agents. 4. To acquire knowledge about the mechanism pathways of different class of medicinal compounds. 5. To have been introduced to a variety of drug classes and some pharmacological properties. 6. To acquire knowledge on thrust areas for further research
55	BPH 402:	Pharmacology-III	2018	<ol style="list-style-type: none"> 1. Students would have understood the pharmacological actions of different categories of drugs 2. They would have studied in detail about mechanism of drug action at organ system/sub cellular/ macromolecular levels. 3. They would have understood the application of basic pharmacological knowledge in the prevention and treatment of various diseases.

				<p>4. They would have observed the effect of drugs on animals by simulated experiments</p> <p>5. They would get an idea about correlation of pharmacology with other bio medical sciences.</p> <p>6. They would have understood the signal transduction mechanism of various receptors</p>
56	BPH 403:	Pharmacognosy-III	2018	<p>1. Terpenes, Polyphenols, Alkaloids, Pharmacology, Toxicity,</p> <p>2. Formulations and Preparations of Herbal Medicines.</p> <p>3. How herbs influence our physiology and can be helpful against several disorders.</p> <p>DNA Finger printing.</p>
57	BPH 404:	Biopharmaceutics & Pharmacokinetics	2018	<p>1. Understand the basic concepts in biopharmaceutics and pharmacokinetics and them</p> <p>2. Use of plasma drug concentration-time data to calculate the pharmacokinetic parameters to describe the kinetics of drug absorption, distribution, metabolism, excretion,</p> <p>3. To understand the concepts of bioavailability and bioequivalence of drug products and them</p> <p>Understand various pharmacokinetic parameters, their significance & applications</p>
58	BPH 405A:	Chemistry Of Natural Products	2018	<p>1. To attain detailed knowledge about chemistry of medicinal compounds from natural origin.</p> <p>2. To understand general methods of structural elucidation of medicinally active natural compounds.</p> <p>3. To attain knowledge regarding isolation and purification of medicinal compounds from natural origin.</p>

59	BPH 405B:	Hospital & Community Pharmacy	2018	<ol style="list-style-type: none"> 1. Discuss the roles and responsibilities of hospital pharmacist, hospital drug policies and guidelines for hospital pharmacy 2. Discuss various drug distribution methods in a hospital pharmacy 3. Apply various methods of inventory control 4. Formulate parenteral preparations Contribute to a newsletter for providing continuous education and awareness 5. Explain about handling and packaging of radiopharmaceuticals
60	BPH 405C	Pharmacovigilance	2018	<ol style="list-style-type: none"> 1. Explain the regulatory requirements for conducting clinical trial 2. Describe in detail about various types of clinical trial designs 3. Explain the responsibilities of key players involved in clinical trials 4. Describe the documentary requirements for Clinical trials 5. Explain Adverse drug reaction and its management 6. Describe basic concepts, and establishment of Pharmacovigilance 7. Explain ADR reporting, methods and tools used in Pharmacovigilance 8. Describe Pharmacoeconomics and safety pharmacology
61	BPH 406	Medicinal Chemistry-III Practicals	2018	<ol style="list-style-type: none"> 1. Synthesis compounds of medicinal interest 2. Conduct monograph analysis of the pharmaceutical compounds

				3. Determine the amount of drug present in an unknown solution 4. Estimate the purity of drugs by performing assays 5. Determine partition coefficient and dissociation constant of a given compound 6. Conduct planned experiments and prepare laboratory report in a standard format
62	BPH 407	Pharmacology-III Practicals	2018	1. Demonstrate intraperitoneal and intramuscular routes of administration of drugs in animals and describe different anaesthetics used in laboratory animals 2. Identify and select laboratory appliances used in experimental pharmacology 3. Recommend the physiological salt solution for different isolated tissue preparations 4. Perform a bioassay procedure and create a Dose Response Curve 5. Demonstrate the screening of a drug for CNS activity 6. Conduct planned experiments and prepare laboratory report in a standard format
63	BPH 408	Pharmacognosy-III Practicals	2018	1. Identify cell wall constituents and cell inclusions 2. Identify the crude drugs by its morphological characteristics and study the anatomical characters by preparing slides 3. Perform chemical tests to identify unorganized crude drugs and lipids 4. Prepare herbarium sheets 5. Conduct planned experiments and prepare laboratory report in a standard format
64	BPH 409	Biopharmaceutics & Pharmacokinetics Practicals	2018	1. Compare the in-vitro drug release profile of different marketed products 2. Perform the solubility enhancement techniques for improvement of drug release of poorly water-

				soluble drugs 3. Estimate the bioavailability (absolute and relative) and bioequivalence from the given clinical data 4. Calculate the drug content in blood sample using Area Under Curve approach 5. Calculate and interpret various pharmacokinetic parameters from the given clinical data
65	BPH 410:	Novel Drug Delivery Systems	2018	1. The use raw data and derive the pharmacokinetic models 2. and parameters the best describe the process of drug absorption, distribution, metabolism and elimination. 3. The critical evaluation of biopharmaceutic studies involving drug product equivalency. 4. The design and evaluation of dosage regimens of the drugs using pharmacokinetic and biopharmaceutic parameters. 5. The potential clinical pharmacokinetic problems and application of basics of pharmacokinetic
66	BPH 411	Pharmaceutical Biotechnology (Theory)	2018	1. To know the basics of biotechnology techniques and the various systems used. 2. To understand the method of genetic engineering for production of rDNA products including monoclonal antibodies. 3. To clarify application of geetic engineering in animals. 4. To understand enzymes and their uses by immobilization. 5. To illustrate the use of fermenter for the production of fermentation products and purification by downstream process.

67	BPH 412:	Clinical Pharmacy & Therapeutics	2018	<ol style="list-style-type: none"> 1. Ability to apply the concepts of Pharmacokinetics to individualize the drug dosage regimen in clinical settings. 2. Ability to design a dosage regimen of a drug based on its route of administration 3. Ability to design and implement pharmacokinetic services 4. Intravenous to Oral conversion of dosage regimens
68	BPH 413:	Comprehensive Viva Voce	2018	<ol style="list-style-type: none"> 1. There shall be a Comprehensive Viva-Voce in IV-year II semester. The Comprehensive Viva-Voce will be conducted by a committee consisting of Head of the Department and two Senior Faculty members of the Department. 2. The Comprehensive Viva-Voce is intended to assess the students understanding of the subjects he studied during the B. Tech. course of study. 3. The Comprehensive Viva-Voce is evaluated for 100 marks by the Committee. <p>There are no internal marks for the Comprehensive Viva-Voce.</p>
69	BPH 414:	Project Work & Seminar	2018	<ol style="list-style-type: none"> 1. Final Year Projects represent the culmination of study towards the Bachelor of Pharmaceutical sciences degree. 2. Projects offer the opportunity to apply and extend material learned throughout the program. 3. Assessment is by means of a seminar presentation, submission of a thesis, and a public demonstration of work undertaken. 4. In contrast to the majority of courses studied elsewhere in the program, projects are undertaken individually or in small groups. 5. This necessarily introduces the dimension of workload management into the program to enable

				completion of a large, relatively unstructured "assignment" over the course of the semester.

