### SRI VENKATESWRA UNIVERSITY:: TIRUPATI

Dr. J.M.J. VOINODINI M.A., Ph.D.

vijayarathnam1@gmail.com Ph. No. 86397 02078.

Assistant Professor Chairman, Board of Studies Dept., of Econometrics S.V. University College of Arts Tirupati - 517 502.

Date: 17-11-2021.

To

The Registrar S. V. University TIRUPATI - 517 502

Respected Sir,

Sub: Department of Econometrics - Submission of Revised syllabus & Model Question papers relating to P.G program concerned as per NEP: 2020 Guide lines and also sending eligibility criteria for Open elective paper - Reg.

Ref: your lr. No.C-II(A,B,&F)/P.G-Revise Syllabus/NEP-2021, Dt. 01-10-2021 & 06-11-2021.

\*\*\*

With reference to the subject cited above, I herewith, submit the Revised Syllabus & Model Question Papers relating to P.G program concerned as per NEP: 2020 Guide lines for introducing the skill Oriented course in 3rd Semester and multidisciplinary Course /Project work in 4th Semester as per Action plan of the NEP-2020, by keeping 24 Credits per Semester (4 Credits each paper) and a total of 96 Credits for the entire P.G. programme and also sending eligibility criteria for Open elective paper in the department of Econometrics for the academic year 2021-2022.

Hence, I request you to take necessary action.

Thank you sir

Yours Sincerely,

(Dr. J.M.J. VOINODINI)

Chairman, Board of Studies

BOS Chair Person .
Dept. of Econometrics

Copy to the Head, Department of Econometrics, SV University, Virupati.

# DEPARTMENT OF ECONOMETRICS S.V.U.COLLEGE OF ARTS::TIRUPATI Restructured syllabus of 2021-22 NEP-2020

#### VISION

The vision is to promote the publication of high-quality research works in the fields of Economic Theory, Econometrics, and Quantitative Economics more generally. Publications may range from more or less extensive accounts of the state of the art in a field to which the authors have made significant contributions, to shorter monographs representing important advances on more specific issues. In addition to the usual promotion by the Publisher in their advertising and displays at conferences, it also arranges for members of the Econometric Society to receive monographs at a special discount.

in the same way as for papers submitted to Econometrics. Our experience shows that this procedure generates quite valuable services to the authors. Referee reports are usually very professional, and contain detailed and specific suggestions on how to improve the manuscript. Such services, which are not normally offered by private publishing companies, are among the features that distinguish the Monograph Series of the Society from others.

### **MISSION**

The department mission is to The Master of Arts programme in Econometrics has been designed with the objective to develop in-depth knowledge of students in frontier areas of economic theory and quantitative methods, so that they are able to use the knowledge to study real world economic problems.

The course has a strong focus on theoretical and quantitative skills and train students in the collection and analysis of the data using their software skills. The programme offers specialized optional courses, which allow student to pursue their studies in their area of interest. The students are required to submit report and present their findings of field-study. Besides, to hone the student's writing and analytical skills they are required to submit a term paper on current economic problem. Thus, the Masters in Econometrics programme seek to: Supportive environment for all students.

### **PROGRAMOBJECTIVE**

The basic objectives of our M.A Econometrics degree program. The department's research mission is to develop an environment conducive to promoting high-quality applied research. Applied research is work that informs policy at the global, national or local level, or that is useful in the conduct of business, or the administration of government or non-profit activities.

- to provide our students with appropriate analytical skills to lay the groundwork for lifelong learning;
- to enable our students to become policy-literate and thus be more informed as citizens;
- to encourage the use of experiential learning, including cooperative education, as a means to
  introduce students to the world of work, reinforce classroom teaching, and assist in the
  development and advancement of career goals;
- to prepare our students for successful careers as applied economists; and
- Prepare students to develop own thinking /opinion regarding current national or international policies and issues
- Create awareness to become a rational and an enlightened citizen so that they can take the
  responsibility to spread the governments' initiatives/schemes to the rural areas for the
  upliftment of the poor or vulnerable section of the society for inclusive growth
- Motivating the learners to conduct investigations of multifaceted problems by applying
  research-based knowledge and different types of research methods including conducting of
  user studies and case studies in libraries, analysis and interpretation of data and synthesis of the
  information to get right solutions to the problems
- Inspiring the learners to learn ICT skills, Retrieval of various Electronic Resources

PO No	Programme outcomes										
PO1	<b>Knowledge of Economic System:</b> Ability to understand economic theories and functioning of basic microeconomic and macroeconomic systems. Prepare students to develop own thinking /opinion regarding current national or international policies and issues.										
PO2	Statistical and Mathematical Skills: Acquaint with collection, organization, tabulation and analysis of empirical data										
PO3	<b>Econometric Applications:</b> Acquaint with basic and applied econometric tools and methods used in economics. The aim of this course is to provide a foundation in applied econometric analysis and develop skills required for empirical research in economics. It also covers statistical concepts of hypothesis testing, estimation and diagnostic testing of simple and multiple regression models.										
PO4	<b>Development Perspective:</b> Delineate the developmental policies designed for developed and developing economics. The course also acquaint with the measurement of development with the help of theories along with the conceptual issues of poverty and inequalities.										

PO5	Environmental Strategy and management: This course emphasis on environmental
	problems emerging from economic development. Economic principles are applied to
	valuation of environmental quality, quantification of environmental damages, tools of
	evaluation of environmental projects such as cost-benefit analysis and environmental
	impact assessments.
PO6	Perspectives on Indian Economy: Acquaint with basic issues of Indian economy and
	learn the basic concept of monetary analysis and financial marketing in Indian financial
	markets.
PO7	Develop critical thinking:Prepare students to develop critical thinking to carry out
	investigation about various socio-economic issues objectively while bridging the gap
	between theory and practice.
PO8	Acquire Practical Knowledge: Practical exercises done will enable students to analyze
	and interpret data and also to draw valid conclusions. This will enable students to face
	real time applications.
PO9	Testing of Hypothesis: Equip the student with skills to analyze problems, formulate a
	hypothesis, evaluate and validate results and draw reasonable conclusions thereof.
PO10	Application in Real Life Problems: Apply the concepts of statistics, Operations
	Research, Probability theory, Time Series, Designs of Experiment, etc. in real life
	problems.Perform, Assess and implement practical techniques and procedure to solve
	and understand the problems and analyze and quantify data collected during any
	project.
PO11	Employment through Entrepreneurship: Prepare students for pursuing research or
	careers that provide employment through entrepreneurship and innovative methods.
	Because today's unemployment problem can also be solved by developing the micro
	and small entrepreneurship.
PO12	Create awareness: create awareness to become a rational and an enlightened citizen so
	that they can take the responsibility to spread the governments' initiatives/schemes to
	the rural areas for the upliftment of the poor or vulnerable section of the society for

### PROGRAM EDUCATIONAL OBJECTIVE

- Understanding the basic assumptions in various econometric analysis, economic theories and enhance capabilities of developing ideas based on them
- Prepare and motivate students for research studies in Econometrics models especially by developing questionnaire, collecting primary data through field surveys
- Provide knowledge of a wide range of econometric techniques using excel or other statistical software
- Motivate students to extract or utilize different websites for secondary data collection, generating concepts for various facets of econometrics studies and gather latest informations provided by various Universities, UGC, or ICSSR
- Motivate students in preparing for various competitive examinations, NET, SET, Indian Economic Service etc., by developing or gaining value addition day by day by giving assignments, by following a routine or developing discipline / concentration etc

### **Unit 1: Theory of Individual Decision Making**

Theory of Demand - Consumer equilibrium under Indifference Curve Analysis - Applications of Indifference Curves - Slutsky Theorem - Revealed Preference Hypothesis - Choice under Uncertainty- Recent Developments in the Theory of Market Demand.

### **Unit 2: Theory of Production and Cost**

Concepts of Production Function – Homogeneous Production Function - Least Cost Combinations of Factors – Cobb-Douglas and CES Production Functions – Frontier Production Function - Properties - Laws of Returns to Scale - Theory of Cost – Traditional and Modern theories of Cost.

### **Unit 3:Traditional Market Structures**

Perfect Competition - Equilibrium, Short Run and Long Run considerations, Efficiency and Welfare - Monopoly - Price and output determination - Price Discrimination - Welfare and Output.

### **Unit 4: Modern Theories of Market**

Monopolistic competition – Collusive and Non- Collusive Oligopoly: Cournot, Bertrand Stackelberg models - Nash equilibrium - Kinked Demand curve and Price Leadership models.

### Unit 5: Limit Pricing and Managerial Theories of Firm

Bain's Limit Pricing: Recent developments – Sylos-Labini and Franco Modigliani Models - Baumol's Sales Maximisation: Static single product model with and without advertisements – Marris' model of Managerial Enterprise.

### **TEXT AND REFERENCE BOOKS:**

### Model Paper

### M.A DEGREE EXAMINATION

#### First Semester

### Branch: ECONOMETRICS

### Paper 101 – MICROECONOMIC THEORY – I

(UNDER CBCS Revised Syllabus from 2021-22)

Time: 3 Hours Max. Marks: 80

# Section-A Answer any FIVE questions Each question carries 4 marks(5X4=20)

- 1. Explain the properties of Indifference curves.
- 2. Explain the statement 'Choice Reveals Preference'.
- 3. State any four properties of the Cobb-Douglas Production Function.
- 4. Explain the relatinship between average cost and marginal cost in the Modern Theory of Cost.
- 5. State the characteristics of perfect competition.
- 6. State the conditions for Price discrimination.
- 7. Explain the Cournot's model of Duopoly.
- 8. Explain the reason for kink in the Demand Curve of an Oligopolist firm.
- 9. What are the weaknesses of the Bain's theory of Limit Pricing?
- 10. State the assumptions of Marris' model of Managerial Enterprise.

### PART-B

### Answer ALL the questions Each question carries 12 marks

11. (a) Discuss consumer's equilibrium under Indifference Curve analysis.

 $O_1$ 

- (b) Explain how the price effect can be decomposed into substitution and income effects.
- 12. (a) Explain the relationship among various cost components in the traditional theory of cost.

Or

- (b) Discuss the properties of CES Production Function.
- 13. (a) Discuss the price and output determination of a firm under perfect competition.

Or

(b) Explain the short – run and long run equilibrium of the firm under Monopoly.

14. (a) Critically examine Chamberlin's model of Monopolistic Competition.

Or

- (b) Explain the Price Leadership model of the Dominant firm.
- 15. (a) Discuss Baumol's theory of Sales Maximisation.

Or

(b) Elucidate the Franco Modigliani model of Limit Pricing.

EMT102	MACROECONOMIC THEORY-I	4Credits
Course O	bjectives: The objective of this course is to provide the basic knowledge.	dge of the study of the
aggregate eco	nomy. The primary goals of macroeconomics are to achieve stable	economic growth and
maximize the	standard of living. The basic concepts in macroeconomics and the concep	ots of National Income,
measurement	of National Income and factors determining national income and prol	olems in Estimation of
National Incom	me. The theory of Employment, consumption Function, investment Mul	tiplier and Accelerator,
IS-LM model	with Government sector, Monetary and Fiscal Policies and effect of IS	and LM curves; Kinds
of investment	and determinations of investment; the monetary policy and fiscal policy	y are tools used by the
government to	control economic performance and reach macroeconomic goals.	
CO1	Define and explain the process of calculating national income, identify demonstrate circular flow of income, analyse the various income identit and international trade, define the concept of green accounting.	
CO2	Understand Say's law of market, classical theory of employment and Ko	
	classical theory, demonstrate the principle of effective demand and inco	me determination.
CO3	Explain the meaning of consumption function, relationship between AP	,
	consumption and income, concept of multiplier and analyse the theories relative income hypotheses.	of absolute and
CO4	Understand the relationship between investment and savings, demonstra	te investment
	multiplier, and understand the meaning of MEC and MEI. CO5. Illustra interest, analyse the various theories of interest	te the meaning of
CO5	The goals are supported by objectives such as minimizing uner	nplovment, increasing
	productivity, controlling inflation, and more. The macro economy of a	
	many forces, and as such, economic indicators are invaluable to assess	
	performance.	5

### **Unit 1: Macro-Economics**

Micro and Macroeconomics - Basic Concepts in Macroeconomics - Stocks and Flows - Statics, Comparative statistics and Dynamics - Micro Foundations of Macroeconomics -- Circular flow of National income.

### **Unit 2: National Income**

Definition – Concepts of National Income – Measurement of National Income – Factors determining National income – National Income and Social Accounting - Methods of Estimation – Problems in Estimation of National Income – National Income and Economic Welfare.

### **Unit 3: Classical and Keynesian Economics**

Classical Theory of Employment – Critique of Classical Theory – Basic Keynesian Model – Consumption Function – Investment Multiplier – Accelerator – Interaction between Multiplier and Accelerator - Integration of Monetary theory and Value theory – Don Patinkin theory – The Real Balance Effect – Pigou Effect.

### **Unit 4: Neo-Classical and Keynesian Synthesis**

The IS-LM model – Extension of IS & LM model with government sector – Relative effectiveness of Monetary and Fiscal Policies –Shifts in IS and LM curves.

### **Unit 5: Savings &Investment**

Kinds of investment – Determinations of investment - Investment demand and Output growth – Marginal Efficiency of Capital – Tobin's 'Q' Theory – Lags in Investment demand.

### MODEL QUESTION PAPER

### M.A DEGREE EXAMINTION FIRST SEMESTER

## BRANCH: ECONOMETRICS Paper-102: MACROECONOMIC THEORY-I

(Under CBCS Revised Syllabus from 2021-22)

Time: 3 Hours Max. Marks: 80

### Section-A

### Answer any FIVE questions Each question carries 4 marks (5X4=20)

- 1. Expliain the basic concepts in Macroeconomics.
- 2. Write a note on Comparative Statics and Dynamics.
- 3. List out the problems in the measurement of National Income.
- 4. Is national income an adequate measure of welfare?
- 5. Explain the concept of Investment Multiplier.
- 6. Write a note on the consumption function.
- 7. Explain the concepts of Classical Range and Keynesian Range.
- 8. Explain the efects of shifts in Savings and Investments on the IS curve.
- 9. What are the determinants of investment?
- 10. Write a short note on Tobin's Q theory.

Section- B
Answer ALL the questions
Each question carries 12 marks
(5X12=60)

11. (a) Explain the Circular Flow of National Income in an economy.

Or

- (b) Examine the Micro Foundations of Macroeconomics.
- 12. (a) Discuss the methods of estimation of National Income.

Or

- (b) Explain different concepts of National Income and their usefulness.
- 13. (a) Critically examine the Classical Theory of Employment

Or

(b) Discuss the practical implications of the basic Keynesian model.

14. (a) Discuss the IS-LM model with government sector.

Or

- (b) Elucidate the relative effectiveness of Monetary and Fiscal Policies.
- 15. (a) Explain the determinants of Marginal Efficiency of Capital

Or

(b) Distinguish between Autonomous and Induced investments and discuss the lags in investment demand.

### **Unit 1: Basic Concepts and Set Theory**

Exponents – Polynomials – Factorization of Equations — Sets - Meaning, Definition, Types of sets, set operations – Ordered Sets – Linear Point Sets - Cartesian product – Relation – Functions.

### **Unit 2: Functions and Limits**

**Functions** - Type of Functions - Increasing and Decreasing - Implicit and Explicit - Constant, Linear, Quadratic, Logarithmic and Exponential functions - Graphical Representations of Functions - **Economic Applications of Functions** - **Limits:** Concepts of a Limit of a Function - Theorems on Limits of Functions - Evaluations of Limits in Simple Cases - Limits and Continuity of Functions.

### **Unit 3: Differential Calculus and Economic Applications (One Variable)**

**Differential Calculus:** Meaning – Process of Differentiation – Rules of Differentiation – Differentiation of Logarithmic and Exponential Functions – Higher Order Derivatives – Maximum and Minimum Points – Points of Inflection - **Economic Applications:** Marginal concepts, Price and cross Elasticity of demand – Relationship among Total, Marginal, Average concepts – Optimizing Economic functions.

### **Unit 4: Integration and Economic Applications**

Concept of an Indefinite Integral – Standard Integral Formula – Rules of Integration – Methods of integration – Concept of a Definite Integral – Area under a Curve – Fundamental theorem of Calculus – Properties of Definite Integral – Area between Curves; **Economic Applications:** Total Functions from Marginal Function – Consumer's and Producer's Surplus.

### **Unit 5: Matrices and Determinants**

**Matrices:** Concept of a Matrix – Types of Matrices – Matrix Operations – **Determinants:** Properties of Determinants – Minors and Co-Factors – Evaluation of Determinants of Second and Third Order - Inverse of a Matrix – Solutions of Simultaneous Linear Equations involving two or three Variables by Matrix Inverse Method and Cramer's Rule – Characteristic roots and equations – Concept of a Quadratic form – Rank of a Matrix – Concept of g-inverse and c- inverse.

