

SRI VENKATESWARA UNIVERSITY, TIRUPATI
DEPARTMENT OF FISHERY SCIENCE AND AQUACULTURE

Minutes of the Meeting

The Members of the Board of Studies in Fishery Science and Aquaculture met on 06-12-2019 in the chambers of the Head, Department of Fishery Science and Aquaculture. The Members thoroughly discussed and finalized the syllabus (Theory, Practical and Dissertation/ Project work) related to M.Sc., Aquaculture course and prepared on par with UGC Guidelines of Choice Based Credit System (CBCS).

Agenda:

Revision of the M.Sc., Aquaculture Syllabus, In according to UGC - CBCS Guidelines;

Dated: 06-12-2019

Members Present:

1. Prof. A.Usha Rani, Chairperson, BOS
2. Dr. P. Naga Jyothi, Head, Ex - Officio Member
3. Dr. S. Janardana Reddy, Member
4. Prof. P. Jacob Das, Member
5. Dr. Y. Suneetha, Member
6. Prof. Padmavathi, External Member
7. Prof. S.Ramakrishna, External Member

Resolutions:

All the members of the above committee unanimously resolved and prepared the syllabus related to the M.Sc., Aquaculture Course and also members suggested the send the soft & Hard Copies to the university authorities.

Signatures:

1. Prof. A.Usha Rani
2. Dr. P. Naga Jyothi
3. Dr. S. Janardana Reddy
4. Prof. P. Jacob Das
5. Dr. Y. Suneetha
6. Prof. Padmavathi
7. Prof. S. Ramakrishna

: *A. Usha Rani*

: *P. Naga Jyothi*

: *S. Janardana Reddy*

: *P. Jacob Das*

: *Y. Suneetha*

DEPARTMENT OF AQUACULTURE
S.V.U. COLLEGE OF SCIENCES
SRI VENKATESWARA UNIVERSITY: TIRUPATI

RESTRUCTURED CURRICULUM FOR
M.Sc. AQUACULTURE (REGULAR) PROGRAMME
TO BE IMPLEMENTED WITH EFFECT FROM THE ACADEMIC
YEAR 2019-2020

SYLLABUS
Choice Based Credit System (CBCS)
December-2019-20

FISHERY SCIENCE AND AQUACULTURE DEPARTMENT:

Vision

- Provide 100% Job security to our students
- To make the department a well-established and reputed center for Aquaculture related studies
- To promote knowledge base and make students self-reliant and useful to the society.
- Faculty involved in decision making – collective leadership. “Wisdom lies in the right perspective”.

Mission

“To train students in Principles and Practices of Aquaculture relevant to regional and National food production programs and Provide Employment to all the outgoing students”.

CHOICE BASED CREDIT SYSTEM (CBCS):

The Choice Based Credit System (CBCS) provides an opportunity for the students to choose courses from the prescribed courses comprising core, elective/minor or skill based courses. The courses can be evaluated following the grading system, which is considered to be better than the conventional marks system. Therefore, it has been found necessary to introduce uniform grading system in the entire higher education in India. This will benefit the students to move across institutions to begin with. The uniform grading system will also enable potential employers in assessing the performance of the candidates. In order to bring uniformity in evaluation system and computation of the Cumulative Grade Point Average (CGPA) based on students' performance in examinations, the UGC has formulated the guidelines to be followed.

Students of this course would be expected to :

1. Be able to play leading role in industry, research and the public services;
2. Understand and appreciate major public concerns and issues associated with
Aquaculture.
3. Have an understanding and grasp of international research environment where

- the frontiers of knowledge in Aquaculture are under research;
4. Be able to adapt and respond positively and flexibly to changing circumstances;
 5. Develop the professional skills and personal attributes to deal with complex issues, both systematically and creatively;
 6. Have the capacity for individual work and teamwork;
 7. Be lifelong learners with intellectual and practical skills.

Department Objectives:

The Department is having the following objectives:

1. To expose students to updated curricula and to recent advances in the subject and enable the students to face NET, SET and other competitive examinations successfully.
2. To create awareness among students about the latest streams of Aquaculture including advanced subjects like Biotechnology, Probiotics, Ornamental fish culture, Fish processing technology and Lab technology.
3. To improve the quality of laboratory and field work for which Aquaculture study tours and excursions have been made compulsory so that the students can become familiar with field status of Aquaculture and surrounding study.
4. To prepare students to attract and develop interest in Aquafarming, Hatcheries, Marketing, processing plants, Fisheries science and Toxicology so that the students can select Aquaculture as their career.
5. The BOS in Aquaculture expects that this new framework of curriculum caters the need of enabling students of subject to accept new challenges of dynamically changing modern era.

Program Educational Objectives:

1. Exposure of students to aqua industries and modern types to acquire this knowledge and skill.
2. To update the syllabus essential for appearing in NET, SET, GATE, ASRB and other competitive exams of UPSC and APPSC.
3. To make aware the students to know Aquaculture practices.
4. To develop trained and knowledgeable human resource for educational and research institutions and industries; to use this human resource for self-reliant India.

5. To develop self-employable ability and to apply knowledge for several Aqua-based industries like farming, feed mills, processing units, it will also provide employment to other dependents.

The M.Sc. degree in Aquaculture being offered by this University provides its students with a course of study that integrates a range of learning and teaching techniques relevant to their educational development and career ambitions. This Masters programme covers the latest developments in Aquaculture and its specializations, viz., Applied Genetics, Fish Biochemistry, Aquatic Biotechnology Fishery Science and Diseases. It provides theoretical knowledge as well as training in the practical and intellectual skills to enable students to better understand and then solve some of the problems in this subject. Graduates in this programme will be induced into critical thinking, and would be able to solve complex problems in Aquaculture. The students would also be inculcated with personal and problem-solving skills that will enhance their employability prospects. Enhanced competence of students has been the key concern in designing and developing this syllabus. Careful thought has gone into selection of topics and setting their scope. Major areas of Aquaculture like Genetics, Physiology, Biochemistry, Ecology, Immunology, Cytology, Aquaculture Biotechnology and Taxonomy have been included in the syllabus only after multiple rounds of thorough discussions and intensive study. Special attention has been paid to subjects like Bioinformatics, Molecular Biology and Genetics to incorporate the latest developments in these fields.

UGC in recent had made initiatives to reorient and restructure the policies of higher education. For creating a boost to the economic growth and social development. It has recognized the need and importance of the skills in the students by bringing down the demand – supply mismatch with ready manpower as skills and knowledge. In addition to conventional disciplines, there is a need to introduce some career oriented courses where qualified students may learn certain skills and knowledge which will provide them more openings in service, industry and self-employment sectors.

Findings for the past and future trends, drivers and challenges, regional aqua feed demand break up of finfish and shellfish is show that there is a need on the major ingredients used in commercial finfish feed, to understand and evaluate the kind of ingredients that will be in demand with the increase in aquaculture production. There are also central and state governments initiatives for promoting aquaculture production and industry. restraints of the commercial aqua feed market

as well as technological advancements in aquaculture industry. In view of the facts the department of Fishery Science and Aquaculture would like to establish skill development courses in Sri Venkatewara University Campus. M.Sc., Aquaculture course was started on 1997 academic year. This sector provides good employment and research opportunities for students, because aquaculture is one of the growth engine of Andhra Pradesh.

OBJECTIVES OF THE PROGRAMME:

The primary objective of the program is to impart quality education in the subject of Fishery Science and Aquaculture as a basic science and its applied branches to the students

1. To meet the academic to provide knowledge for sustainable aquaculture.
2. To expose learners to frontier and thrust areas of Aquaculture
3. To train learners for better performance in various competitive examination and in research careers.
4. To enable the learners to acquire and develop self- study habits
5. To facilitate Higher education & research in Aquaculture
6. To provide the students an on field exposure to help them in understanding the aquaculture practices
7. To provide the learners an experience in research for Aquaculture production,
8. To conduct field studies and different projects of local and global interests.
9. To provide effective utilization of aquatic and land resource
10. Enhancing skills of rural youth commercial fish farming and increasing their entrepreneurship opportunities.
11. Providing means of livelihood through commercial and industrial aquaculture.

PROGRAMME OUTCOMES:

S.No	Program Outcomes
PO1	Apply knowledge in Aquatic Ecology and ecosystem to understand the physical and chemical characteristics of water constituents their physico chemical and functional properties. To assess organic matter and recognize various biogeochemical cycles. Determine the dynamics of aquatic ecosystem and productivity.
PO2	Identify and understand different types of fishes and fin fish anatomy related to classification of commercially important crustaceans and mollusks up to sub class level and their salient features and distribution. Apply knowledge on shell fish anatomy and examine identification and morphology of cultivable organisms.
PO3	Design supplementary feeds applying the principles of food and feeding habits and nutrition to meet the challenges of nutritional problems. Describe fertilization and liming in aquaculture ponds, dynamics of dissolved oxygen, aeration and miscellaneous treatments to increase the production. Determination and estimation of total proteins, carbohydrates and

	lipids in aquatic feeds.
PO4	Know nature of ethics, values, ahimsa, crime and theories of punishment and explain Bhagavad-Gita as student, researcher and aqua technician. Know Professional and social ethics as researcher, marketing, farming, community mentor, aqua business operator and hatcheries.
PO5	Apply appropriate methods of Aquaculture systems, selection, survey and location of suitable site, Aquaculture engineering, hydrology of ponds, selection of species, restocking management and stocking. Techniques of post stocking management and growth. Apply soil and water characteristics and physiology of finfish and shell fish.
PO6	Discuss digestion, respiration, excretion and osmoregulation, circulatory system, neuroendocrine system and reproduction. Describe bioluminescence, mating and parental care. Describe the culture of Indian major carps, exotic carps, air breathing fishes. Locate Hatchery management, Fresh water prawn and pearl culture. Predict Aquarium fishes and management.
PO7	Communicate effectively viral and bacterial diseases in finfish and shellfish. Nutrition and environmental stress diseases information in person and with community. Microbiology and fish pathology. Acquire skills in writing research report, documentation, case studies, seminar presentations, group discussions and marketing strategies.
PO8	Describe fish immunology and immunotechnology. Social and environmental dimensions within nutrition and the life sciences. Able to demonstrate the cell biology , genetics and immunology.
PO9	Know basic structure of cell and its organelles, chromosomes, principles of physico chemical basis of heredity, genetic rationale in fish breeding, natural hybridization and cytogenetics of fishes.
PO10	Apply knowledge on chemical composition of fish and shellfish, common bacteria present in fish, handling of fish. Prepare pharmacology chromosomal engineering and hormonal manipulation of genetics, recombinant DNA and Polymerase chain reaction and gene amplification.
PO11	Develop and design fish feeds, supplementary feeds, biomolecules enzymes metabolism and bioenergetics. Identify computer application and scope of biostatics and statistical analysis in an aquaculture.
PO12	Learn new concepts of fish breeding and hatchery management, limnology, Bioinformatics in aquaculture, General Principles and practices of Aquaculture, Ornamental fish Culture, fish processing technology, marine pollution.

Semester - I

S.No	Components of Study	Title of the Course	Status of Paper	Title of the Paper	Credit Hrs / Week	Number of Credits	IA Marks	Semester End Marks	Total
1	Core*	AQC 101:	Mandatory	Concepts of Aquatic Ecology	6	4	20	80	100

I – SEMESTER

CORE – THEORY- AQC 101: CONCEPTS OF AQUATIC ECOLOGY COURSE OBJECTIVES

To enable the students to

1. Understand the concepts of Aquatic Ecology
2. Acquire knowledge on the Characteristics of water and dynamics of Aquatic ecosystem
3. Understand the Aquatic vegetation
4. Acquire knowledge on Energy transfer in the ecosystem

CORE – THEORY AQC 101 : CONCEPTS OF AQUATIC ECOLOGY

UNIT – I

1. INTRODUCTION: Definition of ecology, organism and environment; features of organism - environment relations; living and non - living environments; the ecosystem or habitat.
2. AQUATIC ECOSYSTEMS : Freshwater ecosystems - Lotic and Lentic ecosystems; Marine ecosystems - oceans and seas, zonation of the seas - rocky, sandy and muddy shores; classification of marine habitat - pelagic, benthic, neritic, oceanic, littoral and abyssal.

UNIT – II

3. PHYSICAL CHARACTERISTICS OF WATER : Light - penetration of sunlight into aquatic media, effect of light on productivity, photoperiodicity in animals; Temperature - annual temperature cycles, thermal stratification of water bodies, thermal optimum, maximum and minimum, water movements, periodic and a periodic current systems; Turbidity - causes, variations and effects.
4. CHEMICAL CHARACTERISTICS OF WATER: Atmosphere and atmospheric gases dissolved in water; Oxygen - oxygen and life, hypoxia, anoxia and hyperoxia, adaptations of animals to varying oxygen tensions; Carbon dioxide - sources of CO_2 , its ecological effects; pH or hydrogen ion concentration - its significance. total hardness and total alkalinity

UNIT – III

5. BIOGEOCHEMICAL CYCLES: Nitrogen cycle; phosphorus cycle; sulfur cycle; carbon cycle; trace elements - manganese and copper.
6. ORGANIC MATTER : Aquatic vegetation – zones of aquatic vegetation; Plankton - classification of plankton, factors affecting plankton distribution, plankton counting and sampling; phytoplankton - zooplankton relationship, plankton productivity; Benthos - phytobenthos and zoo benthos.

UNIT – IV

7. PRODUCTIVITY: Concept of productivity – standing crop, rate of production and rate of removal; primary and secondary productivity; classification of water bodies on the basis of productivity.
8. DYNAMICS OF AQUATIC ECOSYSTEM : Principal steps and components – niches, trophic levels and relations; producers, consumers, decomposers and transformers; food chain and food web; pyramid of biomasses; pyramid of numbers; energy transfer in the ecosystem.

6. Odum, E. P. 1996. Fundamentals of Ecology. 3rd Edn. Natraj Publishers, Dehradun.
7. Santhanam, R. and A. Srinivasan. 1994. A Manual of Marine Zooplankton. Oxford and IBH Publishing Co. Pvt. Ltd., New Delhi.
8. Pillai, N. K. 1986. Introduction to Planktonology. Himalaya Publishing House, Mumbai.
9. Balakrishnan Nair, N and D. M. Thampy. 1980. A Text Book of Marine Ecology. Mc Millan Co. of India Ltd.
10. Battish, S. K. 1992. Freshwater Zooplankton of India. Oxford & IBH Publishing Co. Pvt. Ltd. New Delhi.