46. M.Pharmacy

S.No .	Course Code	Title of the Course	Years of Introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/Skill development
1	MPH 101A(Pharmacology)	General & Systemic Pharmacology	2018	<ol style="list-style-type: none"> 1. Describe the instruments in experimental pharmacology. 2. Know CPCSEA guidelines and OECD guidelines. 3. Know animal physiology with their biochemical reference values in various animal species. 4. Do collection of blood, body fluids and urine from experimental animals. 5. Record the effect of drug on Concentration Response Curves (CRC) using suitable isolated tissue preparations (Synergism and Antagonism).
2	MPH 102A(Pharmacology)	Clinical Pharmacology & Toxicology	2018	<ol style="list-style-type: none"> 1. The pathophysiology of selected disease states and the rationale for drug therapy. 2. The controversies in drug therapy. 3. The importance of preparation of individualized therapeutic plans based on diagnosis. 4. Understanding the concepts of Clinical res

				<p>earch;Therapeutic drug monitoring (TDM) ; concepts of Pharmacotherapeutics, Management & Current Good Clinical Practice of various diseases.</p> <p>5. Studying of various types, mechanisms of Drug interaction; rational for drug combinations; Drug Toxicity and its prevention; Adverse drug reactions and its monitoring</p>
3	MPH 103	Practical 1	2018	<ol style="list-style-type: none"> 1. Recording of concentration response curve (CRC) of acetylcholine 2. Record of the CRC of 5-HT on rat fundus preparation. 3. Record of the CRC of histamine on guinea pig ileum 4. Inotropic and chronotropic effects of drugs on isolated frog heart
4	MPH 104	Practical-II(MAT)	2018	<ol style="list-style-type: none"> 1. Explains the importance of modern instrumentation in pharmaceutical analysis 2. Describes the fundamental principles and applications of spectroscopic techniques Viz., UV- Visible, IR, FTIR. 3. Discusses the principle and applications of chromatographic techniques 4. Identify appropriate instrumental techniques for the analysis of drugs in bulk or in various dosage forms

5	MPH 105	Modern Analytical Techniques and biostatics Theory	2018	<ol style="list-style-type: none"> 1. Explains the importance of modern instrumentation in pharmaceutical analysis 2. Describes the fundamental principles and applications of spectroscopic techniques Viz., UV- Visible, IR, FTIR. 3. Discusses the principle and applications of chromatographic techniques 4. Identify appropriate instrumental techniques for the analysis of drugs in bulk or in various dosage forms. <p>Explains the concepts of Statistics and their applications in pharmacy</p>
6.	MPH 106	Human Values and Professional Ethics-I	2018	<ol style="list-style-type: none"> 1. Awareness of ethical issues and basic ethical approaches. 2. Improved writing skills and understanding of ethical conflict. 3. Enables students to develop ability for moral reasoning and act with ethical deliberations. 4. After studying ethics one is equipped with the ethical sensitivity and moral understanding required to solve complex ethical dilemmas. 5. Learn how to live peacefully
7.	MPH 107	Comprehensive Viva	2018	<ol style="list-style-type: none"> 1. Know the fundamental knowledge on the structure and functions of the various systems of the human body.

				<p>2. understanding all the homeostatic mechanisms of the body</p> <p>3. Understand the relationship of anatomy with various disciplines of pharmacy.</p> <p>4. Understand the dynamic constancy of the body, cell and its components, tissue and types of tissue, blood and its function and composition</p>
8.	MPH (Pharmacology) 201A	Molecular Pharmacology	2018	<p>1. Explain the modes of action of drug at the cellular level by describing their interactions with target proteins</p> <p>2. Explain the receptor signal transduction processes.</p> <p>3. Explain the molecular pathways affected by drugs.</p> <p>4. Understanding the applicability of molecular pharmacology and biomarkers in drug discovery process.</p> <p>5. Outline the molecular features that are responsible for agonist and antagonist binding, and coupling to effector processes, with reference to the nicotinic, muscarinic, and β-adrenergic receptors</p>
9.	MPH 202 A	Methods in Drug Evaluation	2018	<p>1. Know the commonly used instruments in experimental pharmacology.</p> <p>2. describe the animal physiology with their biochemical reference values in various animal species.</p> <p>3. Study of methods for collection of blood, body fluids and urine from experimental animals.</p>

				4. Record the effect of drug on Concentration Response Curves (CRC) using suitable isolated tissue preparations (Synergism and Antagonism).
10.	MPH 203	Practical 1	2018	1. Calculation of the PA_2 Calculate the PA_2 Value 2. Interpolation bioassay 3. Matching or bracketing bioassay 4. Three point bioassay 5. Four point bioassay
11	MPH 204	Practical-II(BPK)	2018	1. Compare and differentiate between compartmental and non compartmental analysis 2. Identify the physiological, Physicochemical and dosage form related factors that affects drug absorption from different dosage forms 3. Examine the absolute and relative bioavailability of drugs form different dosage forms using either plasma or urine data. 4. Compare the bioequivalence of two drug products

12	MPH 205	BIO-PHARMACEUTICS & PHARMACOKINETICS	2018	<ol style="list-style-type: none"> 1. Understand the concept of ADME of drug in human body. 2. Determine the various pharmacokinetic parameters from either plasma concentration or urinary excretion data for drug 3. Apply the various regulations related to developing BA -BE study protocol for the new drug molecule
13	MPH 206	Human Values and Professional Ethics-II	2018	<ol style="list-style-type: none"> 1. Identify and analyze an ethical issue in the subject matter under investigation or in a relevant field 2. Learn about morals, values & work ethics. 3. Develop commitment 4. Learn about the different professional roles. 5. Ethical, social and environmental awareness 6. Professional rights and responsibilities act in morally desirable ways, towards moral commitment and responsible conduct
14	MPH 207	Comprehensive Viva	2018	
15	MPH 301	Mid-Term Evaluation of Research project	2018	<ol style="list-style-type: none"> 6. Final Year Projects represent the culmination of study towards the Master of Pharmaceutical sciences degree. 7. Projects offer the opportunity to apply and extend material learned throughout the program. 8. Assessment is by means of a seminar presentation, submission of a thesis, and a public demonstration of work undertaken. 9. In contrast to the majority of courses