### **MAPPING**

# Model Paper M.A DEGREE EXAMINTION FIRST SEMESTER

### **BRANCH: ECONOMETRICS**

### **Paper-103: MATHEMATICAL METHODS**

(Under CBCS Revised Syllabus from 2021-22)

Time: 3 Hours Max. Marks: 80

### Section-A

### Answer any FIVE questions Each question carries 4 marks (5X4=20)

- 1. What is an exponent? State the properties of exponents.
- 2. Distinguish between a Relation and a Function with an example.
- 3. What is an Algebraic Function? Explain different types of algebraic functions with examples.
- 4. State any two theorems of Limit.
- 5. Define the derivative of a function and write down the Product and Quotient Rules of differentiation.
- 6. Given the demand function,  $Q_d$ = 100- 2P, find the point elasticity of demand at P= 25.
- 7. Discuss the properties of definite integral.
- 8. Given the marginal cost curve MC =  $3-2x-x^2$ , find the total cost curve.
- $9.\;$  Explain the concepts of Upper Triangular Matrix and Lower Triangular Matrix.
- 10. Explain the concepts of g-inverse and c-inverse.

### Section- B

Answer ALL the questions
Each question carries 12 marks
(5X12=60)

$$4^3x \ 27^2$$
 11. (a) Simplify: -----  $9^3x \ 4^2$ 

(b) Define a Set and discuss different types of Sets.

PTO

12. (a) Explain the conepts of Logarithmic and Exponential fucntions and their applications in economics.

Or

(b) Find the limits of the following functions:

 $(x^2+1)$ 

i) Y = ---- $as x \rightarrow \infty^{\square}(x^2-1)$ 

 $(x^2 - 4)$ 

- ii) Y = ----- $as x \to 2^{\square} (x-2)$
- 13. (a) State the conditions for maxima and minima of the function y = f(x) and find them for the function  $y = 3x^2-x+1$ .

Or

- (b) The total revenue and total cost functions of a firm are  $R = 20Q-Q^2$  and  $C = Q^2+8Q+12$  respectively. Find the profit maximizing levels of output and the maximum profits.
- 14. (a) Distinguish between the concepts of 'Definite and Indefinite Integrals' and find the integral of the following function:

$$\int_{0}^{1} x(x+6) dx$$

- Define the concepts of Consumers' Surplus and Producers' Surplus. If the demand function is  $p = 25-3x-3x^2$ , find the consumers' surplus when the quantity demanded,  $x_0 = 2$ .
- 15. (a) Define the concept of Determinant of a Matrix and discuss the properties detrminants with illustrations.

Or

(b) Solve the following system of equations by Cramer's Rule:

2x-4y+3z = 3

$$4x-6y+5z = 2$$

$$-2x+y-z = 1$$

### **Unit 1: Functions and Limits**

**Functions** - Type of Functions - Increasing and Decreasing - Implicit and Explicit - Constant, Linear, Quadratic, Logarithmic and Exponential functions - Graphical Representations of Functions - **Economic Applications of Functions** - **Limits:** Concepts of a Limit of a Function - Theorems on Limits of Functions - Evaluations of Limits in Simple Cases - Limits and Continuity of Functions.

### **Unit 2: Differential Calculus and Economic Applications (One Variable)**

**Differential Calculus:** Meaning – Process of Differentiation – Rules of Differentiation – Differentiation of Logarithmic and Exponential Functions – Higher Order Derivatives – Maximum and Minimum Points – Points of Inflection - **Economic Applications:** Marginal concepts, Price and cross Elasticity of demand – Relationship among Total, Marginal, Average concepts – Optimizing Economic functions.

### **Unit 3: Estimation and Testing of Hypothesis:**

**Estimation:** Introduction — Point and Interval Estimation - Estimators and their Properties: Consistency, Unbiasedness, Efficiency and Sufficiency - Method of estimation — Method of Least Squares and Method of Maximum Likelihood. **Tests of Hypothesis:** Statistical Hypothesis — Critical Region — Best Critical region — The Most Powerful Test - Types of errors - Large sample tests for means and proportions - Small sample tests based on t, F and Chi-square distributions.

### **Unit 4: Sampling Theory:**

Need for sampling – Census Vs. Sampling - Types of sampling – Simple random sampling – Stratified random sampling – Systematic sampling – Two Stage sampling.

### **Unit 5: Correlation and Regression:**

Simple Correlation – Computation – Properties - Rank Correlation - Regression Lines - Numerical problems – Concept of Partial and Multiple Correlations.

MAPPING

Model Paper

M.A DEGREE EXAMINATION 2021-22
First Semester
Branch: ECONOMETICS
DEPARTMENT OF ECONOMETRICS

1<sup>ST</sup> SEMESTER –PRACTICAL EXAMINATION
PAPER CODE: EMT-104

TIME: 3 HOURS Maximum: 80 Marks

Answer any **four**questions, All Questions Carry equal Marks (4\*20=80 Marks)

1. Calculate Mean, Median and Mode for the following data.

Marks	0-10	10-20	20-30	30-40	40-50	50-60	60-70
No. of Students	6	16	35	55	45	31	8

**2.** Following are the Marks obtained by two students A and B in 10 papers in an examination. Who will get the prize, if the consistency of performance is the criterion for awarding the prize?

3.

Student/sets	1	2	3	4	5	6	7	8	9	10
Marks obtained by A	42	82	80	47	51	70	68	53	62	65
Marks obtained by B	41	69	53	64	66	58	71	49	54	45

distribution of typing mistakes committed by a typist

Mistake for Page	0	1	2	3	4	5
No. of Mistakes	142	156	69	27	5	1

- (i) Fit a Poisson distribution (ii) To find expected frequencies
- (iii) Test for goodness of fit.(X²table value is 9.488)
- **4.** The scores for nine students in Physics and Chemistry are as follows:

Ph	ysics	35	23	47	17	10	43	9	6	28	
----	-------	----	----	----	----	----	----	---	---	----	--

The

Chemistry	30	33	45	23	8	49	12	4	31
-----------	----	----	----	----	---	----	----	---	----

Compute the Spearman rank correlation.

### 5. Fit two Regression Lines for the following data, Y on X and X on Y

STATISTICAL METHODS

Х	46	31	29	32	51	24	16	23	28
Υ	34	42	57	40	54	50	28	47	38

**6.** Use Cramer's Rule to solve 3x+5y-7z=13, 4x+y-12z=6, 2x+9y-3z=20.

EMT105(a)

CO<sub>5</sub>

Course Obj	ectives: The main objective of this study progra	mme is thus to cu	ltivate the analytical
skills that ca	an be used to solve complex analytical tasks bas	ed on a non-trivial	statistical analysis of
the underly	ring data.To solve the tasks of formulating a	nd estimating econ	nomic models using
statistical m	ethods. This course an underlying of descriptive s	tatistics, Probability	, Sampling methods,
Correlation	and Regression Analysis and Testing of Hypothe	sis.	
CO1	Able to find Mean, Median, Mode, Range, Qu	artile Deviation and	d Standard Deviation
	and Coefficient of Variation.		
CO2	Able to apply Binomial, Poisson, Normal and I	og-Normal Distrib	ution Correlation and
	Regression Analysis.		
CO3	Able to test small sample tests based on t, F an	d Chi-square distrib	outions
CO4	formulate Statistical Methods describing the	lynamics of econor	mic systems such as
	production function analysis and solve econome	etric analysis of und	lerlying data use with
	knowledge advanced econometric tools and tecl	niques can solve ea	asily.
1			

Student can identify the relationship between the economic variables and test their

### Unit 1: Basics:

Measures of Central Tendency – Measures of Dispersion – Coefficient of Variation, Skewness and Kurtosis – Numerical problems.

### **Unit 2: Probability and Distributions:**

**Probability:** Concept of Probability – Axioms of Probability – Addition and Multiplication theorems – Bayes's Theorem - **Distributions:** Random Variables – Distribution Function – Probability Density Function - Mathematical Expectation – Binomial, Poisson, Normal and Lognormal distributions – Mean and Variance - Chief characteristics of Normal Distribution.

### **Unit 3: Estimation and Testing of Hypothesis:**

**Estimation:** Introduction – Point and Interval Estimation - Estimators and their Properties: Consistency, Unbiasedness, Efficiency and Sufficiency - Method of estimation – Method of Least Squares and Method of Maximum Likelihood. **Tests of Hypothesis:** Statistical Hypothesis – Critical Region – Best Critical region – The Most Powerful Test - Types of errors - Large sample tests for means and proportions - Small sample tests based on t, F and Chi-square distributions.

### **Unit 4: Sampling Theory:**

Need for sampling – Census Vs. Sampling - Types of sampling – Simple random sampling – Stratified random sampling – Systematic sampling – Two Stage sampling.

### **Unit 5: Correlation and Regression:**

Simple Correlation – Computation – Properties - Rank Correlation - Regression Lines - Numerical problems – Concept of Partial and Multiple Correlations.

# Model Paper M.A DEGREE EXAMINTIONFIRST SEMESTER BRANCH: ECONOMETRICS

### Paper-105(a): STATISTICAL METHODS

(Under CBCS Revised Syllabus from 2021-22)

Time: 3 Hours Max. Marks: 80

### Section-A

# Answer any FIVE questions Each question carries 4 marks(5X4=20)

- $1. \ \ \text{Define Arithmetic Mean and discuss its properties}.$
- 2. Define Skewness and discuss different methods of measuring Skewness.
- 3. Define Probability and discuss any three concepts associated with Probability.
- 4. Expalin the concepts of Distribution Function and Probability Density Function.
- 5. Distinguish between Point Estimation and Interval Estimation with an example.
- 6. Explain the concept of Type I Error and Type II Error.
- 7. Explain the concept of Probability Sampling with an example.
- $8.\;$  What are the advantages of Stratified Sampling over the Simple Random Sampling?
- $9. \ \ \text{State various uses of Correlation and Regression analysis in economics.}$
- 10. Distinguish between Partial and Multiple Correlations.

### Section-B

# Answer ALL the questions Each question carries 12 marks

(5X12=60)

### 11. (a) Compute Mean, Median and Mode for the following data:

Class Interval	40-50	50-50	60-70	70-80	80-90	90-100
Frequency	35	24	21	18	6	3

Or

(b) Compute the Coefficeint of Variation for the following data:

Class Interval	5-10	11-15	16-20	21-25	26-30	31-35
Frequency	3	4	7	3	2	1

PTO

12. (a) Derive the Mean and Variance of the Binomial Distribution.

Or

(b) Fit Poisson distribution for the following data:

x-value	0	1	2	3	4
Frequency-f	123	59	14	3	1

13. (a) Discuss the desirable properties of a Good Estimator.

Or

- (b) Out of a sample of 120 persons in a village, 76 were administered a new drug for preventing influenza and out of them, 24 were attacked by influenza. Out of those who were not administered the new drug, 12 persons were not affected by influenza. Prepare
  - (a) The 2x2 table showing actual and expected frequencies.
  - (b) Use Chi-square test for finding out whether the new drug is effective or not.

(The table Chi-square value at 5% level of significance for one degree of freedom is 3.84)

14. (a) Define Sampling and discuss the relative merits and demerits of Sample and Census methods of data collection.

Or

(b) (b) Distinguish between Random and Non-random sampling and discuss different types of Random Sampling.

15. (a) Compute the Correlation Coefficient for the following data and interpret your result:

Class Interval	3	5	6	7	9	10	11	12	13	15
Frequency	4	5	7	8	9	11	12	13	14	16

Or

 $\begin{tabular}{ll} (b) & (b) What are Regression Lines? Explain the method of deriving two regression lines of Y on X and X on Y. \end{tabular}$

### **Unit 1: Nature of Econometrics and Economic Data**

Definition of Econometrics – Steps in Empirical Economic Analysis - Econometric Model – The Role of Measurement in Economics – The Structure of Economic Data: Cross-Sectional data, Time Series data, Pooled Cross Section data, Panel Data.

### **Unit 2: Simple Regression Model**

Two Variable Linear Regression Model: Assumptions, Estimation of Parameters, Tests of Significance and Properties of Estimators – Functional forms of Regression models – Log-linear models, Semi log-models and Reciprocal models – Choice of Functional Form.

### **Unit 3: The General Linear Model**

Review of Assumptions, Estimation and Properties of Estimators: Un-biasness, BLUEs and Tests of significance of estimates – Analysis of Variance - **Dummay variables** - Nature of Dummy variables – Use of Dummy Variables – Errors in Variables and its consequences.

### **Unit 4: Auto-regressive and Distributed Lag Models**

Introduction – Types of Lag schemes - Koyck's lag model, Almon's Lag scheme, Partial Adjustment and Expectations models - Causality in Economics – The Granger Causality Test.

### **Unit 5: Simultaneous Equation Models**

Specification – Simultaneous Bias – Inconsistency of OLS Estimators - The concept of Identification, Rank and Order conditions for Identification – Indirect Least Squares - Two stage Least Squares (without proof), Problems.

### **MODEL PAPER**

### M.A. DEGREE EXAMINATION SECOND SEMESTER

**Branch: Econometrics** 

PAPER: 105(b) – INTRODUCTION TO ECONOMETRICS

(Revised Regulations CBSC from 2021-22)

Time: 3 Hours Max. Marks: 80

#### PART- A

Answer any FIVE questions. Each question carries 4 Marks (Marks:  $5 \times 4 = 20 \text{ Marks}$ )

- 1. Discuss the role of measurement in Economics.
- 2. Explain the method of Pooling of Cross Section and Time Series Data.
- 3. State the properties of OLS Estimators.
- 4. State the assumptions of the two variable linear model.
- 5. Derive the mean and variance of OLS estimator in general linear model.
- 6. What is Error in Variables linear model? What are its consequences?
- 7. What is a distributed lag model? Explain different lag schemes in lagged variable linear models.
- 8. Explain the method of Koyck's lag scheme.
- 9. Show that the OLS estimators are inconsistent in simultaneous equation models.
- 10. State the Rank and Order conditions for Identification.

### **PART-B**

Answer ALL questions. Each question carries 12 Marks (Marks: 5 x 12 = 60 Marks)

11. Explain the interrelationship among economics, mathematics and statistics in econometric approach.

What are the basic principles of Econometric model building?

12. Formulate the classical linear regression model and discuss the properties of least squares estimators of a linear regression model.

(OR)

Explain the different Functional Forms of regression models

13. Show that the OLS estimators are BLUEs.

(OR)

What is multiple correlation coefficient? What are its uses and explain the difference between  $R^2$  and adjusted  $R^2$ ?

PTO

14. Explain Almon's method of estimation of parameters in lagged variables (OR)

Explain the Partial Adjustment and Cagan's Adaptive Expectations models in distributed lag models

15. Explain the method of Indirect Least Squares.

(OR)

Explain the model specification, assumptions and procedure of 2SLS method of estimation without proof.

EMT 105 (c)	AGRICULTURAL ECONOMICS		4Credits
Course C	<b>Dijectives:</b> To import knowledge on role	of agriculture	sector in Economic
development a	and structural changes and contribution of Agricu	lture sector to the	he country economy.
Understanding	the need for improvement in Agricultural Produc	tivity – various	programmes adopted
by the Govern	ment for the improvement of Agricultural producti	vity	
CourseOutc	omes: Attheendofthecourse, the student will be able to		
CO1	Understanding scope of Agriculture Economics	- Role of Agri	culture in Economic
I	Development- changes and contribution of Agricu	ılture sector and	d Role of Women in
	Agricultural Development		
CO2	Inderstanding the development of Agriculture	Sector Post ind	lependence period -
	rends in area production and productivity and India		
CO3	Agriculture Sector Post independence period	– trends in a	rea production and

	1	roductiv	ity and I	ndia's p	osition	in World	d Agricult	ure.				
СО		Understanding the disbursement of institutional finance to primary sector, credit management and risk management.										ţ
СО	5	Other agencies – reasons for indebtedness in Agricultural Households.

### Unit -I: Agriculture and Economic Development

Definition, Nature and Scope of Agricultural Economics – Role of Agriculture sector in Economic Development – Structural changes and Contribution of Agriculture Sector — Modernisation of Agricultural Production Systems – Global Hunger Index – Achieving Zero Hunger – Re-orientation of Agricultural Development- Sustainable Agriculture- Role of Women in Agricultural Development.

### Unit -II: Agriculture Sector in India

Development of Agriculture sector during Post-Independence Period —Green Revolution - Trends in Growth of Gross Cropped Area and Gross Irrigated Area — Decreasing Size of Average Land Holdings — Area, Production and Yields of Principal Crops- Targets and Achievements during Five Year Plans — India's Position in World Agriculture.

### Unit -III. Investments in Agriculture Sector in India

Factors Determining Gross Capital Formation in Agriculture Sector – Trends during Five Year Plans – Share of Public and Private Sectors – Budgetary expenditure on Agriculture sector – Inflow of FDI into Agriculture sector- Sources and Trends in flow of Credit to Agriculture – Kisan Credit Cards – Credit for Rain fed Areas – Indebtedness of Agricultural Households.

### Unit – IV: Government Initiatives and Development of Agriculture

Need for Improvement in Agricultural Productivity- Government Initiatives – National Food Security Mission (NFSM)- National Mission for Sustainable Agriculture (NMSA) and Agricultural Extension

and Technology – National Crop Insurance Programme – PradhanMantriFasalBimaYojana-RashtriyaKrishiVikasYojana – Rain fed Area Development Programme.