COURSE OUT COMES

Upon completion of the course, students will be able to

- CO1. Understand the Aquatic environment and Aquatic ecosystem.
- CO2. Understand the Physical and Chemical Characteristics of water.
- CO3. Acquire knowledge on Importance of Biogeochemical cycles
- CO4. Describe the Nature of Dynamics of Aquatic Ecosystem

CO-PO MAPPING

MODEL QUESTION PAPER
M.Sc. DEGREE EXAMINATION
Branch XV – Aquaculture
AQC 101 - Paper – I – CONCEPTS OF AQUATIC ECOLOGY

(CBCS with effect from 2019-2020)

Time : 3 hours
Marks

Maximum : 80

PART – A

Answer any **FOUR** questions. Each question carries 5 marks.

(Marks : 4x5=20)

1. Lotic and lentic Ecosystems
2. Zonation of the Sea
3. Thermal Optimum
4. Hypoxia
5. Sulphur Cycle
6. Phytobenthos and Zoobenthos
7. Standing Crop
8. Pyramid of biomasses

PART – B

(4X15=60)

Answer **ALL** questions. Each question carries 15 marks

9. (a) Discuss in detail ecosystem with all features
(OR)
(b) Write a detailed account on Marine Ecosystem
10. (a) Discuss in detail the physical characterization of water
(OR)
(b) Answer the following
i. Adaptations of animals to varying oxygen tensions
ii. pH concentration of water
11. (a) Illustrate the Nitrogen cycle and explain the trace elements
(OR)
(b) Discuss in detail the zones of aquatic vegetation
12. (a) Write a detailed account on productivity
(OR)
(b) Narrate the different steps involved in the dynamics of Aquatic Ecosystem.

AQC 102: SYSTEMATICS AND EXTERNAL ANATOMY OF CULTIVABLE ORGANISMS

COURSE OBJECTIVE

To enable the students to

1. Understand the Systematic and External Anatomy of Cultivable Organisms
2. Discuss the basic structure of fishes
3. Understand the classification of commercially important crustaceans and molluscs
4. Acquire knowledge on morphology shell fish

CORE – THEORY

AQC 102 : SYSTEMATICS AND EXTERNAL ANATOMY OF CULTIVABLE ORGANISMS UNIT – I

1. FIN FISH SYSTEMATICS: Classification of fishes up to subclass level; major groups of fresh water fish and their salient features and distribution.

UNIT – II

2. FIN FISH ANATOMY : Basic structure of the skin in fishes; epidermal derivatives – microridges and integumentary glands; dermal derivatives – cosmoid scales, ganoid scales, placoid scales, elasmoid, cycloid and ctenoid scales; fish age and scales; integumentary pigments; mouth and jaws; gill slits; fins – median fins and paired fins, origin of paired fins; coloration – morphology of chromatophores, pigments, physical and chemical colours, mixed colours, colour change, adaptive significance.

UNIT – III

3. SHELL FISH SYSTEMATICS: Classification of commercially important crustaceans and molluscs up to sub class level and their salient features and distribution.

UNIT – IV

4. SHELL FISH ANATOMY: External morphology of shell fish: prawn, shrimp, crab and molluscs – exoskeleton and appendages.

SUGGESTED READING :

MODEL QUESTION PAPER M.Sc. DEGREE EXAMINATION Branch XV – Aquaculture

AQC- 102 - Paper – II – SYSTEMATICS AND EXTERNAL ANATOMY OF CULTIVABLE ORGANISMS

(CBCS with effect from 2019-2020)

Time : 3 hours

Maximum : 80

Marks

PART – A

Answer any **FOUR** questions. Each question carries 5 marks.

(Marks : 4x5=20)

1. Microridges
2. Scales in bony fishes
3. Chondrichthyes classification
4. Major groups of fresh water fish
5. Decapods classification

6. Commercially important molluscs
7. Morphology of shrimps
8. Appendages of Molluscs

PART – B
(4X15=60)

Answer **ALL** questions. Each question carries 15 marks

9. (a) Classify the fishes upto sub-class level. Add a note on major groups of freshwater fishes.
(OR)
(b) Describe the salient features and distribution of freshwater fishes.
10. (a) Write a detailed notes on the basic structure of the skin in fishes. Add a note on dermal derivatives of skin.
(OR)
(b) Explain the morphology of chromatophores and their significance in fishes
11. (a) Describe the classification of commercially important crustaceans in detail
(OR)
(b) Classify the mollusca upto sub-class level. Add a note on commercially important mollusks.
12. (a) Explain the appendages of prawns in detail. Add a note on its exoskeleton.
(OR)
(b) Give a detailed description on the external morphology of crabs. Add a note on their exoskeleton and appendages.

COURSE OBJECTIVE

1. Understand Commercially important fin fish and shell fish
2. Aquire knowledge on Identification of eggs and larval forms of cultivable finfish and shellfish
3. Understand the Biometric analysis
4. Comprehension knowledge on crafts and gear, aquatic insets, aquatic weeds.

PRACTICALS

I – Semester

AQC103: IDENTIFICATION AND MORPHOLOGY OF CULTIVABLE ORGANISMS

1. Identification of commercially important finfish – marine fishes, freshwater fishes, exotic carps, ornamental fishes, predatory fishes and weed fishes.
2. Identification of commercially important shellfish – crabs, prawns and shrimps.
3. Identification of eggs and larval forms of cultivable finfish and shellfish.
4. Identification of fins and scales of fish; mounting of scales.
5. Collection and identification of fish food organisms.
6. Biometric analysis.
7. Length-weight relationship.
8. Dissections: (1) Digestive system (2) Reproductive system in finfish and shellfish.
9. Identification of different crafts and gear.
10. Identification of aquatic insects.
Identification of aquatic weeds.

COURSE OUT COMES

1. Understand the commercially important cultivable organisms

2. Aquire knowledge on commercially important finfish and shellfishes
3. Creating awareness on anatomy of finfish and shellfish
4. Knowledge on Morphology of aquatic insects and weeds.

COURSE OBJECTIVE

1. Understand the biomolecules in aquatic animals
2. Aquire knowledge on Identification of physiology
3. Understand the feed management
4. Comprehension knowledge on feed composition.

AQC 104: FISH NUTRITION

1. Estimation of total proteins, carbohydrates and lipids in fish feeds.
2. Estimation of ash content.
3. Estimation of inorganic ions through flame photometer.
4. Estimation of fiber content in fish feeds.
5. Determination of amino acid profiles through paper chromatography.
6. Effect of different feeds on digestibility, FCR and FCE.
7. Determination of energy contents using bomb calorimeter.
8. Proximate composition of fish digestive tract.

COURSE OUT COMES

1. Understand the estimation of biomolecules
2. Aquire knowledge on techniques for estimations
3. Creating awareness on intestine and gut capacity of aquatic organisms
4. Knowledge on feed composition

AQC 105: COMPULSORY FOUNDATION- THEORY -FISH NUTRITION AND WATER QUALITY MANAGEMENT

COURSE OBJECTIVE

To enable the students to:

1. Comprehensive knowledge on nutritional requirements in aquaculture
2. Know the principles and working application of supplementary feed
3. Understand the properties of fertilizers and liming
4. Aquire knowledge on aeration in fish pond

AQC 105 : FISH NUTRITION AND WATER QUALITY MANAGEMENT UNIT – I

1. NUTRITION: Importance of nutrition; nutritional requirements; nutritive needs of finfish

with special reference to carps and cat fishes and shrimp and prawn; major nutrients – carbohydrates, proteins and lipids and their importance. Natural food and live feed culture: methods of collection of live feed organisms; identification, isolation and maintenance of phytoplankton and zooplankton; mass culture of spirulina and azolla, culture of rotifers (Brachionus and Moina) and artemia.

2. **FOOD AND FEEDING HABITS** : Types of food – basic food, secondary food, incidental food, obligatory food; feeding habits – detritivores, scavengers, herbivores, omnivores, carnivores, surface feeders, column feeders, bottom feeders; monophagic, stenophagic and euryphagic fishes; seasonal changes in food availability and food preferences; food and feeding in relation to age; food selectivity and feeding intensity; feeding strategies; food and feeding habits of prawns, shrimps, crabs and bivalves; morphological adaptations for feeding in fishes.

UNIT – II

3. **SUPPLEMENTARY FEEDS** : Supplementary feed and feed formulations; different types of feeds (dry feed, wet feed, floating feed, sinking feed and flakes); feed composition; nutrient source; feed ingredients (conventional and non-conventional, their nutritive value); water stability of feeds; use of attractants in feeds; binders; processing of feeds (importance of anabolic agents, antioxidants and mould inhibitors; anti nutritional factors); storage and quality control; determination of energy content in feeds.
4. **FEEDING** : Introduction; feeding and fish production; fate of nutrients in feed; water quality and feeding rates – temporal changes; relationship to maximum feeding rate; effects of weather on maximum feeding rate; effluents from fish ponds; off-flavor.

UNIT – III

5.**FERTILIZATION**: Properties of chemical fertilizers: Primary nutrients; secondary nutrients; sources of fertilizers; mixed fertilizers; solubility of fertilizers. Effects of fertilization on plants and invertebrates: Phytoplankton; zooplankton; benthos; macrophytes; water transparency as an index to fertilization; fish yield in fertilized ponds. Organic fertilizers: Sources; influence on pond ecology and fish production.

6.**LIMING** : Properties of liming materials – compounds, neutralizing value, fineness; effects of liming on pond ecosystem – chemistry, production of plankton and invertebrates; fish production; liming rates for ponds; application of liming materials for ponds – selection of liming material and time of application; methods of application; residual effects of liming.

UNIT – IV

7.**DYNAMICS OF DISSOLVED OXYGEN** : Introduction; diffusion; photosynthesis; respiration; diet changes in dissolved oxygen concentrations; predicting decline in dissolved oxygen concentrations; oxygen budgets of fish ponds; algal die-offs; overturns; identification of oxygen problems.

8.**AERATION** : Introduction; principles of aeration; emergency aeration; supplemental or continuous aeration; destratification; practical considerations.

9.**MISCELLANEOUS TREATMENTS** : Introduction; potassium permanganate; hydrogen peroxide; calcium hydroxide; reduction of pH; control of turbidity; salinity; hardness and chloride; water exchange; chlorine removal; rotenone; formalin and malachite green; methods of applying chemicals.

SUGGESTED READING :

1. Halver, J. E. 1972. Fish Nutrition. Academic Press, New York.
2. Sena, S. De Silva and Trever A. Anderson. Fish Nutrition in Aquaculture. Chapman & Hall London. 1998, p. 319.
3. Lovell, J. 1989. Nutrition and Feeding of Fish. Von Nostrand.
4. MPEDA, 1990. Hand Book on Aquafarming – Live feed.
5. MPEDA, 1990. Hand Book on Aquafarming – Aquaculture feed.
6. MPEDA 1990. Aquaculture Engineering and Water Quality Management. Cochin, India.
7. Pillay, T. V. R. Aquaculture: Principles and Practices. Fishing News Books.
8. Jhingran, V. G. 1985. Fish and Fisheries of India. Hindustan Publishing Corporation, New Delhi.
9. Boyd, C. E. 1982. Water Quality Management for Pond Fish Culture. Elsevier Science Publishers.
10. Chakroff, M. 1993. Freshwater Fish Pond Culture and Management. Daya Publishing House, New Delhi.

11. Pillay, T. V. R. and W. A. Dill. 1979. Advances in Aquaculture. Fishing News Books Ltd.

COURSE OUT COMES

After the completion of the course, the students will be able to:

CO1. Acquire knowledge on the Importance of Nutrition

CO2. Understand the Food and Feeding Habits.

CO3. Importance of Supplementary feeds and Fertilization

CO4. Knowledge on Dynamics of Dissolved oxygen

CO-PO MAPPING

POS COS	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12

MODEL QUESTION PAPER

M.Sc. DEGREE EXAMINATION

Branch XV – Aquaculture

AQC- 105 - Paper – III – FISH NUTRITION AND WATER QUALITY MANAGEMENT

(CBCS with effect from 2019-2020)

Time : 3 hours

Maximum : 80

Marks

PART – A

Answer any **FOUR** questions. Each question carries 5 marks.

(Marks : 4x5=20)

1. Zooplankton
2. Morphological adaptations for feeding in fishes
3. Detritivores
4. Off - flavor
5. Macrophytes
6. Liming rates for ponds
7. Algal die - offs
8. Destratification

PART – B

(4X15=60)

Answer **ALL** questions. Each question carries 15 marks

9. (a) Define the important of nutrition and narrate nutritional needs of fishes.

(OR)

- (b) Write a detailed account on food and feeding habits of prawns, shrimps and crabs.
10. (a) Discuss in detail different types of feeds.
(OR)
(b) Write a detailed note on feeding and fish production in relation to fate of nutrients in feed
11. (a) Discuss in detail the properties of chemical fertilizers in Aquaculture
(OR)
(b) Answer the following
i. Application of limiting material for ponds
ii. Residual effects of liming
12. (a) Discuss in detail oxygen budgets of fish pond
(OR)
(b) Define Aeration and explain the principles of aeration.

AQC:106: HUMAN VALUES AND PROFESSIONAL ETHICS – I

COURSE OBJECTIVE

1. Define the term ethics, Good and Bad values, Crime and Punishment
2. Understand the importance good character, conduct and values embedded in various religious
3. Apply knowledge on professional ethichs and correlate the concepts in addressing the ethical issues outside the class rooms
4. Demonstrate knowledge of ethical values in non-class room activity internships and work and resolved the moral issues.