				<p>studied elsewhere in the program, projects are undertaken individually or in small groups.</p> <p>10. This necessarily introduces the dimension of workload management into the program to enable completion of a large, relatively unstructured "assignment" over the course of the semester.</p>
16	MPH 401	Project thesis submission & presentation and Project Viva voce	2018	<ol style="list-style-type: none"> 1. Final Year Projects represent the culmination of study towards the Master of Pharmaceutical sciences degree. 2. Projects offer the opportunity to apply and extend material learned throughout the program. 3. Assessment is by means of a seminar presentation, submission of a thesis, and a public demonstration of work undertaken. 4. In contrast to the majority of courses studied elsewhere in the program, projects are undertaken individually or in small groups. 5. This necessarily introduces the dimension of workload management into the program to enable completion of a large, relatively unstructured "assignment" over the course of the semester.

M. Pharmacy (Pharmaceutics)

S.No.	Course Code	Title of the Course	Years of Introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/Skill development
1	MPH 101B	ADVANCED PHARMACEUTICAL TECHNOLOGY	2018	<ol style="list-style-type: none"> 1. Course designed to impart advanced knowledge and skills required to learn various aspects and concepts at pharmaceutical industries. 2. The Active Pharmaceutical Ingredients and Generic drug Product 3. The elements of Preformulation studies, Objectives Upon completion of the course, student shall be able to understand Optimization Techniques. 4. Industrial Management and GMP Considerations, development & Stability Testing, sterilization process, Pilot Plant Scale Up Techniques & packaging of dosage forms
2	MPH 102B(Pharmaceutics)	Advanced Pharmaceutics	2018	<ol style="list-style-type: none"> 1. Upon completion of this program the student will have fundamental knowledge in preparing conventional dosage forms, pharmaceutical calculation involved in formulation and appreciate the importance of good

				<p>formulation for effectiveness.</p> <ol style="list-style-type: none"> 2. The need, concept, design and evaluation of various customized, sustained and controlled release dosage forms using solubility studies and basic theories of dissolution. 3. To formulate and evaluate various novel drug delivery systems based on the molecular weight determination of polymers and its stability studies.
3	MPH 103	Practical-I(PHARMACEUTICS)	2018	<ol style="list-style-type: none"> 1. The passage of drugs, biopharmaceutical parameters. 2. How to do dissolution studies for the dosage forms to know the bioavailability of the drugs. 3. Solubility studies for the drugs based on its pH and its applications in the formulations of drug delivery systems. 4. To determine the molecular weight of the polymers. 5. Gives an fundamental knowledge on the stability studies
4	MPH 104	Practical-II(MAT)	2018	<ol style="list-style-type: none"> 5. Explains the importance of modern instrumentation in pharmaceutical analysis 6. Describes the fundamental principles and applications of spectroscopic techniques Viz., UV- Visible, IR, FTIR. 7. Discusses the principle and applications of chromatographic techniques 8. Identify appropriate instrumental techniques for the analysis of drugs in bulk or in various dosage form

5	MPH 105	Modern Analytical Techniques and biostatistics Theory	2018	5. Explains the importance of modern instrumentation in pharmaceutical analysis 6. Describes the fundamental principles and applications of spectroscopic techniques Viz., UV- Visible, IR, FTIR. 7. Discusses the principle and applications of chromatographic techniques 8. Identify appropriate instrumental techniques for the analysis of drugs in bulk or in various dosage forms. 9. Explains the concepts of Statistics and their applications in pharmacy
6.	MPH 106	Human Values and Professional Ethics-I	2018	6. Awareness of ethical issues and basic ethical approaches. 7. Improved writing skills and understanding of ethical conflict. 8. Enables students to develop ability for moral reasoning and act with ethical deliberations. 9. After studying ethics one is equipped with the ethical sensitivity and moral understanding required to solve complex ethical dilemmas. 10. Learn how to live peacefully
7.	MPH 107	Comprehensive Viva	2018	
8.	MPH 201B (Pharmaceutics)	INDUSTRIAL PHARMACY	2018	1. The elements of preformulation studies. 2. Acquire skill in preparation of different types of tablets. 3. Acquire knowledge for evaluation of

				<p>various dosage forms.</p> <p>4. Acquire the knowledge of processing of dosage form on large scale that suit pharma industry</p>
9.	MPH202B(Pharmaceutics)	PROCESS VALIDATION & CGMP	2018	<p>1. Acquire knowledge on various quality assurance systems, processes and current regulatory guidelines related to manufacturing and distribution.</p> <p>2. Address quality issues and provide solutions needed to attain Quality leadership in an environment of continual improvement.</p> <p>3. Understand the importance of effective documentation.</p> <p>4. To prepare professionally competent individuals with Quality concept being engrained to achieve global quality standards in pharmaceutical industries</p>
10.	MPH 203	Practical-I	2018	<p>1. Gain knowledge and acquire skills to prepare different types of tablets.</p> <p>2. Highlights the handling of different equipment's for the preparation and evaluation of various dosage forms</p>
11	MPH 204	Practical-II(BPT)	2018	<p>5. Compare and differentiate between compartmental and non compartmental analysis</p> <p>6. Identify the physiological, Physicochemical and dosage form related factors that affects drug absorption from different dosage forms</p>

				<p>7. Examine the absolute and relative bioavailability of drugs from different dosage forms using either plasma or urine data.</p> <p>8. Compare the bioequivalence of two drug products</p>
12	MPH 205	BIO-PHARMACEUTICS & PHARMACOKINETICS	2018	<p>1. Understand the concept of ADME of drug in human body.</p> <p>2. Determine the various pharmacokinetic parameters from either plasma concentration or urinary excretion data for drug</p> <p>3. Apply the various regulations related to developing BA -BE study protocol for the new drug molecule</p>
13	MPH 206	Human Values and Professional Ethics-II	2018	<p>7. Identify and analyze an ethical issue in the subject matter under investigation or in a relevant field</p> <p>8. Learn about morals, values & work ethics.</p> <p>9. Develop commitment</p> <p>10. Learn about the different professional roles.</p> <p>11. Ethical, social and environmental awareness</p> <p>12. Professional rights and responsibilities act in morally desirable ways, towards moral commitment and responsible conduct</p>
14	MPH 207	Comprehensive Viva	2018	