### Unit- V: Agricultural Marketing and Trade in India

Determinants of Marketable and Marketed Surplus – Structure of Agricultural Markets – Primary and Secondary Wholesale Markets- Terminal Markets – Retail Markets – Fairs – Nature of Markets – Group Marketing- Cooperative Marketing – Direct Marketing – Warehousing in Rural areas – Physical and Financial Performance of GrameenBhandaranYojana – Role of AGMARK and AGMARKNET-Exports and Imports of Agricultural Commodities

Model Paper

M. A. DEGREE EXAMINATION – 2021-22
FOURTH SEMESTER
Branch: Econometrics

Paper: EMT 105(c) – AGRICULTURAL ECONOMICS ECONOMICS (Revised Regulations CBSC from 2021-22)

Time: 3 Hours Max: Marks: 80

PART- A

Answer any FIVE questions. Each question carries 4 Marks (Marks:  $5 \times 4 = 20 \text{ Marks}$ )

- 1. What is Nature and Scope of Agricultural Economics.
- 2. Explain the concerpt of Sustainable Development.
- 3. Distinguish between Renewable and non-renewable resources.
- 4. Explain the concept of 'Tragedy of Commons'.
- 5. What are the different sources of Air pollution?

36

6.what is Kisan Credit Cards.

- 7. Explain the National Food Security Mission (NFSM).
- 8. What is National Crop Insurance Programme?
- 9. State the Exports and Imports of Agricultural Commodities
- 10. What is Physical and Financial Performance of GrameenBhandaranYojana?

#### **PART-B**

Answer ALL questions. Each question carries 12 Marks (Marks:  $5 \times 12 = 60 \text{ Marks}$ )

11. Discuss the Role of Women in Agricultural Development.

Oı

Elucidate the Modernisation of Agricultural Production Systems

12. Discuss the Development of Agriculture sector during Post-Independence Period

Or

Explain the Targets and Achievements during Five Year Plans

13. What are the Factors Determining Gross Capital Formation in Agriculture Sector explain.

Or

Explain methods of managing urban solid waste in India.

14. Explain the Sources and Trends in flow of Credit to Agriculture?

Or

Discuss the objectives of National Crop Insurance Programme.

15 Examine the National Mission for Sustainable Agriculture (NMSA) and Agricultural Extension and Technology Or

Examine the Primary and Secondary Wholesale Markets

\*\*\*\*

EMT 106 (a)	ENTREPRENEURSHIP AND SKILL DEVELOPMENT	4Credits
	DE VERSTIVIENT	
Course Obje	ectives: To make students develop and can systematically apply a	n entrepreneurial way
of thinking	To import knowledge on organisations for Skill Developm	nent.Development of
communicati	on skills and skill development.	
CourseOut	comes: Attheendofthecourse, the student will be able to	
CO1	Entrepreneurship and skill development course outcome study	of concepts, functions
	and types of entrepreneurship.	
CO2	To familiar the student with the basic concepts function and type of	of entrepreneurs.

CO			omen entrepreneurship and economic development. Role of national and state level ganizations in the development of entrepreneurship.										
СО			Provide orientation on identification and to assess the feasibility of the project.										
СО	CO5 To make students develop and can systematically apply an entrepreneurial way of thinking.										way of

# Model Paper M. A. DEGREE EXAMINATION – 2021-22 FOURTH SEMESTER

Branch: Econometrics

Paper: EMT 106(a) - ENTREPRENEURSHIP AND SKILL DEVELOPMENT (Revised Regulations CBSC from 2021-22)

Max: Marks: 80

#### PART- A

Answer any FIVE questions. Each question carries 4 Marks (Marks:  $5 \times 4 = 20 \text{ Marks}$ )

1. What is Concepts of Entrepreneurship?

Time: 3 Hours

- 2. Explain the Need for the Development of Skills.
- 3. what isIntra and Inter-personal Communication Skills.
- 4. Explain the concept of Objectives of Project.
- 5. What are the different National and State Level Organizations

- 6. State the National Institute of Small Industry Extension and Training (NISIET).
- 7. Explain the Skill Development Mission.
- 8. Examine the National Skill Foundation of India(NSFI)
- 9. State the PM's National Council on Skill Development
- 10. What is Skill Development Mission

#### **PART-B**

Answer ALL questions. Each question carries 12 Marks (Marks:  $5 \times 12 = 60 \text{ Marks}$ )

11. Discuss the Functions and Types of Entrepreneurs.

Or

Elucidate the relationship between Women Entrepreneurship and Economic Development.

12 Discuss the National Institute of Small Industry Extension and Training (NISIET). Or

Explain the National Institute for Entrepreneurship and Small Business Development (NIESBUD)

13. Elucidate the Methods and Contents of Project Report
Or

Explain the Formulation and Appraisal of Project Report.

14. Explain the concept and Need for the Development of Skills.

Or

Discuss the Verbal and Non-Verbal Communication

15. Examine the – Intra and Inter-personal Communication Skills.

Or

Explain the National Skill Foundation of India(NSFI)

EMT 106(b)	ENVIRONMENTAL ECONOMICS	4Credits

Course Objectives: The main objective of environmental economics is to maintain a balance between economic development and environmental quality. In order to achieve it, environmental economists have to explore the various socio-economic possibilities to reduce pollution and uplift the standard of living of the people. Environmental economics is a distinct branch of economics that acknowledges the value of both the environment and economic activity and makes choices based on

those values. The goal is to balance the economic activity and the environmental impacts by taking into account all the costs and benefits.

Model Paper
M. A. DEGREE EXAMINATION
FOURTH SEMESTER

Branch: Econometrics

Paper: EMT 106(b)- ENVIRONMENTAL ECONOMICS (Revised Regulations CBSC from 2021-22)

Time: 3 Hours Max: Marks: 80

#### **PART-A**

Answer any FIVE questions. Each question carries 4 Marks (Marks:  $5 \times 4 = 20 \text{ Marks}$ )

- 1. What is Environmental Kuznets Curve?
- 2. Explain the concerpt of Sustainable Development.
- 3. Distinguish between Renewable and non-renewable resources.
- 4. Explain the concept of 'Tragedy of Commons'.
- 5. What are the different sources of Air pollution?
- 6. List out the Economic effects of pollution.
- 7. Explain the rationale behind the 'Polluter Pays Principle'.
- 8. What are Pigouvian taxes?
- 9. State the salient features of Air Act
- 10. What is Social Forestry?

#### **PART-B**

Answer ALL questions. Each question carries 12 Marks (Marks:  $5 \times 12 = 60 \text{ Marks}$ )

11. Discuss the nature and scope of Environmental Economics.

Ot

Elucidate the relationship between Economic Development and Environmental Quality.

12. Discuss the issues involved in the management of ground water.

Ot

Explain the cuases of Environmental Degradation in India.

13. To what extent industrialisation is responsible for air pollution in India. Substantiate your answer.

Or

Explain methods of managing urban solid waste in India.

14. Explain the method of Hedonic pricing method of Environment. How do you apply it to control Water Pollution in India?

Or

Discuss the objectives and major provisions of National Environmental Policy 2006.

15. Examine the major provisions of the Envionmental (Protection) Act 1986 enacted after the Bhopal Tragedy in India.

Or

Explain the rationale behind the 'Polluter Pays Principle'

\*\*\*\*

#### EMT 107: HUMAN VALUES AND PROFESSIONAL ETHICS - I

Human values are the virtues that guide us to take into account the human element when we interact with other human beings. It is with those human values that one becomes truly able to put into practice his/her ethical values, such as justice, integrity, and refusal of violence and ban to kill – even in a crisis situation. To create an awareness on Management Ethics and Human Values. To inspire Moral and Social Values and Loyalty. To appreciate the rights of others. The prime objective of the Professional Ethics is to develop ability to deal effectively with moral complexity in students. To understand the moral values that ought to guide the Engineering profession, (b) To resolve the moral issues in the profession, and (c) To justify the moral judgment concerning the profession.

## **Course Objectives**

This is a course on human values and professional ethics. The main objectives of the course is nature of ethics, relation to Religion, Politics, Business, Legal, Medical and Environment; Nature of Values- Good and Bad, analysis of basic moral concepts- right, ought, duty, obligation, justice, responsibility and freedom; the Ahimsa (Non- Violence), Satya (Truth), Brahmacharya (Celibacy), Asteya (Non-possession) and Aparigraha(Non- stealing). Purusharthas(Cardinal virtues)-Dharma (Righteousness), Artha(Wealth), Kama(Fulfillment Bodily Desires). Moksha(Liberation); the Four Noble Truths and Gandhian Ethics; and lastly crime and Theories of punishments are reformative, retributive and Deterrent.

Education- Telugu ~ Akademi, Hyderabad.

16) I.C Sharma Ethical Philosophy of India. Nagin& co Julundhar

**Learning Outcomes** 

Time: 3 Hrs

After successfully completing the course the graduate is able to:

Honesty, open disclosure and sincerity are all characteristics of ethical behavior. Many organizations include a commitment to ethical behavior in their code of conduct. The professionals can adopt a personal code of conduct and make the same commitment on an individual basis. Professional ethics are accepted standards of personal and business behavior, values and guiding principles. The codes of professional ethics are established by professional organizations to help to guide members in performing their job functions according to sound and consistent ethical principles. The principles are beneficence, non-malfeasance, autonomy, justice; truth-telling and promise-keeping.

# **Unit 1: Factor Markets**

Factor Pricing: Marginal Productivity Theory of determination of Factor prices - Factor shares and the 'Adding up' problem - Euler's theorem - Pricing of factors under Imperfect Competition.

#### **Unit 2: Functional Distribution**

Theories of Rent: Concept of Rent – Ricardian theory of Rent – Quasi Rent, Theories of Wages: Wage determination under Perfect competition, Monopsony and Collective bargaining Bilateral Monopoly), Theories of Interest: Classical theory of interest – Loanable fund theory – Keynes liquidity preference theory of interest, Theories of Profit: Profit as dynamic surplus – innovations and profits – risk uncertainty and profits

#### Unit 3:Economics of Information

Basic Concepts of Economics of Information - Economic Value of information - Role of information in Economic theory – Information, a measure of risk - Bayes' Rule - Classical Paradoxes - Choice under Risk - Risk Allocation in Exchange Economies Model - Monopolist Insurer - Perfect Competition - Adverse Selection - Monopolistic Screening, Competition and Market Breakdown - Public Intervention - Brief introduction to Game theoretic approach to information use.

## **Unit 4: General Equilibrium**

Meaning of Partial and General Equilibrium – Static and Dynamic Equilibrium – Stable and Unstable Equilibrium –Walrasian System of General Equilibrium - Existence and Stability of General Equilibrium - Externalities and Allocative Efficiency.

#### **Unit 5: Welfare Economics**

Welfare Economics – Criteria of Social Welfare – Adam Smith, Bentham, Pigou, and Cardinal school – Pareto Optimality in Consumption, Production and Distribution – Kaldor-Hicks Compensation Criteria- Bergson Social Welfare Function - Social Choice Theory, Coase and Sen.

Model Paper
M.A DEGREE EXAMINATION
Second Semester

# Branch: ECONOMETRICS EMT 201 – MICROECONOMIC THEORY – II (UNDER CBCS Revised Syllabus from 2021-22)

Time: 3 hours Marks: 80

# Section-A Answer any FIVE questions Each question carries 4 marks(5X4=20)

- 15. Distinguish between the Value of Marginal Product (VMP) and Marginal Revenue Product.
- 16. Explain the concept of 'Monopolistic Exploitation' of a Factor.
- 17. What is 'Quasi Rent'?
- 18. Explain the concept of 'Liquidity Trap'.
- 19. State the meaning of risk and distinguish it from uncertainity.
- 20. What is 'Zero Sum' game?
- 21. Explain the concepts of stable and unstable equilibrium.
- 22. What are externalities?
- 23. Distinguish between Pareto Optimality and Pareto improvement.
- 24. State the concept of Kaldor-Hicks' Compensation Criterion.

#### Section -B

# Answer ALL the questions Each question carries 12 marks 5x12=60

25. Critically examine Marginal Productivity Theory of Distribution

 $\Omega_1$ 

State and prove Euler's Theorem and explain its significance.

26. Discuss the Ricardian Theory of Rent.

Or

Evaluate the Loanable Funds theory of interest.

13. Elucidate the role of information in economic theory.

Or

Explain the short – run and long run equilibrium of the firm under Monopoly.

15. Critically examine Chamberlin's model of Monopolistic Competition.

Or

Explain the Price Leadership model of the Dominant firm.

15. Discuss Baumol's theory of Sales Maximisation.

Or

Elucidate the Franco Modigliani model of Limit Pricing.

EMT202	MACRO ECONOMIC THERORY II	4Credits
Cours	se Objectives: Macroeconomics refers to the study of the overall	performance of the
economy. W	Thile microeconomics studies how individual people make decisio	ns, macroeconomics
deals with t	he overall aggregate effect of microeconomics. Macroeconomic	es is crucial for the
government	to understand and predict the long-term consequences of their decision	ons. The overarching
goals of mac	roeconomics are to maximize the standard of living and achieve stab	ole economic growth.
The goals ar	e supported by objectives such as minimizing unemployment, inc	reasing productivity,
controlling i	nflation, and more. The objectives are Full employment. Price s	tability. A high, but
sustainable, 1	rate of economic growth. Keeping the balance of payments in equilib	orium.
CO1	The overarching goals of macroeconomics are to maximize the st achieve stable economic growth	andard of living and
CO2	The goals are supported by objectives such as minimizing unemp	ployment, increasing
	productivity, controlling inflation, and more.	
CO3	The macro economy of a country is affected by many forces, an	d as such, economic
	indicators are invaluable to assessing different aspects of performan	ice.
CO4	Meaning and Types of Inflation – Demand-Pull inflation – Cost-	Push Inflation – The
	Phillips curve – The Inflation – Unemployment trade-off.	
CO5	Objectives of Macroeconomic policies – Objectives of Monetary and Real Business cycles Theorem – Post-Keynesians - Implicati Policies.	1 2

#### **Unit 1: Demand for and Supply of Money**

The Classical View- Neo-classical view-Quantity Theory of Money – Keynes and the Demand for Money - Post Keynesian theories of demand for money - Baumol , James Tobin and Friedman – Concept of Money Supply – Components of Money Supply – RBI approach to Money supply – High Power Money and Money Multiplier – Determinants of Supply of Money.

#### Unit - 2: Macro Theories of Distribution

Functional Versus Personal Distribution of Income - MicroversusMacro-theories of Distribution - Marxian, Ricardian, Kelecki Theories of Distribution - Alternate theories of distribution – Kaldor.

#### **Unit 3: Trade Cycles**

Meaning and Types of Trade Cycles – Different theories of Trade Cycles – Samuelson's Model of Trade Cycle – Hicks' Theory Cycle – Kaldor's Model of Trade Cycle – Control of Business Cycle – Monetary and Fiscal Policies.

#### Unit 4: Theories of Inflation

Meaning and Types of Inflation – Demand-Pull inflation – Cost-Push Inflation – The Phillips curve – The Inflation – Unemployment trade-off - The Monetarists Accelerationists' Hypothesis – Rational Expectations Hypothesis – New-classical and Real Business cycles Theorem – Post-Keynesians - Implications for Stabilization Policies.

### **Unit 5: Macroeconomic policies**

Objectives of Macroeconomic policies – Objectives of Monetary policy – The policy of Activists arguments – The policy of Non-activists arguments - Fiscal policy – objectives and tools - Automatic stabilizers – Problems of using of Fiscal policies – Effectiveness of Monetary and Fiscal policies – The concept of Open Economy macroeconomics.

### **EMT 202: MACROECONOMIC THEORY II**

(UNDER CBCS Revised Syllabus from 2021-22

Time: 3 Hrs Marks: 80

# Section-A Answer any FIVE questions Each question carries 4 marks(5X4=20)

- 1. State and explain Fisher's Quantity theory of money.
- 2. What are the components of money supply according to RBI in India?
- 3. Distinguish between Fucntional and Personal distribtuion of Income.
- 4. Explain the Ricardian concept of Stationary State'.
- 5. Briefly explain different phases of Trade Cycle.

- 6. What are the lags in monetary policy?
- 7. Distinguish between 'Demand Pull and Cost Push Inflations'.
- 8. State the implications of Rational Expectation Hypothesis.
- 9. What are the objectives of the Monetary Policy?
- 10. What are the uses of Automatic Stabilizers?

#### Section -B

# Answer ALL the questions Each question carries 12 marks 5x12=60

11. Discuss Tobin's Portfolio Approach to demand for money.

Or

What is 'High Powered' Money? Explain the process of Money Multiplier in an economy.

12. ElucidiateKelecki Theory of Distribution.

Or

Give an account of Kaldor's theory of Distribution.

13. Examine Hicks' Thoery of Trade Cycle.

Or

Explain the methods of controlling Trade Cycles in a free market economy.

14. Discuss the 'Trade – off' between Inflation and unemployment in the short run.

Or

Critcally examine the 'Real Business Cycle Theorem' profounded by the New Classical School.

15. What are the instruments of Monetary policy? Explain their role in stabilisation of the economy.

Or

Expalin the relative effectiveness of Fiscal and monetary policies in promoting economic growth in an economy.