AQC: 106: HUMAN VALUES AND PROFESSIONAL ETHICS – I

- I. Definition and Nature of Ethics- Its relation to Religion, Politics, Business, Legal, Medical and Environment. Need and Importance of Professional Ethics - Goals - Ethical Values in various Professions.
- II. Nature of Values- Good and Bad, Ends and Means, Actual and potential Values, Objective and Subjective Values, Analysis of basic moral concepts- right, ought, duty, obligation, justice, responsibility and freedom, Good behavior and respect for elders.
- III. Ahimsa (Non-Violence), Satya (Truth), Brahmacharya (Celibacy), Asteya(Non possession) and Aparigraha(Non- stealing). Purusharthas(Cardinal virtues)-Dharma (Righteousness), Artha(Wealth), Kama(Fulfillment Bodily Desires), Moksha(Liberation).
- IV. Bhagavad Gita- (a) Niskama karma. (b) Buddhism- The Four Noble Truths - Arya astanga marga, (c) Jainism- mahavrata and anuvratas. Values Embedded in Various Religions, Religious Tolerance, Gandhian Ethics.
- V. Crime and Theories of punishment- (a) Reformative, Retributive and Deterrent. (b) Views on manu and Yajnavalkya.

Books for study:

1. John S Mackenzie: A manual of ethics.
2. "The Ethics of Management" by Larue Tone Hosmer, Richard D. Irwin Inc.
3. "Management Ethics - integrity at work" by Joseph A. Petrick and John F. Quinn, Response Books:New Delhi.

4. "Ethics in Management" by S.A. Sherlekar, Himalaya Publishing House.
5. Harold H. Titus: Ethics for Today
6. Maitra, S.K: Hindu Ethics
7. William Lilly : Introduction to Ethics
8. Sinha: A Manual of Ethics
9. Manu: Manu Dharma Sastra or the Institute of Manu: Comprising the Indian System of Duties: Religious and Civil(ed.) G.C.Haughton.
10. Susruta Samhita: Tr.Kaviraj Kunjanlal, Kunjalal Brishagratha, Chowkamba Sanskrit series, Vol I,II and III, Varnasi, Vol I OO, 16-20, 21-32 and 74-77 only.
11. Caraka Samhita :Tr. Dr.Ram Karan Sarma and Vaidya Bhagavan Dash, Chowkambha Sanskrit Series office, Varanasi I, II, III Vol I PP 183-191.
12. Ethics, Theory and Contemporary Issues., Barbara Mackinnon, Wadsworth/Thomson Learning, 2001.
13. Analyzing Moral Issues, Judith A. Boss, Mayfield Publishing Company, 1999.
14. An Introduction to Applied Ethics (Ed.) John H.Piet and Ayodhya Prasad, Cosmo

Publications.

15. Text book for Intermediate logic, Ethics and Human Values , board of Intermediate Education& Telugu Academic Hyderabad
16. I.C Sharma Ethical Philosophy of India. Nagin&co Julundhar.

COURSE OUT COMES

After studying the course students will able to.

- CO1. Define the term ethics, good and bad values, crime and punishment and religious.
- CO2.Understand the importance of good character, conduct and values embedded in various religions
- CO3. Apply knowledge of Professional ethics and correlate the concepts in addressing the ethical issues outside the class room.
- CO4. Demonstrate the ability to face difficult situations in non class room activities, internships and field work and resolve them confidently.

**MODEL QUESTION PAPER
M.Sc. DEGREE EXAMINATION
Branch XV – Aquaculture**

AQC- 106 - Paper – I – HUMAN VALUES AND PROFESSIONAL ETHICS - I

(CBCS with effect from 2019-2020)

Time : 3 hours

Maximum : 100 Marks

PART – A

Answer any **FOUR** questions. Each question carries 5 marks.

(Marks : 4x5=20)

1. Moral Imagination
2. Nature of values
3. Tolerance
4. Civic virtues
5. Empathy
6. Autonomy
7. Satkdryavdda
8. Niskamma Karma
9. Reformative
10. Compensation

PART – B

(4X15=60)

Answer **ALL** questions. Each question carries 15 marks

11. (a) Write an essay on nature and subject – matter of Ethics.
(OR)
(b) Write an essay on definition, characteristics, importance and types of values.
12. (a) Are Values in nature subjective or objective - discuss
(OR)
(b) Define good and bad and elucidate characteristics of good and bad
13. (a) Write an essay on justice, responsibility and freedom in human values
(OR)
(b) Define and describe Brahmacyarya, Aparigraha, and Moksha
14. (a) Write an essay on the Five Great Vows (Mahavrata) of Jainism
(OR)
(b) Define and describe Aparigraha, Dharma and Artha
15. (a) Explain the Impact of Religion on Values and Behaviour at work place.
(OR)
(b) What is the purpose of Criminal Justice? Write briefly on Reformative and Retributive theories of punishment.

II – SEMESTER

CORE – THEORY AQC 201: PRINCIPLES OF AQUACULTURE

COURSE OBJECTIVE

To enable the students to

1. Describe the Principles of Aquaculture
2. Identify the Design Construction of pond
3. Indicate the Biological characteristics of aquaculture species

4. Acquire knowledge on measurement of growth and water and soil quality parameter.

Semester – II

AQC 201 : PRINCIPLES OF AQUACULTURE

UNIT – I

1. **AQUACULTURE SYSTEMS AND METHODS:** Scope and definition; origins and growth of aquaculture; biological and technological basis; Traditional, extensive, semi - intensive and intensive culture; monoculture, polyculture, composite culture, mixed culture, monosex culture; cage culture, pen culture, raft culture, race way culture, culture in circulatory systems; warm water and cold water aquaculture; sewage – fed fish culture, integrated fish farming.
2. **SELECTION OF SITES:** Survey and location of suitable site – topography; soil characteristics; acid sulphate soils; water source; hydrometeorological data.

UNIT – II

3. **AQUACULTURE ENGINEERING :** Design and construction of pond, layout and design of aquaculture farm, construction, water intake system, drainage system; aeration and aerators; recent advances in aquaculture engineering; tips for better aquaculture practices; design and construction of hatcheries.
4. **HYDROLOGY OF PONDS :** Types of ponds; sources of water – precipitation, direct run off, stream inflow, ground water inflow, regulated inflow; losses of water– evaporation, seepage, outflow, consumptive use, water budgets of embankment ponds; water budget of an excavated pond; water exchange.

UNIT – III

5. **SELECTION OF SPECIES:** Biological characteristics of aquaculture species; economic and market considerations; seed resources, collection and transportation.
6. **PRE STOCKING MANAGEMENT:** Sun drying, ploughing / tilling, desilting, liming and fertilization, eradication of weed fishes.
7. **STOCKING:** Acclimatization of seed and release; species combinations; stocking density; ratio.

UNIT – IV

8. **POST STOCKING MANAGEMENT :** Water and soil quality parameters required for optimum production, control of aquatic weeds and aquatic insects, algal blooms; specific food consumption, food conversion ratio (FCR), protein efficiency ratio, true net protein utilization, apparent net protein utilization, biological value of protein.

9. **GROWTH :** Measurement of growth; length - weight relationship; methods of determination of age in fishes and shellfish based on length data and growth checks; ponderal index; growth hormones.

SUGGESTED READING :

1. Mathew Landau. 1995. **Introduction to Aquaculture**. Daya Publishing House, New Delhi.
2. Pillay, T. V. R. 1993. **Aquaculture: Principles and Practices**. Fishing News Books. Black Well Scientific Publications.
3. MPEDA, 1991. **Hand Book on Shrimp Farming**, Kochi, India.
4. Jhingran, V. G. 1982. **Fish and Fisheries of India**. Hindustan Publishing Corporation, New Delhi.
5. Chakrabarti, N. M. 1998. **Biology, Culture and Production of Indian Major Carps**. Narendra Publishing House, New Delhi.

6. Coche, A. G. and J. F. Muir. 1996. **Pond Construction and Fresh Water Fish Culture – Pond Farm Structures and Layouts – Simple Methods for Aquaculture**. FAO. Daya Publishing House, New Delhi.
7. Upadhyay, A. S. 1995. **A Hand Book on Design, Construction and Equipments in Coastal Aquaculture (Shrimp Farming)**. Daya Publishing House, New Delhi.
8. Wheaton, F. W. 1985. **Aquaculture Engineering**. MPEDA, Cochin.
9. MPEDA 1990. **Aquaculture Engineering and Water Quality Management**. Cochin, India.

COURSE OUT COMES

After completion of this course, students will be able to:

CO1.Understand the Aquaculture systems and methods

CO2.Acquire knowledge on Aquaculture Engineering

CO3.Creating awareness on selection of species and Hydrology of ponds

CO4.Knowledge on Pre stocking Management and Post stocking management and growth.

CO-PO MAPPING

MODEL QUESTION PAPER
M.Sc. DEGREE EXAMINATION
Branch XV – Aquaculture
AQC- 201 - Paper – I – PRINCIPLES OF AQUACULTURE

(CBCS with effect from 2019-2020)

Time : 3 hours

Maximum : 80

Marks

PART – A

Answer any **FOUR** questions. Each question carries 5 marks.

(Marks : 4x5=20)

1. Raft Culture
2. Integrated fish farming
3. Advances in Aqua engineering
4. Embankment ponds
5. Seed resources
6. Stocking density
7. Algal blooms
8. Ponderal Index

PART – B
(4X15=60)

Answer **ALL** questions. Each question carries 15 marks

9. (a) Write a detailed note on origin and growth of aquaculture.
(OR)
(b) Explain the soil characterization and water sources for site selection
10. (a) Write a detailed account on the design and construction of harcheries
(OR)
(b) Describe in detail water budget of an excavated pond
11. (a) Write a note on biological characteristics of aquaculture species
(OR)
(b) Describe in detail different types of pre stocking management
12. (a) Discuss in detail the following
i. Apparent net protein utilization
ii. Biological value of protein
(OR)
(b) Explain the methods of determination of age in fishes shell - fishes.

CORE – THEORY AQC 202: PHYSIOLOGY OF CULTIVABLE ORGANISMS

COURSE OBJECTIVE

To enable the students to

1. Recognize the Physiology of cultivable Organisms.
2. Understand the digestion and respiration.
3. Creating awareness on neuroendocrine system and reproduction.
4. Knowledge on Bioluminescence, mating and parental care.

AQC 202 : PHYSIOLOGY OF CULTIVABLE ORGANISMS

UNIT – I

1. **DIGESTION:** Digestive systems, digestive enzymes, absorption and assimilation.
2. **RESPIRATION :** Respiratory organs, mechanisms of ventilation, respiratory pigments, gaseous exchange mechanism, response of the respiratory system to external changes; accessory respiratory organs.

UNIT – II

3. **EXCRETION AND OSMOREGULATION:** Mechanism of excretion – kidney structure and functions of freshwater and marine teleosts. Osmoregulation in freshwater fishes and marine fishes and salt balance.
4. **CIRCULATORY SYSTEM:** Arteries and veins; mechanical properties and regulation of cardiac activity; general properties of the cardiovascular system; effects of drugs.

UNIT – III

5. **NEUROENDOCRINE SYSTEM:** Neuroendocrine system in finfish; neuroendocrine regulation of moulting and reproduction in crustaceans.
6. **REPRODUCTION:** Reproductive cycles, sexual maturity, spawning and fecundity, gonado somatic index, fertilization, hormones and reproductive behaviour in fishes.

UNIT – IV

7. **BIOLUMINESCENCE:** Light organs – biochemistry, regulation of light emission, significance and employment of luminescence.
8. **MATING AND PARENTAL CARE :** The abyssal and pelagic eggs; attachment devices; spawning sites; nest building and other means of parental care; ovoviviparity and viviparity; types of larvae; metamorphosis; larval life and feeding habits of larvae in finfish and shellfish.

SUGGESTED READING :

1. Hoar W.S. and D. J. Randal. 1976. **Fish Physiology**. Vol. I to IX Academic Press, New York.
2. Khanna, S. S. 1996. **An Introduction to fishes**. Central book depot, Allahabad.
3. Lynwood S. Smith. 1999. **Introduction to Fish Physiology**. Narendra Publishing House, Delhi.
4. Harper, A. L. 1989. **Physiological Chemistry**.
5. Lagler, K. F., J. E. Bardach and R. R. Miller. 1972. **Ichthyology**. John Wiley.

COURSE OUT COMES

After completion of this course, students will be able to:

- CO1 To Understand the metabolism of fishes and prawns
- CO2 Acquire knowledge on Neuroendocrine system
- CO3 Creating awareness on bioluminescence
- CO4 Knowledge on fertilization and parental care

CO-PO MAPPING

POS COS	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
CO1	2	2	3	1	2	3	3	2	2	2	2	2
CO2	2	2	2	1	2	3	2	1	3	2	2	1
CO3	3	2	3	1	2	3	2	2	3	2	2	2
CO4	2	2	2	1	2	3	2	3	3	3	3	3

H-High-3, M- Medium-2, L- Low-1

COURSE OBJECTIVE

To enable the students to

1. Acquire knowledge on Soil and water characteristics
2. Understand classification of planktons
3. Knowledge on Micro & Macro Nutrients
4. Understand Excretory products

MODEL QUESTION PAPER M.Sc. DEGREE EXAMINATION Branch XV – Aquaculture

AQC- 202 - Paper –II – PHYSIOLOGY OF CULTIVABLE ORGANISMS

(CBCS with effect from 2019-2020)

Time : 3 hours

Maximum : 80

Marks

PART – A

Answer any **FOUR** questions. Each question carries 5 marks.

(Marks : 4x5=20)

1. Absorption and assimilation
2. Respiratory pigments
3. Osmoregulation in marine fishes
4. Arteries and veins
5. Reproduction in crustaceans
6. Spawning
7. Significance of Luminescence
8. Viviparity.

PART – B

4X15=60)

Answer **ALL** questions. Each question carries 15 marks

9. (a) Explain various digestive enzymes in different cultivable organisms.
(OR)
(b) Write a detailed note on response of the respiratory system to external changes
10. (a) Describe the mechanism of excretion in fresh water and marine teleosts
(OR)
(b) Discuss in detail about the mechanical properties and regulation of cardiac activity.
11. (a) Write an essay on neuroendocrine regulation of moulting in crustaceans
(OR)
(b) Give an account on hormones and reproductive behavior in fishes
12. (a) Explain the biochemistry and regulation of light emission
(OR)
(b) Narrate an account on larval life and feeding habits of larvae in shellfish.