15	MPH 301	Mid-Term Evaluation of Research project	2018	<ol style="list-style-type: none"> 1. Final Year Projects represent the culmination of study towards the Master of Pharmaceutical sciences degree. 2. Projects offer the opportunity to apply and extend material learned throughout the program. 3. Assessment is by means of a seminar presentation, submission of a thesis, and a public demonstration of work undertaken. 4. In contrast to the majority of courses studied elsewhere in the program, projects are undertaken individually or in small groups. 5. 1.1.3 Activities/Content with direct bearing on Employability/Entrepreneurship/ Skill development

2019-2020

SVU COLLEGE OF ARTS

1. Adult & Continuing Education

S.No	Course Code	Name of the Course	Year of introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/ Skill development	Link to the relevant Document
1	MAAE -1.1	Alternative Learning Systems	2019	<ol style="list-style-type: none">1. Remembrance of different forms of learning.2. Application of different technology support services for effective learning.3. Organization and administration of nonformal education programmes.4. Evaluation of nonformal education programmes.	
2	MAAE-1.2	Policy Studies In Adult/Continuing Education	2019	<ol style="list-style-type: none">1. Identify the socio-political movements during pre-independence period for the promotion of literacy.2. Analyze the trends of adult education programmes during post-independence period from social education to saakshar Bharat Mission.3. Describe the National and International organizations efforts for the promotion of literacy at various levels.4. Explain the State & Central Govt policies on adult education and special reference to literacy, post-literacy and continuing education.	
3	MAAE-1.3	Adult Psychology And Learning	2019	<ol style="list-style-type: none">1: Acquire knowledge on psychological foundations and its relevance to Adult Education and Learners.	

				<p>2: Learn classification of motives and motivation techniques to motivate the Adult Learner.</p> <p>3: Compare the Adult Personality & Child personality based on three Domain principles.</p> <p>4: Examine the Adult Learning characteristics and theories of learning, eventually he/she will apply all aspects in adult class room activity.</p>	
4	MAAE-1.4	Socio-Philosophical Foundatons Of Adult Education	2019	<ol style="list-style-type: none"> 1. Create thinking capacity to survival in the present society with philosophical approach. 2. Know great eminent leaders biography, sacrifices their lives for society. 3. Aware Dalit movement, women movement, co-operative movement in society especially rural areas. 4. Examine the problems of society with reference to bonded labor, child labour, untouchability, transgender and provide awareness on human rights. 	
5	MAAE-1.5	Communication Methods in Adult Education	2019	<ol style="list-style-type: none"> 1. Remembering the concept and methods of communication and their application to adult Education 2. Identifying different models of 	

				<p>communication.</p> <p>3. Describing the media of communication and their utility in continuing education.</p> <p>4. Realising the use of different Audio-visual aids in teaching learning process.</p>	
6	MAAE-1.6	Human Values And Professional Ethics-I	2019	<p>know the importance of professional ethics and to implement the ethical values in various professions.</p> <p>2. understand about the Good and bad values and to analyze the basic moral concepts.</p> <p>3. inculcate the students in the aspects of pursharthas .</p> <p>4. Know different crimes and its impact on personal and social life and theories of punishment</p>	
7	MAAE-2.1	Recent Trends In Adult And Continuing Education	2019	<p>.Identify the variations of literacy growth among States and Nation with reference to gender, rural and urban.</p> <p>2.Recognize the functions, activities of JSS and Saakshar Bharat Mission, to promote Life Long learning.</p> <p>3. Understand the five-year plan period programmes in terms of literacy, non-</p>	

				formal and functional literacy. 4. Examine the significance of the extension activities as third dimension of literacy programmes at field level.	
8	MAAE-2.2	Curriculum And Methods Of Literacy Teaching	2019	<ol style="list-style-type: none"> 1. Remembering the meaning, foundations and theories of curriculum development with reference to adult learners. 2. Distinguishing different principles and approaches of curriculum development. 3. Interpreting the needs and interests of lifelong learners. 4. Executing to evaluate Adult Education programmes 	
9	MAAE-2.3	Research Methods In Adult Education	2019	<ol style="list-style-type: none"> 1. Understanding the concepts and methods of research. 2. Adopting the suitable sampling methods for research studies. 3. Developing tools for research studies. 4. Ability of research report writing. 	
10	MAAE-2.4	Field Work & Practical Assignments	2019	Application of knowledge and	

				<p>skills in project designing</p> <p>2.Ability to do research work.</p> <p>3.Finding solutions to the problems identified in his research work.</p> <p>4.Preparing the research report.</p>	
11	MAAE-2.5	Management Of Adult/Continuing Education	2019	<ol style="list-style-type: none"> 1. Know the principles of Management, Planning and Organizing capacity to conduct Adult Education Programmes. 2. Develop Social and Communication Skills to organize village, Mandal, District, State and Central level programmes. 3. Acquire project techniques for sustainable programmes. 4. Learn and enhance research skills to write project report, monitoring and evaluation of data of Adult Education Programme. 	
12	MAAE-2.6	Human Values And Professional Ethics-Ii	2019	Understand and recognize the importance of Value Education & Human Values and also try to follow the traditional values of family,	

				<p>women and elders in the society.</p> <p>2: Examine code of ethics for medical and health care professionals. They Can sensitize the rural people on Health Issues & Problems.</p> <p>3: Explain the Environmental Protection and relationship between Man and Nature, causes of pollution and impact on environmental health.</p> <p>4: Recognize the need of Social ethics and fight against the anti-social activities, Organ trade, Human trafficking etc.</p>	
13	MAAE-3.1	Training In Adult And Continuing Education	2019	<ol style="list-style-type: none"> 1. Identify the importance of training in Adult and Continuing Education programmes and differences between training and education. 2. Know the training methods, training materials to organize the Adult and Continuing Education programmes. 3. Follow the teaching methods like Lecture, discussion, demonstration and Role Play methods. 4. Recognize training facilities at different levels like National, State, District and Local. 	
14	MAAE-3.2	Comparative Studies In Adult	2019	1: Compare the Adult Education Programmes	