EMT203	BASIC ECONOMETRICS		4Credits
Cours	se Objectives: This course is designed to defi	ne Econometrics,	Steps in Empirical
Economic A	nalysis, Different types of data involved in econ-	ometric Analysis.	The courses involved
Simple and	Multiple Linear regression model and Function	onal forms of No	n-Linear Regression
models.Basic	concept of Auto regressive distributed lag mo	del (ARDL) deve	loped which will be
helpful for fu	ture research work with time series data.		
CO1	Adequate competency in the frontier areas of eco	nomic theory and	methods.
CO2	Formulation and estimation of a multiple regress	on model.	
CO3	Decision about the statistical significance of in	dividual explanato	ory variable and also
	over all models		
CO4	Impacts for the violation of one of the important	nt assumptions for	application of OLS
	regression.		
CO5	Estimation of system of equations, estimation of	panel data models	, generalized method

#### Unit 1: Nature of Econometrics and Economic Data

Definition of Econometrics – Steps in Empirical Economic Analysis - Econometric Model – The Role of Measurement in Economics – The Structure of Economic Data: Cross-Sectional data, Time Series data, Pooled Cross Section data, Panel Data.

## **Unit 2: Simple Regression Model**

Two Variable Linear Regression Model: Assumptions, Estimation of Parameters, Tests of Significance and Properties of Estimators – Functional forms of Regression models – Log-linear models, Semi log- models and Reciprocal models – Choice of Functional Form.

#### Unit 3: The General Linear Model

Review of Assumptions, Estimation and Properties of Estimators: Un-biasness, BLUEs and Tests of significance of estimates – Analysis of Variance - **Dummay variables** - Nature of Dummy variables – Use of Dummy Variables – Errors in Variables and its consequences.

#### Unit 4: Auto-regressive and Distributed Lag Models

Introduction – Types of Lag schemes - Koyck's lag model, Almon's Lag scheme, Partial Adjustment and Expectations models - Causality in Economics – The Granger Causality Test.

## **Unit 5: Simultaneous Equation Models**

Specification – Simultaneous Bias – Inconsistency of OLS Estimators - The concept of Identification, Rank and Order conditions for Identification – Indirect Least Squares - Two stage Least Squares (without proof), Problems.

#### **TEXT AND REFERENCE BOOKS:**

#### MODEL PAPER

M.A. DEGREE EXAMINATION
SECOND SEMESTER
Branch: Econometrics

PAPER: 203 – BASIC ECONOMETRICS (Revised Regulations CBSC from 2021-22)

Time: 3 Hours Max. Marks: 80

#### PART- A

Answer any FIVE questions. Each question carries 4 Marks (Marks:  $5 \times 4 = 20 \text{ Marks}$ )

- 16. Discuss the role of measurement in Economics.
- 17. Explain the method of Pooling of Cross Section and Time Series Data.
- 18. State the properties of OLS Estimators.
- 19. State the assumptions of the two variable linear model.
- 20. Derive the mean and variance of OLS estimator in general linear model.
- 21. What is Error in Variables linear model? What are its consequences?
- 22. What is a distributed lag model? Explain different lag schemes in lagged variable linear models.
- 23. Explain the method of Koyck's lag scheme.
- 24. Show that the OLS estimators are inconsistent in simultaneous equation models.
- 25. State the Rank and Order conditions for Identification.

## **PART-B**

Answer ALL questions. Each question carries 12 Marks (Marks:  $5 \times 12 = 60 \text{ Marks}$ )

26. Explain the interrelationship among economics, mathematics and statistics in econometric approach. (OR)

What are the basic principles of Econometric model building?

27. Formulate the classical linear regression model and discuss the properties of least squares estimators of a linear regression model.

(OR)

Explain the different Functional Forms of regression models

**PTO** 

28. Show that the OLS estimators are BLUEs.

(OR)

What is multiple correlation coefficient? What are its uses and explain the difference between  $R^2$  and adjusted  $R^2$ ?

29. Explain Almon's method of estimation of parameters in lagged variables (OR)

Explain the Partial Adjustment and Cagan's Adaptive Expectations models in distributed lag models

30. Explain the method of Indirect Least Squares.

(OR)

Explain the model specification, assumptions and procedure of 2SLS method of estimation without proof.

EMT204	PRACTICAL-II	4Credits
Course Objective	es: The course designed about Practical knowledge of mat	thematical concepts

specially related to Input-output analysis and Linear Programming which are most important in economic decisions. This course covered Practical knowledge of OLS Method. The course involved practical approach of Multiple Linear Regression Model. Identify, Inconsistency of OLS Estimators. This course is extension of practical practices of Basic Econometrics and Mathematical Economics what we mentioned in the courses of EMT 203 and EMT 205. **CO1** Students can Identify Inter industrial relationships using Input-output analysis, CO<sub>2</sub> analyse maximization of profits and minimization of costs can evaluate using Linear Programming, **CO3** Analyse relationship of economic variables using simple and multiple regression models which are covered in basic Econometrics **CO4** Able to estimate and interpret linear regression models and be able to distinguish between economic and statistical importance CO<sub>5</sub> They should be able to critique reported regression results in applied academic papers and interpret the results for someone who is not trained as an economist. Mappingofcourseoutcomeswiththeprogramoutcomes PO<sub>1</sub> PO2 PO<sub>3</sub> PO6 PO7 PO9 PO4 PO<sub>5</sub> PO8 PO10 PO11 PO12 **CO1** 3 3 2 2 1 1 2 2 1 CO<sub>2</sub> 3 2 2 2 1 1 2 2 1 2 3 2 1 1 2 **CO3** 3 2 2 **CO4** 3 2 3 2 1 1 2 2 1 **CO5** 3 2 1 1 2 1 1 2 1

## **Unit 1: Input-Output Analysis**

Assumptions - Technological Co-efficient Matrix – Closed and open Model – Solution of Open Model – Hawkins-Simon Conditions – Dynamic Input-Output Model – Production Function Approach to Input Output Model.

#### **Unit 2: Linear Programming**

Basic Concepts – Formulation of LPP – Basic and Feasible Solutions – Graphical Solution - Simplex Method – Duality in Linear Programming – Elements of Data envelop Analysis and its Applications.

#### **Unit 3: The General Linear Model**

Review of Assumptions, Estimation and Properties of Estimators: Un-biasness, BLUEs and Tests of significance of estimates – Analysis of Variance - **Dummay variables** - Nature of Dummy variables – Use of Dummy Variables – Errors in Variables and its consequences.

#### Unit 4: Auto-regressive and Distributed Lag Models

Introduction – Types of Lag schemes - Koyck's lag model, Almon's Lag scheme, Partial Adjustment and Expectations models - Causality in Economics – The Granger Causality Test.

#### **Unit 5: Simultaneous Equation Models**

Specification – Simultaneous Bias – Inconsistency of OLS Estimators - The concept of Identification, Rank and Order conditions for Identification – Indirect Least Squares - Two stage Least Squares (without proof), Problems.

#### **TEXT AND REFERENCE BOOKS:**

#### MODEL PAPER

M.A. DEGREE EXAMINATION
SECOND SEMESTER
Branch: Econometrics
PAPER: 204 – practical II
(Revised Regulations CBSC from 2021-22)

# Answer any THREE Questions. All Questions carry equal marks [3x20=60]

1. The following data we get to all the Indian Agriculture production, area and a yield index numbers from 2000-01 to 2014-15 are furnished below.

2000-	2001-	2002-	2003-	2004-	2005-	2006-	2007-	2008-	2009-	2010-	2011-	2012-	2013-	2013-

	01	02	03	04	05	06	07	08	09	10	11	12	13	14	14
Aggregate  Consumption(Y)	107.1	113.7	118.7	122.2	121.8	127.5	129.6	138.5	142.4	145.5	145.9	150.6	148.2	144.4	145.5
Disposable Income (X)	105.6	109.1	112.1	113.8	114.6	116.1	117.7	119.7	121.2	122.4	123.4	123.7	122.4	121.8	122.8

Calculate the following objectives based on the above data

(i). estimate the parameters and fit the two-variable linear model.

$$Y_r = \alpha + \beta X_r + u_r$$

- (ii). to predict the value of 'Y' when 'X=130.5.
- (iii). to determine the R<sup>2</sup>
- 2. The following data relates to the corn production with the inputs of fertilizers and insecticides used.

Production (Y)	40	44	46	48	52	58	60	68	74	80
Fertilizers (X <sub>1</sub> )	6	10	12	14	16	18	22	24	26	32
Insecticides (X <sub>2</sub> )	4	4	5	7	9	12	14	20	21	24

- (i). Estimate the parameters and fit the three variable linear model
- (ii). Test the significance of individual parameters
- (iii) Calculate the Analysis of variance (ANOVA).
- 3. From the following matrix find out the final output goals of each industry, assuming that consumer output targets are USD \$ 80 millions in Steel, USD \$ 30 millions in Coal and USD \$ 50 millions in Railway transport industry. The technological coefficient matrix and final consumer requirements of theCoal (A), Steel (B), and Railway transport (C) are;

	Coal	Steel	Railway's	Final consumer requirements
Coal (A)	0.3	0.2	0.2	Rs. 80 million
Steel (B)	0.2	0.1	0.5	Rs. 30 million
Railway's (C)	0.2	0.4	0.2	Rs. 50 million

**Labour** 0.3 0.3 0.1

- (i). Determine the gross levels of output of three industries and
- (ii). To find what will be the total labour requirements.
- 4. Solve the following LPP using the Simplex method.

Maximize 
$$Z = 12x_1 + 16x_2$$
  
Subject to  $10x_1 + 20x_2 \le 120$   
 $8x_1 + 8x_2 \le 80$   
 $x_1 \text{ and } x_2 \ge 0$ 

- 5. The following problems solved by Using Lagrange multiplier method.
  - (i). Maximization: what combination of (output) mixed should be profit maximizing produced when its total profit function is  $\pi = 80x 2x^2 xy + 3y^2 + 100y$ , and maximum output capacity is x + y = 12, and also estimate the effect of profit when its output capacity extended by one unit.
  - (ii). Minimization: what combination of goods x and y should produced to the minimum cost when joint cost function  $C = 6x^2 + 10y^2 xy + 30$ , and firm as a production quota is x + y = 34. Estimate the effect on cost if the production quota is reduced by one unit.

EMT205(a)	MATHEMATICAL ECONOMICS	4Credits
Course Obje	ctives: This course also introduces the Mathemat	tical tools such as Differential Calculu
and Econon	nic Applications (Two or More Variables), I	Differential Equations and Econom
Applications	.This course explores Input-output analysis and	d Linear programming which is mo
important in	the area of Inter industrial dependency and maxin	nization of the profits and minimizatio
of the cost of	f the firms.	
CO1	Students can deal Mathematical calculation of Lagrange's method and also student can eval Economic Applications.

#### Unit 1: Differential Calculus and Economic Applications (Two or More Variables)

**Differential Calculus:** Functions of two or more variables and Partial Derivatives – Rules of Partial Differentiation – Second-Order Partial Derivatives – Optimization of Multivariable Functions – Constrained Optimization with Lagrange Multipliers – Significance of Lagrange Multiplier – Differentials – Total and Partial Differentials – Homogeneous Functions – Euler's Theorem – Partial Elasticities; **Economic Applications:** Maximization of Utility – Minimization of Cost – Maximization of Cost, Profit – Elasticity of Substitution

## **Unit 2:Differential Equations and Economic Applications**

Definitions and Concepts – Linear Differential Equations of the First and Second Order with constant coefficient – Non-linear Differential equations of First-Order and First Degree – Variable Separable Case,

Differential Equations with homogeneous equations - Economic Applications of Differential Equations - Dynamic Multiplier - Harrod-Domar Model.

# **Unit 3: Difference Equations and Economic Applications**

Definitions and Concepts – Homogeneous Linear Difference Equations with Constant Coefficients – Particular Solution of Non-homogeneous Linear Equations – Linear First Order and Second Order Difference Equations with constant coefficients – Cobweb Model –Market model with Stocks – Dynamic Multiplier – Multiplier Acceleration Model: HarrodDomar Model – Multiplier's Accelerator Interaction Model of Samuelson.

### **Unit 4: Input-Output Analysis**

Assumptions - Technological Co-efficient Matrix – Closed and open Model – Solution of Open Model – Hawkins-Simon Conditions – Dynamic Input-Output Model – Production Function Approach to Input Output Model.

#### **Unit 5: Linear Programming**

Basic Concepts – Formulation of LPP – Basic and Feasible Solutions – Graphical Solution - Simplex Method – Duality in Linear Programming – Elements of Data envelop Analysis and its Applications.

#### **TEXT AND REFERENCE BOOKS**

#### MODEL PAPER

M.A. DEGREE EXAMINATION
Second Semester
Branch: Econometrics
PAPER: 205(a) – MATHEMATICAL ECONOMICS
(Revised Regulations CBSC from 2021-22)

Time: 3 Hours Max. Marks: 80

# PART- A Answer any FIVE questions. Each question carries 4 Marks

(Marks:  $5 \times 4 = 20 \text{ Marks}$ )

1. Explain the rules of partial differentiation.

- 2. Discuss the concept of partial elasticities.
- 3. Distinguish between first order and second order differential equations.
- 4. What is partial integration
- 5. Explain the concept of Non-homogeneous linear equation.
- 6. State the importance of Dynamic Multiplier.
- 7. Discuss the features of Technological Coefficient of Matrix.
- 8. State the assumptions of Dynamic Input Model.
- 9. How do you formulate Linear Programming Problem?
- 10. Explain the importance of Linear Programming Technique.

# **PART-B**

# Answer ALL questions. Each question carries 12 Marks (Marks: 5 x 12 = 60 Marks)

11. Explain constrained optimization with Lagrange multipliers with an example.

#### OR

Maximise the utility function  $U=6xy-x^2$ , subject to the budget constraint 4x+2y=30.

12. Explain the general formula for solution of first order differential equation with an example.

#### OR

Find the solution Y(t) of the following differential equation, given that Y(0) = -2

$$\frac{dy}{dt} = \frac{ty^2}{\sqrt{1+t^2}}$$

13. Explain the procedure for solving non homogeneous difference equations and solve the following system.

$$\frac{1}{t} = 4 \frac{1}{t - 1^{-9}}$$
 and  $Y_0 = 5$ .

#### OR

Describe the Multiplier – Accelerator interaction model of Samuelson.

**PTO** 

14. Given an econometrician's explanation for Input – Output technique and appraise the assumptions of input – output model.

OR

Given the matrix

$$X = \begin{bmatrix} 50 & 30 & 40 \\ 20 & 60 & 25 \\ 10 & 15 & 24 \end{bmatrix} \text{ and } F = \begin{bmatrix} 50 \\ 40 \\ 60 \end{bmatrix}$$

Where X represent the intersectoral flow of goods and F represent the final demand vector, time the total requirement table by inviting Leontief Matrix.

15. Explain the graphical solution of linear programming problem given below:

Maximize 
$$Z=20x+10y$$
  
Subject to  $4x+3y \le 48$   
 $3x+5y \le 60$   
 $x \le 9$   
 $x,y \ge 0$ 

OR

Using the Simplex method solve the following:

Maximize 
$$Z=6x_1+4x_2$$
  
Subject to  $-2x_1+x_2 \le 2$   
 $x_1-x_2 \le 2$   
 $3x_1+2x_2 \le 9$   
 $x_1,x_2 \ge 0$ 

EMT 205(b)	ACTUARIAL STATISTICS	4Credits

Course Objectives: The objective of the course is to provide knowledge on Actuarial Statistics. Actuarial analysis is an essential task performed by insurance companies to analyze data and estimate the probability of an insurance claim being filed for a given event. This work allows insurance companies to predict with areas on able degree of accuracy the amount of claims they will pay out, which helps them determine what premiums they must charge to remain profitable.

CourseO	utcomes: Attheendofthecourse, the student will be able to
CO1	To learn and gain the knowledge about the impact of economic and social conditions in the financial sector.
CO2	To create awareness about the financial terminology and calculations in the policy designing
CO3	To skill development and honed by successful actuaries include an excellent business communications in sense with knowledge of finance, accounting, and economics.
CO4	Actuaries often required keen analytical and problem solving skills using mathematics and statistics.
CO5	Actuaries can ability to work with reliability and relevance by using the analytical and scientific reports generated by the researchers

 $\overline{\triangleright}$ 

**Unit -1** Theory of Interest rates, Rate of Interest, Nominal rate of interest. Accumulation factors. Force of interest, present values, Stoodley formula for the force of interest, Present value of cash flows, Valuing cash flows - Basic Annuities Certain, Present values and accumulation, Concepts of different annuities, Continuously payable annuities, Varying annuities.

**Unit- 2** Utility Theory, Insurance and Utility Theory, Models for individual claims and their sums, Approximations for the distribution of the sum - Application to Insurance - Survival function, time until death for a person age X, Accurate future Life time, Force of Mortality.

**Unit-3** Life Table and its Relation with Survival Function – Examples - The Deterministic Survivorship group, Recursion formulas, Assumptions for traditional ages, Analytical Laws of Mortality, Select and Ultimate tables.