PRACTICALS

AQC 203: SOIL AND WATER CHARACTERISTICS

1. Determination of temperature, pH and transparency.
2. Estimation of dissolved oxygen and primary productivity.
3. Estimation of carbon dioxide.
4. Estimation of total ammonia – nitrogen and nitrate – nitrogen.
5. Estimation of phosphates.
6. Estimation of iron.
7. Estimation of chlorine
8. Determination of hardness.
9. Estimation of organic matter and biological oxygen demand (BOD)
10. Determination of salinity.
11. Plankton analysis.

COURSE OUT COMES

After completion of this course, students

- CO1. Understand water quality parameters
- CO2. Acquire knowledge on soil quality parameters
- CO3. Creating awareness on Plankton analysis
- CO4. Knowledge on Excretion

COURSE OBJECTIVE

To enable the students to

1. Recognize the Physiology of cultivable Organisms.
2. Understand the excretion and respiration
3. Creating awareness on Determination of fish age.
4. Knowledge on gonado somatic index and fecundity in fish

AQC 204: PHYSIOLOGY OF FINFISH AND SHELLFISH

1. Effect of size, sex and salinity on oxygen consumption.
2. Effect of eyestalk ablation on oxygen consumption in crab.
3. Estimation of excretory ammonia.
4. Collection and preservation of pituitary gland in fish
5. Induced breeding in fish through hypophysation.
6. Estimation of haemolymph chlorides with reference to salinity in crab.
7. Effect of thyroxine on fish growth.
8. Determination of fish age.

9. Estimation of gonado somatic index and fecundity in fish

COURSE OUT COMES

After completion of this course, students will be able to:

- CO1 To Understand the metabolism of fishes and prawns
- CO2 Acquire knowledge on Neuroendocrine system
- CO3 Creating awareness on hormones
- CO4 Knowledge on fertilization and fecundity

COMPULSORY FOUNDATIONAQC 205: FRESHWATER AQUACULTURE

COURSE OBJECTIVE

To enable the students to

- 1. Understand the culture of Indian Major carps
- 2. Acquire knowledge on hatchery management
- 3. Creating awareness on Fresh water pearl culture
- 4. Knowledge on important Aquarium fishes and management

AQC 205 : FRESHWATER AQUACULTURE

UNIT – I

- 1. **CULTURE OF INDIAN MAJOR CARPS** – Catla, Rohu, Mrigal
- 2. **CULTURE OF EXOTIC CARPS** – Grass carp, common carp, silver carp, tilapia
- 3. **CULTURE OF AIR BREATHING FISHES** – Murrels and cat fishes

UNIT – II

HATCHERY MANAGEMENT:

- 4. **FISH:** Induced breeding; hypophysation of Indian Major carps; types of hatcheries - Hapa, Jar hatchery, circular hatchery (Chinese hatchery), Modern Indian hatchery system.
- 5. **FRESHWATER PRAWN:** Identification of post larval stages; brood stock management, breeding and Hatchery management, larval rearing.

UNIT – III

- 6. **FRESHWATER PRAWN CULTURE:** Seed collection from natural sources; culture of *M.rosenbergii* / *M.malcolmsonii*
- 7. **FRESHWATER PEARL CULTURE:** Definition and scope, origin of pearls, pearl producing molluscs; freshwater pearl culture in the World and in India; types of pearls; mantle cavity insertion, mantle tissue insertion, gonadal insertion; water quality management.

UNIT – IV

- 1. **AQUARIUM FISHES AND MANAGEMENT :** Identification of commercially important ornamental fishes, setting and design of freshwater aquarium; taxonomy of species; live bearing fishes; egg laying fishes; biology of ornamental fishes; physiochemical properties of water used in aquaria; aquatic plants and other structures for beauty and utility; common aquarium fish diseases and their control; preparation of supplementary feeds and mass production of ornamental fishes.

SUGGESTED READING:

- 1. Pillay, T. V. R. 1998. **Aquaculture Principles and Practices**. The Fishing News Books.
- 2. Rath, R. K. 2000. **Freshwater Aquaculture**. Scientific Publishers (India) Jodhpur.
- 3. Piska, R. S. 1999. **Fisheries and Aquaculture**. Lahari Publications. Hyderabad.

COURSE OUT COMES

After completion of this course, students will be able to:

- CO1 Understand the Culture of Indian Major carps
- CO2 Acquire knowledge on Aquaculture Hatchery Management
- CO3 Creating awareness on Fresh water prawn culture
- CO4 Knowledge on Aquarium fishes and Management

CO-PO MAPPING

H-High-3, M- Medium-2, L- Low-1

MODEL QUESTION PAPER
M.Sc. DEGREE EXAMINATION
Branch XV – Aquaculture
AQC- 205 - Paper –III – FRESH WATER AQUACULTURE
(CBCS with effect from 2019-2020)

Time : 3 hours

Maximum : 80

Marks

PART – A

Answer any **FOUR** questions. Each question carries 5 marks.

(Marks : 4x5=20)

1. Carp fishes
2. Breathing fishes
3. Types of Hatcheries
4. Larval rearing
5. Pearl producing molluscs
6. Water quality management
7. Egg laying fishes
8. Aquarium fish diseases

PART – B
(4X15=60)

Answer **ALL** questions. Each question carries 15 marks

9. (a) Discuss in detail the culture of Indian major carps.
(OR)
(b) Describe the culture of different exotic carps in detail
10. (a) Discuss in detail about Hypophysation of major carps in detail
(OR)
(b) Explain in detail the breeding and hatchery management along with larval rearing
11. (a) Write a detailed account on fresh water prawn culture
(OR)
(b) Discuss in detail on fresh water pearl culture in India and also in the world
12. (a) Write a detailed note on identification of commercial ornamental fishes and its Biology
(OR)
(b) Discuss in detail the preparation of supplementary feeds and mass production of ornamental fishes.

AUDIT COURSE: AQC 206: HUMAN VALUES AND PROFESSIONAL ETHICS – II
COURSE OBJECTIVE

To enable the students to

1. Associate the term value education, self-introspection and self – esteem which or the core aspiration of all human beings.
2. Understand the importance of ethics in different fields like medical business, environment and social ethics and ethics of media
3. Apply the knowledge to assess issues and problems in each profession in each profession and correlate the concepts in addressing the thical issues while choosing and joining a profession.
4. Develop all round and well balanced personality of the students and shapes them to become morally finer, socially responsible and physically fit persons of the society.

AUDIT COURSE: AQC 206: Human values and Professional Ethics – II

UNIT – I

Value Education – Definition – relevance to present day – Concept of Human Values – self introspection – Self-esteem. Family values – Components, structure and responsibilities of family – Neutralization of anger – Adjustability – Threats of family life – Status of Women in family and society – Caring for needy and elderly Time allotment for sharing ideas and concerns.

UNIT – II

Medical ethics – Views of Charaka, Sushruta and Hippocrates on moral responsibility of medical practitioners. Code of ethics for medical and healthcare professional. Euthanasia, Ethical obligation to animals, Ethical issues in relation to health care professionals and patients. Social justice in health care, human cloning, problems of abortion. Ethical issues in genetic engineering and Ethical issues raised by new biological technology or knowledge.

UNIT – III

Business ethics – Ethical standards of business – Immoral and illegal practices and their solutions. Characteristics of ethical problems in management, ethical theories, causes of unethical behavior, ethical abuses and work ethics.

UNIT – IV

Environmental ethics – Ethical theory, man and nature – Ecological crisis, Pest control, Pollution and waste, Climate change, Energy and population, Justice and environmental health.

UNIT – V

Social ethics – Organ trade, Human trafficking, Human rights violation and social disparities, Feminist ethics, Surrogacy/Pregnancy. Ethics of media – Impact of Newspapers, Television, Movies and Internet.

Books for study:

1. John S Mackenjie: A manual of ethics.
2. “The Ethics of Management” by Larue Tone Hosmer, Richard D. Irwin Inc.
3. “Management Ethics – integrity at work” by Joseph A. Petrick and John F. Quinn, Response Books: New Delhi.
4. “Ethics in Management” by S.A. Sherlekar, Himalaya Publishing House.
5. Harold H. Titus: Ethics for Today
6. Maitra, S.K: Hindu Ethics
7. William Lilly: Introduction to Ethics
8. Sinha: A Manual of Ethics
9. Manu: Manava Dharma Sastra or the Institute of Manu: Comprising the Indian System of Duties: Religious and Civil (ed) G.C.Haughton.
10. Susruta Samhita: Tr.Kaviraj Kunjanlal, kunjralal Brishagratha, Chowkamba Sanskrit series, Vol I, II and III, Varnasi, Vol I OO, 16-20, 21 – 32 and 74- 77 only.
11. Caraka Samhita: Tr. Dr. Ram Karan Sarma and Vadya Bhagavan Dash, Chowkambha Sanskrit Series office, Varanasi, I, II, III Vol I PP 183 – 191.
12. Ethics, Theory and Contemporary Issues., Barbara Mackinnon, Wadsworth/ Thomson Learning, 2001.
13. Analyzing Moral Issues, Judith A. Boss, May fields Publishing Company, 1999.
14. An Introduction to Applied Ethics (Ed) John H.Piet and Ayodhya Prasad, Cosmo Publications.

15. Text Book of Intermediate First Year Ethics and Human Values, Board of Intermediate Education – Telugu Akademi, Hyderabad.

I.C Sharma Ethical Philosophy of India. Nagin & co Julundhar

COURSE OUT COMES

After completion of this course, students

CO1 Understand the Value education and Medical ethics

CO2 Acquire knowledge on Business ethics

CO3 Creating awareness on Environmental ethics

CO4 Knowledge on Social ethics

MODEL QUESTION PAPER

M.Sc. DEGREE EXAMINATION

Branch XV – Aquaculture

AQC- 206 - Paper –II – HUMAN VALUES AND PROFESSIONAL ETHICS- II

(CBCS with effect from 2019-2020)

Time : 3 hours

Maximum : 80

Marks

PART – A

Answer any **FOUR** questions. Each question carries 5 marks.

(Marks : 4x5=20)

1. Caring for Needy
2. Concept of Anger
3. Ethical Obligation to animals
4. Human Cloning
5. Work Ethics
6. Problems of Unethical behavior
7. Need for Environmental Health
8. Man and Nature
9. Surrogacy Pregnancy
10. Social Disparities

PART – B

(4X15=60)

Answer **ALL** questions. Each question carries 15 marks

11. (a) Define family Explain the structure of Family System in India
(OR)
(b).Critically examine the status of Women in Family in India
12. (a) Write a note on Social Justice in Health Care

(OR)

(b) What important ethics are to be followed by Medical Practitioners

13. (a) Write briefly on the ethical problems in Management

(OR)

(b) Write any one of the ethical theories of your choice

14. (a) What do you understand by Ecological crisis? What are its affects?

(OR)

(b) Examine the need and importance of Pest Control

15. (a) "Internet" has changed the behaviour of your'. Discuss.

(OR)

(b) Evaluate the impact of Newspapers on Indian Society

III – SEMESTER

CORE – THEORY- AQC 301: MICROBIOLOGY AND FISH PATHOLOGY

COURSE OBJECTIVE

To enable the students to

1. Understand the Principles and scope of Microbiology
2. Classify Microbiology and Fish Pathology
3. Summarize Food Microbiology, Organize Fish farming and public health techniques
4. Examine Diseases and Nutritional Deficiency diseases in Aquaculture

Semester – III

CORE THEORY AQC 301 : MICROBIOLOGY AND FISH PATHOLOGY

UNIT – I

1. **INTRODUCTION TO MICROBIOLOGY:** Scope and definition; major groups of microorganisms and their characteristics; classification and identification of microorganisms; fine structure, morphology and culture characteristics of bacteria and viruses.

UNIT – II

2. **SOIL AND AQUATIC MICROBIOLOGY:** Study of role of microorganisms in soil and water; soil and water probiotics and their importance.
3. **FOOD MICROBIOLOGY:** Role of microorganism's in preservation and spoilage of fishery products and food stuffs.

UNIT – III

10. **VIRAL AND BACTERIAL DISEASES IN FINFISH AND SHELLFISH:** Causes, symptoms, diagnosis, prophylactic and therapeutic measures.
5. **PROTOZOAN AND FUNGAL DISEASES:** Causes, Symptoms, diagnosis and preventive measures.

UNIT – IV

6.CRUSTACEAN AND HELMINTH PARASITES IN FISH:

Diseases caused by isopods and leachae; diseases caused by dactylogyrus and monocoelium; trematode larvae, nematodes and fish leeches – clinical picture, symptoms and prophylaxis. **Tumours in fish** – Epitheliomas and fibroepitheliomas, epithelioma papulosum; papillomas; adenomas; carcinomas; hepatoma and melanomasarcomas.

- 7.**NUTRITIONAL DEFICIENCY DISEASES:** Metabolic disturbances; vitamin deficiency; gastritis and enteritis; aflatoxins in feed.
11. **ENVIRONMENTAL STRESS DISEASES:** Lack of oxygen; gas bubble disease; pH; acidosis and alkalosis; intoxications; hydrocyanic acid, free chlorine, metals, phenol and temperature, disturbances.
12. Fish farming and public health; techniques of curative baths and mass injections.

SUGGESTED READING :

- David Freifelder. 1987. **Microbial Genetics**, Narosa Publishing House.
- Michael J. Pelczar, JR. E C. S. Chan & Noel R. Krieg : **Microbiology**, Tata McGraw Hill Edition. 5th Edition.

- Kabatza, Z. 1985. **Parasites and Diseases of Fish Cultured in the Tropics**. Taylor and Frances, London
- Van Duijn, C. 1973. **Diseases of Fishes**. London Life Books Ltd.
- Conroy, D. A. and Herman, R. L. 1968. **Text Book of Fish Diseases**. T.F.H. (Gt. Britain) Ltd.
- Das, M. K. And R. K. Das. 1997. **Fish and Prawn Diseases**, Inland Fisheries Society of India, Barrackpore.
- Chakrabarathi, N. M. 1995. **Diseases of Cultivable Fresh Water Fishes and Their Control**. Daya Publishing House, New Delhi.
- Ellis, Anthony E. (Edr.) 1995. **Fish and Shell Fish Pathology**. Daya Publishing House, New Delhi.