		Education		<p>of different countries based on its aims and significance.</p> <p>2: Compare and contrast of Adult Education movement and progress in different countries like UK, USA, Denmark etc with reference to India.</p> <p>3: Find out the similarities and dissimilarities of Adult Education Programs in selected countries.</p> <p>4: Identify the problems of Adult Education in terms of Planning, Organization and Budget activities in developing countries and India.</p>	
15	MAAE-3.3	Material Development For Adult And Continuing Education	2019	<ol style="list-style-type: none"> 1. Identify the significance of learning materials in Adult Education classes. 2. Design the teaching learning activity objectives for better performance of Teacher educator in Adult Education Programmes. 3. Enhance language forms and competence and tune with the needs of the learner. 4. Develop teaching learning materials for self-learning 	
16	MAAE-3.4a	Peoples' participation And Development	2019	<ol style="list-style-type: none"> 1. Analysing the role and functions of people committees, 	

				<ol style="list-style-type: none"> 2. Understanding the functions of Panchayat Raj institutions. 3. Knowledge on the role of co-operatives in rural development. 4. Ability to catalyse the performance of PRIs and co-operatives. 	
17	MAAE-3.4b	Vocational Education And Skill Development	2019	<ol style="list-style-type: none"> 1. Identify the relationships of Vocational Education and Adults development. 2. Understand the institution training importance and its practices in vocational training. 3. Identify the issues of Rural Vocational training in India and Asian Countries. 4. Provide Vocational Guidance and Counselling for Adult trainees. 	
18	MAAE-3.4c	Guidance And Counselling In Adult And Continuing Education	2019	<ol style="list-style-type: none"> 1. Remembering the concept and theories and perspectives of guidance and counselling in educational process. 2. Recollecting understanding and analysis of educational problems 	

				<p>of a clientele group.</p> <ol style="list-style-type: none"> 3. Knowing the roles and functions of guidance counsellor. 4. Analysing the use of computers and internet in guidance and counselling. 	
19	MAAE-4.1	Monitoring And Evaluation	2019	<p>Identify the concept of monitoring and monitoring systems in adult education</p> <ol style="list-style-type: none"> 2. Describe the different evaluation models. 3. Demonstrate the tools and techniques of evaluation. 4. Understand the importance of learner evaluation. 	
20	MAAE-4.2	Human Resource Development And Management In Lifelong Learning	2019	<ol style="list-style-type: none"> 1. Understand the importance of human resource development and its historical background. 2. Analyze the human capital and its functions in Adult Education. 3. Explain the cost benefit process and problems of measurements. 4. Identify the need of planning in human resource development and relation to Adult Education. 	

21	MAAE-4.3a	Environment And Education	2019	<p>1.Understand the fundamental aspects of environment and need of environmental protection.</p> <p>2: Interpret the environmental crisis with reference to pollutions and its impact of human life need of Environmental Conservation.</p> <p>3: Know the environmental laws and role of individual and community to Control environmental pollution.</p> <p>4: Explain Ecology and eco factors for Ecological Balance.</p>	
22	MAAE-4.3d	Population Education	2019	<p>1. Recollecting the concepts, needs and importance of population related terminologies.</p> <p>2. Analysing the causes and consequences of population growth.</p> <p>3. Distinguishing the roles of different agencies in promotion of population education and control.</p> <p>4. Identifying the different National population policies and influences fertility, mortality and migration.</p>	

23	MAAE-4.4	Dissertation / Project Work	2019	<p>Application of knowledge and skills in project designing</p> <p>2.Ability to do research work.</p> <p>3.Finding solutions to the problems identified in his research work.</p> <p>4.Preparing the research report.</p>	
----	----------	-----------------------------	------	---	--

2. Ancient Indian History, Cultural Archeology

S.No	Course Code	Name of the Course	Year of introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/ Skill development	Link to the relevant Document
1	AIHC&A-304(B)	b) Social and Political Institutions in Ancient India	2019	<ul style="list-style-type: none"> ➤ The student will be able to understand the basic features of various theories and thoughts used in archaeological interpretations. ➤ They can formulate a research proposal and decide on appropriate materials and methods of analysis. ➤ They can present the findings and the process of conducting research in written and verbal formats. 	

2	AIHC&A-305(A)	a) Outlines of Indian History	2019	➤ The non-history students as an external elective course become familiar in understanding the broad phases of Indian history and culture	
3	AIHC&A-404(B)	b) India's Early Cultural Contacts with other Countries	2019	<ul style="list-style-type: none"> ➤ Cross regional cultural diffusion has been an important aspect of historical evolution. ➤ A strong and vibrating civilization having its impact felt upon other contemporary cultures has been a common phenomenon of history ➤ The students were able to understand the influence of Indian culture on Central Asia, south east asia, Japan, Tibet, Persia, Greece, Rome, Indo- China 	

3. Area Studies Programme

S.No	Course Code	Name of the Course	Year of introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/ Skill development	Link to the relevant Document
1. 1	SEAP-104	ANCIENT INDIAN HISTORY UPTO 1206 A.D.	2019	<ul style="list-style-type: none"> 1) Students understand the causes for the spread of Indian culture in Southeast Asia. 2) Know the different Indian dynasties of the past in Southeast Asia. 3) Students will be able to learn the impact of Indian cultural on Southeast Asian societies 	

2.	SEAPS-203	REGIONAL GEOGRAPHY OF SOUTH PACIFIC AND EAST ASIA	2019	1) Students identify physical setting, landforms, climate and soils of South Pacific. 2) Comprehend on Australia, New Zealand, Japan and China Recognize the economic trends in South Pacific and East Asian nations	
3.	SEAPS-303	INDIA AND THE WORLD	2019	1) Students acquaint knowledge on Opening of Japan and its early western contacts. 2) Knows Japan's militarization, Russo Japanese war and the First World War 3) Gain knowledge on US Occupation of Japan and Post World War-II developments and Japanese foreign relations.	
4.	SEAPS-402	DEVELOPING BLUE ECONOMY	2019	1) Develop an understanding of the rise of industrial economies like Singapore, Malaysia, Thailand and Indonesia. 2) Comprehend of the economies of Australia and New Zealand. 3) Ability to know the Regional Economic Groups like ASEAN, ESCAP, APEC and EAS.	