**Unit** − **4** Life Insurance: Insurance payable at the moment of death and at the end of the year of death – Level benefit insurance, Endowment insurance, Deferred insurance and Varying benefit insurance. Life Annuities. Single payment, Continuous Life annuities, Discrete life Annuities – life annuities with monthly payments, Complete annuities – Immediate and Apportionable annuities – due.

**Unit 5:** Multiple life functions, Joint life and Last Survivor status, Insurance and Annuity benefits through multiple life function, Evolution for Special Mortality laws - Multiple decrement models, associated single decrement tables, Central of multiple decrement, Central force assumptions for multiple decrements. Uniform distribution assumption for multiple decrements.

## odel Paper

# M.A DEGREE EXAMINTION SECOND SEMESTER

#### **BRANCH: ECONOMETRICS**

Paper-205(b): ACTUARIAL STATISTICS

(Under CBCS Revised Syllabus from 2021-22)

Time: 3 Hours Max. Marks: 80

#### Section-A

# Answer any FIVE questions Each question carries 4 marks (5X4=20)

- 1. What is Life Insurance
- 2. Explain the Theory of Interest rates
- 3. State any four Assumptions for traditional ages.
- 4. What is Special Mortality laws.
- 5. Define the Utility Theory
- 6. Explain the Endowment insurance
- 7. What are the causes of Endowment insurance
- 8. Explain the Analytical Laws of Mortality
- 9. What is Endowment insurance
- 10. Write a short note on Level benefit insurance

Section- B

# Answer ALL the questions Each question carries 12 marks (5X12=60)

- 11. (a) Explain the Survival function, time until death for a person age X, Accurate future Life time, Force of Mortality
  Or
- (b) Elucidate the Assumptions for traditional ages, Analytical Laws of Mortality, Select and Ultimate tables.
  - 12. (a) Critically examine the Central of multiple decrements, Central force assumptions

for multiple decrements.

Or

- (b) Explain the Multiple life functions, Joint life and Last Survivor status, Insurance
- 13. (a) critically Analyse the Insurance and Utility Theory

 $\Omega_1$ 

- (b) Discuss the 'Evolution for Special Mortality laws
  - 14. (a) Define Present values and accumulation, Concepts of different annuities,

Or

- (b) Explain the Models for individual claims and their sums.
- 15. (a) Critically examine the Evolution for Special Mortality laws Multiple decrement models
- (b) Discuss the major Concepts of different annuities, Continuously payable annuities, Varying annuities.

EMT 205(c)	)	WOMEN AND ECONOMIC		4Credits
		DEVELOPMENT		
Course	Objec	ctives: To make the students to understand t	he role of Women	in India's Economic
Developmer	nt To a	assess the status of women in India in terms	of such key indica	tors as literacy rates,
education, w	vork p	articipation rates, income, wealth and politic	al power.

# Model Paper

# M.A DEGREE EXAMINTION- 2021-22 SECOND SEMESTER

# BRANCH: ECONOMETRICS Paper-205(c): WOMEN AND ECONOMIC DEVELOPMENT

(Under CBCS Revised Syllabus from 2021-22)

Time: 3 Hours Max. Marks: 80

Section-A

Answer any FIVE questions Each question carries 4 marks (5X4=20)

- 1. What is Fertility Rates
- 2. Explain the Micro Credit Groups
- 3. Explain about Women and Literacy,.
- 4. What is Special Mortality laws.
- 5. Describe the Income Inequalities.

- 6. Explain the Gender division of labour
- 7. Explain Kasturba Gandhi BalikaVidyalayas (KGBV)
- 8. Explain the National Programme for Adolescent Girls (NPAG)
- 9. What isRashtriyaMahilaKhosh (RMK)
- 10. Write a short note on Indira Gandhi MatrutvaSahayogYojana

#### Section-B

# Answer ALL the questions Each question carries 12 marks(5X12=60)

11. (a) explain the Factors affecting women entry into labour markets

Or

- (b) Elucidate the Role of Women in Economic Development.
- 12. (a) Critically examine the Role of Non-Government Organizations in Women's welfare.

Or

- (b) Explain the National Institute of Entrepreneurship and Small Business Development (NIESBUD)
- 13. (a) critically Analyse the KishoriBalikaPathakam Indira KranthiPatham JananiSurakshaYojana BangaruTalliProgramme

Or

- (b) Discuss the Role and functions of Ministry of Women and Child Development
- 14. (a)critically examine the Women Development

Or

- (b) Explain the Welfare Programmes
- 15. (a) Critically examine the Factors affecting women entry in Agriculture, Industry and Service sectors

Or

(b) Discuss the NABARD -Small Industries Development Bank of India (SIDBI).

MODEL QUESTION PAPER
M.A.DEGREE EXAMINATION
SECOND SEMESTER
Branch: ECONOMETRICS
EMT 206(b):INDUSTRIAL ECONOMICS

(Revised syllabus CBCSw.e.f.2021-2022)

Time:3 Hours Max. Marks :80

#### **SECTION -A**

Answer any FIVE of the following. Each question carries 4 Marks.

(Short notes) (5X4=20)

- 1. What is the Strategies of Industrialization in Developing Countries?
- 2. What is the difference between the Firmand Industrie
- 3. How many Types of Investment.
- 4. What is Cost-Benefit Analysis
- 5. What is Pay Back Method
- 6. What is the meaning of Break-Even Analysis?
- 7. What is the Net Present Value Method
- 8. Importance of Accounting Rate of Return Method.
- 9. What is the Project Evaluation explain.
- 10. What is the Role of Science and Technology in Industrial Development

75

#### **SECTION -B**

Answer any ALL question. Eachquestion carries 10 Marks. 5X10=50

11. a) Write a note on Development-Factors to Promoting Industrialization-Strategies of Industrialization in Developing Countries.

#### OR

- b) What is Industrialization and Economic Development explain.
- 12. a)Examine the main objectives of the Firm-Optimum Firm-Factors **OR** 
  - b)Explain the Alfred Weber Theories of Industrial Location.
- 13. a) what is the difference between Pay Back Method and Accounting Rate of Return Method **OR**
- b) Explain Alfred Weber, Sargeant Florence, August Losch, Walter Isard–Melvin Greenhut theory's.
  - 14. a) Explain the Net Present Value Method and Internal Rate of Return Method.

#### OR

- b) Explain the Cost-Benefit Analysis-Different Rates of Return Methods
- 15. a) Write a note on Role of Science and Technology in Industrial Development-Industrial Policies of 1956 and 1991.

#### OR

b) Examine the Importance of Break-Even Analysis.

#### EMT 207: HUMAN VALUES AND PROFESSIONAL ETHICS – II

Human values are the virtues that guide us to take into account the human element when we interact with other human beings. ... It is with those human values that one becomes truly able to put into practice his/her ethical values, such as justice, integrity, and refusal of violence and ban to kill – even in a crisis situation. To create awareness on Management Ethics and Human Values. To inspire Moral and Social Values and Loyalty. To appreciate the rights of others. The prime objective of the Professional Ethics is to develop ability to deal effectively with moral complexity in students. To understand the moral values that ought to guide the Engineering profession, (b) To resolve the moral issues in the profession, and (c) To justify the moral judgment concerning the profession.

#### **Course Objectives**

This course explores of the Human values and professional ethics for economics. The main objectives of the course is the value Education, concept of human values, self-introspection, self-esteem, family

valuesand responsibilities of family, threats of family life - status of women in familyandsociety; The medical ethics, responsibility of medical practitioners. ethical issues; business ethics immoral and illegal practices, ethical abuses and work ethics; environmental ethics, ecological crisis; social ethics and ethics of media.

**Unit-I:** Value Education- Definition - relevance to present day - Concept of Human Values - self introspection - Self-esteem - Family values-Components, structure and responsibilities of family-Neutralization of anger - Adjustability - Threats of family life - Status of women in familyandsociety - Caring for needy and elderly - Time allotment for sharing ideas and concerns.

**Unit-II**: Medical ethics- Views of Charaka, Sushruta and Hippocratus on moral responsibility of medical practitioners. Code of ethics for medical and healthcare professionals. Euthanasia, Ethical obligation to animals, Ethical issues in relation to health care professionals and patients. Social justice in health care, human cloning, problems of abortion. Ethical issues in genetic engineering and Ethical issues raised by new biological technology or knowledge.

**Unit-III**: Business ethics- Ethical standards of business-Immoral and illegal practices and their solutions. Characterics of ethical problems in management, ethical theories, causes of unethical behavior, ethical abuses and work ethics.

**Unit-IV**: Environmental ethics- Ethical theory, man and nature- Ecological crisis, Pest control, Pollutionand waste, CI imate change, Energy and population, Justice and env iron mental health.

Unit-V: Social ethics- Organ trade. Humantrafficking. Human rights violation and social disparities, Feminist ethics. Surrogacy/pregnancy. Ethics of media- Impact of Newspapers, Television, Movies and Internet.

\*\*\*\*\*

**Learning Outcomes** 

After successfully completing the Human values and professional ethics the graduate is able to:

The value Education, concept of human values, self-introspection, self-esteem, family valuesand responsibilities of family, threats of family life - status of women in familyandsociety; The medical ethics, responsibility of medical practitioners. ethical issues; business ethics immoral and illegal practices, ethical abuses and work ethics; environmental ethics, ecological crisis; and social ethics, ethics of media. Honesty, open disclosure and sincerity are all characteristics of ethical behaviour. Many organizations include a commitment to ethical behaviour in their code of conduct. Professionals can adopt a personal code of conduct and make the same commitment on an individual basis. Professional ethics are accepted standards of personal and business behaviour, values and guiding principles. Codes of professional ethics are established by professional organizations to help to guide members in performing their job functions according to sound and consistent ethical principles. The principles are beneficence, non-malfeasance, autonomy, justice; truth-telling and promise-keeping.

### MODEL PAPER

M.A. DEGREE EXAMINATION THIRD SEMESTER

Branch: Econometrics

PAPER: EMT 301 – ADVANCED ECONOMETRICS

(Revised Regulations CBSC from 2021-22)

Time: 3 Hours Max. Marks:80

#### PART-A

Answer any FIVE questions (Marks:  $5 \times 4 = 20 \text{ Marks}$ )

- 1. Explain any one of the tests for detecting the Multicollinearity.
- 2. Explain the Bartlett Test for detecting the Heteroscadasticity.
- 3. Explain Cochran-Orcutt two-stage method.

- 4. Discuss the sources and consequences of Auto-Correlated disturbances.
- 5. Explain the Linear Probability Model.
- 6. Discuss the Censored Regression Model.
- 7. Write a note on K-Class estimators.
- 8. Discuss the LIML method of estimation.
- 9. What is meant by a fixed effects model (FEM)? Explain.
- 10. What is meant by an error components model (ECM)? Explain.

#### **PART-B**

Answer ALL questions (Marks:  $5 \times 12 = 60 \text{ Marks}$ )

11. Explain the concept of Multicollinearity. How does the presence of Multicollinearity affect prediction of the dependent variable?

(OR)

What is Heteroscadasticity? What are its consequences? Discuss a procedure for estimating the parameters of the model in the presence of Heteroscadasticity.

12. Explain Durbin-Watson test for testing the positive and negative Autocorrelation of first order.

(OR)

Explain the procedure for estimation of parameters of the model in the presence of Auto-correlation.

13. Explain the method of Probit Model in Limited Dependent Variables.

(OR)

Explain the Logit Method of Estimation.

14. Discuss the method of Two Stage Least Squares (2SLS).

(OR)

Explain the method of Full Information Maximum Likelihood (FIML).

15. When is panel data regression model inappropriate? Give an example.

(OR)

What is meant by an integrated time series? Explain.

#### **Unit 1: Computer Fundamentals**

Definition - Components of a computer-block diagram – Evolution of computer – Generations – input/output devices – storing information in computer – types of computers – Hardware and Software – Compilers and Assemblers – Low level and high-level languages – Operating systems and the graphic user interface – Microsoft Windows operating system.

#### **Unit 2: MS-WORD**

Creating, opening and saving files - editing and formatting text - spell and grammar check - auto correct-hyphenation - creating of tables and columns - mail merge - equation editor - concept of a macro - print preview.

#### **Unit 3: MS-EXCEL**

Work sheet – entering data – creation of worksheets and workbooks – opening and saving workbooks - editing and formatting - sorting, filtering and pivot tables - Creating graphs and charts - mathematical and statistical functions -Data analysis pack in Excel - Descriptive statistics, tests of hypothesis, ANOVA, Correlation and Regression, Random Number Generation.

#### **Unit 4:Data Handling Using SPSS**

Opening Excel files in SPSS - Variables, labels and values, Analysis tools - Descriptive statistics - Selection of variables in multiple linear regression - Stepwise, forward and backward procedures - Factor analysis and Discriminant analysis (Stress on procedures and syntax only).

#### **Unit 5: Data Analysis using R**

R environment – Workspace, Getting help, Packages and Built-in data - Assigning values, performing vectorized arithmetic - Creating objects, vectors, lists, matrices, arrays and data frames - Conditional selection, sorting and indexing data frames, implicit looping - Importing data - Branching and looping statements - plotting data – Bar plots, Pie charts, Histogram, Box plots - Summary statistics - Generating samples from discrete and continuous distributions - Simple correlation and regression - Testing hypothesis of mean and variance, Analysis of variance.

#### **TEXT AND REFERENCE BOOKS:**

- 8. J. Maindonald& J. Braun, Data Analysis and Graphics Using R: An Example-based. Approach.
- 9. P. Murrell, R Graphics (2nd Ed.).
- Finally, student will be able to write programme for Simple statistical analyse and interpret through R-programming.

# Model Paper M. A. DEGREE EXAMINATION THIRD SEMESTER

**Branch: Econometrics** 

EMT 302 – COMPUTER APPLICATIONS AND DATA ANALYSIS

(Revised Regulations CBSC from 2021-22)

Time: 3 Hours Max: Marks: 80

#### PART- A

Answer any FIVE questions. Each question carries 4 Marks

(Marks:  $5 \times 4 = 20 \text{ Marks}$ )

- 1. Explain the characteristics of a computer.
- 2. Distinguish between Hardware and Software.
- 3. Describe the concept of 'macro' in MS Word.
- 4. Explain the importance of Spell and Grammar check in MS Word.
- 5. How do you create Worksheets and label them in MS Excel?
- 6. Distinguish between Absolute cell referencing and Relative cell referencing.
- 7. Describe the procedure for opening Excel files in SPSS.
- 8. Explain the Descriptive Statistics for data analysis in SPSS.
- 9. Explain the method of sorting and indexing data frames using R- software.
- 10. How do you draw Bar chart using R-software?

#### **PART-B**

Answer ALL questions. Each question carries 12 Marks

(Marks:  $5 \times 12 = 60 \text{ Marks}$ 

11. Describe the input-output devices of a computer and show them in a Block-diagram.

 $O_1$ 

What is an Operating System? Explain its features.

12. Discuss the procedure for creation of a Table, inserting columns and rows and editing them in MS Word.

Or

Describe the procedure for inserting Microsoft Equation in MS Word and explain the uses of equation editor in MS Word.

13. Explain the procedure for creating a scatter diagram and editing it in MS Excel by using Hypothetical statistical data.

Or

Discuss the steps involved in the estimation of descriptive statistics by using statistical functions in MS Excel.

PTO

14. Explain the procedure for estimating a linear regression equation for statistical data using SPSS.

Or

Discuss the procedure for estimating the Chi-square test statistic using SPSS.

15. Explain the procedure of generating samples from discrete and continuous distributions using R-software.

Or

Using R-software, compute the mean, variance and ANOVA table with an example of your own.

Using SPSS Testing of Multicollinearity, Heteroscedasticity and Autocorrelation, LPM and Logistic regression models

**R-programme**; Descriptive Statistics, Correlation Matrix, Simple and Multiple Regression analysis and Testing of Hypothesis, LPM and Logistic Regression Models.

# SRI VENKATESWARA UNIVERSITY: TIRUPATI BRANCH IV (B) - ECONOMETRICS Semester-303(a): PRACTICAL EXAMINATION COMPUTER APPLICATIONS AND DATA ANALYSIS

Time: 3 Hours Max. Marks: 80

Answer any Four Questions. All Questions Carry Equal Marks [4x20 = 80]

1. The following data refers to the distribution of body length of 120 fish observed in a lake.

Class	8-10	10 - 12	12 - 14	14 -16	16 - 18	18 - 20
Frequency	4	24	41	31	16	4

Prepare i) Histogram, ii) Frequency Polygon iii) Ogives

2. The following data refers to the intake of various dietary components consumed by 20 experimental subjects. Calculate all possible correlations among them using Excel Data Analysis and interpret the findings.