COURSE OUT COMES

After completion of this course, students

CO1 Understand the Characteristics of bacteria and viruses

CO2 Acquire knowledge on Aquatic Microbiology

CO3 Creating awareness on Diseases in finfish and shellfish

CO4 Knowledge on Parasites in fishes, Nutritional deficiency diseases and Environmental stress diseases

CO-PO MAPPING

MODEL QUESTION PAPER
M.Sc. DEGREE EXAMINATION
Branch XV – Aquaculture
AQC- 301 - Paper –I – MICROBIOLOGY AND FISH PATHOLOGY

(CBCS with effect from 2019-2020)

Time : 3 hours

Maximum : 80

Marks

PART – A

Answer any **FOUR** questions. Each question carries 5 marks.

(Marks : 4x5=20)

- Major groups of micro organisms

2. Viruses characteristics
3. Probiotics
4. Food Stuffs
5. Dactylogyresis
6. Tumores in fishes
7. Aflatoxins in feed
8. Mass injections

PART – B
(4X15=60)

Answer **ALL** questions. Each question carries 15 marks

9. (a) Define micro organisms and explain the classification and identification of micro organisms.
(OR)
(b) Discuss in detail the characterization of bacteria with details of its culture
10. (a) Illustrate the role micro organisms in soil and water its importance
(OR)
(b) Explain the role of micro organisms in preservation and spoilage of fish products.
11. (a) Illustrate the bacterial diseases in fish and Shell fishes
(OR)
(b) Discuss in detail the diagnosis and preventive measures of protozoan diseases in fishes
12. (a) Discuss in detail Helminth parasites in fishes?
(OR)
(b) Answer the following
 - i. Fish farming and public health
 - ii. Gas bubble disease
 - iii. Trematode larvae

CORE – THEORY AQC 302: FISH IMMUNOLOGY

COURSE OBJECTIVE

To enable the students to

1. Acquire knowledge on fish immunity
2. Understand the structure and functional aspects, Immunoglobulin
3. Know the principles and working application of Immuno diffusions
4. Comprehensive knowledge on Immunising fish

AQC 302 : FISH IMMUNOLOGY

UNIT – I

1. **IMMUNE SYSTEM IN FISH:** Innate & acquired immunity- Advanced, primitive and unique

features; specific and non-specific defence mechanisms.

- 2. LYMPHOID SYSTEM IN FISH :** Stem cells, thymus, spleen, head, kidney and other lymph glands; lymphocyte subpopulation in fish

UNIT – II

- 3. Antigen - Types - Heptanes, Ag - Ab interactions**
- 4. IMMUNOGLOBULIN:** IgM structure and functional aspects; other Igs; Ig mediated immunity; antibody diversity.
- 5. COMPLEMENT SYSTEM :** Classical & alternative

UNIT – III

- 6. NON IG MEDIATED HUMORAL IMMUNITY:** Antigrowth factors, antienzymes, lysins, complement (properdin path way); agglutinins and opsonins.
- 7. CRUSTACEAN IMMUNE SYSTEM**
- 8. CELL MEDIATED IMMUNITY:** MHS class I & II, allograft rejection; anaphylactic hypersensitivity; delayed type hypersensitivity, lymphokines. Antibody probes in diagnosis of fish diseases & immunodiagnostic kits.

UNIT – IV

- 9. IMMUNOTECHNOLOGY:** Immunodiffusions, immuno electrophoresis, radio immunoassay, ELISA, MLR, Hybridoma technique, immunoblotting.
- 10. CONCEPT OF IMMUNISING FISH:** Vaccines and immunostimulants in fish adjuvants; features of vaccine development; vaccine delivery systems; identification of disease problems and potential vaccines; case study describing vaccination for furunculosis; commercial considerations. Management of aquacultural practices through immunological approach.

SUGGESTED READINGS :

MODEL QUESTION PAPER
M.Sc. DEGREE EXAMINATION
Branch XV – Aquaculture
AQC- 302 - Paper –II – FISH IMMUNOLOGY

Time : 3 hours
Marks

Maximum : 80

PART – A

Answer any **FOUR** questions. Each question carries 5 marks.

(Marks : 4x5=20)

1. Acquired immunity
2. Lymph glands
3. Antigen
4. Antibody diversity
5. Antigrowth factors
6. Lymphokines
7. ELISA
8. Potential Vaccines

PART – B

(4X15=60)

Answer **ALL** questions. Each question carries 15 marks

9. (a) Discuss in detail specific and non specific defence mechanisms
(OR)
(b) Illustrate Lymphoid system in fish
10. (a) Write a detailed account on structure and functional aspects of immunoglobulin
(OR)
(b) Describe in detail classical and alternative complement system.
11. (a) Write a detailed account on Antigrowth factors and Antienzymes
(OR)
(b) Describe in detail crustaceans immune system
12. (a) Answer the following
 - i. Immunodiffusions
 - ii. Immunoblotting
 - iii. Radio immune assay(OR)
(b) Discuss in detail management of aqua cultural practices with reference to immunological approach

COURSE OBJECTIVE

To enable the students to

1. Understand the Principles and techniques of Microbiology
2. Classify and Identification of disease causing microbes.
3. Summarize chromosomes and Chromosomal banding techniques
4. Examine Diseases and Nutritional Deficiency diseases in Aquaculture

PRACTICALS

AQC 303: MICROBIOLOGY AND FISH DISEASES

1. Preparation and sterilization of microbial media.
2. Quantitative determination of microorganisms by dilution plate technique.
3. Staining methods of microorganisms.

4. Antibiotic sensitivity.
5. Isolation and characterization of intestinal pathogens.
6. Measurement of the size of the cell.
7. Collection and Preservation of Diseased Fish.
8. External & Internal examination of diseased finfish and shellfish.
9. Maceration and squash preparation of organs and microscopic observation.
10. Identification of disease causing microbes.
- 11 Identification of various diseases in finfish and shellfish
- 12 Preparation of chromosomes from gill epithelium
- 13 Observation of chromosomes from fish tissues.
- 14 Preparation of chromosomes from scale and fin epithelium.
- 15 Induction of ploidy variations in different tissues of fish.
- 16 Chromosomal banding techniques.
- 17 Observation of meiotic chromosomes from testis
- 18 Isolation of DNA from yeast.
- 19 Isolation of RNA from yeast.
- 20 Raising antibodies to fish antigen.
- 21 Immunoelectrophoresis.
22. Double immunodiffusion

After completion of this course, students

CO1 Understand the structure of prokaryotic and eukaryotic cells and cell organelles

CO2 Acquire knowledge on Chromosomes and Cell cycle

CO3 Creating awareness on Genetic rationale in fish breeding and physico chemical basis of heredity

CO4 Knowledge on Natural hybridization and cytogenetics of fishes

CO-PO MAPPING

CO4	1	1	2	1	1	1	1	1	3	3	1	1

H-High-3, M- Medium-2, L- Low-1

COURSE OBJECTIVE

To enable the students to

1. Understand the Principles and techniques of Immunology
2. Classify and Identification of RNA & DNA
3. Summarize chromosomes and Chromosomal banding techniques
4. Examine immuno techniques in Aquaculture

AQC304: CELLBIOLOGY, GENETICS AND IMMUNOLOGY

1. Preparation of chromosomes from gill epithelium
2. Observation of chromosomes from fish tissues.
3. Preparation of chromosomes from scale and fin epithelium.
4. Induction of ploidy variations in different tissues of fish.
5. Chromosomal banding techniques.

6. Observation of meiotic chromosomes from testis.
7. Isolation of DNA from yeast.
8. Isolation of RNA from yeast.
9. Raising antibodies to fish antigen.
10. Immunoelectrophoresis.
11. Double immunodiffusion

COURSE OUT COMES

To enable the students to

CO1 Understand the Immunity system in fish

CO2 Acquire knowledge on chromosome structure and functions

CO3 Creating awareness on Humoral immunity, Crustacean immune system and cell mediated immunity

CO4 Knowledge on Chromosomal banding techniques.

H-High-3, M- Medium-2, L- Low-1

GENERIC ELECTIVE – THEORY AQC 305: CELL BIOLOGY AND GENETICS

COURSE OBJECTIVE

To enable the students to

1. Acquire knowledge on physico-chemical basis of heredity
2. Understand the principles of genetic rationale in fish breeding
3. Acquire knowledge on Natural hybridization in fishes and Genetic diversity in fishes
4. Knowledge on sex chromosomes in fishes

AQC 305: CELL BIOLOGY AND GENETICS

UNIT – I

1. STRUCTURE OF PROKARYOTIC AND EUKARYOTIC CELLS: ultra-structure of animal cell; cell differentiation in animal cells. Structural organization of plasma membrane; membrane protein, cytoskeletal proteins; types of cell functions – transport of nutrients, osmosis and active transport.

2. CELL ORGANELLES: Organization and functions of endoplasmic reticulum, golgi complex, lysosomes, mitochondria, ribosomes, nucleus, and vacuoles.

UNIT – II

3. CHROMOSOMES: Structural organization, nucleosomes, chromonema, euchromatin, heterochromatin, centromere, kinetochore, telomeric organization.

4. Cell cycle, mitosis and meiosis; cell senescence and death.

UNIT – III

4. PRINCIPLES AND PHYSICO-CHEMICAL BASIS OF HEREDITY: Phenotype and genotype, chromosomal basis of heredity; Mendel's laws of inheritance, **mutations** – types of mutations, molecular basis of mutation and its importance, chemical and physical mutagens, site directed mutagenesis.

5. GENETIC RATIONALE IN FISH BREEDING: Random genetic drift, inbreeding, measures to prevent random genetic drift and inbreeding;

selective breeding programmes - selection of species and traits, choice of breeding strategy, methods of selection and evaluation of selection response, impacts of selective breeding programmes on aquaculture productivity.

UNIT – IV

7. Natural hybridization in fishes, consequences and evolutionary impacts of hybridization; artificial hybridization – hybridization in Indian carps and Chinese carps. Genetic diversity in fishes – natural genetic variation in fishes, stock concept, measuring genetic variation, importance of genetic diversity; threats to fish genetic diversity – fishing pressure, physical modification of habitat and pollution load, introduction of exotic fishes; genetic management of natural fish populations – goals and tasks and conservation approaches.

8. **CYTOGENETICS OF FISHES** : Chromosome preparation, staining of chromosomes, chromosome banding techniques (NOR banding, C-banding, G and R banding, Fluorescence *insitu* hybridization), trends in karyotype evolution, sex chromosomes in fishes.

SUGGESTED READING :

MODEL QUESTION PAPER
M.Sc. DEGREE EXAMINATION
Branch XV – Aquaculture
AQC- 305 - Paper –III – CELL BIOLOGY AND GENETICS

(CBCS with effect from 2019-2020)

Time : 3 hours
Marks

Maximum : 80

PART – A

Answer any **FOUR** questions. Each question carries 5 marks.

(Marks : 4x5=20)

1. Active Transport
2. Ribosomes
3. Mitosis and Meiosis
4. Cell senescence
5. Phenotype and Genotype
6. Genetic Drift
7. Sex Chromosomes in fishes
8. Mendel's laws of inheritance

PART – B
(4X15=60)

Answer **ALL** questions. Each question carries 15 marks

9. (a) Explain Structural organization of plasma membrane
(OR)
(b). Write a note on structure and functions of mitochondria
10. (a) Explain the events involved in cell cycle
(OR)
(b) Discuss in detail the structural organization of chromosomes.
11. (a) What is mutation? Explain molecular mechanisms of mutation
(OR)
(b) Explain in detail the selective breeding procedures in aquaculture
12. (a) Explain the genetic biodiversity in fishes
(OR)
(b) Write a note on types of chromosomal banding techniques.

COURSE OBJECTIVE

To enable the students to

5. Understand bioinformatics applications in aquaculture
6. Acquire knowledge on application of genetic maps
7. Comprehensive knowledge on automated tools for phylogenetics analysis
8. Understand applications of microarray technology

AQC 305 B: BIOINFORMATICS IN AQUACULTURE

UNIT - I

1. BIOINFORMATICS AN OVERVIEW: Definition and objectives of bioinformatics, major bioinformatics databases, data integration and data analysis, molecular biology and bioinformatics, central dogma of molecular biology, important definitions related to central dogma and overview of bioinformatics applications.

2. INFORMATION SEARCH AND DATA RETRIEVAL: Introduction, tools for web search, data retrieval tools, data mining of biological data bases.

UNIT – II

3. GENOME ANALYSIS AND GENE MAPPING: Genome analysis, gene mapping, sequence assembly problem, genetic mapping and linkage analysis, physical maps, cloning the entire genome, genome sequencing, applications of genetic maps.

4. TOOLS FOR SIMILARITY SEARCH AND SEQUENCE ALIGNMENT: Fasta, Blast, Filtering and gapped BLAST, PSI – BLAST, Comparison of running time for various programmes.

UNIT – III

5. ALIGNMENT OF PAIRS OF SEQUENCES: Introduction, biological motivation of alignment problems, methods of sequence alignments, using scoring matrices, measuring sequence detection efficiency.

6. ALIGNMENT OF MULTIPLE SEQUENCES : Introduction, methods of multiple sequence alignment, evaluating multiple alignments; phylogenetic analysis – methods of phylogenetic analysis, tree evaluation, problems in phylogenetic analysis, automated tools for phylogenetic analysis.

UNIT – IV

7. GENE IDENTIFICATION AND PREDICTION: Introduction, basis of gene prediction, pattern recognition, gene prediction methods, other gene prediction tools.

8. GENE EXPRESSION AND MICROARRAYS: Introduction, working with DNA microarrays, clustering gene expression profiles, data sources and tools for microarray analysis

applications of microarray technology.