TOURISM:

S.No	Course Code	Name of the Course	Year of introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/ Skill development	Link to the relevant Document

1.	T-102	PLANNING AND DEVELOPMENT OF TOURISM	2019	<ul style="list-style-type: none"> 1) Students understand geographical profile of different countries of Southeast Asia. 2) Know the trends in population movement within Southeast Asia. 3) Students will be able to assess location significance and various infrastructural developments. 	
2	T. 201	HISTORICAL APPLICATION OF TOURISM IN INDIA	2019	<ul style="list-style-type: none"> 1) Students list the Christian Missionary activities in Southeast Asian countries. 2) Knows the factors of Indian Emigration, and Chinese economic contribution in Southeast Asia. 3) Comprehensive grasp over different cultures and religions in Southeast Asia 	
3	T 301	TRAVEL AGENCY AND TOUR OPERATIONS MANAGEMENT	2019	<ul style="list-style-type: none"> 1) Students learn about the different political regimes in Southeast Asian nations. 2) Comprehend on the contemporary political and economic conditions in Southeast Asian countries 3) Analyse the reasons to address some of the questions of contemporary world politics 	
4	T 303	AIRLINE TICKETING AND INFORMATION MANAGEMENT	2019	<ul style="list-style-type: none"> 1) Students acquaint knowledge on Opening of Japan and its early western contacts. 2) Knows Japan's militarization, Russo Japanese war and the First World War 3) Gain knowledge on US Occupation of Japan and Post World War-II developments and Japanese foreign relations. 	

4. Centre for Extension Studies

5. Centre for Gandhian Studies

6. Centre for Womens Sudies

1	SVUWS 206b	Familial values and Ethics	2019	<ul style="list-style-type: none"> This course helps to define behavior in various situations, help youth make good choices, and solidify the bond of the family values. 	
2	SVUWS-304D	Women's participation in Agriculture & Allied sectors	2019	<ul style="list-style-type: none"> To understand the Role of Women in Agriculture and allied fields and Policies and Programmes for Women in Agriculture importance's in our country and to know the possible oppournities to create agri-business 	

7. Econometrics

S.No	Course Code	Name of the Course	Year of introduction	Activities/Content with direct bearing on Employability/Entrepreneurship/ Skill development	Link to the relevant Document

1	EMT 101	MicroeconomicTheoryI	2019	<ul style="list-style-type: none"> • The microeconomic theory is to analyze how individual decision-makers, both consumers and producers, behave in a variety of economic environments. • The common goal in all of these issues is to identify the incentives of the various participating agents and the trade-offs that they face. • Microeconomics is a branch of economics that studies the behavior of individuals and firms in making decisions regarding the allocation of scarce resources and the interactions among these individuals and firms. • Microeconomics shows conditions under which free markets lead to desirable allocations. • The fundamental concepts of supply and demand, rational choice, efficiency, opportunity costs, incentives, production, profits, competition, monopoly, externalities, and public goods will help you to understand the world around you. 	
---	---------	----------------------	------	---	--

2	EMT 102	MacroeconomicTheoryI	2019	<ul style="list-style-type: none"> • Define and explain the process of calculating national income, identify its components, demonstrate circular flow of income, analyse the various income identities with government and international trade, define the concept of green accounting. • Understand Say's law of market, classical theory of employment and Keynes objection to the classical theory, demonstrate the principle of effective demand and income determination. • Explain the meaning of consumption function, relationship between APC and MPC, consumption and income, concept of multiplier and analyse the theories of absolute and relative income hypotheses. • Understand the relationship between investment and savings, demonstrate investment multiplier, and understand the meaning of MEC and MEI. CO5. Illustrate the meaning of interest, analyse the various theories of interest • The goals are supported by objectives such as minimizing unemployment, increasing productivity, controlling inflation, and more. The macro economy of a country is affected by many forces, and as such, economic indicators are invaluable to assessing different aspects of performance. 	
---	---------	----------------------	------	---	--

3	EMT 103	MathematicalMethods	2019	<ul style="list-style-type: none"> • Formulate mathematical models describing the dynamics of economic systems.Demonstrate the role of quantitative techniques in the field of business/industry, illustrate different types of equations, solve equations and system of equations, understand the concept of sets, illustrate and apply basic set operations. • Explain the rules for calculating derivatives, uses and application in calculating inter-relationship among total, marginal and average cost and revenue, calculate maxima, minima, elasticity, decide the optimal level of production for a firm. • Demonstrate the rules for calculating integration, describe the importance and application of integration in consumers' and producers' surpluses, total revenue and cost. • Illustrate matrix operation, minors, cofactors, use cofactor method to find inverse of a matrix, use Cramer's rule to solve systems of equations. • Students will get to learn applications of mathematical tools to economy. 	
---	---------	---------------------	------	--	--

4	EMT 104	Practical I	2019	CO1 Able to find Mean, Median, Mode, Range, Quartile Deviation and Standard Deviation and Coefficient of Variation. CO2 Able to apply Binomial, Poisson, Normal and Log-Normal Distribution Correlation and Regression Analysis CO3 Able to test small sample tests based on t, F and Chi-square distributions CO4 Able to find Inverse of a Matrix, System of Simultaneous Linear Equations and Cramer's Rule method. CO5 Student can identify the relationship between the economic variables and test their significance which is key factor for economic analysis and policy making or business decisions.	
5	EMT 105	Statistical Methods	2019	CO1 Able to find Mean, Median, Mode, Range, Quartile Deviation and Standard Deviation and Coefficient of Variation. CO2 Able to apply Binomial, Poisson, Normal and Log-Normal Distribution Correlation and Regression Analysis. CO3 Able to test small sample tests based on t, F and Chi-square distributions CO4 formulate Statistical Methods describing the dynamics of economic systems such as production function analysis and solve econometric analysis of underlying data use with knowledge advanced econometric tools and techniques can solve easily. CO5 Student can identify the relationship between the economic variables and test their significance which is key factor for economic analysis and policy making or business decisions.	
6	EMT 106	Human Values and Professional Ethics-I	2019		
7	EMT 201	Microeconomic Theory II	2019	Course Objectives: The microeconomic theory is to analyze how individual decision-makers, both consumers and producers, behave in a variety of economic environments. The factor prices	