SNO	PRO	FAT	СНО	CAL	IRON	VITA
1	54.0	37.0	518.0	360	21	2321
2	58.0	34.0	524.0	363	22	2481

4 54.0 42.0	534.0 388 526.0 372 521.0 381	23	2436 2151
4 54.0 42.0	526.0 372		
		26	2151
5 56.0 39.0 !	521.0 381		
		24	2122
6 57.0 41.0	542.0 379	23	2238
7 58.0 42.0	524.0 386	24	2408
8 52.0 43.0	512.0 381	28	2326
9 59.0 46.0	544.0 372	21	2129
10 53.0 45.0	538.0 389	20	2189
11 58.0 39.0	526.0 376	18	2326
12 52.0 48.0	556.0 388	17	2289
13 61.0 42.0	551.0 361	16	2186
14 58.0 47.0	548.0 373	22	2381
15 51.0 46.0	532.0 389	19	2286
16 42.0 41.0	489.0 348	21	2132
17 49.0 40.0	512.0 347	23	2412
18 51.0 42.0	551.0 386	26	2638
19 59.0 46.0	552.0 346	25	2132
20 42.0 41.0	489.0 389	20	2189

3. Fit the Multiple Linear Regressions for the following data using R-Programme and comment on results.

Υ	40	44	46	48	52	58	60	68	74	80
X1	6	10	12	14	16	18	22	24	26	32
X2	4	4	5	7	9	12	14	20	21	24

4. The weights of a calf taken at weekly intervals are given below. Plot the scatter diagram and fit a Straight Line using the method of least squares. Display the Straight Line Equation and r<sup>2</sup> Value on chart. What is the average rate of growth per week?

Age (X)	1	2	3	4	5	6	7	8	9	10
Weight(Y) (in Kgs)	52.5	58.7	65.0	70.2	75.4	81.1	87.2	95.5	102.2	108.4

5. The below table gives Y is Dependent variable and  $X_1$ ,  $X_2$ ,  $X_3$ ,  $X_4$ ,  $X_5$  are independent

variables. Our model is 
$$Y=\alpha_0+\alpha_1X_1+\alpha_2X_2+\alpha_3X_3+\alpha_4X_4+\alpha_5X_5+\varepsilon$$

Υ	X1	X2	Х3	X4	X5
60323	830	234289	2356	1590	107608
61122	885	259426	2325	1456	108632

63221	962	328975	2099	3099	112075
63639	981	346999	1932	3594	113270
64989	990	365385	1870	3547	115094
63761	1000	363112	3578	3350	116219
66019	1012	397469	2904	3048	117388
67857	1046	419180	2822	2857	118734
68169	1084	442769	2936	2798	120445
66513	1108	444546	4681	2637	121950
68655	1126	482704	3813	2552	123366
69564	1142	502601	3931	2514	125368
69331	1157	518173	4806	2572	127852
70551	1169	554894	4007	2827	130081

Detect Multicollinearity using VIF test. If there Multicollinearityproblem exist what solution you are suggest [using SPSS].

6. Create an Excel worksheet with the following data

SNO	TC	TR	HDL	VLD	LDL
1	187.1	210.1	33.6	42	111.5
2	194.2	211.4	30.8	42.3	121.2
3	203.6	215.4	31	43	129.6
4	200	228.1	32.4	45.6	122
5	201	211.4	32	42.3	126.7
6	187.2	194.1	32.4	38.8	116
7	209.1	218.8	29.1	43.8	136.2
8	167.4	239.1	29.8	47.8	89.7
9	171.1	222	30.4	44.4	96.3
10	210.2	225.1	30	45	135.2
11	220.1	200.1	31	40	149.1
12	216.4	194.9	31.9	38.9	145.6
13	259.4	209.1	30.8	41.8	186.8
14	209	231	30	46.2	132.8
15	200	221	30	44.2	125.8

Using this data find the Descriptive Statistics using Data Analysis in Excel. Comment on results

EMT 303(b)	APPLIED ECONOMETRICS		4Credits
Course Ob	jectives: The objective of this course is to provi	de the basic know	ledge of an advanced
	erstanding of consumer behaviour and decis	ion-making. To d	levelop a theoretical
understanding of	of strategic behaviour of economic agents.		
•			
CourseOutco	mes:Attheendofthecourse, thestudentwillbeable	eto	
CO1 St	udent will be able to develop a sound unde	erstanding of the	core microeconomic

			oncepts that economists use to understand the process of decision-making by an conomic agent(s).											
СО			The student should be able to apply mathematical tools and techniques to study behaviour of economic agents.											
СО			tudents will be able to identify strategic behaviour of economic agents and formulate tem in a game theoretic framework.											
СО			tudent can explore Macro econometric models; Klein-Goldberger Model for USA, garwal, K. Krishna Murthy and N.V. A. Narasimhan Models.

#### **Unit 1: Demand Analysis**

Demand functions – Restrictions to be satisfied by Demand functions - Single Equation models, Engel Functions and Curves, Specification of Functional forms and Estimation – Linear Expenditure System - Review of Empirical Studies.

#### **Unit 2: Consumption Function**

Theories of Consumption Function – Alternative specifications – Absolute Income Hypothesis, Relative Income Hypothesis, Life Cycle Hypothesis, Permanent Income Hypothesis – Problems of Estimating the Consumption Function – Review of some empirical studies.

#### **Unit 3: Production Functions**

Single Equation Estimation of production functions - Cobb-Douglas, CES, Translog - Specifications and Estimation issues - Review of Empirical studies - Functional forms and Estimation of Cost Functions - Estimation of Factor demand Equations - Empirical Studies.

#### **Unit 4: Macro Econometric Models**

Nature of Simultaneous Macro Econometric Models – Klein-Goldberger Model for USA - Brookings Model – Macro Econometric models for India – Agarwal, K. Krishna Murthy and N.V. A. Narasimhan Models.

#### **Unit 5: Other Applications of Single and Simultaneous Equation Models**

Models of Money Demand and Supply – Estimation of Demand for Money Function – Application in Industrial Organization, Labour Economics and Health Systems – Review of Empirical Studies.

#### **TEXT AND REFERENCE BOOKS:**

#### <u>Model Paper</u> M. A. DEGREE EXAMINATION THIRD SEMESTER

Branch: Econometrics
Paper: EMT 303(b): APPLIED ECONOMETRICS
(Revised Regulations CBSC from 2021-22)

Time: 3 Hours Max: Marks: 80

#### **PART-A**

Answer any FIVE questions. Each question carries 4 Marks (Marks:  $5 \times 4 = 20 \text{ Marks}$ )

- 1. Distinguish between Cross Section and Time series data.
- 2. What is an Engel function? How do you derive it from the Household's utility function?
- 3. Explain the concept of Absolute Income Hypothesis.
- 4. State briefly the problems involved in estimating the Consumption Function.
- 5. List out different methods of estimating Cobb-Douglas Production Function.
- 6. What is Elasticity of Cost? What are its uses?
- 7. Discuss the nature of Simultaneous Equations Model.
- 8. State the essence of the Agarwal's Macro-econometric Model for India.
- 9. Explain the uses of Simultaneous Equations in Health System.
- 10. Construct a Simultaneous Equations Model relating to Labour economics.

#### **PART-B**

#### Answer ALL questions. Each question carries 10 Marks

(Marks:  $5 \times 12 = 60 \text{ Marks}$ )

11. Examine the restrictions to be satisfied by Demand Function such as  $x_i = x_i$  ( $p_1$ ,  $p_2$ ,  $j_1$ ,  $j_2$ ,  $j_3$ ).

Or

Describe the nature of different Engel forms utilized by researchers to analyse family budget studies with special reference to some of the empirical studies.

12. Elucidate various functional forms used in the estimation of Consumption Function.

Or

Review the empirical studies on Consumption Function in India.

13. Enumerate the problems of estimating Aggregate Production Function.

Or

Explain the properties of CES Production Function and its applications in Industrial sector.

14. Examine the trends in Macro-econometric model building and illustrate the problems involved in macro-econometric model building.

Or

Make a comparison of K. Krishna Murthy's Macro-econometric Model with that of N. V. A. Narasimham.

15. Examine the applications of Simultaneous Equations in the models of Demand for and Supply of Money.

Or

Describe the application of Simultaneous equations in Industrial Organizations.

EMT 303(c)	ECONOMICS OF DEVELOPMENT AND		4Credits
	PLANNING		
Course Obje	ctives: The paper provides fundamental found	lation of basic grov	wth and development
issues, approache	s and models. The paper attempts to discuss	the structure and c	hange in variables. It
helps understand	the overall static and dynamic perspectives	of the economy in	a purely theoretical
perspective.			
CourseOutcom	es:Attheendofthecourse, thestudentwillbeable	eto	
CO1 The	economic development plan provides a con	nprehensive overv	iew of the economy,
sets	policy direction for economic growth, an	d identifies strate	egies, programs, and
proj	ects to improve the economy.		
CO2 The	aim of economic development is to impro-	ve the material st	andards of living by
raisi	ing the absolute level of per capita incomes	. Raising per capi	ita incomes is also a

	S	tated obj	ective o	f policy	of the g	overnm	ents of a	all devel	oping co	ountries.			
СО	a	One of the most important functions of economic planning is to achieve consistency among different economic objectives. Some desirable goals are likely to conflict with others.											
CO	1	One of the mong dif		-			econor e	nic plan	nning is	to achie	eve con	sistency	
CO	r	Five basic stages are traditional society, preconditions for take-off, take-off, drive to maturity, and age of high mass consumption), there exists no clear definition for the stages of economic development.  Mappingofcourseoutcomeswiththeprogramoutcomes

# Model Paper M.A DEGREE EXAMINATION Third Semester Branch: ECONOMETRICS

#### EMT 303(c): ECONOMICS OF DEVELOPMENT AND PLANNING

(UNDER CBCS Revised Syllabus from 2021-22)

Time: 3 Hrs Marks: 80

#### Section-A

Answer any FIVE questions. Each question carries 4 marks(5X4=20)

- 1. Distinguish between Growth and Development.
- 2. Explain the concept of Vicious Circle of Poverty.
- 3. Explain the Marxian concept of Industrial Reserve Army.
- 4. State the meaning of the concept of Directly Productive Activity.
- 5. Explain the concept of Demographic Dividend.
- 6. State the need for Manpower planning.
- 7. State the benefits of international trade.
- 8. State the need for export promotion measures in a developing economy.
- 9. What is Choice of Technique?
- 10. State the importance of Cost-benefit analysis in project planning.

## Section –B Answer ALL the questions Each question carries 12 marks 5x12=60

11. Discuss the obstacles to economic development.

OR

Elucidate the need for introduction of HDI and PQLI as measures of economic development.

12. Critically examine the Marxian Theory of economic growth.

OR

Make an assessement of Lewis' model of unlimited supplies of labour.

13. Discuss the need for industrialization to promote economic growth in a developing economy.

OR

Elucidate the role of Technology in promoting economic development.

14. 'Trade is an Engine of Economic Growth'- Robertson. Elucidate.

OR

Discuss the objectives and intstruments of Fiscal policy.

15. Explain the need for the introduction of 'appropriate technology' in a labour abundant country like India.

OR

Examine the role of foreign capital in developing countries.

EMT 303(d)		4Credits
	MARKETS	
Cours	se Objectives: To introduce students to the world of financial service	es to enrich student's
understandin	g of the fundamental concepts and working of financial service in	stitutions. Further, to
equip studen	ts with the knowledge and skills necessary to become employable in	the financial service
industry.		
CourseOut	comes: Attheendofthecourse, the student will be able to	
CO1	Explain the broad features of Indian financial institutions	with its apex banks'
	objectives and purview. Also understand the instruments to control	credit in the country.
CO2	Effectively narrate the kinds and components of money with its reg	ulatory system, be
	aware of the functions, objectives and limitations of commercial ba	nks.
CO3	Identify the existence and development of non-banking finance	ial institutions, know
	the important role of Mutual funds, LIC, investment compan	ies etc., utilize and
	effectively participate in the development process.	

СО	4	Understand the conditions of financial markets and its impact in the economy												
СО			Demonstrate the role and significance of foreign exchange rate and its markets with simpact on various sectors in the economy.

## M. A. DEGREE EXAMINATION THIRD SEMESTER

Branch: Econometrics

Paper: EMT: 303(d)- FINANCIAL INSTITUTIONS AND MARKETS

(Revised Regulations CBSC from 2021-22)

Time: 3 Hours Max: Marks: 80

PART- A

Answer any FIVE questions. Each question carries 4 Marks(Marks:  $5 \times 4 = 20 \text{ Marks}$ )

- 1. Write a note on evolution of financial system.
- 2. State the structure of financial system.
- 3. What is the feature of Money market?
- 4. Give an account of discount and finance houses in India.
- 5. Explain briefly the functions of stock exchange.
- 6. Mention the features of primary Market.
- 7. What are the uses of mutual funds?
- 8. What are the functions of Industrial Finance Corporation of India (IFCI)?
- 9. Explain the advantages of foreign capital.
- 10. State briefly the Role of UTI in mobilizing financial resources.

#### PART- B

Answer ALL questions. Each question carries 12 Marks (Marks:  $5 \times 12 = 60 \text{ Marks}$ )

11.Discuss the role of financial system in economic development.

Or

Explain the functions of financial system.

12. Elucidate the recent developments in Indian money market and their limitations.

Oı

Explain the instruments of money market and their limitations.

13. Explain the reforms introduced by the Govt.to improve the performance of capital market.

 $O_1$ 

State the objectives and functions of and Securities and Exchange Board India (SEBI).

14.Discus the functions and achievement of I.C.I.C.I

Or

Explain the role of Industrial Development Bank of India in Industrial Development.

15. Mention the functions and problems of Life Insurance Corporation.

Or

Discuss the advantages and disadvantages of foreign capital.

#### Econometrics (R) III Semester

EMT 304	PERSONALITY DEVELOPMENT AND	4Credits
	SOFT SKILLS	
Course O	bjectives: Develop effective presentation skills. Conduct	effective business
correspondence	and prepare business reports which produce results. Be	come self-confident
individuals by n	nastering inter-personal skills, team management skills, and leader	ership skills.
CourseOutco	nes: Attheendofthecourse, the student will be able to	
CO1	Soft skills provide students with a strong conceptual and pro-	actical framework to
	buildDevelop and manage teams.	
CO2	They play an important role in the development of the	
	Students' overall personality, thereby enhancing their career pro-	ospects
CO3	This paper provides strong practical orientation to the studen	ts and helps them in
	building andimproving their skills in communication, the effe	ctive use of English,
	businesscorrespondence, presentations, team building, leadership	ip, time management,
	groupdiscussions, interviews, and inter-personal skills.	
CO4	This paper also helps students in careervisioning and planni	ng, effective resume
	writing and dealing with placement consultantsand headhunte	rs and also to create
	interesting, and interactive manner,	
CO5	Which gives amplescope for the students to interact with each	other and face a wide
	variety of issues, topics, and situations that they are likely to c	ome across as entry-
	level.

### EMT 304 :PERSONALITY DEVELOPMENT AND SOFT SKILLS

(Revised syllabus CBCSw.e.f. 2021-2022)

Time:3 Hours Max. Marks:80

#### **SECTION -A**

Answer any FIVE of the following. Each question carries 4 Marks.

(Short notes) (5X4=20)

- 1. What is the Concept of Personality.
- 2. What are the Causes for sick personality and healthy Personality
- 3. Explain Self-awareness skills.
- 4. What is Goal setting explain
- 5. What is the meaning of diversity Problem
- 6. Explain Ethical decision making.
- 7. What are the Causes of low self-esteem.
- 8. What is the meaning of positive attitude
- 9. Importance of Ethical decision making.
- 10. Explain the Interpersonal skills.

#### SECTION -B

Answer any ALL question. Eachquestion carries 12 Marks.

5X12=60

11. a) Write a note on Physical, social, educational, family, intellectual and emotional determinants.

#### OR

- b)Briefly explain the Foundations of personality development.
- 12. a)examine the Causes for sick personality and healthy Personality **OR** 
  - b)Explain the self-awareness and management skill.

- 13. a) What are the reasons for the Valuing diversity: Problem **OR** 
  - b) briefly examine the positive attitude and negative attitude.
- 14. a) Explain the Steps in developing a positive Personality.

#### OR

- b) Write an essay on Ethical decision making
- 15. a) write a note on Counseling and Mentoring Empowering **OR** 
  - b)Importance of Ethical decision making and interpersonal skills.

**Unit 1: Structure of the Indian Economy** 

Indian Economy on the Eve of Independence- Basic Characteristics of the Indian Economy as Developing Economy- Major issues of Development in Indian Economy- Growth and Structural Changes in the Indian Economy- Population-Poverty –Measurement of Poverty, Anti PovertyProgrammes - Inequality- Natural Resources-Infrastructure- Human Development in India-Prices, Price Policy and Economic Growth- Balanced Regional Development-Unemployment in India.

#### **Unit 2: Agricultural Sector**

Role Agriculture in Indian Economy- Share of Agriculture - Interrelationship between Agriculture and Industry –Land Tenure System - Farm Size and Productivity -Institutional and Technological Aspects- New Agricultural Policy-Food Security in India-Rural Credit- Agricultural Marketing- Regional Disparities in Indian Agriculture- Irrigation and other Agricultural Inputs.

#### **Unit 3: Industrial Sector**

Industrial Structure and Economic Growth- Large and MSMEs - Industrial Labour Problems and Labour Policy -Industrial Sickness Causes and Remedial Measures- Economic Reforms and Industrial Growth-Pattern of Industrialization-Public and Private Industrial Finance in India- Unorganized Sector and Informalisation of the Indian Economy.

#### Unit 4: Tertiary and Foreign Sectors

Service Sector - Role, Growth and Structure of Service Sector in India –Growth, Composition and Direction of India's Foreign Trade – Trade Policy and its Reforms in India – India's Balance of Payments - WTO and Indian Economy.