9. GENERAL APPLICATIONS OF BIOINFORMATICS IN AQUACULTURE.

3. Linkage analysis
4. Fasta
5. BLAST
6. Phylogenetic analysis
7. Microarray analysis
8. Data mining

PART – B

(4X15=60)

Answer **ALL** questions. Each question carries 15 marks

9. (a) Explain major bioinformatics databases
(OR)
(b).Write a note on Central dogma of molecular biology
10. (a) Explain the Genetic mapping and linkage analysis
(OR)
(b)Discuss in detail the Tools for similarity search and sequence alignment
11. (a) Describe the methods of sequence alignment using scoring matrices
(OR)
(b) Explain in detail the methods of multiple sequence alignment
12. (a) Discuss the problems in phylogenetic analysis
(OR)
(b) Write a note on General applications of Bioinformatics in aquaculture

COURSE OBJECTIVE

To enable the students to

1. Understand the concepts of Fishery Economics
2. Describe the role and responsibilities of marketing
3. Knowledge on Finance of Aquaculture
4. Knowledge on utility on remote sensing techniques for the identification of suitable grounds for aquaculture

AQC 306: FISHERY ECONOMICS, EXTENSION AND ENVIRONMENTAL MANAGEMENT

UNIT – I

AQUACULTURE ECONOMICS : Production economics – definition of economics and application of economic principles to aquaculture; the input-output relationship; maximum level of input; least-cost combination of inputs; maximum level of output; combination of products; economics of size; partial budget analysis.

MARKET ECONOMICS: Basic concepts in demand and price analysis; supply and demand for fish; elasticity of demand (price elasticity of demand, income elasticity of demand, cross elasticity of demand).

UNIT – II

ECONOMICS AND FINANCING OF AQUACULTURE :

Economic viability; assets and liabilities; cost-return analysis; production costs-variable and fixed costs; operating income; evaluation of farm performance; sensitivity analysis; minimum farm size; gross revenue.

Economic feasibility of investment analysis; methods of feasibility analysis – the payback method, net present value method, average rate of return, discounting method; benefit – cost ratio; internal rate of return; cash flow analysis; socio-economic analysis; risk and insurance.

Economics of carp, prawn and shrimp breeding farms and production farms. Role of banks, central organizations and other funding agencies in the growth and development of aquaculture.

UNIT – III

FARM MANAGEMENT: Concepts of economic principles of farm management; application of farm management principles in aquaculture.

MARKETING : Economics of fish markets; marketing and resource management; co-operatives and their importance in fish production and marketing; export oriented growth policies; fisheries projects and fish resources; institutional and management issues; planning and financing schemes for fisheries; legal and environmental issues.

FISHERIES EXTENSION: Extension education-objectives and principles; role of extension in community development; rural development strategies – programmes for weaker sections of the community; fisheries as a tool in rural development; extension strategies and methodologies; employment generation.

UNIT – IV

REMOTE SENSING: Utility of remote sensing techniques for the identification of suitable grounds for aquaculture and for obtaining data on geographical information system (GIS); role of remote sensing in the assessment of aquatic pollution.

ASSESSMENT OF ENVIRONMENTAL HAZARDS AND IMPACTS OF AQUACULTURE :

Concept of clean environment; impact of fish farming on the aquatic ecosystem; impact of fish farming on socio-economic and socio cultural environment; effects of aquatic pollution on fish farming; environmental impact assessment studies (EIA); ecofriendly technologies in aquaculture.

SUGGESTED READING :

MODEL QUESTION PAPER M.Sc. DEGREE EXAMINATION

Branch XV – Aquaculture

AQC- 306 - Paper –IV – FISHERY ECONOMICS, EXTENSION AND ENVIRONMENTAL MANAGEMENT (CBCS with effect from 2019-2020)

Time : 3 hours

Maximum : 80

Marks

PART – A

Answer any **FOUR** questions. Each question carries 5 marks.

(Marks : 4x5=20)

1. Aquatic ecosystem
2. Export policies
3. Input output relationship
4. Coast – return analysis

5. GIS
6. Community development
7. Price elasticity of demand
8. Risk and insurance

PART – B
(4X15=60)

Answer **ALL** questions. Each question carries 15 marks

9. (a) Give an account on the input – output relationship in Aquaculture
(OR)
(b) Give a detailed account on market economics in relation to supply and demand for fish
10. (a) Describe the economics of prawn and shrimp breeding farms
(OR)
(b) Give an account on the role of banks in the growth and development of aquaculture
11. (a) Describe the fisheries as a tool in rural development
(OR)
(b) Describe the planning and financing schemes for the development of fisheries
12. (a) What is the role of remote sensing in the assessment of aquatic pollution
(OR)
(b) Describe the eco friendly technologies used in aquaculture

AQC- 307: OPEN ELECTIVE – THEORY- COASTAL AQUACULTURE

Course Objectives

To enable the students to:

COURSE OBJECTIVE

1. Understand seed collections from natural resources
2. Acquire knowledge on Crab culture and Lobster culture
3. Understand the methods of Double cropping
4. Comprehension knowledge on Oysters, pearl oysters and mussels

AQC- 307: COASTAL AQUACULTURE

UNIT – I

1.SHRIMP HATCHERY MANAGEMENT: Seed collection from natural resources, identification of post larval stages, brood stock management, breeding by eyestalk ablation, hatchery management, larval rearing of *Penaeus monodon*. Shrimp Culture Management: Culture of *P.vannamei* and *P.mondon*

2.CRAB CULTURE: Culture of *Scylla serrata*, *Scylla oceanica*, *Scylla tranquibarica*.

3.LOBSTER FISHERY: Distribution – biology of spiny lobster – abundance of spiny lobster - culture of spiny lobster – processing and preservation of lobsters.

UNIT – II

4.CRAY FISH CULTURE: Culture of *Procambarus clarkii* – pond culture methods – double cropping.

5.MOLLUSCAN CULTURE: Oysters, pearl oysters and mussels.

UNIT – III

6.SEAWEED CULTURE: Seaweed morphology, biology, reproduction, importance of seaweeds; culture of seaweeds.

7. MARINE AND BRACKISHWATER FISH CULTURE: Culture of *Lates calcarifer*, *Etroplus suratensis* and *Mugil cephalus*.

UNIT – IV

8. POST HARVEST TECHNOLOGY: Harvesting methods - drainable ponds, undrainable ponds, cage and raceway farms, handling and transport; principles and importance of fish preservation; preservation methods - traditional and advanced methods of fish preservation – sun drying, salt curing, pickling, smoking, chilling, freezing and canning.

9. PRESERVATION AND PROCESSING : Processing and preservation of fish products and byproducts – minced meat, FPC, fish meal, fish oils, fish hydrosate, fish sauce, fish glue; sanitation in processing plants and quality control of fresh and processed fish and fishery products; IQF shrimp Freezing.

SUGGESTED READING :

1. MPEDA, **Hand Book on Aquafarming**, Shrimps, lobsters, mudcrabs (1996).
2. Nandi, N. C. and S. K. Pramanik. 1994. **Crabs and crab Fisheries of Sundarban**. Hindustan Publishing Corporation.
3. Pillay, T. V. R. 1988. **Aquaculture, Principles and Practices**. Fishing News Books.
4. Piska, R. S. 1999. **Fisheries and Aquaculture**. Lahari Publications, Hyderabad.
5. Pandian, T. J. 2001. **Sustainable Indian Fisheries**. National Academy of Agricultural Sciences.
6. Sahoo, D. and S. Z. Qasim. 2002. **Sustainable Aquaculture**. APH Publishing Corporation, New Delhi – 110 002.
7. MPEDA – Hand Book on Aqua farming – **Fish Processing, Quality Control & Marketing**. 1995. Kochi, India.
8. Pillay, T. V. R. 1993. **Aquaculture: Principles and Practices**. Fishing News Books.

MODEL QUESTION PAPER
M.Sc. DEGREE EXAMINATION
Branch XV – Aquaculture
AQC- 307 - Paper – IV – COASTAL AQUACULTURE

(CBCS with effect from 2019-2020)

Time : 3 hours
Marks

Maximum : 80

PART – A

Answer any **FOUR** questions. Each question carries 5 marks.

(Marks : 4x5=20)

1. Eyestalk Ablation
2. Lobster culture

3. Cray Fish double cropping
4. Mussels
5. Sea weeds importance
6. Mugic Cephalus
7. Handling & transport of fish
8. Sanitation in Processing Plants

PART – B
(4X15=60)

Answer **ALL** questions. Each question carries 15 marks

9. (a) Describe the culture of P. Monodon
(OR)
(b) Give an account on the culture of Scylla Serrata
10. (a) Give an account on the culture of Procambarus Clarkii.
(OR)
(b) Describe the Culture of Edible Oysters
11. (a) Give an account on culture of Seaweeds
(OR)
(b) Describe the culture methods of Lates Calcariferous
12. (a) Give an account of Fish Preservation methods
(OR)
(b) Describe the different types of Fish products & By products.

COURSE OUT COMES

1. Understand the Shrimp hatchery management
2. Aquire knowledge on Crab culture, cray fish culture and Molluscan culture
3. Creating awareness on Seaweed culture
4. Knowledge on Post harvest technology

CO-PO MAPPING

POS COS	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12

CO4	2	3	1	1	3	2	1	1	1	1	1	1

H-High-3, M- Medium-2, L- Low-1

OPEN ELECTIVE - AQC 308: FISH PROCESSING TECHNOLOGY

COURSE OBJECTIVE

To enable the students to

1. Understand the Chemical composition of fish and shell fish
2. Know the principles and working application of fish preservations and package
3. Ac quire knowledge on different types of aquaculture freezers
4. Knowledge on processing of low cost fish and by products.

OPEN ELECTIVE - AQC 308: FISH PROCESSING TECHNOLOGY

UNIT-I

Chemical composition of fish and shellfish: moisture, protein, fat, carbohydrates, ash etc.

Microbiology of fresh and processed fish: Morphology of bacteria: growth and reproduction of bacteria: effect of environmental factors like temperature, pH, oxygen, moisture, etc.

UNIT-II

Common bacteria present in fish; identification and isolation. Bacteria of sanitary significance.

Handling of fish: spoilage of fish and shellfish; effect of temperature on fish spoilage, use of ice;

UNIT - III

Solid carbon dioxide and liquid nitrogen in fish preservations; containers for packaging and transportation of fish, handling on board fishing vessels and on shore; use of chemical preservatives and irradiation in extending shelf life of fish and shell fish.

Canning: Principles of canning; canning materials; handling and preparation of fish and shellfish for canning; spoilage of canned fish; chemical and microbiological spoilage and their prevention.

Curing: Salting of fish-principles and practices; pickling; smoked fish; spoilage of cured fish.

UNIT-IV

Freezing of fish: Techniques of freezing; different types of freezers; changes during freezing and storage of fish; effects of freezing on proteins, lipids and bacteria, spoilage of frozen fish and shellfish; denaturation of proteins, lipid hydrolysis; fat oxidation, protection of frozen fish; glazing and wrapping; use of anti-oxidants; thawing of frozen fish, double freezing of fish; storage, transportation and distribution of frozen fish, industrial methods of freezing fish and shellfish; production and freezing of fish fillets, minced meat and fish fingers.

Byproducts: processing of low cost fish, minced meat, fish oil, fish meal, fish sausages, isinglass, glue, fish silage, chitosan, chitin pearl essence, alginates, agar and corals.

Text Books:

1. R.R. Colwell (ed): *Biotechnology in Marine Science*, 1982.

4. Brandi, A.V.: *Fish catching methods of the World*, 3rd edition, Fishing News Books ltd. 1984.
5. Connel, J.J.: *Control of Fish Quality*, Fishing News Books Ltd., 1975.
6. Sanisburry, J.C.: *Commercial Fishing Methods*, Fishing News Books Ltd., 1971.

References:

1. *Connell J.J. : Advances in fish science and technology*, Fishing News Books Ltd., 1980.
2. *Nedelec C.: FAO catalogue of small scale fishing gear*, FAO (FNB)

COURSE OUT COMES

After completion of this course, students

CO1 Understand the Chemical composition of fish and shell fish

CO2 Acquire knowledge on Common bacteria present in fish

CO3 Creating awareness on fish preservation and packaging

CO4 Knowledge on Freeing of fish and by products

CO-PO MAPPING

POS COS	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO 10	PO11	PO12

MODEL QUESTION PAPER
M.Sc. DEGREE EXAMINATION
Branch XV – Aquaculture
THIRD SEMESTER - OPEN ELECTIVE
AQC: 308 – Paper IV (A) FISH PROCESSING TECHNOLOGY
(CBCS with effect from 2019-2020)

Time : 3 hours

Maximum : 80 Marks

PART – A

Answer any **FOUR** questions. Each question carries 5 marks.

(Marks : 4x5=20)

1. Moisture in shell fish
2. Microbiology of fresh fish
3. Bacteria in fish
4. Spoilage of fish
5. Fish preservation
6. Spoilage of canned fish
7. Types of freezers
8. Agar and corals

PART – B
(4X15=60)

Answer **ALL** questions. Each question carries 15 marks

9. (a) Discuss in detail the morphology, growth and reproduction of Bacteria in fishes.
(OR)
(b) Write an essay on the chemical composition of shell fishes
10. (a) Discuss in detail the identification and isolation of bacteria in fishes.
(OR)
(b) Write different aspects associated in Handling of fishes
11. (a) Write a detailed account on chemical preservative using in fishes
(OR)
(b) Write an essay on curing of fishes in detail
12. (a) Write an detailed note on freezing technique and different freezers for freezing fishes.
(OR)
(b) Write a detailed account on the by products of fishes and other marine products.

AQC 309: POLLUTION AND TOXICOLOGY

COURSE OBJECTIVE

To enable the students to

1. Acquire knowledge on methods of toxicity testing factors
2. Understand marine environment sewage pollution
3. Understand Heavy metal pollution
4. Verify Oil pollution ,biological impacts

UNIT-I

Marine Pollution-definition- role of GESAMP- major pollutant- sources, transport path, dynamics. Toxicology- lethal and sub lethal effects of pollutants to marine organisms bioconcentration, bioaccumulation and biomagnifications- methods of toxicity testing factors influencing toxicity- synergistic and antagonistic effects- role of microcosms and mesocosms.

UNIT II

Sewage pollution industrial, agricultural and domestic impact on marine environment, treatment methods. Detergents- composition- eutrophication and ecological significance- Plastics and Litter source and impact in the marine environment.