8	EMT 202	Macroeconomic Theory II	2019	<p>CO1 The overarching goals of macroeconomics are to maximize the standard of living and achieve stable economic growth</p> <p>CO2 The goals are supported by objectives such as minimizing unemployment, increasing productivity, controlling inflation, and more.</p> <p>CO3 The macro economy of a country is affected by many forces, and as such, economic indicators are invaluable to assessing different aspects of performance.</p> <p>CO4 Meaning and Types of Inflation – Demand-Pull inflation – Cost-Push Inflation – The Phillips curve – The Inflation – Unemployment trade-off.</p> <p>CO5 Objectives of Macroeconomic policies – Objectives of Monetary policy. New-classical and Real Business cycles Theorem – Post-Keynesians - Implications for Stabilization Policies.</p>	
9	EMT 203	Basic Econometrics	2019	<p>CO1 Adequate competency in the frontier areas of economic theory and methods.</p> <p>CO2 Formulation and estimation of a multiple regression model.</p> <p>CO3 Decision about the statistical significance of individual explanatory variable and also over all models</p> <p>CO4 Impacts for the violation of one of the important assumptions for application of OLS regression.</p> <p>CO5 Estimation of system of equations, estimation of panel data models, generalized method of moments, discrete response models, censored regression models and estimation of average treatment effects.</p>	

10	EMT 204	Practical II	2019	<p>CO1 Students can Identify Inter industrial relationships using Input-output analysis,</p> <p>CO2 analyse maximization of profits and minimization of costs can evaluate using Linear Programming,</p> <p>CO3 Analyse relationship of economic variables using simple and multiple regression models which are covered in basic Econometrics</p> <p>CO4 Able to estimate and interpret linear regression models and be able to distinguish between economic and statistical importance</p> <p>CO5 They should be able to critique reported regression results in applied academic papers and interpret the results for someone who is not trained as an economist.</p>	
----	---------	--------------	-------------	--	--

11	EMT 205	Mathematical Economics	2019	<p>CO1 Students can deal Mathematical calculation of static optimization, Application of Lagrange's method and also student can evaluate Differential Equations and with Economic Applications.</p> <p>CO2 Able to estimate and interpret Inter industrial relationships using Input-output analysis, also analyse maximization of profits and minimization of costs of the firms using Linear Programming method</p> <p>CO3 Economic Applications of Differential Equations – Dynamic Multiplier – Harrod-Domar Model.</p> <p>CO4 Homogeneous Linear Difference Equations with Constant Coefficients – Particular Solution of Non-homogeneous Linear Equations – Linear First Order and Second Order Difference Equations with constant coefficients – Cobweb Model –Market model with Stocks</p> <p>CO5 Formulation of LPP – Basic and Feasible Solutions – Graphical Solution - Simplex Method – Duality in Linear Programming – Elements of Data envelop Analysis and its Applications.</p>	
12	EMT 206	Human Values and Professional Ethics II	2019		

13	EMT 301	<i>Indian Economy</i>	2019	<p>Course Outcomes: At the end of the course, the student will be able to</p> <p>CO1 Students will develop ideas of the basic characteristics of Indian economy, its potential on natural resources. Understand the importance, causes and impact of population growth and its distribution, translate and relate them with economic development.</p> <p>CO2 Understand agriculture as the foundation of economic growth and development, analyse the progress and changing nature of agricultural sector and its contribution to the economy as a whole. Students will obtain information regarding various agricultural issues in India and remedies for it</p> <p>CO3 Students will aware about recent economic affairs such as demonetization, universal basic income, cashless economy, skill and training development schemes, make in India etc</p> <p>CO4 Students will get benefit about various economic issues at local, national and global level.</p> <p>CO5 Grasp the importance of planning undertaken by the government of India, have knowledge on the various objectives, failures and achievements as the foundation of the ongoing planning and economic reforms taken by the government.</p>	
----	---------	-----------------------	-------------	---	--

14	EMT 302	<i>Economics of Insurance</i>	2019	<p>Course Outcomes: At the end of the course, the student will be able to</p> <p>CO1 Demonstrate knowledge of insurance contracts and provisions, and the features of property-liability insurance, life and health insurance, and employee benefit plans.</p> <p>CO2 Demonstrate knowledge of the operation and management of insurance entities, and the economic implications of organizational design and structure.</p> <p>CO3 Develop skills to facilitate insurance product cost and pricing, marketing, and distribution.</p> <p>CO4 Develop practical skills through professional development seminars, internships, and/or a practicum in insurance and risk management.</p> <p>CO5 Examine the role of public policy including social insurance in personal financial planning and risk management.</p>	
----	---------	-------------------------------	-------------	--	--

15	EMT 303	<i>Advanced Econometrics</i>	2019	<p>Course Outcomes: At the end of the course, the student will be able to</p> <p>CO1 Concepts of Heteroscedasticity & Multicollinearity. Possible reasons behind the presence of Heteroscedasticity & Multicollinearity. Skill to judge the reliability of estimation in case of violation of basic assumptions for the application of ordinary linear regression method.</p> <p>CO2 Concepts of Autocorrelation reasons behind the presence of Heteroscedasticity & Multicollinearity. Describe the variance/covariance matrix for the regression errors under the assumption that the errors are correlated</p> <p>CO3 Apply modern econometric methods covering time series analysis, financial econometrics, microeconometrics, macroeconometrics and structural econometric modelling;</p> <p>CO4 Interpret and critically evaluate applied economics research literature; demonstrate programming skills and numerical methods; and</p> <p>CO5 Apply methods learned to address policy and business decision questions.</p>	
----	---------	------------------------------	-------------	---	--

16	EMT 304	<i>Computer Applications and Data Analysis</i>	2019	<p>Course Outcomes: At the end of the course, the student will be able to</p> <p>CO1 Students will get basic knowledge of computers i.e., block diagram, evolution of computer, input/output devices, storing information in computer etc.</p> <p>CO2 At the end of this course student will gain Examine spreadsheet concepts and explore the Microsoft Office Excel environment. Import and export data.</p> <p>CO3 Work with pivot tables and charts. Create and edit charts. Learn to use functions and formulas. Perform analysis tasks using Data analysis pack</p> <p>CO4 Student gained and evaluate Econometric Methods such as OLS, LPM, Logistic regression analyses and conclude using SPSS Package</p> <p>CO5 Finally, student will be able to write programme for Simple statistical analyse and interpret through R-programming.</p>	
----	---------	--	-------------	---	--