#### **Unit 5: Planning and Development**

Objectives and Strategy of Planning- Public Sector and Indian Planning- Re-Organization of Planning Commission (NITI Aayog) - Privatization and Globalization and its impact on India-Government Subsides in India - Problems of Capital Formation- Foreign Capital, Foreign aid and Economic Development in India.

#### **Model Paper**

M. A. DEGREE EXAMINATION THIRD SEMESTER Branch: Econometrics

Paper: EMT 305(a): INDIAN ECONOMY (Revised Regulations CBSC from 2021-22)

Time: 3 Hours Max: Marks: 80

#### PART- A

Answer any FIVE questions. Each question carries 4 Marks (Marks:  $5 \times 4 = 20 \text{ Marks}$ )

- 1. State the major structural changes in Indian economy since its independence.
- 2. What are the basic characteristics of a developing economy?
- 3. Write a short note on new agricultural policy.
- 4. Explain the concept of food security.
- 5. Write a short note on the source of industrial finance in India.
- 6. What are the major problems of industrial labour in India.
- 7. Write a short note on GATT.
- 8. Describe broad structure of India's foreign trade in recent years.
- 9. What are the major objectives of planning in India?
- 10. What are the problems of capital formation in India?

#### PART-B

Answer ALL questions. Each question carries 12 Marks

(Marks:  $5 \times 12 = 60 \text{ Marks}$ )

11. What do you mean by anti-poverty Programmes? Briefly describe about anti-Poverty programmesimplemented in India after 1970s.

Or

Critically examine the Indian economic development during five-year plans.

12. Explain inter relationship between agriculture and industry.

 $\mathbf{O}_{1}$ 

Examine the controversy in India between the farm size and productivity.

13. What are the causes of industrial Sickness in India? Suggest some remedial measures.

Oı

Evaluate the importance of Micro, Small and Medium Scale Enterprises (MSMEs) in the Indian economy.

14. Examine methods of correcting disequilibrium in India's BOP.

Or

Evaluate the impact of WTO on agriculture in India.

15. Explain the concepts of Privatization and Globalization and their impact on India.

Ot

Discuss the role of foreign capital and foreign aid in India's Economic development.

EMT 305(b)	ECONOMICS OF INSURANCE	4Credits							
Course C	<b>Objectives:</b> The objective of this course is to provide the basic known	vledge of Economics							
of Insurance,	of Insurance, Element of Risk and Risk Management, Life and Health Insurance, Risk and Insurance								
General and	Other Types of Insurance and Regulation of Insurance are explained	l <b>.</b>							
CourseOut	comes: Attheendofthecourse, the student will be able to								
CO1	Demonstrate knowledge of insurance contracts and provisions	, and the features of							
	property-liability insurance, life and health insurance, and employed	e benefit plans.							
CO2	Demonstrate knowledge of the operation and management of in	nsurance entities, and							
	the economic implications of organizational design and structure.								
CO3	Develop skills to facilitate insurance product cost and price	ing, marketing, and							
	distribution.								
CO4	Develop practical skills through professional development se	eminars, internships,							

	and/or a practicums in insurance and risk management.											
СО			nine the role of public policy including social insurance in personal financial and risk management.									
Mappingofcourseoutcomeswiththeprogramoutcomes												
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
CO1	3	3	2	2	-	1	1	-	2	2	-	1
CO2	3	2	2	2	-	1	1	-	2	2	1	2
CO3	3	3	2	-	2	1	1	-	2	2	-	-
CO4	3	2	3	2	-	1	1	-	2	2	1	-
CO5	3	2	1	_	1	2	-	1	1	2	-	1

#### Unit 1: Element of Risk and Risk Management

Fundamental of Risk and Uncertainty – Classification of Risk – Risk Pooling and Risk Transfer - Concept of Risk Management – Essentials and Elements of Risk Management – Risk Assessment and Risk Control.

#### **Unit 2: Risk and Insurance**

Definition of Insurance – Role and Functions of Insurance – General and Specific Principles of Insurance Contract – Insurance and Economic Development – Insurance as Financial Intermediaries and Investment Institutions – Classification of Insurance - The Concept of Re-insurance.

#### **Unit 3: Life and Health Insurance**

Fundamental Principles of Life and Health Insurances – Functions of Life and Health Insurances – Plans of Life and Health Insurance – The Process of Underwriting Life and Health Insurance- Group Insurance

#### **Unit 4: General and Other Types of Insurance**

Definition of General Insurance – Marine, Motor Vehicular, Fire and other types of Insurances –Physical and Moral Hazards in General Insurance – The General Insurance Corporation (GIC Re) and General Insurance Companies, NOUN – Growth of General Insurance business in India.

#### **Unit 5: Regulation of Insurance**

Organization and Growth of LIC - Monopoly of LIC - Need for Insurance Regulation in India - Functions and Duties of Insurance Regulation and Development Authority (IRDA) of India — Entry of Private and Foreign Insurance Companies – Implications – Prospects of Insurance Companies.

#### **TEXT AND REFERENCE BOOKS:**

#### Model Paper

M. A. DEGREE EXAMINATION
THIRD SEMESTER
Branch: Econometrics
Paper: EMT 305(b): ECONOMICS OF INSURANCE

(Revised Regulations CBSC from 2021-22)

Time: 3 Hours Max: Marks: 80

#### PART-A

Answer any FIVE questions. Each question carries 4 Marks (Marks:  $5 \times 4 = 20 \text{ Marks}$ )

- 1. Define the concept of Risk and distinguish it from the Concept of Uncertainty.
- 2. What is Risk Pooling?
- 3. Define Insurance.
- 4. Explain the concept of Reinsurance.
- 5. State the functions life insurance.
- 6. Give a brief account of any two life insurance products available in India.
- 7. Mention various types of General Insurance.
- 8. Explain the concept of Utmost Good faith.
- 9. Give a brief account on LIC of India.
- 10. What is IRDA? State its functions briefly.

#### **PART-B**

Answer ALL questions. Each question carries 12 Marks (Marks:  $5 \times 12 = 60 \text{ Marks}$ )

11. Explain the concept of Risk Management and examine the essentials of Risk Management.

 $\Omega_1$ 

Explain the concepts of Risk Assessment and Risk Control. Examine different methods of effective Risk Management.

12. Is Insurance a contract? If so, discuss General and Specific Principles of Insurance Contract.

 $O_1$ 

Elucidate the relationship between Insurance and Economic Development.

13. Critically examine various life insurance products being marketed in India.

Oı

What are the functions of Health Insurance? State the relevance of various Health Insurance policies in the Indian Context.

14. Enumerate the problems faced in the marketing of General Insurance policies in India.

Or

Examine the principles of Physical and Moral Hazards in General Insurance with special reference to India.

15. Do you think that there was a need for the entry of private and foreign insurance companies in Insurance business in India? Justify your answer.

Or

Critically examine the functioning of Insurance Regulatory and Development Authority in India.

- 7. Hamilton, J.D, Time Series Analysis, Princeton, N.J., Princeton University Press, 1994.

#### **Learning Objectives**

After successfully completing the course Time Series Econometrics the graduate is able to:

At the end of the course the students will acquire additional specialization through the Time series Econometrics Analysis. Skill to judge the reliability of estimation in case of Stationarity and Non-Stationarity test, Co-integration test. Students will be able to execute in-depth analysis of VECM model and Granger Causality test. Student can perform the Forecasting with a single-equation linear regression model, and Forecasting with a multi-equation econometric model. Student can evaluate Univariate Time Series Models like MA, AR, ARMA and ARIMA models. Finally, student will be able to calculate VAR model which most important in macro-economic models.

## MODEL PAPER M.A. DEGREE EXAMINATION FOURTH SEMESTER

Branch: Econometrics

PAPER: EMT 401 – TIME SERIES ECONOMETRICS

(Revised Regulations CBSC from 2021-22)

Time: 3 Hours Max. Marks:80

#### **PART-A**

Answer any FIVE questions. Each question carries 4 Marks (Marks:  $5 \times 4 = 20 \text{ Marks}$ )

- 1. Explain the concept of stationary stochastic process.
- 2. Explain the concept of unit root stochastic process.
- 3. Discuss the concept of Co-integration.
- 4. Explain the Johansen test for Co-integration.
- 5. Explain the nature and uses of forecast.
- 6. Explain the concept of Unconditional Forecasting.
- 7. State the properties of Moving Average models.
- 8. State the properties of Auto Regressive models.
- 9. Explain the ARCH model.
- 10. What is a VAR model? How do you measure the volatility in VAR models?

#### **PART-B**

Answer ALL questions. Each question carries 60 Marks

(Marks:  $5 \times 12 = 60 \text{ Marks}$ )

11. Explain Trend stationary and Difference stationary stochastic processes with an example.

(OR)

Explain any two tests for stationarity of the stochastic process.

12. Describe the Engle-Granger and Augmented Engle-Granger tests used in testing for Co-integration in the econometric estimation of regression equation.

(OR)

Explain the ARDL Co-integrating test.

13. Explain the procedure for 'Forecasting' with serially correlated errors.

(OR)

Explain Conditional forecasting.

14. State the properties of ARMA process in econometric analysis.

(OR)

State the properties of homogeneous non-stationary Processes of order'd'.

15. Describe the DF and ADF tests used in testing for unit roots in the econometric estimation of regression equation.

(OR)

Explain the VAR and GARCH models in econometric analysis.

#### **Unit 1: Transportation Problem**

Nature and Matrix form of TP – Transportation Table – Types of Transportation Problem – Balanced Transportation Problem, Unbalanced Transportation Problem – Methods to solve Transportation Problem – The Initial Basic Feasible solution: North-West Corner Rule and Vogel's Approximation method – Moving towards optimality, the Transportation Algorithm.

**Unit 2: Assignment Problem:** Assignment problem, Transportation problemand Linear Programming – Types of Assignment problem – Properties of Optimal Solution – Solving the Assignment Problem by Hungarian Algorithm – The Auction Algorithm for Assignment Problem – Branch and Bond Techniques for Assignment Problem.

**Unit 3 : Game Theory:** Basic concepts -Two-person Zero Sum Games - The Maximum Minimax Principle - Games without Saddle Points - Mixed Strategies - Graphical solution of 2 x n and m x 2 Games - Dominance property - The Modified Dominance Property - Reducing the Game Problem as a Linear Programming Problem.

#### **Unit 4: Inventory Management**

Introduction - Inventory control - Techniques of Inventory control with known demand - Economic Lot Size Problems - The fundamental Problem of Economic Order Quantity (EOQ), The Problem of EOQ with Uniform Demand, and The Problem of EOQ with Finite Rate of Replenishment - Problem of EOQ with Shortage.

#### **Unit 5: Simulation**

Introduction – Elements of a Simulation Model – Event – Types of Simulation – Generation of Random Phenomena – Monte Carlo Technique – Generation of Uniform (0,1) Random Observations – Simulation languages.

#### **TEXT AND REFERENCE BOOKS:**

## Model Paper M. A. DEGR EE EXAMINATION FOURTH SEMESTER

Branch: Econometrics

Paper EMT 402 – OPTIMIZATION IN ECONOMICS

(Revised Regulations CBSC from 2021-22)

Time: 3 Hours Max: Marks: 80

#### PART- A

Answer any FIVE questions. Each question carries 4 Marks (Marks:  $5 \times 4 = 20 \text{ Marks}$ )

- 1. Explain the mathematical formulation of the Transportation Problem with an example.
- 2. Distinguish between Balanced and Unbalanced Transportation Problem.
- 3. What is a Game Theory? List out the assumptions made in the theory of Games.
- 4. Explain the Maxi-min principle used in Game theory.
- 5. Define Inventory. What are the advantages and disadvantages of having inventories?
- 6. Explain the different costs that are involved in inventory problems.
- 7. Explain the concepts of Network: (i) Activities and (ii) Nodes.
- 8. Explain the rules for constructing the Networks.
- 9. Explain the concept of Simulation.
- 10. Explain the Event-type Simulation with the help of an illustration.

#### **PART-B**

Answer ALL questions. Each question carries 12 Marks (Marks:  $5 \times 12 = 60 \text{ Marks}$ )

11. Explain how the initial basic feasible solution to the Transportation Problem is determined using Vogel's approximation method.

Or

Determine an initial basic feasible solution to the following Transportation Problem using North West Corner Rule:

	D1	D2	D3	D4	Availa	bility
	O1	6	4	1	5	14
	O2	8	9	2	7	16
	O3	4	3	6	2	5
Requirement	6	10	15	4	35	

12. Define Saddle point and value of the Game. Determine the value of the game whose pay-off is given by:

Player B

Or

Explain the Dominance property and use the dominance property to solve the game theory whose pay off matrix is given by:

		Play	er B
		I	II
	I	9	2
Player A	II	8	6
	III	6	4

13. Explain the fundamental problem of EOQ.

Or

Explain the problem of EOQ with finite rate of replenishment.

14. What is a Network? Explain the constraints in Network.

Or

Explain the Critical Path Method (CPM).

15. Explain the different methods to generate Uniform (0, 1) Random observations.

Explain the procedure involved in the generation of a sequence of random observations from any specified probability distribution.

\*\*\*

#### Concepts are covered in this Practical Approach follows;

- ➤ Unit root test [ADF-Augmented Dicky-Fuller test].
- > Spurious Regression.
- ➤ Co-integration Test.
- ➤ Vector Error Correction Mechanism [VECM].
- Granger Causality test.
- > VAR Model.
- > ARMA and ARIMA Model.
- > Optimization-Transportation problem; Balanced Transportation Problem, Unbalanced Transportation Problem North-West Corner Rule.
- Assignment problem; Hungarian Algorithm Branch and Bond Techniques for Assignment Problem.

#### SRI VENKATESWARA UNIVERSITY: TIRUPATI BRANCH IV (B) - ECONOMETRICS (2021-22) Semester-IV: 403(a)-PRACTICAL EXAMINATION

Time: 3 Hours Max. Marks: 80

\_\_\_\_\_\_

#### Answer any Four Questions. All Questions carry equal marks [4x20=80]

6. The following time series data relates to capital, revenue receipts and expenditure of the union Govt. of India data and also GDP at market prices time series data have the base year 2011-12 (in crores of rupees) during the period from 1988-89 to 2014-15.

	GDP Base				GDP Base		
	year	Total	Total		year	Total	Total
Year	(2011-12)	Receipts	Expenditure	Year	(2011-12)	Receipts	Expenditure
1988-89	2063458	73469	79111	2002-03	4319293	411365	413248
1989-90	2186180	82316	92908	2003-04	4662417	475146	471203
1990-91	2307151	93951	105298	2004-05	5028361	506382	498252

#### Find the following objectivesby using Eviews

- I. Calculate stationarity test by using ADF
- II. If the data has non-stationary series then find out whether the functional relationship between PDI and PCE has spurious regression (Non-sense regression) or not.

8. The following quarterly time series data shows USA people *Personal Disposable Income (PDI),Personal Consumption Expenditure (PCE)* and *Gross Domestic Product (GDP)* in terms of billions of dollars 1987, during the 1970-I to 1981-iv.

Year	Q	GDP	PDI	PCE	Year	Q	GDP	PDI	PCE	Year				
	ı	2872. 8	1990. 6	1800. 5		ı	3259. 4	2334. 7	2050.8		ı	3591. 8	2587. 3	2347. 1
	II	2860.	2020.	1807. 5	4	П	3267. 6	2304. 5	2059	8	II	3707	2631. 9	2394

		3289.	2382.	2067.			3567.	2556.				3803.	2808.	2468.
	iv	1	7	4		iv	2	2	2331.6		iv	1	8	6

Using the above time series data, examine **Johansen Cointegration** test to study the co-integration between PCE,PDI and GDP by using Eviews.

9. Consider the problem of assigning four sales persons to four different sales regions as shown in below table such that the total sales are maximized.

	Sales	Sales	Sales	Sales
	Region-I	Region-II	Region-III	Region-IV
Salesman-I	10	22	2	14
Salesman-II	16	18	22	10
Salesman-III	24	20	12	18
Salesman-IV	16	14	24	20

The cell entries represent annual sales figures in lakhs of rupees. Find the optimal allocation of the sales persons to different regions by using Hungarian Method.

**Unit 1: Old and New Theories of International Trade** 

Comparative advantage in Ricardian, Haberler and Heckscher-Ohlin Theories – Factor Price Equalization Theorem - Intra Industry Trade – Neo-Chamberlin and Neo-Heckscher-Ohlin Theorems - Product Cycle and Technology Gap and Strategic Trade theories.

#### **Unit 2: Free Trade and Protection**

Free Trade vs. Protection – Theory of Tariffs –The Political Economy of Non-tariff Barriers - Terms of Trade – Secular Deterioration (Singer-Prebisch) Thesis -Immiserizing Growth- The Concept of Customs Union - Regional Trade Agreements - EU and SAARC.

#### Unit -3: Balance of Payments and adjustment Mechanism

Balance of Payments Accounts –Adjustment of Deficit in Balance of Payments – Traditional Elasticity and Absorption Approaches - Theories of policy mix - BOP adjustments with capital mobility – Foreign Trade Multiplier.