UNIT III

Heavy Metal pollution- sources, distribution, fate- analytical approaches; Pesticide pollution classification, sources, distribution, fate and ecological impacts with special reference to marine fishes, birds and mammals.

UNIT- IV

Oil Pollution- composition, sources, biological impacts on fishes, birds, mammals, . treatment techniques. Thermal pollution- sources - uses of waste heat role of biocides, chlorine ecological impacts. Radioactive pollution- sources (natural and artificial) biological effects of radiation.

Environmental monitoring methods for critical pollutants-objectives status limitations biological indicators - natural bioaccumulations (mussel watch water quality assessment. Use of analytical instruments AAS, ICP, GLC, Spectrofluorometer for analyzing Petroleum hydrocarbon, Pesticides, Heavy metals etc.

Text Books

1. Clark R.B 1992. Marine pollution 3rd edition Clarendon, Press Oxford.
2. Williams 1996. Introduction to Marine Pollution Control. John Wiley.
3. Michael J. Kennish 1994. Practical Handbook on Estuarine and Marine Pollution.

Reference Books

1. Johnston, R. (ed), 1976. Marine Pollution, Academic Press, London.
2. Goldberg, E. D. 1974. The Health of the oceans, UNESCO Press. Paris.
3. Park, P .K, Kester D.R., J.W. Deudall and B.H Ketchum, 1983. Wastes in the Ocean. Vols. 1 to 3. Wiley Interscience Publishers, New York.

COURSE OUT COMES

After completion of this course, students

CO1 Understand the Marine pollution

CO2 Acquire knowledge on Sewage pollution

CO3 Creating awareness on Heavy metal pollution

CO4 Knowledge on Oil pollution

MODEL QUESTION PAPER

M.Sc. DEGREE EXAMINATION

Branch XV – Aquaculture

AQC- 309 - Paper – IV – POLLUTION AND TOXICOLOGY

(CBCS with effect from 2019-2020)

Time : 3 hours
Marks

Maximum : 80

PART – A

Answer any **FOUR** questions. Each question carries 5 marks.

(Marks : 4x5=20)

1. Biomagnifications
2. Eutrophication
3. Pesticide pollution
4. Thermal pollution
5. GESAMP
6. Bioaccumulation
7. Microcosms
8. Detergents

PART – B

(4X15=60)

Answer **ALL** questions. Each question carries 15 marks

9. (a) Describe the sources dynamics of Marine pollution
(OR)
(b) Give an account on the lethal and sub lethal effects of pollutants to marine organisms
10. (a) Give an account on the Sewage pollution
(OR)
(b) Describe the Plastics and Litter source and impact in the marine environment
11. (a) Give an account on sources and distribution of heavy metal pollution
(OR)
(b) Describe the sources and composition of oil pollution
12. (a) Give an account on uses of waste heat role of biocides of thermal pollution
(OR)
(b) Describe the Environmental monitoring methods for critical pollutants

AQC310 : ENVIRONMENTAL MONITORING AND BIODETERIORATION

COURSE OBJECTIVE

To enable the students to

1. Understand limitations for monitoring critical pollutants

2. Know the role of biotechnology in environmental pollution
3. Acquire knowledge on Control of bio deterioration of wood and synthetic substances in the sea
4. Understand prospects of sustainable development and current environmental problems in India and their management.

AQC 310: ENVIRONMENTAL MONITORING AND BIODETERIORATION

UNIT-I

1. Global environmental monitoring methods: Status and objectives, limitations for monitoring critical pollutants.
2. Role of biotechnology in environmental pollution control: Indicator organisms, Test organisms, Monitoring organisms, Enzymes.

UNIT-II

3. Coastal developmental activities-environmental issues.
4. Micro and Macro fouling, corrosion of metals and alloys in the sea, effects of bio-fouling and bio deterioration on marine structures.

UNIT-III

5. Protection methods against corrosion and fouling; Application of biotechnology in controlling the bio deterioration of wood and synthetic substances in the sea.
5. Red tides: Cause character and effects on the organisms of Marine environment.

UNIT-IV

6. Current Environmental Issues: Current environmental problems in India and their management. Urban waste and health: recycle of water and use; role of garden, park and reservoirs in environmental protection.
7. Sustainable development: an international perspective; Retrospect and prospects of sustainable environmental development

8. Recycle of water

PART – B
(4X15=60)

Answer **ALL** questions. Each question carries 15 marks

9. (a) Describe the global environmental monitoring methods
(OR)
(b) Give an account on the limitations for monitoring critical pollutants
10. (a) Give an account on the roll of biotechnology in environmental pollution control
(OR)
(b) Describe the costal development activities
11. (a) Give an account on micro and macro fouling
(OR)
(b) Describe the corrosion of metals and alloys in the sea

12. (a) Give an account on application of biotechnology in controlling the bio deterioration

(OR)

(b) Describe the Environmental monitoring methods for critical pollutants

IV – SEMESTER

COURSE OBJECTIVE

To enable the students to

1. Understand structure and replication of DNA
2. Acquire knowledge on Hormonal manipulation of genetic sex
3. Comprehensive knowledge on techniques of analyzing the PCR in biotechnology and genetic engineering
4. Acquire knowledge on Bioactive compounds from marine organisms and Cryopreservation of gametes.

AQC 401 : AQUACULTURE BIOTECHNOLOGY

UNIT – I

1. Structure and replication of DNA: Principles of DNA isolation; DNA blotting
2. DNA : Transcription and translation

UNIT – II

3. CHROMOSOMAL ENGINEERING: Genome manipulation, polyploidy, gynogenesis, androgenesis, method of chromosomal manipulation, Induction of ploidy and evaluation.

Hormonal manipulation of genetic sex, strategy of sex reversal, management of hormone treatment, biological effects of sex reversal, integrated approach. Transgenic fish, candidate genes for transfer, making gene constructs, mechanism of gene transfer, characterization of transgenic fish, potential hazards and benefits.

UNIT – III

5. Recombinant DNA and gene cloning – cloning vectors for recombinant DNA, restriction enzymes for cloning, cloning in bacteria and eukaryotes, construction and screening of genomic and cDNA libraries.

6. Polymerase chain reaction and gene amplification - basic PCR and its modifications; applications of PCR in biotechnology and genetic engineering- DNA polymorphism, DNA fingerprinting, Nucleotide probes, mapping and gene sequencing: RAPD, RFLP. DNA bar-coding.

UNIT – IV

A) PHARMACOLOGY: Prospects – Bioactive compounds from marine organisms: Biomedical potential of marine natural products isolation and mode of action. Eicosonoids and related compounds from marine algae. Antitumour and cytotoxic compounds from marine organisms.

B) Cryopreservation of gametes: Implications of cryopreservation in Aquaculture. Bioremediation: Types of bioremediation and their importance; Role of Probiotics in Aquaculture.

MODEL QUESTION PAPER

M.Sc. DEGREE EXAMINATION

Branch XV – Aquaculture

AQC- 401 - Paper –I – AQUACULTURE BIOTECHNOLOGY

(CBCS with effect from 2019-2020)

Time : 3 hours

Maximum : 80 Marks

PART – A

Answer any **FOUR** questions. Each question carries 5 marks.

(Marks : 4x5=20)

1. DNA blotting
2. What is translation
3. Gynogenesis
4. Characteristics of transgenic Fish
5. C DNA libraries
6. DNA barcoding
7. Eicosonids
8. Probiotics in Aquaculture

PART – B

(4X15=60)

Answer **ALL** questions. Each question carries 15 marks

9. (a) Write a detailed note on the principles of DNA isolation
(OR)
(b).Explain the process involved in protein synthesis and compare it with prokaryotes and eukaryotes.
10. (a) Discuss in detail Genome manipulation
(OR)
(b)Define transgenic fish and discuss potential hazards and benefits.
11. (a) Write a detailed account on Recombinant DNA and gene cloning?
(OR)
(b) Discuss in detail DNA polymorphism and DNA fingerprinting.
12. (a) Write a detailed note on Bio active components from marine organisms
(OR)
(b)Discuss in detail types and importance of Bioremediation.

AQC 402: ESSENTIALS OF BIOCHEMISTRY
COURSE OBJECTIVE

To enable the students to

1. Acquire knowledge on structure and function of biomolecules
- 2.** Understand enzyme classification and their factors
3. Attain knowledge on vitamins and minerals
4. Understand bioenergetics models and energy budget

AQC 402: ESSENTIALS OF BIOCHEMISTRY

UNIT – I

1. BIOMOLECULES

A brief account of structure and function of protein, lipid and carbohydrate.

UNIT – II

2. ENZYMES

Nomenclature and classification; chemical nature of enzymes; coenzymes, properties of enzymes, factors affecting enzyme activity.

UNIT – III

3. METABOLISM

Interconversions of protein, lipid and carbohydrates; A general account of vitamins and minerals and their importance.

UNIT – IV

4. BIOENERGETICS

Definition and scope; bioenergetics model; structure of an energy budget; components of the energy budget – measurement of components; faecal losses – the absorption efficiency excretory losses– the assimilation efficiency; metabolic losses; effects of environmental

factors on metabolism – temperature, salinity, oxygen and other abiotic factors; examples of energy budgets.

COURSE OUT COMES

After completion of this course, students

- CO1 Understand the Biomolecules
 - CO2 Acquire knowledge on Enzymes
 - CO3 Creating awareness on Metabolism
 - CO4 Knowledge on Bioenergetics
- CO-PO MAPPING

POS COS	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
CO1	2	1	3	1	1	2	2	1	1	1	3	3
CO2	2	1	3	1	1	2	2	1	1	1	3	3

H-High-3, M- Medium-2, L- Low-1

MODEL QUESTION PAPER
M.Sc. DEGREE EXAMINATION
Branch XV – Aquaculture
AQC- 402 - Paper –II – ESSENTIAL OF BIOCHEMISTRY

(CBCS with effect from 2019-2020)

Time : 3 hours

Maximum : 80 Marks

PART – A

Answer any **FOUR** questions. Each question carries 5 marks.

(Marks : 4x5=20)

1. Types of carbohydrates
2. Note on proteins

3. Coenzymes
4. Role of enzymes
5. Role of minerals
6. β oxidation pathway
7. Energy budget
8. Examples of abiotic factors

PART – B
(4X15=60)

Answer **ALL** questions. Each question carries 15 marks

9. (a) Write a detailed account on structure and functions of proteins
(OR)
(b). Explain Lipids - Discuss its structure and functions in detail
10. (a) Describe in detail the nomenclature and classification of enzymes
(OR)
(b) Illustrate the chemical nature and properties of enzymes.
11. (a) Discuss in detail the metabolism of carbohydrates
(OR)
(b) Give a detailed account on the role of vitamins and minerals in
Metabolism
12. (a) Write a detailed note on environmental factors on metabolism
(OR)
(b) Define Bioenergetics and illustrate its model in detail

AQC 403: BIOTECHNOLOGY AND BIostatISTICS

1. DNA Electrophoresis.
2. Estimation of DNA by Diphenylamine reaction.
3. Determination RNA by orcinol method.
4. Separation of protein through Electrophoresis (PAGE).
5. Separation of eyestalk peptides through HPLC.
6. Absorption spectrum of DNA.
7. Calculation of mean, median mode.

8. Calculation of standard deviation and coefficient of variation.
9. Calculation of Correlation co-efficient.
10. Fitting of regression lines.
11. Application of F-test.
12. Diagrammatic representation of statistical data

COURSE OBJECTIVE

To enable the students to

1. Effective utilization of aquatic and land resource
2. Providing means of livelihood through commercial and industrial aquaculture.
3. Provide knowledge for sustainable aquaculture.
4. Provide the students on an field exposure to help them in understanding the Aquaculture practices.

AQC 404 : PROJECT WORK/ DISSERTATION

Each student will be under the guidance of a Faculty member and the students will put in 80 hours of field oriented research work which mainly consists of visiting to the field for sample collection and analyzing in the laboratory. Data collected is compiled and submitted as a dissertation to the Department. During Viva Voce the student has to present his work to the panel of examiners.

COURSE OUT COMES

After completion of this course, students

- CO1 Reproduce knowledge on aquaculture farming
- CO2 Acquire knowledge on culture and diseases identification
- CO3 Creating awareness on self – employment
- CO4 Knowledge on aquaculture by products

CO-PO MAPPING

POS COS	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO 10	PO11	PO12
CO1	3	3	3	3	3	3	3	3	3	3	3	3
CO2	3	3	3	3	3	3	3	3	3	3	3	3
CO3	3	3	3	3	3	3	3	3	3	3	3	3
CO4	3	3	3	3	3	3	3	3	3	3	3	3

AQC 405 : COMPUTER APPLICATIONS, INFORMATION TECHNOLOGY AND BIOSTATISTICS IN AQUACULTURE

COURSE OBJECTIVE

To enable the students to

1. Understand the classification of computers
2. Knowledge on computer application
3. Understand the scope of Biostatistics in aquaculture
4. Understand the statistical analysis in research

AQC 405 : COMPUTER APPLICATIONS, INFORMATION TECHNOLOGY AND BIOSTATISTICS IN AQUACULTURE

UNIT- I

1. INTRODUCTION TO COMPUTER

History of computers, classification of computers, computer generations; Input, output processing and storage devices – Floppy disk, hard disk, CD-ROM, DVD. Operating system – types of operating systems – MS DOS, WINDOWS; MS – ACCESS, FOXPRO.

UNIT- II

2. COMPUTER APPLICATIONS

Computer Graphics – graphic generation methods, uses of computer graphics, graphic forms; Internet access tools, Web searching, e-mail, File Transfer Protocol 9 FTP); Word processing and presentation software MS- WORD and MS- POWERPOINT, MS – EXCEL; Use of commonly available statistical packages, such as SPSS ANOVA etc.

UNIT – III

3. INTRODUCTION AND SCOPE OF BIOSTATISTICS

Definition and scope, collection, tabulation and presentation of data; measures of central tendency – mean, median and mode; measures of dispersion, mean deviation, standard deviation, co-efficient of variation; curve fitting; correlation and regression.

UNIT – IV

4. STATISTICAL ANALYSIS:

Normal probability distribution and its applications; students t- test; correlation coefficient; regression co-efficient; F-distribution; X^2 distribution; analysis of variance (ANOVA); Probit analysis.