17	EMT 305	<i>Public Finance</i>	2019	<p>.</p> <p>Course Outcomes: At the end of the course, the student will be able to</p> <p>CO1 Understand the sources of finance both public and private, demonstrate the role of government to correct market failures and possible advantage of public financing</p> <p>CO2 Attain the advantages and knowledge of public investments and other government expenditures. Understand the causes of growing public expenditures for various programmes and policies within and outside the country.</p> <p>CO3 Understand the possible burden, benefits and distribution of various types of taxes among various classes of people, know the general trend and impact on general welfare and arouse them to suggest good and bad tax system.</p> <p>CO4 Understand the needs of public borrowing from all possible sources to meet necessary public investment/expenditures. Also be alerted to find sources for repayment</p> <p>CO5 Deliver effectively the preparation of budget and how they are passed in the house. Understand the changes in size and flexibility of state and central budget along with the role played by Finance Commission.</p>	
----	---------	-----------------------	-------------	---	--

18	EMT 306	<i>Financial Institutions and Markets</i>	2019	<p>Course Outcomes: At the end of the course, the student will be able to</p> <p>CO1 Explain the broad features of Indian financial institutions with its apex banks' objectives and purview. Also understand the instruments to control credit in the country.</p> <p>CO2 Effectively narrate the kinds and components of money with its regulatory system, be aware of the functions, objectives and limitations of commercial banks.</p> <p>CO3 Identify the existence and development of non-banking financial institutions, know the important role of Mutual funds, LIC, investment companies etc., utilize and effectively participate in the development process.</p> <p>CO4 Understand the conditions of financial markets and its impact in the economy</p> <p>CO5 Demonstrate the role and significance of foreign exchange rate and its markets with its impact on various sectors in the economy.</p>	
19	EMT 307	<i>Practical III</i>	2019	<p>Course Outcomes: At the end of the course, the student will be able to</p> <p>CO1 Student will gain Examine spreadsheet. Work with pivot tables and charts. Create and edit charts. Learn to use functions and formulas.</p> <p>CO2 Perform analysis tasks using Data analysis pack using MS-Excel.</p> <p>CO3 Student gained and evaluate Econometric Methods such as OLS, LPM, Logistic regression analyse and conclude using SPSS Package</p> <p>CO4 Student will able to test of Multicollinearity, Heteroscedasticity and Autocorrelation.</p> <p>CO5 Student will be able to write programme for Simple statistical analyse and interpret through R-programming.</p>	

20	EMT 308	IntroductiontoEconometrics	2019	<p>CO1 students will have adequate competency in the frontier areas of economic theory and methods</p> <p>CO2 Use basic econometric estimation techniques such as Ordinary Least Squares to estimate bivariate and multivariate regression models.</p> <p>CO3 Decision about the statistical significance of individual explanatory variable and also over all model.</p> <p>CO4 Impacts for the violation of one of the important assumptions for application of OLS regression.</p> <p>CO5 Students will acquire additional specialization topics are estimation of system of equations, estimation of panel data models, generalized method of moments, discrete response models, censored regression models and estimation of average treatment effects.</p>	
----	---------	----------------------------	-------------	--	--

21	EMT 309	IndianEconomy	2019	<p>CourseOutcomes:Attheendofthecourse, thestudentwillbeableto</p> <p>CO1 Students will develop ideas of the basic characteristics of Indian economy, its potential on natural resources.Understand the importance, causes and impact of population growth and its distribution, translate and relate them with economic development.</p> <p>CO2 Understand agriculture as the foundation of economic growth and development, analyse the progress and changing nature of agricultural sector and its contribution to the economy as a whole. Students will obtain information regarding various agricultural issues in India and remedies for it</p> <p>CO3 Students will aware about recent economic affairs such as demonetization, universal basic income, cashless economy, skill and training development schemes, make in India etc</p> <p>CO4 Students will get benefit about various economic issues at local, national and global level.</p> <p>CO5 Grasp the importance of planning undertaken by the government of India, have knowledge on the various objectives, failures and achievements as the foundation of the ongoing planning and economic reforms taken by the government.</p>	
----	---------	---------------	-------------	--	--

22	EMT 310	Economics of Insurance	2019	<p>Course Outcomes: At the end of the course, the student will be able to</p> <p>CO1 Demonstrate knowledge of insurance contracts and provisions, and the features of property-liability insurance, life and health insurance, and employee benefit plans.</p> <p>CO2 Demonstrate knowledge of the operation and management of insurance entities, and the economic implications of organizational design and structure.</p> <p>CO3 Develop skills to facilitate insurance product cost and pricing, marketing, and distribution.</p> <p>CO4 Develop practical skills through professional development seminars, internships, and/or a practicum in insurance and risk management.</p> <p>CO5 Examine the role of public policy including social insurance in personal financial planning and risk management.</p>	
----	---------	------------------------	-------------	--	--

23	EMT 401	<i>International Trade and Finance</i>	2019	<p>Course Outcomes: At the end of the course, the student will be able to</p> <p>CO1 Identify the basic difference between inter-regional and international trade, understand how international trade has helped countries to acquire goods at cheaper cost and explain it through the various international trade theories.</p> <p>CO2 Show the benefits of international trade in a way how nations with strong international trade have become prosperous and have the power to control world economy and how global trade can be one of the major contributors of reducing poverty.</p> <p>CO3 Explain how restrictions to international trade would limit a nation in the services and goods produced within its territories and at the same time explain that a rise in international trade is essential for the growth of globalization.</p> <p>CO4 Show the importance of maintaining equilibrium in the balance of payments and suggests suitable measures to correct disequilibrium as well.</p> <p>CO5 Be aware of the changes in the composition as well as direction of foreign trade after international trade and know the causes and effects of deficits in the balance of payments, measures adopted to correct the deficits and identify the need for having trade reforms.</p>	
----	---------	--	-------------	---	--

24	EMT 402	<i>Environmental Economics</i>	2019	<p>Course Outcomes: At the end of the course, the student will be able to</p> <p>CO1 Realize the importance and influence of environment on the economy including the quality of manpower. Arouse their feelings to make cleaner environment so as to achieve harmonious development.</p> <p>CO2 Understand that environmental problem is not the problem of a single country or region but a global problem/issue. Hence, policy formulation may be for all countries.</p> <p>CO3 Demonstrate the scientific management of waste materials; realize the role and importance of individuals to keep the environment clean.</p> <p>CO4 Understand the causes and victims of environmental pollution like poverty, population explosion, and over-use of resources, careless or unscientific dump/management of wastes.</p> <p>CO5 Suggest appropriate measures to correct environmental degradation, aware of those ingredients such as healthy climate, quality of human beings, domestic and other natural habitats and biodiversity levels, productivity and productions, sustainability, etc are all influenced by environment.</p>