#### **Unit 4: Theories of Exchange rate determination**

Exchange rate under free market – Spot and Forward Rates -Exchange rate adjustments under capital mobility - Floating Rates and their implications for developing countries - Currency Boards - Import and Exchange Controls and Multiple Exchange Rates.

#### **Unit 5: Global Institutions**

The Bretton Woods System - IMF and World Bank - Collapse of Bretton Woods System - New International Monetary Order - WTO - Issues at the recent WTO ministerial Conferences-Multinational Corporations - Implications for Developing countries.

### Model Paper M. A. DEGREE EXAMINATION FOURTH SEMESTER

**Branch: Econometrics** 

Paper: EMT 403(b): INTERNATIONAL TRADE AND FINANCE

(Revised Regulations CBSC from 2021-22)

Time: 3 Hours Max: Marks: 80

#### **PART-A**

Answer any FIVE questions. Each question carries 4 Marks (Marks:  $5 \times 4 = 20 \text{ Marks}$ )

- 16. Define the concept of Comparative Advantage and explain how comparative advantage is proved in the Ricardian Theory of Comparative Advantage.
- 17. Explain the Concept of intra-industry Trade. How do you measure it?
- 18. Explain the concept of Immiserizing Growth.
- 19. Distinguish between the concepts of Trade Creation and Trade Diversion.
- 20. State the Marshall Lerner Condition for Devaluation.
- 21. What do you mean by Policy Mix?
- 22. What is Spot rate of Exchange? How is it different from the Forward Rate of Exchange?
- 23. What do you understand by Multiple Exchange Rates?
- 24. Write a Short note on Bretton Woods Twins.
- 25. What is Multilateralism?

#### **PART-B**

Answer ALL questions. Each question carries 60 Marks (Marks:  $5 \times 12 = 60 \text{ Marks}$ )

11. Critically examine the Heckscher-Ohlin Theory of International Trade.

Or

Explain Neo-Chamberlin Model of International Trade.

12. Discuss the relative merits and demerits of Free Trade.

Or

Analyse the effects of Tariff with partial and general equilibrium approaches.

13. Explain the Absorption Approach to Devaluation.

Or

Explain how adjustment in balance of payments takes place under fixed exchange rates.

14. Discuss the exchange rate adjustments with free mobility of capital.

Or

Discuss the relative merits and demerits of Fixed and Flexible Exchange Rates.

15. Critically examine the role of IMF in ensuring adequate international liquidity under Bretton Woods' system.

Or

Assess the role of World Trade Organization in liberalizing international trade since 1995.

**Unit 1: Structure of the Indian Economy** 

Indian Economy on the Eve of Independence- Basic Characteristics of the Indian Economy as Developing Economy- Major issues of Development in Indian Economy- Growth and Structural Changes in the Indian Economy- Population-Poverty –Measurement of Poverty, Anti PovertyProgrammes - Inequality- Natural Resources-Infrastructure- Human Development in India-Prices, Price Policy and Economic Growth- Balanced Regional Development-Unemployment in India.

#### **Unit 2: Agricultural Sector**

Role Agriculture in Indian Economy- Share of Agriculture - Interrelationship between Agriculture and Industry –Land Tenure System - Farm Size and Productivity -Institutional and Technological Aspects- New Agricultural Policy-Food Security in India-Rural Credit- Agricultural Marketing- Regional Disparities in Indian Agriculture- Irrigation and other Agricultural Inputs.

#### **Unit 3: Industrial Sector**

Industrial Structure and Economic Growth- Large and MSMEs - Industrial Labour Problems and Labour Policy -Industrial Sickness Causes and Remedial Measures- Economic Reforms and Industrial Growth-Pattern of Industrialization-Public and Private Industrial Finance in India- Unorganized Sector and Informalisation of the Indian Economy.

#### **Unit 4: Tertiary and Foreign Sectors**

Service Sector - Role, Growth and Structure of Service Sector in India –Growth, Composition and Direction of India's Foreign Trade – Trade Policy and its Reforms in India – India's Balance of Payments - WTO and Indian Economy.

#### **Unit 5: Planning and Development**

Objectives and Strategy of Planning- Public Sector and Indian Planning- Re-Organization of Planning Commission (NITI Aayog) - Privatization and Globalization and its impact on India-Government Subsides in India - Problems of Capital Formation- Foreign Capital, Foreign aid and Economic Development in India.

#### **Model Paper**

M. A. DEGREE EXAMINATION FOURTH SEMESTER

Branch: Econometrics

Paper: EMT 403(c): INDIAN ECONOMY (Revised Regulations CBSC from 2021-22)

Time: 3 Hours Max: Marks: 80

#### PART-A

Answer any FIVE questions. Each question carries 4 Marks (Marks:  $5 \times 4 = 20 \text{ Marks}$ )

- 10. State the major structural changes in Indian economy since its independence.
- 11. What are the basic characteristics of a developing economy?
- 12. Write a short note on new agricultural policy.
- 13. Explain the concept of food security.
- 14. Write a short note on the source of industrial finance in India.
- 15. What are the major problems of industrial labour in India.
- 16. Write a short note on GATT.
- 17. Describe broad structure of India's foreign trade in recent years.
- 18. What are the major objectives of planning in India?
- 10. What are the problems of capital formation in India?

#### PART-B

Answer ALL questions. Each question carries 12 Marks (Marks:  $5 \times 12 = 60 \text{ Marks}$ )

11. What do you mean by anti-poverty Programmes? Briefly describe about anti-Poverty programmesimplemented in India after 1970s.

Or

Critically examine the Indian economic development during five-year plans.

12. Explain inter relationship between agriculture and industry.

Oı

Examine the controversy in India between the farm size and productivity.

13. What are the causes of industrial Sickness in India? Suggest some remedial measures.

 $\bigcap$ r

Evaluate the importance of Micro, Small and Medium Scale Enterprises (MSMEs) in the Indian economy.

14. Examine methods of correcting disequilibrium in India's BOP.

Or

Evaluate the impact of WTO on agriculture in India.

15. Explain the concepts of Privatization and Globalization and their impact on India.

Or

Discuss the role of foreign capital and foreign aid in India's Economic development.

#### EMT 403(d):PROJECT

A project objective describes the desired results of a project, which often includes a tangible item. An objective is specific and measurable, and must meet time, budget, and quality constraints. ... A project may have one objective, many parallel objectives, or several objectives that must be achieved sequentially.

Project objectives are what you plan to achieve by the end of your project. This might include deliverables and assets, or more intangible objectives like increasing productivity or motivation. Your project objectives should be attainable, time-bound, specific goals you can measure at the end of your project.

Goals and objectives are statements that describe what the project will accomplish, or the business value the project will achieve. Goals are high level statements that provide overall context for what the project is trying to achieve, and should align to business goals. In brief, project management objectives are the successful development of the project's procedures of initiation, planning, execution, regulation and closure as well as the guidance of the project team's operations towards achieving all the agreed upon goals within the set scope, time, quality and budget standards.

#### **Learning Outcomes**

The use effectively oral, written and visual communication. identify, analyze, and solve problems creatively through sustained critical investigation. integrate information from multiple sources. Demonstrate an awareness and application of appropriate personal, societal, and professional ethical standards. The value of any project cannot be measured without defining success. It requires focus on outcomes. Outcomes are the events, occurrences, or changes in conditions, behavior, or attitudes that indicate progress toward a project's goals. Outcomes are specific, measurable, and meaningful. Good outcome statements are specific, measurable, and realistic." Think carefully about what you can realistically accomplish given the groups you want to reach and the scope of your resources. Develop outcomes as follows: Outcomes should describe what you want to happen after your activity iscompleted.

EMT 4	04	FR	FREEDOM MOVEMENT IN INDIA, 1857-1947								4Credi	ts
	1007 1717											
Course Objectives: The Indian national movement was undoubtedly one of the biggest mass												
movements modern Society has ever seen, It was a movement which galvanized millions of People of all												
	classes and ideologies into political action and brought to its knees a mighty colonial empire. Consequently,											
along with the British, French, Russian, Chine, Cuban and Vietnam revolutions, it is of great relevance to												
those wishing to alter the existing political and social structure  CourseOutcomes: Attheendofthecourse, the student will be able to

- Unit I Nationalism: Its meaning and different interpretations Factors leading to growth of Nationalism- Emergence of Indian National Congress- Moderates and Militant Nationalists- Swadeshi and Home Rule Movements
- Unit II Emergence of Gandhiji: Non- Violence and Satyagraha- Rowlat and Khilafat issues-Non- cooperation Movement- Swarajists - Civil disobedience Movement- Ministries at Provincial level and Second World War
- Unit III Revolutionary Nationalists: Bhagath Singh- Growth of Capitalist class and its role Growth of left Ideology and peasant and Working class movement. Kisan Mahasabha
- Unit IV Growth of Communal Ideology and politics: Factors leading to Communalism-Formation of Muslim League and Hindu Mahasabha- National issues, Role of Congress and Muslim League, Cripps proposals and Quit India Movement, Cabinet Mission, the Partition and attainment of Independence
- Unit V Freedom Struggle in Princely states: Socio, Political and Administrative conditions-Origin of Nationalism- Impact of Freedom Struggle of British India over Native States, Haripura Resolution, 1938- Growth of Popular Movements- Lapse of Paramountacy-Join India Movement- Vallabhai Patel and Integration.

# MODEL QUESTION PAPER M.A.DEGREE EXAMINATION,-2021-22 FOURTH SEMESTER Branch IV: ECONOMETRICS EMT 404:FREEDOM MOVEMENT IN INDIA, 1857 - 1947

(Revised syllabus CBCSw.e.f.2021-2022)

Time:3 Hours Max. Marks:70

#### SECTION -A

Answer any FIVE of the following. Each question carries 4 Marks.

(Short notes) **(5X4=20)** 

- 1. Factors for the growth of Nationalism.
- 2. Militant Nationalists.
- 3. Rowlatt Act.
- 4. Swaraj Party.
- 5. Growth of capitalist class in India.
- 6. Significance of KisanMahasabha.
- 7. Importance of Muslim League.
- 8. Significance of Cripps proposals.
- 9. Importance of growth of popular movements.
- 10. Lapse of paramountacy.

#### SECTION -B

Answer any ALL question. Eachquestion carries 10 Marks.

5X10=50

11. a) Write a note on Nationalism, its meaning and different interpretations.

OR

- b) What was Home Rule Movement in India? Discuss.
  - 12. a) Write about non violance and satyagraha and their significance during freedom movement in India?

#### OR

b)Explain the powers and functions of Ministries at provincial government in India.

13. a) Describe critically on the role played by revolutionary Nationalist Bhagath Singh durinBrish rule in Indi.

#### OR

- b)Give a critical account of Peasant Movements between 1921 -1942 in India.
- 14. a) What are the reasons for the growth of communalism between 1937 -1947 in India.

#### OR

- b)Write a detailed note on cabinet Mission in India.
- 15. a) Explain the political conditions in Princely States in India.

#### OR

b)Write an essay on Join India Movement and its significance

#### **Unit 1: Transportation Problem**

Nature and Matrix form of TP – Transportation Table – Types of Transportation Problem – Balanced Transportation Problem, Unbalanced Transportation Problem – Methods to solve Transportation Problem – The Initial Basic Feasible solution: North-West Corner Rule and Vogel's Approximation method – Moving towards optimality, the Transportation Algorithm.

**Unit 2: Assignment Problem:** Assignment problem, Transportation problemand Linear Programming – Types of Assignment problem – Properties of Optimal Solution – Solving the Assignment Problem by Hungarian Algorithm – The Auction Algorithm for Assignment Problem – Branch and Bond Techniques for Assignment Problem.

**Unit 3 : Game Theory:** Basic concepts -Two-person Zero Sum Games - The Maximum Minimax Principle - Games without Saddle Points - Mixed Strategies - Graphical solution of 2 x n and m x 2 Games - Dominance property - The Modified Dominance Property - Reducing the Game Problem as a Linear Programming Problem.

#### **Unit 4: Inventory Management**

Introduction - Inventory control - Techniques of Inventory control with known demand - Economic Lot Size Problems -The fundamental Problem of Economic Order Quantity (EOQ), The Problem of EOQ with Uniform Demand, and The Problem of EOQ with Finite Rate of Replenishment - Problem of EOQ with Shortage.

#### **Unit 5: Simulation**

Introduction – Elements of a Simulation Model – Event – Types of Simulation – Generation of Random Phenomena – Monte Carlo Technique – Generation of Uniform (0,1) Random Observations – Simulation languages.

#### **TEXT AND REFERENCE BOOKS:**

- 1. KantiSwarup, P.K.Gupta and Man Mohan: Operations Research, Sultan Chand and sons, New Delhi.
- 2. Panneerselvam, R: Operations Research, Eastern Economy Edition, Prentice Hall of India, New Delhi, 2007.
- 3. Srinivasan, G., Operations Research \_Principles and Applications, Second Edition, Prentice Hall of India, New Delhi, 2012.

- 4. Richard, Brown and Govindaswamy, N., Schaum's Outlines Series Operations Research, Second Edition, 2012.
- 5. Gupta, P.M. and D.S.Hira: Operations Research, Sultan Chand and Sons, New Delhi.
- 6 Harven, Wagner: Operations Research.
- 7 Starr and Miller: Inventory Control.

#### Model Paper

### M. A. DEGREE EXAMINATION FOURTH SEMESTER

Branch: Econometrics

Paper EMT 405(a) – OPTIMIZATION IN ECONOMICS

(Revised Regulations CBSC from 2021-22)

Time: 3 Hours Max: Marks: 80

#### **PART-A**

Answer any FIVE questions. Each question carries 4 Marks (Marks:  $5 \times 4 = 20 \text{ Marks}$ )

- 1. Explain the mathematical formulation of the Transportation Problem with an example.
- 2. Distinguish between Balanced and Unbalanced Transportation Problem.
- 3. What is a Game Theory? List out the assumptions made in the theory of Games.
- 4. Explain the Maxi-min principle used in Game theory.
- 5. Define Inventory. What are the advantages and disadvantages of having inventories?
- 6. Explain the different costs that are involved in inventory problems.
- 7. Explain the concepts of Network: (i) Activities and (ii) Nodes.
- 8. Explain the rules for constructing the Networks.
- 9. Explain the concept of Simulation.
- 10. Explain the Event-type Simulation with the help of an illustration.

#### **PART-B**

Answer ALL questions. Each question carries 12 Marks (Marks:  $5 \times 12 = 60 \text{ Marks}$ )

11. Explain how the initial basic feasible solution to the Transportation Problem is determined using Vogel's approximation method.

Or

Determine an initial basic feasible solution to the following Transportation Problem using North West Corner Rule:

D1 D2 D3 D4 Availability

	Οl	6	4	1	5	14
	O2	8	9	2	7	16
	О3	4	3	6	2	5
Requirement	6	10	15	4	35	

Player B

12. Define Saddle point and value of the Game. Determine the value of the game whose pay-off is given by:

Or

Explain the Dominance property and use the dominance property to solve the game theory whose pay off matrix is given by:

		Player B		
		I	II	
	I	9	2	
Player A	II	8	6	
	III	6	4	

13. Explain the fundamental problem of EOQ.

Or

Explain the problem of EOQ with finite rate of replenishment.

14. What is a Network? Explain the constraints in Network.

Or

Explain the Critical Path Method (CPM).

15. Explain the different methods to generate Uniform (0, 1) Random observations.

Or

Explain the procedure involved in the generation of a sequence of random observations from any specified probability distribution.

#### Model Paper

M. A. DEGREE EXAMINATION FOURTH SEMESTER

Branch: Econometrics

Paper: EMT: 405(b)- DATA BASE FOR INDIAN ECONOMY

(Revised Regulations CBSC from 2021-22)

#### PART-A

Answer any FIVE questions. Each question carries 4 Marks (Marks:  $5 \times 4 = 20 \text{ Marks}$ )

Max: Marks: 80

- 1. State the major structural changes in Indian economy since its independence.
- 2. What are the basic characteristics of a developing economy?
- 3. Write a short note on new agricultural policy.
- 4. Explain the concept of food security.
- 5. Write a short note on the source of industrial finance in India.
- 6. What are the major problems of industrial labour in India.
- 7. Write a short note on GATT.
- 8. Describe broad structure of India's foreign trade in recent years.
- 9. What are the major objectives of planning in India?
- 10. What are the problems of capital formation in India?

#### **PART-B**

Answer ALL questions. Each question carries 12 Marks (Marks:  $5 \times 12 = 60 \text{ Marks}$ )

11. What do you mean by anti-poverty Programmes? Briefly describe about anti-Poverty programmes implemented in India after 1970s.

Oı

Critically examine the Indian economic development during five-year plans.

12. Explain inter relationship between agriculture and industry.

Or

Examine the controversy in India between the farm size and productivity.

13. What are the causes of industrial Sickness in India? Suggest some remedial measures.

Or

Evaluate the importance of Micro, Small and Medium Scale Enterprises (MSMEs) in the Indian economy.

14. Examine methods of correcting disequilibrium in India's BOP.

Or

Evaluate the impact of WTO on agriculture in India.

15. Explain the concepts of Privatization and Globalization and their impact on India.

Or

Discuss the role of foreign capital and foreign aid in India's Economic development.