SUGGESTED READINGS :

1. **Computers Today** by Suresh K. Basandra 1999. Published by Galgotia Publications, Pvt. Ltd., New Delhi.
2. **Microsoft Office**, by Setultz, 1997.
3. **Database Processing** by D. M. Kroenke, Galgotia Publications, 1990.
4. **Introduction to Biostatistics** – By Sokal-Rohlf (2nd Edn) Freeman International Editor 1973.
5. **Bio-Statistics – An introductory Text**-Goldstein, A The Macmillan Co., New York, 1971.
6. **Statistical Analysis in Biology** by Mather, K Chapman and Hall, London, 1972.
7. **Probit Analysis** by Finney, D. J. S. Chand & Co., Ltd., New Delhi.
8. **Biostatistics** by Lewis Alvin 1971. Affiliated East West Press Pvt., Ltd., New Delhi.
9. **Statistical methods in Biology** by Bailey Norman T. J. 1965. The English Language Book Society & The English University Press Ltd

COURSE OUT COMES

After completion of this course, students

CO1 Understand the Introduction to computer

CO2 Acquire knowledge on Computer applications
 CO3 Creating awareness on Introduction and scope of biostatistics
 CO4 Knowledge on statistical analysis
 CO-PO MAPPING

8. Probit analysis

PART – B

(4X15=60)

Answer **ALL** questions. Each question carries 15 marks

9. (a) Write an account on input, output processing and storage devices

(OR)

(b) Explain MS DOS and WINDOWS in detail.

10. (a) Discuss in detail the salient features of computer graphics and their applications

(OR)

(b) What are the advantages of SPSS and ANOVA in aquaculture

11. (a) Write an essay on measures of central tendency

(OR)

(b) Explain the correlation and regression in detail

12. (a) Describe the student t – test and add a note on regression co –

efficient

(OR)

(b) Give an account on F – distribution X^2 distribution.

THEORY: AQC 405: B AQUACULTURE ENGINEERING

COURSE OBJECTIVE

To enable the students to

1. To learn the basic aspects of successful farm designing for effective management and optimum yield
2. Students will learn about design and construction of Freshwater fish farm and brackish water shrimp farm
3. Students will get an understanding of design and construction of Fish hatchery and Shrimp hatchery
4. Students will get an understanding of design and construction of culture systems like Cages and Rafts, Pens and Enclosures, and Raceway Farms

UNIT – I

1. **Planning and Aquaculture Development:** Priorities, resources, technology, human resources, legal and environmental factors and organization of aquaculture.
2. **Selection of Sites for Aquaculture:** Criteria for site selection of fresh water and brackish water farms - land based and open water farms; quantity and quality of water, sources of pollution and conflicts.
3. **Farm/hatchery standards and bio-security measures:** Sanitary and Phyto-Sanitary (SPS) measures; Better Management Practices (BMP's)

UNIT – II

4. **Freshwater Fish Farm** - Design and construction: Layout of farm, size of the farm, division of the farm area; size, shape and depth of ponds; dike design, pond bottom and harvesting sump; water supply and drainage system of pond – pipes, sluice, monk, turn-down pipe; aerators and method of construction.
5. **Brackish water Shrimp Farm** - Design and construction: Layout designs, design of water management systems, design of water control structures, design of peripheral and internal dikes, water supply and drainage, method of construction.

UNIT – III

- 6 **Fish Hatchery** - Design, construction: Criteria for site selection of hatchery and nursery; Design and construction of Jar hatchery and Chinese hatchery system.
7. **Shrimp Hatchery** - Design and construction: Site selection and facilities required – maturation tanks, spawning tanks, larval rearing tanks, live food culture tanks, water storage and filtration

tank, aeration, seawater supply and piping system; Lay-out and construction.

UNIT – IV

8. **Cages and Rafts:** Design and construction.
9. **Pens and Enclosures:** Design and construction
- 10 **Raceway Farms:** Design and construction.

MODEL QUESTION PAPER
 M.Sc. DEGREE EXAMINATION
 Branch XV – Aquaculture
AQC- 405 B - Paper –II – AQUACULTURE ENGINEERING

(CBCS with effect from 2019-2020)

Time : 3 hours
Maximum : 80 Marks

PART – A

Answer any **FOUR** questions. Each question carries 5 marks.

(Marks : $4 \times 5 = 20$)

1. Layout of farm
2. Internal dikes
3. Jar hatchery
4. Spawning tanks
5. Filtration tank
6. Cages and Rafits
7. Raceway farms
8. Piping system

PART – B
($4 \times 15 = 60$)

Answer **ALL** questions. Each question carries 15 marks

9. (a) Write a detailed account on Design and construction of freshwater fish farm
(OR)
(b) Explain the drainage system of freshwater fish ponds
10. (a) Describe in detail the Design and construction of Brackish water shrimp farm
(OR)
(b) Illustrate the Design and construction of fish hatchery
11. (a) Discuss in detail the Design and construction of Shrimp hatchery
(OR)
(b) Give a detailed account on the seawater supply and piping system
12. (a) Write a detailed note on Design and construction of pens and enclosures
(OR)
(b) Define raceway farms

COURSE OBJECTIVE

To enable the students to

1. Understand the life cycle of important shell fishes
2. Know Induced maturation in *penaeus monodon* by eye stalk ablation
3. Knowledge on reproductive hormones in crustaceans
4. Understand health management hatcheries

AQC 406B: Fish Breeding and Hatchery Management

UNIT-I

Natural seed resources, site selection and collection methods. Life cycle of important shellfish (*Penaeus monodon*, *P. vannamei*, *Macrobrachium rosenbergii*, *Scylla serrata*, lobster, edible, oyster, pearl oyster, fresh water mussel, holothurians, sea horse, horse-shoe carb, *Sepia*, *Loligo*, cray fish etc.).

UNIT-II

Sexual maturity and breeding seasons of different species. Maturation stages of *Macrobrachium rosenbergii* and *Penaeus monodon*.

Induced maturation in *Penaeus monodon* by eye stalk ablation;

UNIT-III

Reproductive physiology. Reproductive hormones in crustaceans; Brood stock management of *Penaeus monodon*, *P. vannamei* and *Macrobrachium rosenbergii*.

UNIT-IV

Breeding and hatchery management of *Penaeus monodon* and *Macrobrachium rosenbergii*. Breeding and hatchery management of crabs and bivalves. Food and feeding of larval stages of important shellfishes. Health management in hatcheries.

REFERENCE BOOKS:

7. MPEDA – Hand Book on Aquafarming – **Fish Processing, Quality Control & Marketing** 1995. Kochi, India.

COURSE OUT COMES

After completion of this course, students

CO1. Understand the Natural seed resources

CO2.Acquire knowledge on Sexual maturity and breeding seasons of different species

CO3. Creating awareness on Reproductive physiology, Reproductive harmones in crustaceans

CO4. Knowledge on Breeding and hatchery management of penaeus monodon and Macrobrachium rosenbergii

Branch XV – Aquaculture

AQC 406B: Fish Breeding and Hatchery Management

(CBCS with effect from 2019-2020)

Time : 3 hours

Maximum : 80 Marks

PART – A

Answer any **FOUR** questions. Each question carries 5 marks.

(Marks : 4x5=20)

1. Layout of farm
2. Internal dikes
3. Jar hatchery
4. Spawning tanks
5. Filtration tank
6. Cages and Rafits
7. Raceway farms
8. Piping system

PART – B

(4X15=60)

Answer **ALL** questions. Each question carries 15 marks

9. (a) Write a detailed account on Design and construction of freshwater fish farm
(OR)
(b).Explain the drainage system of freshwater fish ponds
10. (a) Describe in detail the Design and construction of Brackish water shrimp farm
(OR)
(b)Illustrate the Designer and construction of fish hatchery
11. (a) Discuss in detail the Design and construction of Shrimp hatchery
(OR)
(b)Give a detailed account on the seawater supply and piping system
12. (a) Write a detailed note on Design and construction of pens and enclosuers
(OR)
(b) Define raceway farms

COURSE OBJECTIVE

To enable the students to

1. Acquire knowledge on dynamics of lentic and lotic environments
2. Understand classification of planktons
3. Know aquatic plants
4. Understand artificial enrichment

AQC 407: LIMNOLOGY

UNIT-I

Introduction to limnology: inland water types, their identities and distribution; ponds and lakes; streams and rivers; dynamics of lentic and lotic environments.

Lakes - their origin and diversity. Famous lakes of the world and India; nature of lake environment; morphometry, physical and chemical conditions and related phenomena;

UNIT-II

Biological relations: influence of physical and chemical conditions on living

organisms in inland waters. Plankton: planktonic organisms; classification of plankton; Distribution of plankton: geographic, vertical, horizontal and seasonal distribution of phytoplankton and zooplankton: seasonal changes of body form in planktonic organisms; food of planktonic organisms. Primary productivity;

UNIT-III

Aquatic plants: character, classification, zonation, seasonal relations, quantity produced chemical composition distribution in different waters, limnological role.

Nekton: composition, distribution, movements.

Benthos: classification; periphyton; zonation; distribution; movements and migration; seasonal changes in benthos, profundal bottom fauna.

UNIT-IV

Biological productivity: circulation of food material; classification of lakes based on productivity; laws of minimum; biotic potential and environmental resistance; quantitative relationships in a standing crop; trophic dynamics; successional phenomena; indices of productivity of lakes; artificial enrichment.

Lotic environments: running waters in general; physical conditions; classification of lotic environments, biological conditions; productivity of lotic environments. influence of currents; plant growth; plankton; nekton; benthos; temporary and head waters streams; ecological succession.

12. (a) Describe the student t – test and add a note on regression co –

efficient

(OR)

(b) Give an account on F – distribution X^2 distribution.

AQC 408 A : GENERAL PRINCIPLES AND PRACTICES OF AQUACULTURE

COURSE OBJECTIVE

To enable the students to

1. Understand types of culture systems in aquaculture
2. Acquire knowledge on aquatic weeds
3. Understand induced breeding and seed fish production

4. Determined culture of Indian major carps

AQC 408 A : GENERAL PRINCIPLES AND PRACTICES OF AQUACULTURE

UNIT – I

1. Definition of Aquaculture: Types of culture, pond preparation and selection of culture.
2. Control of aquatic weeds and predators; management of fish ponds.

UNIT – II

3. Induced breeding and seed fish production in carps; transport of seed fish
4. Food and feeding in fish - live feed and artificial feeds.
5. Measurement of growth : Length - weight relationship; determination of growth hormones

UNIT – III

6. Culture of Indian major carps and air breathing fishes.
7. Culture of shrimp and prawn.
8. Integrated fish farming; aquarium fish and their maintenance.

UNIT – IV

9. Bacterial and viral diseases of fish - causes, symptoms diagnosis and control measures.
10. Protozoan and fungal diseases and their control.

SUGGESTED READINGS :

1. Santhanam, R. et.al. 1990. **A Manual of Fresh Water Aquaculture** Oxford & IBH Publ Ltd., New Delhi.

MODEL QUESTION PAPER

M.Sc. DEGREE EXAMINATION

Branch XV – Aquaculture

**AQC- 408 - Paper –IV – GENERAL PRINCIPLES AND PRACTICES OF
AQUACULTURE**

(CBCS with effect from 2019-2020)

Time : 3 hours

Maximum : 80 Marks

PART – A

Answer any **FOUR** questions. Each question carries 5 marks.

(Marks : 4x5=20)

1. Types of culture
2. Fish ponds
3. Transport of breeders
4. Artificial feeds
5. Air breathing fishes
6. Fish farming in India
7. Control measures of Bacterial diseases
8. Fungal diseases of fishes

PART – B
(4X15=60)

Answer **ALL** questions. Each question carries 15 marks

9. (a) Discuss in detail selection of species for culture
(OR)
(b)Discuss in detail control of aquatic weeds and predators.
10. (a) Describe the transport of seed fish and explain seed fish production seed fish production in carps
(OR)
(b) Discuss in detail:
 - i. Food and feeding in fish
 - ii. Growth hormones in fishes
11. (a) Discuss in detail culture of shrimp and prawn
(OR)
(b) Give a detailed account on aquarium fish and its maintenance
12. (a) Discuss in detail different viral diseases in fishes and its diagnosis
and control
(OR)
(b) Give a detailed account on protozoan diseases in fishes and its control measure.

AQC- 408 -B: ELECTIVE FOUNDATION – THEORY: ORNAMENTAL FISH CULTURE

COURSE OBJECTIVE

To enable the students to

1. Understand classification of ornamental fishes
2. Acquire knowledge on construction and setting up fresh water aquarium and it maintenance
3. Know diseases of aquarium fishes
4. Understand economic s of ornamental fish culture

AQC 408 - B : ORNAMENTAL FISH CULTURE

UNIT – I

1. Classification and characteristic features of common species of freshwater ornamental fishes.
2. Classification and characteristic features of common species of brackish water and marine ornamental fishes.

UNIT – II

3. Construction and setting up freshwater aquarium and its maintenance; aquarium plants.
4. Mass production of ornamental fishes – food and feeding habits, water quality maintenance, breeding and rearing.

UNIT – III

5. Bacterial and viral diseases of aquarium fishes – causes, symptoms and control.
6. Fungal, parasitic and nutritional deficiency diseases – causes, symptoms and control.

UNIT – IV

7. Setting up of an export oriented ornamental fish unit.
8. Economics of ornamental fish culture.

SUGGESTED READINGS :

1. V. K. Dey, 1986. **Ornamental Fishes**. MPEDA.
2. R. Santhanam. 1987. **A Manual of Freshwater Aquaculture**, Oxford X IBH.
3. V. Satyanarayana. 1996. **Fish culture**, Narendra Publishing House.
4. P. K. Talwar and A. G. Jhingran 1991. **Indian Fishes**, Oxford & IBH
5. Q. J. Shammi and S. Bhatnagar. 2002. **Applied Fisheries**, Agrobios (India)

COURSE OUT COMES

After completion of this course, students

CO1. Understand the Common species of fresh water ornamental fishes

CO2. Acquire knowledge on Mass production of ornamental fishes
